Swift, a bird so called from its rapid flight, is a native of Southern Asia, and comprises over 30 species. Two species are seen in Britain.

Swiss Guards were a special body of troops established in France in 1536 for the guarding of the Royal person. On the attack on the Tuilleries in 1792, the Swiss Guards stuck to their post until massacred. They were subsequently re-organised in 1815, but finally disbanded in 1830.

Swords, from 30 to 30 inches long, were used by the Romans. The most famous swords of the Middle Ages were those made of Damascus and Ferrara steel. The term is now applied to almost any long-edged bladed weapon.

Symphony, the title given to an orchestral composition of wide scope, and comprising five different movements—the introduction, allegro, andante, scherzo, and finale. The most famous composers of symphonies have been Beethoven, Handel, Haydn, and Mozart.

Syndicalism, a new labour movement which demands that industries shall be controlled by those who work them.

Synods, assemblies of heads or representatives of State and ecclesiastical for settling disputes relating to Church authority and government. The first National Synod in England was in 672 at Hertford, the last was held by Cardinal Pole in 1555. In Presbyterian churches a Synod is a court of Presbyteries.

T

Tabanus, the type genus, entomologically, of the Tabanidae; a familiar British variety is the Breeze-fly.

Tabard, a cloak or outer garment worn in medieval days by the peasantry. The name was also applied to a garment worn by knights over their armour.

Tabernacle, a place of worship; a sacred place; specifically in Hebrew history the Temple of Solomon. "Spurgeon's Tabernacle" in London, built for the famous Baptist preacher in 1861, is a familiar non-Jewish example of the application of the name.

Tael, a Chinese coin equal in value to 1½ oz. of pure silver; the Halkan customs tael is worth about 48.9d.

Taffety, a kind of silk fabric manufactured in England in the 16th century, and now generally applied to a mixed cloth of silk and wool.

Tailor Bird, a familiar bird in India and China, of an olive-green colour, and remarkable for its habit of constructing its nest of leaves, which it sews together.

Taipei Rebellion broke out in China in 1850, and was intended to overthrow the Manchurian dynasty. It was not suppressed until 1864, when, by the aid of General Gordon, the rebels were crushed.

Tai Mahal, the white marble mausoleum built at Agra by Shah Jahan in memory of his favourite wife. Over 20,000 men were occupied for over twenty years in its erection.

Talavera, Battle of, was fought on the 27th and 28th July, 1809, between the British and Spanish forces under Wellington, and a large French force under Victor and Sebastiani. It ended in complete defeat for the French.

Talc, a lustrous siliceous mineral found in foliated and granular masses, soft to the touch, and used as a substitute for chalk. Soapstone is a variety of talc.

Talent, an ancient denomination of coin or money value. In Palestine it was worth 3,000 shekels, or between £300 and £400. The Attic talent was of the value of about £200, the Roman great talent £90, the little talent £75.

Talisman, a charm, consisting of a magical figure, engraved under superstitious observance of the configuration of the heavens, to which wonderful potentiality for averting evil was anciently ascribed.

Tallage, in Norman times, were taxes levied by the Crown upon lands and tenements.

Tallow, the more solid portions of animal fat, and prepared from beef, mutton, and other fats by melting at a low temperature. Stearin is its chief constituent.

Tally Office, in the Exchequer, was the department of the Government in which tallies were kept, representing the acknowledgment of monies paid or lent; in 1834 the Houses of Parliament were burnt down through the overheating of a stove with discarded Exchequer tallies.

Talmud, the book containing the civil and canonical laws of the ancient Jews, comprising the Mishna, being a compilation from oral tradition, and the Gemara, which is a collection of criticisms and comments on the Mishna by eminent Jewish Rabbis. There are two Talmuds—the Jerusalem, compiled in the 4th or 6th century, and the Babylonish, collected in the 6th century.

Tamarind, a tree of great utility, of which there are two varieties, one peculiar to the West Indies, and the other to the East Indies. Its wood makes good building timber, its bark has tonic properties, its leaves yield a valuable dye, and its fruit is used in the making of sauces.

Tambourine, a light, small one-headed drum, formed of a ring or hoop of wood, or metal, with loose discs of metal let into the sides which jingle when shaken. In ancient times this instrument was called the timbrel. It is much played in Southern Europe as a dance accompaniment, and of late years has had a sort of revival in England, by its use by girls of the Salvation Army.

Tammany, a New York democratic organisation, sprang out of an old benevolent society named after an Indian chief, and has exerted a powerful influence over political movements in New York in recent times. The leaders of the organisation have in many instances used their power when their party has been successful at the polls in a manner which has brought down upon them the strongest condemnation of the supporters of pure municipal government. They have appointed their nominees to every prominent office, and have exacted bribes from contractors, saloon keepers, and others for concessions and privileges which they would not otherwise have obtained, and generally Tammany rule has meant wholesale corruption. Of this there is ample evidence in the disclosures of the Tweed and other Tammany frauds, and in the fact that the "Boss" for the time being usually contrives to make himself wealthy. Mr. Sulzer, Tammany Governor of New York State, was impeached for misuse of political funds in 1913.

Tanistry, a system of land tenure which once prevailed among the Celts, by which the succession devolved upon the member of the family whom the clan deemed most fitted for it.

Tannin, a substance obtained from a variety of plants

and trees, and from gall-nuts, and largely used in leather making.

Tanning, the process by which skins and hides are converted into leather. Tannin, or tannic acid, is the chief ingredient used, and this is obtained mainly from the bark of oak, hemlock, birch, beech, and other trees. The skins are steeped in baths or tanks of the tannic preparation for a considerable time, and in absorbing acid become gradually converted into leather.

Tantalum, a scarce metal occurring in very small quantities in combination with various rare minerals, such as tantalite, columbite, etc., associated with niobium.

Tapestry, a fabric largely used in former times for wall decoration and hangings. It was known to the ancient Greeks, but in its modern form came into prominence in the 15th and 16th centuries, when it was manufactured in a marked degree of excellence by the weavers of Flanders, especially those of Arras. The manufacture was introduced into England early in the 17th century, and was attended by considerable success. At the present day the term is applied to worsted cloths for furniture coverings, and there are also various kinds of tapestry carried now made. The most famous tapestries of olden times were the *Auvers* tapestry, and the *Savonnerie*. The Gobelins Tapestry factory, originated in Paris in the reign of Francis I., is still a national establishment. (See also *Bayeux Tapestry*.)

Tapioca, a food-substance yielded by the tuber of a tropical plant, poisonous in its raw state, but purified by roasting.

Tapir, a hoofed quadruped of hog-like form, having a flexible proboscis. It is a vegetable feeder, lives in the forest regions of South America, Sumatra and Borneo, and is of a dark brown color.

Tar is a dark viscid product obtained from the destructive distillation of wood, coal, peat, etc. The woods mainly used are of the pine family. The product of the distillation of wood is acid; that of coal is alkaline. In the course of distillation it yields light oil consisting of benzene and similar hydrocarbons; dead oil, comprising carbolic acid, aniline, naphthalene, etc.; and pitch, a leading ingredient in asphalts and black varnishes. From coal tar numerous dyes and other compounds are obtained.

Tarentula, a large hairy kind of spider common in some parts of Italy, and at one time thought to be poisonous. Music was supposed to be the only cure for its sting, which superstition gave rise to the Tarentula dance.

Targums, the name given to certain Chaldean paraphrases of portions of the Old Testament, probably of the 1st century. The most valuable of the Targums which have survived are those on the Pentateuch, ascribed to Onkelos, and Jonathan-ben-Uziel.

Tartan, a thin transparent muslin fabric used for light evening dresses or ornamentation.

Tarpaulin Rock at Rome received its name from the tradition that Tarpa, the daughter of the Governor of the Citadel who betrayed the fortress to the Sabines, was crushed to death by their shields and buried beneath the rock. It was the height whence persons guilty of treason were hurled to death.

Tarsus, the seven small bones constituting the ankle or instep, including the three metatarsal bones.

Tartan, the name given to a cloth of woollen or worsted plaid, formerly the distinctive material of the dress of the Scottish Highlanders, each clan having its own special tartan. Tartans are now an ordinary fabric for women's dresses everywhere. Of modern varieties there are silk and velvet tartans.

Tartar, a term used to denote a person of irascible temper, a vixen or shrew; to "catch a tartar" was to come into contact with such a one, or to encounter more than was bargained for.

Tartaric Acid, an organic acid of great value prepared from tartar deposited in wine vats during fermentation. The commercial tartaric acid is chiefly obtained from acid potassium tartrate (Argol), and is largely used in dyeing, calico printing, and in the manufacture of effervescent beverages. The purified sort is cream of tartar.

Tattersall's, a famous horse-market at Knightsbridge, originated by Richard Tattersall in 1770, and since carried on by his successors with success, the sale of thoroughbreds being the chief business.

Taurin, an organic substance existing in bile, and deriving its name from the fact that it was first discovered in the bile of the ox. It contains sulphur and nitrogen.

Taurus, the second constellation of the Zodiac, lying between Aries and Gemini, and including the Pleiades group and a smaller group, the Hyades, among which the star Aldebaran, of the first magnitude, appears.

Taverns were not known before the 13th century. In Edward III.'s time there were only three in London: "one in Chepe, one in Walbrook, and the other in Lombard Street."

Taximeter is an ingenious contrivance by which the strictly legal fare chargeable for a cab journey is indicated. It is only recently that it has been adopted on a large scale in London, although in Berlin and Paris it has been successfully working for many years. It is now in use extensively in this country both for motor cabs and ordinary cabs.

Taxia is a resinous substance obtained from the leaves of the yew-tree.

Tay Bridge spans the Tay at Dundee, is over two miles in length, and was opened for traffic on the 20th June, 1897. A previous bridge, completed in 1877, was blown down on the 28th December, 1879, as a railway train was passing over it, and upwards of eighty people perished.

Tea was introduced into England about the middle of the 17th century, when it was a great luxury, and fetched from £6 to £20 a pound. It is an Asiatic plant, native properly to China, Japan, and India. Up to about 1850 the greater portion of the tea imported into this country came from China; the bulk is now obtained from India and Ceylon, although China tea of good quality is again working its way into favour. Green tea and black tea differ by reason of the method of their drying and preparation for the market, the former being roasted after but a short exposure to the air, and the latter after a much longer exposure.

Teak, the wood of an Indian tree of great hardness and durability, largely used in shipbuilding.

Teal, a small fresh-water duck, of which two kinds, the Common Teal and the Garganey, occur in Britain. Other species—there are seventeen in all—are found in America and other countries.

Te Deum, the song of praise ("Te Deum laudamus"—"We praise Thee, O God"), is supposed to have been the composition of St. Ambrose in the 4th century. It is used in the services of the Roman Catholic and English churches.

Testators, a name given to the originators of the first English Temperance Society. The term arose from a quaint assertion of a Preston working man, when the question of partial or total abstinence was discussed. He declared that nothing but "te-te-to-tal" would do.

Telegraph. The first practical telegraphic instruments were invented by Gauss and Weber in 1833, and by Sir Charles Wheatstone in 1836, although the idea of using electricity for transmitting intelligible messages was first suggested towards the close of the 18th century. The Morse-Digney recording instrument, which is now most largely used, is a kind of clockwork arrangement in which the slight clicking sounds alone are sufficient to interpret the message, the letters being indicated by various combinations of dots and dashes. From 60 to 100 words per minute can be transmitted by this method. Of late years various systems of multiplex-telegraphy have been devised, by means of which many messages can be transmitted over the line at the same time. The principle of a code telegram was adopted by the House of Commons in 1889, but the Act did not come into operation until 1895. The most important and interesting of recent telegraphic developments have been in connection with wireless telegraphy, introduced by Signor Marconi. An arrangement came into force on January 1st, 1905,

whereby telegrams for transmission from wireless stations on the coasts to ships at sea are accepted at a charge of 10d. a word. An arrangement exists with Britain and the Marconi Co. for wireless stations in London, Egypt, Aden, Bangalore, Pretoria, and Singapore, linking all parts of the Empire. Since October, 1907, there has been wireless telegraphy between this country and America.

Telepathy supposes such a mental sympathy between persons as enables emotional influences to pass from one to another at a distance without external means and independently of the ordinary action of the senses.

Telephone, an instrument for producing sound at a distance over a conducting wire or cord by the agency of electricity, was invented by Graham Bell in 1875, although it is only in recent years that it has come into general use. It consists of a thin disc of iron vibrating in front of a magnet, surrounded by a coil of insulated copper wire which is connected with a similar coil at a distant station. By speaking into the mouthpiece of the telephone, currents of electricity are induced which are transmitted through the line, and thus sounds are reproduced. The National Telephone Company, which was an amalgamation of various companies, originally formed to develop the telephone industry of this country, was taken over by the General Post Office from January 1, 1912. There are International Telephone lines connecting England and Belgium and England and France, and experiments are being conducted with a view to further extending International telephonic communications. Telephone business is largely on the increase for business and other purposes in all our populous centres, and now that the Post Office authorities have assumed full control further developments may be looked for.

Telescope, an optical instrument for viewing objects at a distance, used largely in astronomy, originated in the early part of the 17th century, although its principle was described as far back as 1550 by Roger Bacon. It consists essentially of two members, one the objective, a large converging lens, or concave mirror, which forms an optical image of the object; the other, the eyepiece, which magnifies the image. The largest reflector in the world is that made by Alvan Clark for the Yerkes Observatory, Chicago. The diameter of the object glass in this instrument is 40 inches, and the length of the tube 75 feet.

Telescope Fly, a two-winged tropical insect, remarkable for the long projecting stalk upon which its eyes are placed.

Tellurium, a scarce element found in minute quantities in its native state and in combination with gold, silver, and other metals. It is a crystalline, brittle substance, resembling sulphur and selenium.

Temnograph, an instrument working by frictional motion governed by pendulous weights, and designed to plot on a scale accurately a section of the ground over which it passes.

Temperance Societies were originally started in the United States about 1826. The British and Foreign Temperance Society was established in 1831, and the London Temperance League in 1851.

Templars were soldier knights organised in the 11th century for the purpose of protecting pilgrims in their journeyings to and from Jerusalem, and obtained their name from having granted to them by Baldwin II., a temple for their accommodation. At first they were non-military, and wore neither crests nor helmets, but a long wide mantle and a red cross on the left shoulder. They were established in England about 1180. During the crusades they rendered valuable service, showing great bravery and devotion. In the 12th century they founded numerous religious houses in various parts of Europe and became possessed of considerable wealth. It was this that caused their downfall. Kings and Popes alike grew jealous of their influence, and they were subjected to much persecution, and Pope Clement V. abolished the Order in 1312. Edward II. in 1308 seized all the property of the English Templars. The English possessions of the Order were transferred to the Hospitallers of St. John, afterwards called the

Knights of Malta. The London Temple is on the site of the chief seat of the Order in this country.

Temple, a building dedicated to the worship of a deity or deities. Those built by the ancient Greeks, at Olympia, Athens, and Delphi, were the most famous. The Temple of Diana at Ephesus was another. The Temple of Solomon 1012 B.C. was destroyed by Titus A.D. 70.

Temple Bar, an historic gateway that until 1879 stood at the western entrance to Fleet Street, near the bottom of Chancery Lane. In olden times it was the custom to impale the heads of traitors over this gateway. Re-erected at Theobald's Park, Cheshunt.

Tempo, a musical expression referring to the pace at which a composition is to be played, and generally used in combination with a qualifying word, as "Tempo Ordinario," ordinary time.

Tenant Right is the right which a tenant has in unexhausted improvement introduced into land he is relinquishing, and applies both to permanent improvements and unexhausted crops.

Tench, a familiar fresh-water fish of the Carp family, averaging some three pounds in weight, and of a mingled green and olive colour.

Tenebrae (*darkness*), the title given to a solemn service peculiar to the Roman Catholic Church on Good Friday and two previous days, when all the lights, but one are extinguished.

Tenor, the part sung by the highest natural male voice. Its compass covers about two octaves, ranging upward from the first C and below the middle C.

Teraphim, the name used by the ancient Hebrews to designate certain household gods partly in human shape, and greatly revered.

Teredo, the scientific name of the ship-worm, which lodges itself when young in the bottom of ships, and bores its way outward, causing much injury. Modern ships, however, do not offer opportunities to the ship-worm, for even when of wood they are metal-sheathed.

Termite are white ants which abound in hot countries and live in colonies, their habitations being built upon mounds rising to a height of 12 or 15 feet, and constructed with a labyrinth series of galleries and chambers. A king and queen are at the head of a colony; the rest are neuter, the males being soldiers and the females workers.

Tern a species of sea-gull of elegant plumage, smaller than the ordinary gull. There are some sixty species, about a dozen of which are British.

Terra-Cotta, a kind of unglazed pottery, mostly of a red colour, largely used for building and garden decoration. Many terra-cotta examples of Greek statuettes and other objects have been discovered.

Terrapin, a kind of fresh-water tortoise common on the Atlantic coast of America, and greatly esteemed.

Terrier, the name applied to several breeds of hardy dogs ranging from the shaggy Skye to the old English black and tan. The class also includes the fox-terrier, the Maltese, the Boston, and the Yorkshire.

Territorial. The Territorial force of the British Army came into being from the 1st April, 1908, when the Volunteer Force and the Imperial Yeomanry were combined in the new organisation. This Second Line force is controlled by the various County Associations formed for this purpose, and is regional in character, each district recruiting one, and three of them two divisions each. There are Divisions, Mounted Brigades and Army Troops, with Artillery and Engineers for defended ports; and the equipment is on the latest modern lines, with wireless, cable and air-line, Telegraph companies, cyclist battalions, etc. In 1913 the Territorials numbered 265,807.

Tertiary Series, the third in order of the geological formations, comprising the three sub-groups of the Pliocene, Miocene, and Eocene divisions.

Test Act, passed in 1673, prescribed that all government officers, civil and military, should be compelled to receive the sacrament according to the forms of the Church. It was repealed in 1828.

Testator, a French and Scotch silver coin of the 16th century. There was also an English tester of the value of 1s., and later on one worth 6d.

Testudo, the name given to a military movement in use by the ancient Roman soldiers. It consisted of a

defensive screen formed by troops standing close together and massing their shields above their heads.

Tetradrachm, an ancient Grecian coin, of silver, equal to 4 drachmas.

Teutonic Order of German military knights, was founded in the Holy Land, at the end of the 12th century, for succouring the wounded of the Christian army before Acre. Returning to Germany, they established themselves on Prussian territory, but were dispersed in the 13th century by Jagellon, Duke of Lithuania. The Order continued to exist in a more or less weakened form, and in 1809 Napoleon I. ended its existence by confiscating its possessions.

Teutons, a German race that came into prominence in the 4th century B.C., and later invaded Gaul, but were defeated by Marcius 102 B.C. The name Teutons was afterwards applied to the German peoples generally.

Thaler, a German silver coin which has existed since the 16th century. That of the present day is worth about 3s. English. "Dollar" is its derivative.

Thallium, a scarce metal, discovered by Sir William Crookes in 1861 from the refuse left after the distillation of selenium. It is found in iron and copper pyrites, and is employed in the manufacture of glass.

Thames, the principal river of England, rises in the Cotswold Hills, and passing through Wiltshire, Berkshire, and Oxfordshire, and pursuing its ever-broadening seaward course through Reading, Windsor, Richmond, London, Greenwich, and Gravesend. It is about 220 miles long, and at the Nore, where it joins the sea, is six miles wide. Commercially, it is the most important river of Great Britain.

Thane, a title of nobility used in Anglo-Saxon times, and in the reign of Athelstan was conferred upon any free man who possessed five hides of land, or had accomplished three sea voyages.

Thanet Beds, a term applied to certain strata of sand, constituting the base of the Tertiary, in the London Basin, and remarkable for its bottom layer of marine flints.

Thaumaturgy, a term used to express something miraculous or wonderful, the name being derived from Gregory Thaumaturgus, a Pontus bishop of the 3rd century, who claimed to have wrought many supernatural marvels.

Theatines, a religious Order established in Italy in the 16th century, for the purpose of repressing heresy. They bound themselves to poverty, and refrained from soliciting alms, though they did not refuse voluntary gifts. Some remnants of the Order still exist in Italy.

Theatres are buildings in which plays are performed. The theatres of the ancient Greeks and Romans were generally in circular form, with tiers of stone seats around them, and roofless. The first authorised theatre in England was that of Burbage, built in Shoreditch in 1574. Other theatres were erected at Bankside, in Southwark—the Globe, where some of Shakespeare's plays were first produced, and the Blackfriars. From 1642 to 1660 all London theatres were closed, but at the Restoration they were opened again, and for the first time women were allowed to appear on the stage, female parts having previously been played by young beardless men. At present there are over 50 theatres licensed by the Lord Chamberlain in London alone, affording accommodation for over 400,000 persons, and at which there is an average daily attendance of between 70,000 and 80,000.

Theism, belief in a personal Deity, and therefore applicable to all leading religions.

Thellusson Act, passed in 1800, marked an important change in the law regarding a testator's power of devising real property. Peter Isaac Thellusson, a wealthy London merchant, left the bulk of his property, over £600,000, to accumulate during the lives of his three sons and their sons, after which the accumulated fund was to go to the eldest male descendant. Mr. Thellusson died in 1797, and the publication of his will gave rise to so much censure that the Thellusson Act was passed, restraining testators thereafter from devising

property for accumulation for longer periods than 22 years after death.

Theobromine, an alkaloid substance found in the seeds or beans of the Cacao plant, and a chief constituent of the cocoa and chocolate of commerce. It is the alkaloid present in tea and coffee.

Theodolite, an instrument, used by surveyors, for measuring horizontal angles upon a circle.

Theosophists. The Theosophical Society, which has its headquarters in Madras, was founded by Mme. Blavatsky and Col. Olcott in 1875, in New York, and has now over 400 branches in different parts of the world. Its professed aims are (1) to form a nucleus of the universal brotherhood of humanity; (2) to encourage the study of comparative religion, philosophy and science; (3) to investigate the unexplained laws of nature and the powers latent in man. Among other things, theosophy claims to "restore to the world the science of the spirit," while its bond of union is "not the profession of a common belief but a common search and aspiration for Truth."

Therapeutics, the science which treats of the healing of diseases and the laws of health.

Thermite is the name of a mixture of granulated aluminium and oxide of iron in atomic proportions, and was developed by Dr. Hans Goldschmidt, of Essen Rulr. It is used with success for welding purposes. Thermite may be stirred with a red hot poker, thrown into the fire, or have melted cast iron poured over it without setting up any visible action; but, raised to a higher temperature, reaction ensues, and a heat a thousand degrees hotter than any furnace.

Thermo-Dynamics, a term first applied by Joule to designate that branch of physical science which treats of the relations of heat to work. What is called the first law of thermo-dynamics is thus stated by Clerk Maxwell: "when work is transformed into heat, or heat into work, the quantity of work is mechanically equivalent to the quantity of heat." The second law asserts "that heat tends to flow from a body of hotter temperature to one that is colder, and will not naturally flow in any other way."

Thermo-Electricity is the electrical current resulting from the heating or cooling of two or more dissimilar metals at the point of union.

Thermometer, an instrument by which the temperature of bodies is ascertained, was invented by Galileo, and developed by his pupil, in the early part of the 17th century. It consists of a glass tube with a very small bore, containing, in general, mercury or alcohol. This expands or contracts by variation in the temperature, and the state of the atmosphere, the body, liquid, or gas as the case may be, with regard to heat, is indicated by a scale on the surface of the tube. Various forms of thermometer are used for particular purposes. For further information and illustrative comparisons see p. 112.

Thick-Knee, a family of birds closely related to the plover. The only English species is the Norfolk plover.

Thieves' Vinegar was a concoction anciently made from rosemary tops, sage leaves, and other articles steeped in vinegar, and believed to be an antidote against the plague. The tradition was that certain thieves had plundered the dead without catching the infection during one of the historic visitations in England by reason of having drunk this infusion. In reality, however, it had no such quality.

Thirty-Nine Articles. (See *Articles*.)

"Thirty Tyrants" were a committee who ruled Athens, with absolute authority, from 404 to 403 B.C., when Thrasybulus overthrew them.

Thirty Years' War, between the Roman Catholics and Protestants in Germany, lasted from 1618 to 1648. The chief figures of this war were Wallenstein and Gustavus Adolphus.

Thistle, Order of. (See *Orders*.)

Thistlewood Conspiracy was headed by Arthur Thistlewood, who had been imprisoned previously for challenging Lord Sidmouth, and had for its object the overthrow of the Cabinet, and the assassination of the Ministry, on the occasion of George III.'s funeral in 1820. The plotters met in Cato Street, Tottenham Court Road, London, but

were betrayed and brought to trial, and Thistlewood and four more conspirators were hanged for treason.

Thomites, a fanatical organisation headed by a Cornish publican named Thom, who claimed to be Sir W. Courtenay, knight of Malta, and King of Jerusalem, who got up an agitation against the Poor Law Act in 1834. In the disturbances that took place Thom killed several people, he himself and eight others being slain by the military.

Thorium, a scarce metal of the nature of aluminium. It ignites below a red heat, and burns with great brilliancy.

Thorn Back, a fish of the ray or skate species, common in the British seas, and popular as food. It has a mottled skin, in which yellow and light and dark brown intermingle.

Thorough, the name given to the political policy of Strafford and Laud, in the reign of Charles I., when they attempted by a relentless system of tyranny against their opponents to dispose of all obstacles to the gaining of their ends.

Thorough Bass, a musical term applied to a voice part accompanied by numerals, showing the chord applicable to each note. The term also refers to the entire science of harmonic composition.

Thous, a kind of fox or small wolf—in some respects resembling a jackal—occurring in Africa and parts of Asia. It is of various colours, but mostly brindled, with dark stripes across the back.

Thrush, a well-known song bird, also known as the throats and the mavis. It is widely distributed over Europe, Asia, and South America. There are some hundred species, eight occurring in Britain.

Thugs were a secret organisation of Indian fanatical assassins. They strangled their victims, and buried their bodies with a consecrated pickaxe, and set upon one-third of their plunder to the goddess Kali. These assassins were difficult to suppress, but vigorous measures ultimately, after twenty years' effort, secured their extermination about 1830.

Thumb-Screw, an instrument of torture used in olden times to extort confessions from prisoners. It consisted of a frame of three upright bars, between which the thumb of the victim was inserted; then a screw was turned on with sufficient force to give intense pain without jeopardising life.

Thuro's Invasion was a wild escapade undertaken by Thurot, an Irish naval officer in the French service. He got together a small naval squadron, and landed at Carrickfergus with 3,000 men in February, 1766. After sacking the town he crossed to the Isle of Man, and there was engaged by Captain Elliot. Thurot (whose real name was O'Farrell) was killed and his little army captured.

Thursday, the 5th day of the week, named after Thor, the Scandinavian deity. To the ancient Romans Thursday was *Dies Jovis*, or Jupiter's day.

Thyrus, a staff carried by ancient Greece by the Bacchantes during their festivities. It was tipped with a pine-cone ornament and frequently appears in ancient sculptures.

Tiara was the name originally given to a head ornament worn by the ancient Persians. The name was afterwards applied to the Pope's Triple Crown. The tiara of the first French kings was a high round cap. At the present day any coronet or frontal head ornament is styled a tiara.

Tichborne Case, the longest trial ever known in English Courts, was begun on 23rd May, 1871, when Arthur Orton, claiming to be Sir Roger Tichborne, commenced proceedings to establish his right to the Tichborne estates, worth £24,000 a year, and lasted until the 6th March, 1872, having occupied 103 days—the claimant being non-suited and arrested on a charge of perjury. The claimant himself was under examination 22 days, and the speech of Sir John (afterwards Lord) Coleridge extended over 26 days. These proceedings cost the estate over £90,000. The claimant's trial for perjury and forgery was begun on the 23rd April, 1872, and lasted off and on until the 28th February, 1874, when Orton was sentenced to 14 years' imprisonment. He was released on ticket of leave in 1884, and some years later made a written confession of his guilt.

Tides, the periodical rise and fall of the waters of the ocean and its arms, are due to the attraction of the moon and sun. Newton was the first to give a general explanation of the phenomenon of the tides. He supposed the ocean to cover the whole earth, and to assume at each instant a figure of equilibrium, under the combined gravitational influence of earth, sun, and moon, thus making and controlling the tides.

Tiers Etat, the lowest of the three estates of the realm as reckoned in France—nobility, clergy, and tiers Etat—prior to the Revolution.

Tiger, a powerful carnivorous animal of the cat family, which occurs in India and certain other parts of Asia. Its skin is of a tawny yellow, relieved by black stripings of great beauty of formation. The tiger is hunted in India, and its ferocious disposition renders the sport both exciting and dangerous. The prey of the tiger includes buffaloes, antelopes, and occasionally human beings, though the man-eating tiger is the exception rather than the rule. Tigers attain a length of from 14 to 15 feet.

Tiger-Cat, though much smaller than the tiger, bears considerable resemblance to it in regard to its markings and general structure. It is found not only in India but in Java and South America. It preys on small game.

Tiles are slabs of baked clay, used for covering floors, roofs, passages, etc., and of various forms; they were used in ancient times and were often made of marble or enamelled earthenware. In modern times tiles have been largely used for decorative purposes, especially for fire-places, hearths, and floors, many beautiful designs having been produced.

"Times" (*The*) newspaper was founded in 1785, as "The London Daily Universal Register," and assumed its present title in 1788. Since 1803 the Walter family have been the chief proprietors and directors. On a reorganisation in 1903, Lord Northcliffe acquired a large proprietary share. The 40,000 number of *The Times* was issued on Sept. 10, 1912.

Tin, a well-known metal generally found in veins of rock, occurring in Cornwall and Devon, the Malay Archipelago, and Australia. It is a white metal, susceptible of being rolled to an extreme fineness, and forms one of the most useful alloys, being a component of Britannia metal, bell metal, bronze, pewter, etc.

Tin-Plate is tin-coated steel plate, largely used for domestic utensils, and other purposes. The chief centre of the trade in this country is South Wales.

Titanium, a scarce metal found in association with oxygen in rutile, anatase, and brookite, as well as with certain magnetic iron ores. It combines with nitrogen at a high temperature.

Tithes, an ecclesiastical tax consisting of a tenth part of the annual produce, known to the ancient Jews, and first imposed by Christian authorities in the 4th century, although not made compulsory in England before the 9th century. Tithes derived from land are termed "predial," those derived from cattle being styled "mixed," while others are personal. After the passing of the Tithes Commutation Act of 1836, tithes were gradually converted into rent charges, and to-day the old form of tithes exists only to a small degree.

Titles by Purchase. Titles cannot be bought—at least directly—in this country, but on the Continent it is different. A title of nobility from one of the German States costs £8,000, while that of baron of the empire may be obtained for the sum of £12,000. In Spain one may receive the Order of Charles III., of Isabella, or that of Merit, "your choice" for £250, the Cross of the Chevalier or any title of nobility for £1,000. At the Vatican the Orders of Pius IX., of Gregory, and of Silvester have been sold; the Commander's Orders for £280, that of Chevalier for £120, Gentlemen of the Cap and Sword for £120, Baron £1,800, Count £3,400.

Titmouse, a small but powerful bird of the woodpeckers and forsythids. There are over 90 species, six of which occur in Britain; the long-tailed titmouse being the most common. The other British varieties are

the great titmouse, the coal titmouse, the marsh titmouse, the blue titmouse, and the crested titmouse, whose names sufficiently describe their peculiarities. They feed on insects and larvae, and are found in North America and Asia as well as in Europe.

Tobacco is made from the leaves of various narcotic plants of the Nicotiana family, which contain a volatile oil and an alkaloid called nicotine. Tobacco is largely grown in America, Cuba, France, and other countries of a warm climate. It undergoes various processes of preparation. The leaves are first dried, then cut into small pieces, moistened and compressed, and in this form is known as cut or "shag" tobacco; when moistened with syrup or treacle and pressed into cakes, it is Cavendish; when twisted into string form, it is "twist" or "pigtail." For cigars the mid-ribs of the dry leaves are removed, and what is left is moistened and rolled into cylindrical shape. For snuff, the tobacco leaves are moistened and allowed to ferment, then dried, powdered and scented. The consumption of tobacco in the United Kingdom is over 9,500,000 lb. per annum, the amount paid for duty on the same aggregating over £17,000,000.

Toga, an outer robe worn by the ancient Romans, and corresponding to the pallium of the Greeks. It was white and made of wool, and was the distinctive garb of the Roman citizen.

Toleration Act was passed in 1689, to relieve Protestant dissenters from the more serious of the disabilities under which they had previously laboured.

Tolls, payments for privileges of passage, existed from very early times. They were first exacted in respect of ships passing up rivers, tolls being demanded on the Elbe in 1109. Tolls for land passage are said to have originated in England in 1269, toll-bars being erected at certain distances on the high-roads in the 17th century, where toll had to be paid for all vehicles passing to and fro. After about 1825 they began to disappear, but have lingered here and there on country roads down to very recent years. Tolls on London river bridges ceased in 1878-9.

Tomahawk, an axe-like weapon formerly in common use among the North American Indians, who showed great accuracy of aim in throwing it.

Ton, a weight of 20 cwt. avoirdupois, or 2,240 lb. In the United States the ton is an even 2,000 lb.

Tonic Sol-Fa system of musical notation, in which letters are substituted for notes, was invented about 1840 by Miss Glover, of Norwich, and afterwards developed with considerable success by the Rev. John Curwen. The Tonic Sol-Fa Association was founded in 1853, and the College in 1862.

Tonsure, the shaven part of the head of a Roman Catholic ecclesiastic, dates from the 5th or 6th century. In the Roman Catholic Church only a circle, or a crown, is shaved, while in the Greek Church the hair is wholly shaved off.

Topaz, a transparent mineral gem, being a silicate and fluoride of aluminium, and generally found in granitic rocks. Its usual colour is a variety of yellow, but it also occurs in pink and blue shades. The best kinds come from Brazil. It is also found in Scotland, Cornwall, Siberia, and the United States. A pure topaz has the brilliancy of a diamond.

Tope, a small kind of shark, sometimes called the dog-fish. It occurs in European waters; one species, which has a dark back, and is white underneath, is found in British seas.

Tories, a political party name which came into use about 1690. They supported the hereditary doctrine of divine right, were opposed to Dissenters, and were essentially members of the Court party. In later times they opposed the Reform Bill and held out for the maintenance of Church and State unimpaired. The word is still used to express a more rigid adherence to the older principles of Toryism than is implied in the word "Conservative."

Torpedoes. (See *NAVY*.)

Tort, a legal term specifying an actionable wrong, apart from mere breach of contract. Torts are classed as wrongful acts, such as trespass, libel, etc., and acts resulting in pecuniary loss, such as negligence, nuisance, etc.

Tortoises or Turtles are cold-blooded reptiles, four-footed, and encased in a strong shell protection, the shells of some species being of beautiful horny substance and design, in much demand for combs and ornamental work. It is the custom to designate the land species as tortoises and the aquatic kinds as turtles. The commercial tortoise-shell, however, is chiefly obtained from sea-turtles. Tortoises abound in all warm climates except Australia. The green turtle from which the celebrated soup is made is a marine reptile found chiefly in the Indian and Pacific Oceans.

Torture, as a form of punishment, was in use among the Romans, though only upon the persons of slaves. In the Middle Ages it was commonly resorted to, especially in connection with charges of heresy. It was held that torture would make a guilty person confess, but not an innocent one. It was not inflicted in England after 1640. As practised by the Spanish Inquisition it included a terrible variety of suffering, often being carried to the point of death.

Toucan, the name of a South American family of birds, remarkable for their huge bills, are brightly coloured, and often attain a length of from 6 to 8 inches. They live on fruit, are of arboreal habits, and nest in holes.

Touchstone, a kind of jasper called by the ancients "Lydian stone," of economic value in testing the quality of metal alloys, especially gold alloys. The testing process is very simple. The alloy is drawn across the broken surface of the Touchstone, and from the nature of the mark or streak it makes the quality of the alloy can be ascertained.

Turmaline, a mineral occurring in different colours in prismatic crystals, and remarkable for its action on light, it having the power of polarising light rays under certain conditions. It is a double silicate of aluminium, iron, and certain other metals, and occurs in Cornwall, Devon, South America, and Asia.

Tournaments were equestrian contests between military knights and others armed with lances, and prevailed through almost the whole period of the Middle Ages. They were introduced into England by the Normans.

Tower of London was a royal palace from the time of the Conqueror, who began the building of the White Tower in 1066. Later kings made considerable additions. From the 15th to the 18th centuries many princes and nobles were executed or imprisoned here, and here Henry VI., Edward V., and his brother were put to death. The Crown Jewels are kept at the Tower, and in the Armoury a fine collection of armour of various dates is preserved.

Towton, the Yorkshire village between Leeds and York, where, in 1461, Edward IV. defeated the Lancastrians and established his rule.

Transcendentalism, a term that came into use from about 1833 in reference to a religious movement, headed by Pusey, Keble, Newman, and other Oxford high churchmen, who published "Tracts for the Times," in which their views were set forth. Among other things, they advocated a higher degree of ceremonial in worship, and their enthusiasm put new activity into the Church, although the secession to Rome of some of their more prominent members showed the tendency of the movement.

Trafalgar, Battle of, was fought off Cape Trafalgar on the 21st October, 1805, between the British and the combined French and Spanish Fleets, the former under Nelson's command, consisting of twenty-seven vessels; the latter, under the command of Villeneuve, comprising eighteen French and fifteen Spanish men-of-war. The British destroyed, captured, or sunk nineteen of the enemy's ships, and a complete victory was gained, though at the cost of Nelson's life.

Tramways were first established in New York by John Francis Train about 1825, and the first English tramway was opened in 1865 at Birkenhead. The first London tramway was established at Bayswater, in 1861. It was not until after 1870, however, when an Act to facilitate the construction of tramways was passed, that any great extension of these roads took place. Between 1870 and 1880, 233 miles of tramways

were constructed in England and Wales. Up to this time the cars had been drawn by horses. A steam cable tramway was opened on Highgate Hill in 1884, and steam came to be largely employed during the next few years. In later years, however, electricity has gradually superseded other forms of motive power on tramways, and the result has been an enormous extension of this method of transit. In 1898 there were only 265 miles of tramways open within the United Kingdom, and in 1902 there were about 3,000 miles open. The capital expended is about 74 millions sterling, and the majority of the systems in running are electrified, and under municipal control both in London and the great provincial towns. The number of passengers carried exceed 2,743 millions per annum. Electric tramway development, however, is being considerably arrested by the extension of the motor-bus services.

Transcendentalism, a term applied to a system of philosophy which transcends ordinary experience. It originated in Germany, and had for its chief apostles Richter, Fichte, and Schelling. In America Emerson propounded transcendental theories.

Transsept, the portion of a church which extends across the interior between the nave and the choir. The terminal portions are called respectively the north and south transepts. Some of the older churches have two transepts.

Transmigration of Souls was a doctrine expounded by Pythagoras, and forms part of the Brahmin and Buddhist religions. The ancient Greeks termed it metempsychosis, and the theory is that after death the soul of a man passes into the body of some other man or animal.

Transubstantiation, a term which first came into recognised use in the controversy between Berengar and Lanfranc in the 11th century, indicating the supposed conversion of the bread and wine of the Eucharist into the body and blood of Christ, and called the doctrine of the "Real Presence."

Trappists, an austere monastic Order founded at La Trappe, in Normandy, in 1140. A new Order of Trappists was established by Rancé in 1662, after which the members of the Order were enjoined to silence, prayer, reading, and manual labour, and forbidden to study or to eat fish or drink wine. They were expelled from France when the Revolution broke out, and for a time were settled in Worcestershire, but in 1815 they removed to Mount Mellary, in Co. Waterford, Ireland, where they established a new community. There are to-day Trappist Monasteries in France, Belgium, Italy, Algeria, Ireland, and the United States.

"Travellers' Tree," the name given to a peculiar kind of tree which grows in Madagascar, its branches and leaves forming themselves into the shape of a peacock's tail. The leaves are several feet in length, and their stalks are full of water, which furnishes a refreshing drink to travellers.

Treadmill, a large cylindrical machine provided with a series of steps, and maintained in rotary motion by the pressure of men's weight. A rail is fixed outside the wheel, and to this the workers of the treadmill hold by their hands, while their feet are kept continually in motion from step to step, the weight of their bodies keeping the machinery revolving. It is at present used chiefly in prisons as a form of punishment.

Treasure-Trove, a legal term applying to money, plate, or bullion found hidden in the earth, or elsewhere, and for which there is no owner. The treasure legally belongs to the Crown, but it is the practice to reward the finder with the full value of the property on its being delivered up.

Treble, in music, is the highest part of vocal or instrumental music, as sung by soprano voices, or played by the violin or other instrument of high pitch.

Tree-Frog, a kind of frog very plentiful in South America and fairly representative in Europe, Asia, North America and Australia. The European kind is of a greenish colour, and while on the tree is difficult to distinguish from the foliage. It possesses feet of peculiar formation, with discs exuding a sticky

composition, which enables it to hold to trees and other objects with ease.

Trent, Council of, first sat in 1545, the last sitting being on the 25th of December, 1562. It was at this Council that, at the time of the Reformation, the general policy, principles, and dogmas of the Roman Catholic Church were authoritatively settled.

Triassic Formation is the lower division of the Mesozoic series of rocks, lying above the Permian and below the Jurassic series. The Triassic in Britain is sub-divided into Upper and Lower Trias, the former comprising marl and shale, and the Lower consisting chiefly of red sandstone. This formation does not give any special yield of fossil remains.

Tribunes, of the Romans, were first elected from the people in 494 B.C. At first there were only two, then the number was raised to five, and finally to ten. They held the power of *veto*, and their persons were regarded as sacred.

Tricolour, the flag of the French republic since 1793, consisting of three equal vertical bands of red, white, and blue.

Triennial Act, which fixed the duration of Parliament to three years, was passed by the Long Parliament in 1642. Charles II. repealed this Act, but it was re-enacted in 1664, to be repealed again in 1716 by the passing of the Septennial Act, which still remains in force.

Trigonometry, a department of mathematics dealing with angles and their functions in every form, and divided into two sections—plane trigonometry and spherical trigonometry.

Trimmer, a name that came into use in English politics in the latter part of the 17th century, being specially applied to the party headed by the Marquis of Halifax, who was charged with adapting himself to Whigs or Tories as occasion served.

Trimurti, the Hindu triad, Brahma, Vishnu, and Siva, symbolised as an entity. In the depictions of the Trimurti three distinct heads are represented, the theological unity combining Brahma, the creative power, Vishnu, the preserving element, and Siva, the destroying principle, in one supreme unification.

Trinity, the term applied to the Godhead, "three persons and one God," as it is expressed in the *Litany*—Father, Son, and Holy Ghost. The doctrine of the Trinity has general acceptance among Christian communities, and has been explained in different ways. One of the earliest statements of it is the Athanasian: "We worship one God in Trinity, and Trinity in unity; neither confounding the Persons, nor dividing the substance."

Trinity House, on Tower Hill, London, was incorporated in 1514 as an association for piloting ships, and has ever since been entrusted with various matters connected with the regulation of British navigation. Since 1854, the lighthouses of the country have been under its supervision.

Triple Alliance. There have been several Triple Alliances; among others that of England, Sweden, and the Netherlands against France in 1668; that of Great Britain, France, and the Netherlands in 1717 against Spain; and that of Germany, Austria, Italy, in 1882, against Russia and France.

Triptych, a picture, carving, or other representation, generally panelled, with two swing doors, by which it could be closed in; frequently used as an altar piece. Also a writing tablet in three parts, two of which folded over the one in the centre.

Trireme, an ancient vessel with three rows of oars, of great effectuality in early naval warfare. Mentioned by Thucydides. It was a long, narrow vessel propelled by 170 rowers. The Romans copied it from the Greeks, and used it with considerable advantage.

Trisagion ("thrice holy"), an ancient Jewish hymn, still regularly sung in the service of the Greek Church. A version of it—*Tersanctus*—also forms part of the Anglican Eucharistic service.

Trisula, a trident emblem of Siva, the destroying principle of the Hindu Trinity.

Triumvirate, a term used to denote a coalition of three persons in the exercise of supreme authority. The first Roman triumvirate was that of Pompey,

Julius Caesar and Crassus, 60 B.C.; the second was that of Mark Antony, Octavian and Lepidus, 43 B.C. There have been modern instances of office-holding by triumvirate, the most notable being that of Jefferson, Madison and Gallatin in America. The term is used also in respect of any trio or triad of persons or qualities.

Troglodyte, signifying "a cave-dweller"—a term used by several classic writers in speaking of prehistoric races who lived in caverns and excavations where they could be safe from the attacks of wild animals. Evidence of such existence have been found in many parts of Europe, and there are cave-dwellers to this day among certain Indian tribes of North America.

Trogon, a bird of the woodpecker family, famous for its long curved tail, extending to two feet or more. It is strictly a tropical bird, and is found in Central America, India, and Africa. The upper part of its plumage is of a rich golden green, while below it is of a bright crimson.

Trombone, a well-known brass musical instrument of the trumpet order, comprising three tubes, one of which fits into another and can be extended to and fro to produce the various notes. The tone of the trombone is rich, and it forms one of the most useful adjuncts of a modern orchestra or band.

Troop, as constituted in the British cavalry force, forms a body of 56 non-commissioned officers and men, commanded by a captain and two lieutenants. A squadron comprises two troops.

Trophies are memorials of victory, often consisting of arms or other spoils captured in battle. In modern times trophies have often taken the form of symbolic erections, but, generally, a trophy constituted an object or a group of objects taken from an enemy, or captured in the chase, such as arms, flags, etc.

Tropic-Bird, a long-tailed kind of sea-bird of white plumage, about the size of a pigeon.

Troubadours was the name given to the early Provençal poets, whose rhymes were chiefly devoted to chivalry and romance. They did much to cultivate the romantic sentiment in days when society was somewhat barbaric, and helped considerably in the formation of those unwritten codes of honour which served to mitigate the rudeness of medieval days. Their vogue was from the 11th to the 13th century, and they were chiefly of knightly rank. With the decline of chivalry their occupation was gone, and though minstrels of a commoner type continued to appear as troubadours for some time later, men of the true troubadour spirit no longer existed.

Trout, a fresh-water fish of the Salmonidae family, with dark spots, common in the lakes and rivers of Europe, and much esteemed by anglers.

Trouvère or **Trouveur** were medieval poets, of northern France, whose productions were of a more elaborate character—epics, romances, fables, and chansons de geste—than those of their contemporaries the Troubadours.

Truffles are a subterranean edible fungus much esteemed for seasoning purposes. There are many species, and they are found in considerable quantities in France, England, Italy, and other places. They are often met with under birch or oak trees, and prefer calcareous soils, but there are no positive indications on the surface to show where they are, and they are not to be cultivated. Hogs, and sometimes dogs, are used to scent them out, the former, by reason of their rooting propensities, being the most successful in the work.

Trumeau, an architectural term denoting a piece of wall, generally a central pillar or column between two openings, such as those of arched doorways. In niches of these trumeaux a sculptured figure was often placed in the churches of the mediæval period.

Trumpet, a very ancient wind musical instrument consisting of a single tube of brass or other metal, and in olden times used chiefly for military music, though now adopted in orchestral composition. Handel was fond of this instrument, and wrote some fine music for trumpet obligato.

Trunk-hose was the part of the hose which covered the trunk or body, and extended in bow form from

the waist to the middle of the thigh, enclosing the hips. In vogue in the 16th and 17th centuries.

Tsambo, the cereal product of Tibet, Tataray, and parts of China, from which the chief food of the people is made.

Tschefkinite, a mineral of velvet-black colour found in certain parts of Russia, named after General Tschefkin. It is a silicate whose exact constituents are unknown.

Tsetse, an African dipterous fly of considerable size, whose bite is poisonous, and often fatal to animals.

Tsuba, a flat piece of metal constituting the guard of a Japanese sword, usually pierced and decorated.

Tuberculosis is a disease resulting from the formation of tubercles and the presence of tubercle-bacillus. Tuberculosis of the lungs is what is known as consumption.

Tudor Period extends from 1485 to 1603. The first Tudor sovereign was Henry VII., descended from Owen Tudor; then followed Henry VIII., Edward VI., Mary, and Elizabeth, the last of the line.

Tuesday, the third day of the week, named from the Saxon deity Tiu, Tiw, or Tiesco. To the Romans, it was the day of Mars.

Tullerian, a French royal and Imperial palace, dating from 1664. It was attacked by insurgents during the outbreaks of 1792, 1830, and 1848, and in 1871 was burned down by the Communists.

Tulipomania was a 17th century craze for the possession of rare tulips, which attained its height about 1630, and led to financial panic in Holland. A single bulb of "Semper Augustus" was sold for 13,000 florins. Dumas the elder, in his story, *The Black Tulip*, gives an interesting picture of the period.

Tulle, a delicate kind of silk lace, originally made at Tulle in France. It is much used for the ornamentation of ladies' garments, hats, etc., and for veils.

Tumululi, a mound of earth raised over the bodies of the dead. The mound of Marathon, enclosing the bodies of the Athenians who were killed in the famous battle with the Persians, is a celebrated tumulus. Such mounds were commonly raised over the tombs of the distinguished dead in ancient times, and sometimes enclosed heavy structures of masonry.

The Roman "barrows" were tumuli. Evidences of such mounds are frequent in prehistoric remains.

Tun, a liquid measure formerly in general use, but now obsolete. A tun of ale was 216 gallons.

Tundra is the name of a vast treeless plain of Northern Russia with small lakes and morasses scattered here and there, but almost devoid of vegetation. It is a cold, bare region, where only the reindeer can find sufficient sustenance.

Tungsten, a metal some of whose ores are known as *wolfram* and *shrelite*.

Tunny, the name of a species of mackerel common in Mediterranean and Atlantic waters. Grows to a great size—eight or ten feet frequently—and is the object of important fisheries. A large trade is done in preserved tunny.

Turban, a head-dress worn by men in Oriental countries, and consists of a scarf wrapped round the turboosh or cap. Turbans vary in material, colour, and folds, according to the rank of the wearer.

Turbines, propelled by steam, have recently come into prominence in connection with steamship transit. Numerous vessels are now afloat, and many more are building of this type. Although the principle was embodied in patents of sixty years ago, it is only within the last few years that any special effort has been made to secure its more general adoption.

Turbine engines have been decided upon for many new British liners, and a considerable number have been successfully tried in America. The English Channel service has also got its turbine steamers, and a torpedo turbine is a recent achievement.

For high speed the turbine class of steamer possesses advantages over ordinary reciprocating engines.

Turbot, a large sea fish, highly valued as food. It often attains from 30 to 40 lbs. in weight. Its flesh is white and firm. It is confined to European waters, and is caught by line or trawl.

Turkey, a fowl of American origin, brought to Europe from America soon after the dis-

covery of that country. It was a domesticated bird in England in the first half of the 16th century.

As a wild game bird it still exists in large numbers in Mexico, its native country, and in the Southern States of America. The turkey in domestication has greatly developed. The cock turkey often attains a weight of 30 lbs. It has a lustrous plumage; the head and upper part of the neck are bare of feathers. The hen is smaller. At Christmas time in England, and on Thanksgiving Day in the United States, the turkey is the chief ornament of the festive table.

Turmeric, a yellow dye substance obtained from an East Indian plant of the ginger class, which is cultivated in other warm climates also, for commercial purposes. Turmeric, in its commercial form, comprises the root of the plant dried or powdered. It is likewise used in the preparation of curry powder, and has an alkaloid taste.

Turpentine, a resinous substance obtained from a variety of mostly coniferous trees, the *Pinus australis*, of which there are large forests in North Carolina, being the most productive of the oily matter. The crude turpentine undergoes distillation, the resin which is separated from the resin being colourless and of a pungent odour. It uses are many. It is largely utilised in making paints and varnishes, and has medicinal properties.

Turquoise, formerly called Turkey Stone, is a blue, or greenish-blue precious stone, the earliest and best specimens of which came from Persia. It is composed of a phosphate of aluminium, with small proportions of copper and iron. India, Tibet, and Silesia yield turquoise, and a variety is found in New Mexico and Nevada. It derives its name from the fact that the first specimens were imported through Turkey.

Turtle. See *Tortoise*.

Turtle-Dove, a small kind of wild pigeon, which visits the southern parts of England about May and remains until September. The heads of the male birds are a light bluish-grey, the back is greyish-brown, while the breast has a purple tint. The female is less pronounced in colour.

Twankey is the name of a small river in western China, and supplies the name of a kind of tea grown in that region, in considerable favour with a large class of consumers.

Tweed, a twilled fabric, consisting of two or more colours of yarn combined in the same cloth, and should be entirely of wool, though there are inferior kinds in which cotton has a part. The surface of the cloth is unfinished. Tweed was originally woven in the valley of the Tweed, hence its name, but is now manufactured in all cloth-producing centres.

Twelfth Night is the eve of the feast of the Epiphany, and in olden times was made the occasion of many festivities. It was the most popular festival next to Christmas, but is now little observed.

Twilight is the light which is reflected in the atmosphere when the sun is below the horizon before sunrise or after sunset. The term is most usually understood to refer, however, to the evening light; the morning light we call dawn. The twilight varies in duration in different countries, according to the position of the sun. In tropical countries it is short; in the extreme north it continues through the night.

Tyburn, the name of a turnpike which formerly stood near the present Marble Arch, and a notorious place of public execution of criminals.

Tycoon, a title often used by foreigners to designate the Emperor of Japan, but not used or recognised by the Japanese. The title seems to have been coined in 1854 by those concerned in concluding the treaty between the United States and Japan. In Japanese Tycoon simply means, "great prince."

Tympanum is, in architectural phraseology, the triangular space at the back of a pediment, or, indeed, any space in a similar position, as over a window or between the lintel and the arch of a doorway. In ecclesiastical edifices the tympanum is often utilised for sculptured ornamentation.

Tynwald, the title given to the Parliament of the Isle of Man, which includes the Governor and Council (the Upper House), and the House of Keys, the representative assembly. This practically con-

stitutes Home Rule, the acts passed by the Tynwald simply requiring the assent of the Sovereign.

Typewriting is a method of printing in type-letters by means of a machine called a typewriter, of which there are several kinds, including the Remington, Yost, Smith-Premier, Underwood, Oliver, Barlock, and others. Each machine is fitted with a keyboard, indicating the various letters of the alphabet, figures, punctuation marks, etc., and as these are struck by the finger of the operator the corresponding type-signs are impressed on the paper, the ink being conveyed by an ink-saturated ribbon or pad. Typewriters are now a necessary feature of most business houses, and are also much used by literary men and others, representing a great saving of time as well as ensuring a clearness of caligraphy not otherwise attainable. One of the most generally effective of modern labour-saving contrivances.

Typhoon, a cyclonic storm of great violence occurring in the autumn months in the China seas. It is similar in duration and destructive force to the general West Indian hurricane.

Tyrolienne, a Tyrolean dance of a waltz character, often accompanied by a song or chorus.

Tyrolite, the name given to a hydrous arsenate of copper—soft, flexible, and in colour a bluish-green.

U

Ubbonites, a sect of German Anabaptists, named after the founder, Ubbo Phillips, who in 1534 separated from the main sect by refusing to acknowledge Christ's kingdom as an earthly one.

Ubiquarians (or **Ubiquitarians**), a small German sect, originated 1250 by John Brentius, who held that the body of Christ was present everywhere.

Uckwallists, a Mennonite sect who believed that Judas and Pilate would be saved by reason of their ignorance, and taught the doctrine of Universalism.

Uhlans, a light cavalry soldier armed with a lance. Marshal Saxe had a corps of them; and in the Franco-German war of 1870 the Prussian Uhlans won fame.

Ukase, a Russian edict, issued by the Czar or his government, and having the force of regular laws.

Ulster Custom, a tenant-right usage prevailing in Ulster, and recognising the right of a yearly tenant to remain in occupation so long as a fair rent is paid, to dispose of his tenancy, and to obtain compensation if the landlord resumes possession for himself.

Ultramarine, a sky-blue pigment obtained from lapis lazuli, a stone found in Tibet, Persia, Siberia, and some other countries. A cheaper ultramarine is now produced by grinding and heating a mixture of clay, sulphur, carbonate of soda and resin.

Ultramontanism is the term applied to the views of Roman Catholics who deem that absolute authority in religious affairs should be vested in the Pope, subordinate only to the Ecumenical Council.

Umbur is of two kinds, raw and burnt. Both are used as pigments, the former being a dark brown and the latter a reddish-brown. It is made from brown hematite and clay.

Umbrellas did not come into general use in England until the latter part of the 18th century. They were known to the ancients, however, by whom they were used both against sun and rain.

Uncials were a form of written characters used in times prior to the 10th century; while smaller than capitals they were larger than the later minuscule. The term uncial was a misapplication of St. Jerome's *litteræ uncialis*, "inch-high" letters.

"**Uncle Tom's Cabin**," a story published in 1852, setting forth in an intensely interesting form the horrors of the slave trade as they then existed in America. Its author, Mrs. Harriet Beecher Stowe, achieved great fame by the story.

Unction, the act of anointing with oil, a symbol of consecration practised in the Roman Catholic, Greek, and other Churches, but not in the Protestant.

Extreme unction is the rite of anointing a dying person with holy oil. This function consists in anointing the eyes, ears, nostrils, mouth, the palms of the hands, and the soles of the feet.

Undulatory Theory is the theory which traces light to vibrations set up in an invisible medium termed the luminiferous ether, and therefore transmitted and diffused to the permeation of all space.

Uneared increment is an increase in value of land, houses, etc., brought about by influences independent of the efforts or outlay of the owner.

Unicorn, a fabulous single-horned animal, the monocoer of classic writers. In heraldry its form is horse-like, with the tail of a lion and pointed single horn growing out of the forehead. Introduced into the British Royal Arms by James I., two unicorns having figured in the Scottish Royal Arms.

Uniformity Act was passed in 1559, in the second year of Elizabeth's reign, and prescribed the restoration of the English Prayer Book, ordering it to be read in all churches, and imposing a penalty on those who neglected to attend church. Both Roman Catholics and Puritans suffered by this enactment. A century later, in 1662, Charles II.'s Act of Uniformity, commanding all clergymen to subscribe unreservedly to the whole of the Prayer Book, led to the defection of 2,000 divines, who preferred to give up their benefices to going against their consciences.

Uniforms for soldiers were introduced by Louis XIV. in 1665, but were not adopted in the British military service until some years later.

Unionists, the name given to the Conservatives and seceding Liberals who opposed Mr. Gladstone's Home Rule Bill in 1886. The term is still continued as a general party appellation.

Union Jack, is a combination of two flags—the banner of St. George, white with a red cross, the original English flag, and the banner of Scotland, blue with a white diagonal cross. This combination was effected after the union with Scotland, and the term Jack is supposed to refer to James I. (Jacques). A further addition was made to the Union Jack after the union with Ireland in 1801, when the banner of St. Patrick, white with a diagonal red cross, was introduced.

Union of Great Britain and Ireland was proposed in the Irish Parliament in January, 1799, but rejected by a majority of one, while in the English House of Commons the majority in favour of it was overwhelming. The measure was ultimately passed with adequate majorities by both Parliaments, and the union came into force on January 1, 1801.

Union, Treaty of, was the treaty by which Scotland became formally united to England, the two countries being incorporated as the United Kingdom of Great Britain, the same Parliament to represent both, Scotland electing sixteen peers and forty-five members of the House of Commons. Uniformity of coins, weights, and measures was provided for, Scottish trade laws and customs were assimilated to those of England, and as regarded religion and the practice of the law, Scotland was to continue as before. This Act was ratified on May 1, 1707.

Unit, a former British gold coin of the value of 20s. issued in 1664 by James I.

Unitarianism is the doctrine which proclaims the impersonality of God, and denies the theory of the Trinity. As regards other matters of belief and doctrine Unitarians hold differing views, the older members of the sect accepting Christ as a Divine manifestation in a human life, and believing in the sacred character of the Scriptures and in the miracles; whereas the "Progressive" Unitarians only accept Christ as a specially good, wise and holy man, and reject the inspiration of the Bible, the miracles and the doctrine of atonement. It was not until after the Reformation that Unitarianism developed to any particular extent in England. In the United States Unitarians are numerically strong and have produced some eminent preachers, such as Dr. Channing and Theodore Parker. In Great Britain the Unitarians have at present 345 chapels or other places of worship, and about as many recognised ministers.

United Greeks are such members of the Greek Church as cling to the older Greek.

United Irishmen were an association of Irishmen

whose aim was to establish an Irish Republic. They were in league with French supporters and had six war frigates ready for action. The leader, Wolfe Tone, was captured, however, in October, 1798, and the movement was effectually crushed. Wolfe Tone committed suicide in prison.

Universalists, a sect that arose in the 3rd century, and was condemned by the Council of Constantinople in 553. They held the doctrine of the final salvation of all men. There are several Churches of Universalists in America to-day, but the sect has few followers in Britain.

Universities are institutions for providing higher education, with power to confer degrees on such members as pass certain prescribed educational standards. In England there are nine universities—Oxford and Cambridge, both founded before the 12th century; London, 13th century; Liverpool, Leeds, Manchester, Durham, Sheffield, and Birmingham. Scotland has four—St. Andrews, Glasgow, Aberdeen, and Edinburgh; the first three having been founded in the 15th century, and that of Edinburgh in 1582. In Ireland there are three universities—Dublin University (founded in 1592 as Trinity College); the National University of Ireland established in 1908; and the Queen's University of Belfast, founded in 1827. The University of Wales dates from 1893. The universities of France, Germany, and other countries are numerous, and many of them very ancient. The Bologna and Paris Universities were founded in the 12th century. The chief universities of the United States are those of Yale and Harvard.

University Extension is a method which has been in operation for a number of years of extending the means of university teaching to young people who would otherwise be unable to avail themselves of university advantages. Under this scheme lectures are given and classes opened in the chief centres of population, and the higher education of the universities is thus brought within popular reach. Female as well as male students are admitted to these courses.

Upari, the poisonous sap of certain trees growing in Java and the Malayan and Philippine Islands. The natives use the sap for arrow-poison. Strychnine is yielded by one of these trees, the *Strychnos ignatia*.

Uraeus, the sacred serpent of the ancient Egyptians, always represented on the head-dresses of divinities and royal personages. It was the symbol of supreme power, and was in the form of an asp.

Uralite, a mineral substance having the crystalline form of augite, but the physical properties of hornblende. It is commonly regarded as a paramorph of the last named mineral.

Uraninite, a pitch-black heavy mineral usually found in granite rocks and forming the chief source of uranium. It is also called pitch-blende, and occurs sparingly in Cornwall.

Uranium, a metal discovered by Klaproth in 1789 in pitch-blende. It is of a dark colour and heavy, and is found in Cornwall, Saxony, and elsewhere. The oxides and salts of uranium are of importance, and are used for colouring glass and other purposes. Uranite is an emerald-green ore of uranium, and the discovery of Radium was due to experiments with uranium.

Uranus, the seventh of the major planets in distance from the sun, from which it is removed 1,800 millions of miles. It is nearly four times the diameter of the earth and has four satellites. Sir William Herschel discovered the planet in 1781.

Uriconian, the name given to a series of volcanic rocks occurring in Shropshire near Wroxeter, the site of the old Roman station of Uriconium.

Ursa Major, the Greater Bear, or "Charles's Wain," a constellation familiar to all observers because of the brilliancy of the seven stars forming its outline. It never sets in these latitudes.

Ursa Minor, the Lesser Bear Constellation, has, like Ursa Major, several prominent stars, of which the pole star is the brightest.

Usquebaugh is the old Celtic name for spirit, distilled originally from barley. The name is still used

in Scotland. Burns in *Tam o' Shanter*, wrote, "Wi' usquebae we'll face the devil."

Utilitarianism is a term that originated with the Italian philosopher Beccaria, and has for its aim "the greatest happiness of the greatest number," and insists that this should be the sole aim of all public action. Jeremy Bentham was the chief propounder of the philosophy, and in more recent times John Stuart Mill advocated it with much acceptance. Herbert Spencer's exposition of the theory represented a still higher development of it.

Utopia was the imaginary island of Sir Thomas More's ideal state, where the conditions of life and government were perfect. The work, which was published in 1516, was the forerunner of a host of other books on similar lines. Swift, Voltaire, and, in our own time, Bellamy, Mallock, and others have ventured into the same field with more or less success. Ruskin styled Utopianism "another of the devil's pet words."

Utraquist, a name given in Church history to the Calixtines, because, in the 15th century, they partook of, or demanded, both elements in their celebration of the Eucharist.

Utrecht, Treaty of, was the famous treaty by which the War of the Spanish Succession was brought to a close in 1713. It was signed by the representatives of Great Britain and her allies and France, and resulted in a general adjustment of many old-standing international differences.

Uvarovite, an emerald-green variety of garnet. It contains chromium sesquioxide. Named after Uvarov, the Russian statesman.

Uvula-wort (or **Throatwort**), the nettle-leaved Bell-flower (*Campanula Trachelium*), found plentifully in English copses, and given its popular name because of the reputation it had of being of service medicinally in the treatment of pains and swellings in the throat.

Usama, a Burman linear measure equal to about 22 English miles.

V

Vagrancy was the subject of stringent punishment under the old English laws. A vagabond on conviction was sentenced to be branded with a "V" and sent into slavery for two years by an ordinance of 1547, and whipping, setting in the stocks, and mutilating the ears were other penalties of this offence. The present Vagrant Act was passed in 1844.

Valentine's Day, the 14th February, is a Roman Catholic festival in celebration of St. Valentine, one of the Christian martyrs of the 3rd century. He was so renowned for affection and benevolence that the custom arose of selecting valentines on his festival day.

Valentinians were a sect of the 2nd century, adherents of Valentine, a priest, who deserted his faith and proclaimed doctrine in which gods and goddesses were substituted for the Trinity.

Valhalla, in Scandinavian mythology, is the special Paradise to which the souls of warriors slain in battle were transported. The term is also generally used to designate a burial place of great men.

Valkyria, the chosen handmaidens of Odin, appointed to serve at the Valhalla banquets. Their most important office, however, according to the Norse mythology, was to ride through the air at a time of battle and point out the heroes who were to fall. It is one of these Valkyria who is made the heroine of Wagner's opera "Die Walküre."

Vampire, according to ancient superstition, was a spectre in human form, which rose from its grave in the night-time and preyed upon the living as they slept, sucking their blood, and then returning to the grave.

Vampire-bats, a peculiar kind of bat commonly known as a "flying fox." These bats are found in South America, Asia, Africa, and the Malay Archipelago, and receive their name from the supposition that they live on the blood of animals.

Vanadium, a scarce metallic element found in iron ores and certain minerals and clays. It forms

oxides which develop salts of commercial value in dyeing and calico printing. Originally discovered by Ström in 1830, it was found also in the copperbeds of Cheshire by Roscoe in 1836.

Vandalia was a Gothic war who ravaged Gaul, Spain, and North Africa in the 5th century, and finally attacked the city of Rome, drawing down upon themselves universal opprobrium for their wanton destruction of beautiful objects and monuments.

Vanilla, a climbing orchid of tropical America, found also in Asia; the dried fruit of certain species furnishes the agreeable aromatic vanilla of commerce, so much used for flavouring.

Variolids, the name given to the water-lizards or the *Lacertis* order, and distinct from the true lizards in having scales arranged in rings across the body. They are inhabitants of Southern Asia.

Varnish is of two leading kinds: spirit varnish, made from resinous substances dissolved in spirit; and oil-varnish, in which the dissolving agent is linseed oil and turpentine.

Vase, a hollow vessel of a decorative character, with or without handles, and of various shapes and designs. The vases of the ancient Greeks were of great beauty, and such as have been preserved are highly valued. One of the finest examples of a Greco-Roman vase is the famous Portland Vase in the British Museum. (See **Portland Vase**).

Vatican, the Papal residence at Rome, a famous palace on the hill adjacent to St. Peter's. Its museum is a rich treasure-house of literary and artistic objects.

Vauxhall Gardens were a famous London pleasure resort from the early part of the 18th to the middle of the 19th centuries. It was here that many great singers appeared from time to time, where the earliest balloon ascents in England were made, and where the displays of fireworks were on a scale of great magnitude for the period.

Vedas, the sacred writings of the ancient Hindoos, comprising hymns, sacred formulae, and prayers. Their origin is by no means clearly established.

Vegetarianism is the theory that vegetables are the only proper food for human beings and afford all the sustenance that is necessary for a healthy life. A Vegetarian Society was founded in London in 1847, and both in the metropolis and in numerous provincial towns vegetarian restaurants have been established with considerable success.

Velhungerlochte, a mediæval tribunal said to have been founded by Charlemagne in the 13th century. It dealt with cases in which the penalty of death was involved, and caused many persons of rank and distinction who were not favoured by the Government to be summarily arrested, convicted and put to death. The last of these courts was held in 1668, by which time the suppression of the tribunal had become a public necessity.

Vellum. (See **F parchment**.)

Velvet, silk fabric woven with a fine pile on one side only. When the pile is made entirely of silk it is styled silk velvet; when cotton is mixed with the silk, it is cotton-velvet or velveteen.

Ventilation is a means adopted of obtaining fresh supplies of air in rooms and buildings. It is a science that has been much studied in recent years and has led to the adoption of methods of air renewal by which the public health has been greatly improved.

Ventriloquism, the art of speaking in many voices and at apparent different distances, without seeming motion of the lips. The art was practised by the ancient Greeks and Romans, and was probably responsible for many supposed oracular utterances.

Venue, a legal term designating the place where an action is to be tried or from which a jury is to be summoned.

Venus, the planet second in order from the Sun, and distant from that orb 67,500,000 miles. It is 7,510 miles in diameter and revolves on its axis only once in 243 days. At wide intervals Venus passes between the earth and the sun, when what is called the "Transit of Venus" takes place. The last transit was in 1882. There will not be another until 2004.

Verd-Antique, a peculiar kind of stone found chiefly in Italy, and to some extent quarried in Cornwall and certain parts of Scotland, Ireland, and the United States. It is a highly-ornamental stone, var-coloured, beautifully veined and capable of a high polish.

Verdigris, a compound formed by exposing copper to contact with vinegar in the air. There is blue verdigris and green verdigris, the latter containing the greater proportion of copper. Verdigris is used both as a mordant and as a pigment.

Verjuice, an acid liquid formerly much used in cooking. It is derived mostly from sour grapes, crab-apples, and other acid fruits.

Vermillion, a pigment obtained from cinnabar, but generally made artificially from a mixture of one part of sulphur with four of mercury. It yields a bright red colour.

Versat, a Russian measure of length equal to about two-thirds of an English mile.

Vertebrate, the zoological division comprising such animals as have a backbone.

Vesta, a minor planet discovered by Dr. Olbers of Bremen in 1807. It revolves round the Sun between Mars and Jupiter.

Vestals were priestesses of ancient Rome, appointed to guard the perpetual fire consecrated to Vesta. They were required to take vows of chastity, and during the thousand years from Numa, 710 B.C. to Theodosius, A.D. 394, when the order was abolished, only 18 vestals were condemned for incontinence.

Viatium (literally "provision for a journey"), an expression designating the numbering of Holy Communion to one on the point of death.

Vicar of Bray, the original of the ballad of that name, was Simon Allevyn, a Berkshire vicar, who was "twice a Papist and twice a Protestant," as Fuller asserts, serving under four monarchs, Henry VIII., Edward VI., Mary I., and Elizabeth.

Victoria Cross, an order of merit for conspicuous valour, awarded to members of the Army and Navy, was established in 1856, since when there have been over 520 distributions made. The Cross carries with it a pension of £20 a year to non-commissioned officers and men with an extra £5 for every bar.

Victoria Regia, a species of large water-lily, a native of South America, having leaves of a diameter of 5 to 6 feet, the flower being about a foot in diameter, white, with a rose-centre. Specimens are to be seen growing at Kew.

Vicuña, a large mammal of the camel family, found wild in the mountain regions of Bolivia and Chili. It is not domesticated like the Lama and Alpaca, but yields a wool which is made into dress fabrics.

Vienna Congress, sat at Vienna from September, 1814 to June, 1815, and settled the delimitation of the territories of the various European nations after the subjugation of Napoleon. Ceylon, Mauritius, Cape Colony, Heligoland, Malta, and part of Guiana were accorded to England; France was permitted to hold more territory than she had possessed at the outbreak of the Revolution, in 1792; Austria took Northern Italy; Russia, Poland; and Prussia, part of Saxony and the Rhenish province.

Wikinges, were Scandinavian sea-plunderers who from the 8th to the 10th centuries were the terrors of northern waters. They were traditionally supposed to be descendants of Norse Kings, and men of great physical prowess.

Wine-making. (See **Wine** and **Distillation**.)

Vinegar, is obtained by the fermentation of alcoholic liquids, induced by various processes. It is a dilute acetic acid. Vinegar has been used as a condiment from the days of the Romans, and is the active agent in the preparation of pickles and many sauces.

Violin, a familiar stringed musical instrument, a smaller form of the more ancient viol. Instruments of the violin type have been in use from remote times, and the form as now played upon is practically the same as that of the 16th century. The construction of the violin was in the century following brought to a point of refinement that has not since been equalled. The greatest of all violin-makers was Stradivari of Cremona, whose violins to-day fetch immense prices.

Violoncello, a large, stringed instrument, tuned an octave lower than the viola, and held held downwards by the performer between his knees while playing. One of the most effective of orchestral instruments, and a powerful medium of solo playing.

Viper, a species of poisonous snake of which there is one example in Britain, the common viper or adder, measuring from 2 to 3 feet in length, and only found in very dry localities.

Virginal, a keyed instrument of a clavichord type, fashionable in the 16th and 17th centuries, and said to have been played upon by Queen Elizabeth and Mary Queen of Scots.

Virgo, the 6th constellation of the Zodiac, lying between Leo and Libra. It has seven prominent stars ranged in the form of the letter "Y." One of these stars is of the first magnitude, the other six being of the third magnitude.

Viscount, a title of rank coming next below that of an Earl. The title originally stood for deputy-earl. The first English Viscount was Viscount Beaumont, created in 1440.

Vishnu, one of the gods of the Hindoo Trinity; the supreme head, symbolised in the Vedas as the Sun.

Volsung, an offshoot of the Ostrogoths. They invaded Italy under Alaric in A.D. 400, and 20 years later acquired and occupied Rome. They were powerful up to the 6th and 7th centuries, ruling in Spain, France and Italy in turn, until in 711 the Saracens overthrew them, and slew their last king, Roderic.

Vitriol, the old name of sulphuric acid, represented in its pure form by oil of vitriol. Sulphate of copper forms blue vitriol; sulphate of iron, green vitriol; and sulphate of zinc, white vitriol. Among other vitriols are nickel vitriol, red vitriol, and blue vitriol.

Vivandiere, a female camp follower informally attached to French military regiments, and acting as vendor of liquors, fruits, etc.

Vivisection, the dissection for scientific purposes of living animals. The practice has been strongly opposed by humanitarians, and certain Acts have been passed for restricting vivisection to authorised and qualified persons within prescribed limits.

Vizier, a chief Turkish minister in the olden days. The first Grand Vizier to the Ottoman Porte was appointed in 1386, and although the office was formally abolished in 1838, it has since been occasionally revived.

Volapuk, a commercial language intended for universal use, formulated by Johann M. Schleyer about 1879.

Volcanoes are mountains or mounds beneath which, in the depths of the earth, there is a continual fire that at intervals throws up flame, molten rock (lava), ashes, etc. The most active volcanoes of modern times have been those of Aetna, Vesuvius and Stromboli, in Italy; Hekla in Iceland; and Mont Pelée in Martinique. The last named was in violent eruption in 1902, when the chief town of St. Pierre was completely destroyed, and many lives were lost.

Vole, a small rodent represented in Britain by three species, the best known being the Short-tailed Field Mouse. There are in all some 50 species, distributed over nearly all parts of the world.

Volt, the electro-motive force unit, named after Volta, and defined and adopted since 1893 in terms of the ohm and the ampere.

Volunteers were first raised in England during the American War in 1778, and in 1793-94, when a French invasion was feared, a considerable Volunteer force was organised. The Volunteers at that time numbered over 400,000. Another agitation in 1859 concerning a probable French invasion caused the formation of the Volunteer force. The enrolled strength of the Volunteer organisation in 1870 was 292,893; and in 1901 it reached its highest point, 288,476. In 1907 the entire number of Volunteers was 257,918. The force was re-formed as the Territorial Force in 1908. (See *Territorial Force*.)

Vulcanite (ebonite), the dark form of india-rubber, capable of being vulcanised at a high temperature. It is used as an electrical insulator, and for many

commercial purposes, such as the manufacture of combs, piano keys, etc.

Vulgate, a term used to designate the Latin version of the Scriptures sanctioned by the Council of Trent in 1546.

Vulpine Phalanger, an Australian marsupial mammal, resembling a small fox, and called also the Brush-tailed Opossum.

Vulture, a famous bird of prey of two distinctive groups: that of the Old World, which has the nostrils divided by a mass of bone, and the New World vulture, which has no such division. Vultures are the great scavengers of tropical regions. The European species are the Griffon Vulture and the Egyptian Vulture, which, however, have seldom been known to visit England. Vultures are without feathers on the head and neck.

W

Wading Birds, an order of long-legged birds, including the stork, flamingo, heron, crane, etc., which frequent marshes and shallow waters, and are able to stand in the water to watch for prey.

Wagram, Battle of, was fought on the 5th and 6th July, 1809, when Napoleon completely defeated the Austrians, leading to the signing of the treaty of Peace, by which Austria relinquished all her sea-coast to France, and Joseph Bonaparte was acknowledged King of Spain.

Wagtail, a familiar long-tailed small bird, of which four species are British, the Pied, Grey, Yellow, and White Wagtails, while the Blue-headed Wagtail also occasionally makes his appearance. The species frequents flat and marshy country, and one variety is called "Peggy Dishwasher." Wagtails nest in ruts, and are bold and active of habit.

Wahabees were followers of Abd-el-Wahab, an Arab reformer who advocated complete obedience to the Koran, and attracted numerous fanatical supporters. They were at one time powerful enough to rule an Arabian territory, but were subdued by Ibrahim Pasha in 1826.

Walls, a legal term applied to stolen goods that have been thrown away in flight. They are liable to be forfeited to the Crown, but will be given up to the person robbed if it be shown that he has taken adequate steps to have the thief arrested.

Waltz, the night minstrels who make music at Christmas in the open, a remnant of the old-time minstrels attached to Courts and feudal dwellings.

Wakes were originally parish festivals in celebration of the patron saint's day and the dedication of the church. Regulated by law in 1536, they gradually fell into desuetude, or became divorced from their former significance.

Walcheren Expedition was undertaken under the command of the Earl of Chatham, heading 40,000 land forces, and Sir Richard Strachan, with a fleet of 35 ships of the line and 200 smaller vessels, in July, 1809, its object being to capture Walcheren, then in the possession of the French. So much time was wasted, however, by Chatham on the way, a full month being spent in Flushing, that the enemy had ample time to defend Antwerp, the ultimate object of the expedition, and when at last the British forces were landed on Walcheren Island all chance of success was gone, and the place was evacuated, Chatham leaving behind a garrison of 15,000 men, 7,000 of whom perished from malaria, and 3,500 were permanently incapacitated. The whole project ended in disaster and Chatham was compelled to resign his post.

Waldenses, the name given to a settlement of Christians under the leadership of Peter de Waldo, of Lyons, in the 12th century. They attracted much attention by the persecutions to which they were subjected. They were then settled in Piedmont, and continued to live there in spite of every opposition. Later, both Charles I. and Cromwell interceded and obtained for them increased toleration. The Waldenses are now a somewhat numerous sect, having over fifty places of worship

- in Piedmont and a membership of over 15,000. They have had full freedom of worship since 1848.
- Wall of China (The Great),** begun in 214 B.C. and intended as a barrier against invasion. It is nearly 7,500 miles in length, stretching along the north-western boundary of the country, and varying in height and thickness, being the strongest in the neighbourhood of Peking.
- Waloons** were French Protestants inhabiting certain parts of France and Belgium, and many of them came to this country in 1565 as refugees. They established themselves at Sandwich, and certain parts of the eastern counties, and aided the development of local industries.
- Walpurgis Night,** the night before the 1st of May, when witches and creatures of evil are supposed to have liberty to roam. Named after St. Walpurgis, an English nun, who went on a mission to Germany in the 8th century. There is a famous Walpurgis night scene in Goethe's *Faust*.
- Walrus,** a large marine mammal having in the upper jaw two large curved tusks, which average in length from ten to thirteen feet. It lives on fish, and inhabits the North Polar regions.
- Waltz,** a popular round dance, danced in couples, introduced into England from the Continent in 1813.
- Wandoo Monkey,** a headless monkey with a tufted tail, found on the Malabar Coast, and often called the "lion-tailed monkey."
- Wapantake,** the ancient name given in the northern counties to territorial divisions corresponding to the Hundreds of southern counties.
- Wapinschow,** an ancient Scottish custom of assembling the people for the purpose of testing their capacity for bearing arms and their readiness to take the field.
- Wapiti,** a large North American deer with great brown-tinted horns, often, but erroneously, styled the Elk or Grey Deer.
- Warbler,** a small, lively bird famed for its song, and represented in Britain by over 20 species, including the nightingale, the red-breast, the willow-wren, etc.
- Wardmoths** are annual meetings of the inhabitants of London wards, at which they elect their Common Councilmen. Their meetings date from 1366.
- War Expenditure.** Russia's weekly expenditure of £1,077,950 towards the close of the war with Japan was by no means extraordinary. Our own war in South Africa, the bill for which totalled the huge sum of £111,948,000, worked out at £1,500,000 a week. The total cost of the Crimean War was about £33,000,000; of this Russia paid £12,000,000, France £93,000,000, and Great Britain £78,000,000, the weekly expenditure for the three countries being, Russia £1,400,000, France £900,000, and Great Britain £700,000. America's successful struggle for independence cost the mother country £121,000,000, or just under £1,600,000 a week. France, however, has had to foot the heaviest weekly war bill on record, the total cost of her terrible conflict with Germany being £315,000,000, or over £7,000,000 a week. The Napoleonic wars which ended at Waterloo were comparatively cheap for France, seeing that the total bill only amounted to £565,000,000, while that of Great Britain, including the financing of many little Powers in their struggle against the Emperor, amounted to £831,000,000.
- Wars of the Roses.** (See *Roses*, *Wars of*.)
- Wart-snake,** a curious but harmless viviparous serpent having warty scales, numerous in certain parts of India. One species is aquatic.
- Wasp,** the name of a well-known order of insects which live in communities of males, females, and workers, much the same as bees. The female wasp and neuters have a venomous sting.
- Watch.** (See *Polices*.)
- Watchers.** (See *Hærology*.)
- Water Deer,** the Chinese musk deer, an animal of small size and aquatic habits, and hornless.
- Water Flea,** a small crustacean provided with several pairs of legs, carrying gills which enable them to swim rapidly to and fro on the surface of the water. They are only found in fresh water.
- Water Frame,** the name given to the spinning frame invented by Arkwright, because of its being driven by water-power. In Lancashire, where it was most used, it was known as the "throstle."
- Water-Gas** is an illuminating gas, and also in its non-luminous form is used as a heating gas. It is obtained by means of a specially constructed furnace into which steam is admitted, and passes upward through the fire and into a separator, where it becomes decomposed. As the steam passes through the furnace it is charged with either coal dust or crude naphtha, which process induces chemical reaction, and a fixed gas is the result.
- Waterlander,** a sect established in Holland as an offshoot of the Mennonites. They were more tolerant than the original sect, and did not regard the Bible as necessary to salvation. For a time they were of great influence, but ultimately they became reconciled with their opponents, with whom they are now united.
- Waterloo, Battle of,** was fought on Sunday, June 18th, 1815. Napoleon had 71,947 men and 246 guns; while Wellington's army, at the beginning of the battle, comprised 67,667 men and 156 guns. The battle raged from 10 in the morning until 5 in the afternoon with alternating success, Wellington gradually gaining the mastery, however, and when the Prussian forces under Blücher joined him late in the afternoon the whole allied army moved forward and Napoleon's defeat was rendered complete. The total losses of the Allied Army in killed, wounded and missing were 25,076. The French lost over 30,000 men.
- Waterloo Bridge,** crossing the Thames, was built by Rennie, and opened in 1817. It has nine arches, each of 120 feet span, is built of granite, and has a length (including approaches) of 2,425 feet.
- Waterproofing,** a method of rendering cloths capable of resisting water, an art which has been greatly developed in recent years. The first article of the kind was what is called "Mackintosh," made mainly of india-rubber, but later processes mingle the waterproofing with the threads of the fabric by the introduction of additional substances.
- Water-Spider,** an interesting little animal which spins a sac of silk on a water-plant, which it uses as a sort of diving bell. From this it obtains bubbles of air, one at a time. Thus the spider is enabled to remain below the surface a considerable time.
- Water-Spout,** a column of water drawn to a considerable height in the air and descending to earth with a rapid whirling motion. The phenomenon only lasts a few minutes, and frequently a number of water-spouts form and discharge either simultaneously or in rapid succession. Water-spouts only occur over the sea.
- Watling Street,** the name of the old Roman road which ran from Dover, by way of Canterbury, Rochester, London, and Bedford, to Chester.
- Wax,** the name applied to certain plant substances or mixtures, and used for various purposes, such as the making of wax candles, bleaching, and making artificial flowers, anatomical models, etc., also in pharmacy for blending in the composition of plasters, ointment, etc. The best known natural wax is beeswax, and there are others, such as spermaceti, obtained from the sperm whale, and Chinese wax, which is a cerotyl cerate.
- Waxbill,** a small Oriental and African bird of the Ploceidæ family, with wax-like bill, and beautifully variegated plumage. The Java sparrow, the South African Grosbeak, and the blue-breasted wax-bill are attractive, and often find their way into cages.
- Wax-Goose,** the name generally given to a festive gathering of people employed in printing and other works, so called from the fact that in earlier times a goose was the principal dish of the feast.
- Weasel,** a small carnivorous mammal common in Britain, of nocturnal habits, living on small rodents, birds, etc.
- Wheat Office** is now a branch of the Board of Agriculture and Fisheries. In the United States £200,000 a year is spent on this kind of work, and the advice given to fruit farmers and cotton planters abundantly compensates for the outlay. The British

Weather Office staff are always glad to help anyone to information for a special purpose.

Weather Predictions by Animals are more common than is perhaps believed by town dwellers. Cats are credited with wailing right over their ears when rain is approaching. Cats also become restless and wander aimlessly about the house when a thunderstorm is brewing. The braying of a donkey is said to be a sign of coming rain. Before winter sets in, moles prepare a sort of basin in which they deposit a quantity of earthworms. When these basins are fewer in number than usual the mole-catchers state that the winter is sure to be mild. The field-mouse has been noticed carefully to cover up its hole prior to the setting in of cold and snow. Sheep in mountainous districts will change their feeding ground to the lee side of the hills before the arrival of severe gales and rain. Bees are very sensitive to atmospheric changes. When they return to the hive, and do not come out again for a time, rain is indicated. Working bees, when collecting honey, are said to be so afraid of bad weather that if a cloud obscures the sun they will hurry home. If domestic geese are seen to fly without any palpable reason, rain is to be expected. If ducks are noticed going out on to the grass fields in the daytime in search of snails, a shower may usually be looked for. When it is likely to be wet, garden-spiders spin only short threads. When the shrill voice of the peacock is heard, a change of weather is probable. If the swallow flies high it is a sign of fine weather, but when it is near the ground rain is to be expected. The movements of rooks are much watched by some agriculturists as an index to the coming weather. If the rooks are seen settling noisily upon trees and flying hither and thither instead of going straight away, a wet day is probable. If they are flying low in the winter, going and returning silently, early and late, before sunrise and after sunset, a sharp frost may be looked for. Fish are extremely sensitive to the weather, as the angler well knows, many species declining to feed when a change is in progress.

Weaver Bird, a small bird inhabiting Southern Asia and Australia, remarkable for its habit of building a nest formed of blades of grass dexterously interwoven and suspended from the boughs of trees.

Weaving has been practised since before any time of which we have record. The Egyptians credit the invention to Isis, the Grecians to Minerva. The main principle of the weaving loom is the same to-day as it was thousands of years ago; a warp extends lengthwise through the loom, the threads being held in separate regular order by being passed through a reed or "slay," while the weft is crossed through alternating threads of the warp by means of a shuttle which holds the weft. Thus the fabric is built up. Weaving was done by hand up to the early part of the 19th century, when Cartwright's steam-powered loom was introduced, and is now in universal use. The Jacquard loom for weaving figured designs dates from 1801.

Wedding Days, or anniversaries observed, in addition to the original wedding day, are as follows: Silver Wedding Day, commemorates the 25th year of married life; Golden Wedding Day, 50 years; Diamond Wedding, 60 years.

Wednesday, the 4th day of the week, derived its name from Woden or Odin, the Norse god of war.

Week. (See Calendar.)

"Weekly Dispatch" was started as a London Liberal Sunday newspaper in 1801. It is now one of the Harnsworth series of papers.

Weaver, a species of sea-fishes which possess the power of inflicting stings by means of the dorsal fin. The British species are the Great Weaver, which averages some 15 inches in length, and the Little Weaver, which is less than half that size.

Weevil, the popular name of a large order of beetles of a very destructive kind. They abound in all parts of the world, and are voracious feeders on leaves, seeds and grain. Some of the tropical species possess brilliant plumage.

Weights and Measures are said to have been introduced by Phidon, Tyrant of Argos, in 895 B.C.

Weights were at first calculated from grains of wheat, the lowest still called a grain. The basis of ancient measures was the natural proportions of the human body, the digit or breadth of the middle part of the first joint of the forefinger being taken as the lowest unit. Under Richard I., standards of weights and measures had to be provided for the whole kingdom by the sheriffs of London.

Wellington College. (See Public Schools.)

Wenlock Group, a geological term referring to a sub-group of the Upper Silurian series, more than 4,000 feet in thickness, and consisting of limestone and shale.

Werewolf, according to an Old World superstition, was a human being changed into a wolf, but preserving its original intelligence. Numerous men charged in the Middle Ages with crimes were deemed of the Werewolf category. The superstition prevailed in many parts of Europe to a comparatively recent time, and some such belief is prevalent amongst most savage races at the present day.

Wesleyan Methodists. (See Methodists.)

Western Church, the name given in ecclesiastical history to the Roman Catholic Church, as distinct from the Eastern or Greek Church.

Westminster Abbey stands on the site of an old church and religious establishment of the 7th century. It was rebuilt under Edward the Confessor, and again under Henry III., and important additions were made by Edward II., Edward III., Richard II., Richard III., and Henry VII., the latter erecting the beautiful eastern chape in the Decorated Style which bears his name. The western towers and front were rebuilt by Wren in the 18th century.

Westminster Hall, adjoining the Houses of Parliament, was built as a Banqueting Hall by William Rufus, and many courtly festivals were held there in succeeding centuries. King John established the Law Courts there. It now forms a gigantic hallway, leading to the Houses of Parliament, but was once more used as a Banqueting Hall in August, 1905, when the then Prime Minister, Mr. Balfour, entertained the Officers of the French Fleet there.

Whale, a large marine animal averaging, when full grown, from 40 to 60 feet long, the head comprising nearly one-third of the whole length. It inhabits the Arctic Ocean, and is much hunted for the sake of its blubber, a thick mass of fat, underlying its skin to a thickness of from 8 to 16 inches. This blubber yields the whale oil of commerce, and the whalebone is derived from the baleen plates, forming the structural portion of the mouth. The whale fisheries form an important industry, Dundee being the headquarters of the whale-fishing fleet. About half a ton of whalebone is obtained from one whale, which is worth between £2,000 to £3,000 per ton. (See **Rorqual** and **Spinn Whale**.)

Wheat, the name of several varieties of plants of the Grass family, yielding a fruit or grain which, in its crushed state, is termed flour, and from which is obtained our most valuable food staple. Over five and a-half million tons of wheat grain is imported into this country. There are less than two million acres under wheat in Great Britain. Of the wheat consumed annually in this country (about 33,500,000 quarters), only 7,500,000 quarters are grown at home. It is calculated, however, that Canada's capacity for wheat production is so great that we could look to that colony alone to supply us all with wheat.

Whelk, a molluscous univalve with a spiral shell, and comprising some 20 species. The Common Whelk is abundant on the British coasts, and is captured in large quantities and sold as food.

Whidah Bird, the widow-bird, of West and Equatorial Africa, a beautiful genus including the "Mourning Widows" and "Paradise Widow-birds" of the dealers. To a body of about 5 inches long, the males of some of the species have a tail of something like 12 inches during the breeding season. The plumage is showy and the song pleasing.

Whigs, a political name which came into use in the time of Charles II., and designated the progressive

- party down to the passing of the Reform Bill of 1832 when it was superseded by the term Liberal.
- Whimbrel**, a bird of the Curlew family, more common in Scotland than in England.
- Whinchat**, a small migratory bird, which is seen in Britain from April till September, and has a bright brown plumage, spotted with darker brown. The male has a beautiful song.
- Whip**, the name commonly given to the Patronage Secretary of the Treasury, whose duty it is to keep the supporters of the Government together for important Parliamentary divisions. Each party has its own chief Whip, with assistants.
- Whirlpool**, a circling current of water often of great power, capable of drawing into its centre and submerging small vessels. The most famous whirlpool is the *muelstrom* on the Norwegian coast.
- Whirlwind**, a sudden circular rush of opposing winds, which often causes much damage.
- Whisky**, an ardent spirit distilled from malt or other grain, and containing a large percentage of alcohol. It has a greater consumption than any other spirit, and is of many kinds, Scotch and Irish whiskies being chiefly consumed in this country, and being of pot still or patent still production, or a blend of the two. American whiskies are mostly distilled from Indian corn.
- Whistler**, a kind of marmot found in the mountains of Northern and Western America.
- White Ant.** (See *Termites*.)
- Whitebait**. (See *Herring*.)
- Whiteboys**, an insurrectionary Irish body who gave great trouble to the authorities in the latter part of the 18th century and the early part of the 19th. They derived their name from their custom of wearing a linen garment over their coats. Several of their ringleaders were executed.
- White Cross League**, a missionary association working in the principal towns and cantonments of India. The Bishop of Lahore is president.
- White Elephant**, a term in common use to designate a gift that causes the recipient more trouble or cost than it is worth; derived from an old-time custom of the Kings of Siam who presented a white elephant to a courtier if he desired to ruin.
- Whitehall**, erected within sight of Westminster Abbey and Palace in the 13th century, was the residence of the Archbishops of York until Henry VIII. took possession of it in 1530. Thenceforward to 1609, when it was burned down, it continued to be the favourite town residence of royalty, and to the Stuarts especially it was a great centre of court festivities. In those days, with its grounds, it extended from the Strand to the river. The only portion of Whitehall now standing is the Banqueting Hall built by Inigo Jones, on a scaffold projected from the front of which Charles I. was beheaded.
- White House**, the name of the official residence at Washington of the President of the United States.
- Whitethroat**, a familiar bird of the warbler family, commonly seen in British hedgerows in the summer time.
- Whiting**, a well-known sea-fish of the cod family, very plentiful around our coasts, much used as food, and averaging from 14 to 16 inches in length.
- Whitsuntide**, the festival celebrating the descent of the Holy Ghost. It is a movable feast, always occurring seven weeks after Easter.
- Widgeon**, a kind of Duck common in Northern Europe, and breeding to some extent in Scotland. The male is of somewhat brilliant colours, with interminglings of black, red, and white.
- Wild Cattle** existed in our dense forests for some time after the Norman Conquest; Fitzstephen mentions that forest bulls were to be found around London, and Walbran, in his *Memorials of the Abbey of St. Mary of Fontainebleau*, states that "fierce wild cattle" were to be found in Knaresborough Forest. Descendants of these fierce animals are said to exist now in a few famous herds in a semi-domesticated state. The most famous of these are the Chillingham herd of white cattle of the Earl of Tankerville, and Earl Ferrers's Chertley Park herd.
- Wild Sheep** still exist at St. Kilda, but nowhere else in Great Britain. In the 18th century the proprietor of St. Kilda was entitled to one out of every seven sheep born on the main island. These were carried to one of the smaller islets, where they were allowed to run wild.
- Will**, a written document signed by a person containing directions as to the disposition of his property or possessions after his death. The person making a will must be of full age, and the will must be signed in the presence of two witnesses, who must also sign their names to the document in the testator's presence.
- Willow**, a waterside-loving tree of the genus *Salix*, to which the osiers belong. The White Willow makes the best cricket-bat blades, and its wood is useful in carpentry also; while the bark of nearly all the species is of considerable commercial importance, especially for tannery purposes.
- Wimple**, an antique outdoor covering for the neck, chin, and sides of the face, of silk or linen, worn by women in Anglo-Saxon and Norman days; and still retained as a Conventual dress for nuns in some places. It was bound on the forehead of females of quality by a golden and jewelled fillet.
- Wincey**, a fabric sometimes woven entirely of wool, but more commonly of wool and cotton. Also sometimes called lincey-wincey.
- Wind**, air set in motion by special atmospheric conditions, is of various degrees, from a slight rustling breeze to a hurricane. Winds are *constant*, as in trade winds or anti-trade winds; *periodic*, as in monsoons and other wind-visitations occurring according to influences of season; *cyclonic* and *anti-cyclonic*, when their motion is spiral; *whirlwinds*, *hurricanes* and *torradores*, when high temperature and great density induce extreme agitation. Ordinarily, a wind is named from the point from which it blows. The *sirocco*, the *mistral*, and the *simoon* are local forms of winds of great velocity. A *blizzard* is a blinding blast of icy temperature.
- Windmills** were in use in the East in ancient times, but were not much seen in Europe before the 13th century. Wind sawmills were invented by a Dutchman in the 17th century, and one was erected near the Strand in London in 1633. Great improvements have been made in these mills in recent years, especially in the United States, where, by the application of the wide shaft principle, much space is saved and the mills can be used for pumping, grinding, and other purposes.
- Windows**, originally apertures for the admission of the wind into dwellings, began to be made of glass and used only for the admission of light in very early times. There is evidence of glass windows having been used at Pompeii, but they did not become common in England before the 12th century. A window tax was imposed in 1695, and again at later dates for special revenue purposes. As late as 1890, the sum of £1,824,584 was obtained from this tax. It was repealed in 1889.
- Windsor Castle**, the famous British royal residence on the banks of the Thames, as it now stands, was mainly built by Henry III., though a royal residence had existed there from the time of the Conqueror. Additions were made by Henry VIII., Elizabeth, and Charles II. Windsor Park and Forest comprise over 25,000 acres.
- Wine**, the fermented juice of the grape, to which alcohol and other matters are added. The varieties of wine are innumerable, each obtaining its distinctive character from the kind and quality of the grapes of which it is made, the locality in which it is produced, or the amount of alcohol it contains. Wines are "sparkling," as champagne, due to their being bottled before fermentation is completed; or "still," that is, non-effervescent. Alcohol is present in ports and sherries to the extent of from 16 to 25 per cent.; in lighter wines from 7 to 10 per cent. France, Germany, Spain, Portugal, Italy, Greece, and Austria-Hungary are all wine-producing countries; and the United States, Australia, and South Africa have also to be reckoned with in this connection, their wines improving in quality year by year.
- Wire**, originally made by hammering, is now produced

by means of powerful machinery which draws the heated metal through a series of holes of gradually diminishing size. The first wire mill in England was set up at Macclesfield in 1669. Enormous quantities of wire, of differing grades and sizes, are now used, ranging from a thickness difficult to bend to the finest thread.

Witchcraft, was generally believed in all through the Middle Ages, and thousands of people were put to death as witches. In England the laws against witchcraft existed down to 1736. According to one authority, "the judicial murders for witchcraft in England in 200 years was 30,000." The last executions for witchcraft in England were in 1716, when a Mrs. Hicks and her daughter aged nine were hanged at Huntingdon.

Witanagemot, the name given to the Great Council of the Anglo-Saxons, "the Council of the Wise Men," and composed of the leading nobility.

Woad, a plant that in olden times was largely used in England for the blue-dye obtained from it. It is a biennial plant, and is still cultivated in some parts.

Wolf-Fish, a voracious sea-fish living largely on crustaceans, which its strong teeth enable it easily to crush. It is also called the cat-fish.

Wolverine, a species of cat inhabiting the more northerly parts of the United States, and somewhat resembling the Polar bear in shape and structure, though of a dark colour.

Wolves, well-known carnivorous animals still found in many parts of Europe, but not existing in Britain since the middle of the 17th century.

Woodcock, a game-bird greatly valued for its flesh, but not very abundant at present in Britain. It is of the Snipe family, and winters with us. It is one of the birds protected by the Game Laws. The parent birds carry their young to and from the feeding spots.

Wood-Louse, a name of wide application given to any terrestrial isopod of the Oniscidae family. They have segmented bodies and numerous legs, and feed mostly on decaying matter, animal and vegetable.

Woodpecker, a familiar tree-climbing bird, of which three species are found in Britain. It builds in hollows of trees, and feeds on insects which it obtains from the trunks of trees by tapping them, for which purpose it has a wedge-shaped bill and a protrusile tongue. There are some 200 species.

Wool has been largely grown and used in the manufacture of cloth in England from times anterior to the Roman invasion. It is grown on the backs of sheep, and is of various kinds, according to the breed of sheep from which it is derived. Wool differs from hair in that it has a wavy, serrated fibre, its curl being a notable characteristic, whereas hair has a smooth surface comparatively free from serratures. Long wools are mostly used for the manufacture of worsted goods, and short wools for woollen cloths, though the improvements in machinery in recent years have enabled manufacturers to utilise short wools to a great extent for dress fabrics as well as for woollens. The finest wools are obtained from the fleeces of the Spanish merino sheep. Australia and New Zealand are now the greatest wool producing countries.

Woolpack, the name given to the seat occupied by the Lord Chancellor in the House of Lords. At the time when it was first used, in the reign of Edward III, wool was the great staple commodity of the country.

Worcester, Battle of, was fought on September 2nd, 1651, between Cromwell and his forces and the Scots army under Charles Stuart (afterwards Charles II.), when the latter was defeated.

Work Divisions in Different Nations. From a table showing the division of labour in different countries, the following comparisons are obtained. Occupations are divided into three classes, namely, agriculture, horticulture and forestry; manufactures and mining; and commerce and transportation. In the last-named class Holland leads with a percentage of 17.2, while America's is 10.6. England's is only 13, Germany is 10.4, and France 9.4. In manufactures and mining America has a comparatively low rank, her percentage being only 24.7. Scotland leads all with 60.4, followed closely by

England and Wales with 58.3, Germany has 57.4, and France 33.6. Belgium, Holland and Switzerland also, of course, rank high, each of them having more than one-third of its working population thus engaged. In the first class, of agriculture and allied occupations, America has a percentage of 55.9, while Germany has 37, France 44.2, Austria and Hungary respectively 58.2 and 58.6, Italy 59.4, Holland 30.7, Belgium 21.1, Scotland 12, and England and Wales only 8.

World's Greatest City, **The**—London, the capital of the British Empire, is the largest, wealthiest and most populous city of the world. It covers an area of 692 sq. miles—inclusive of what is legitimately called "Greater London"—has a population of 7,252,363, consuming over 225,000,000 gallons of water per day, admitting within its ports goods to the annual value of £167,558,254, and exporting £253,511,393 worth, enjoying nearly eight sq. miles of parks and open spaces, having 609 acres of cemeteries, and being protected by a force of 22,137 police. Greater London's mean rateable value, for Metropolitan Police purposes, is roundly 56 millions a year. It is governed, as to the City proper, by the Lord Mayor and Corporation; as to the whole of London, for general administrative purposes, by the London County Council; and as to various local affairs, by the various borough councils, of which it has 28. It returns 6 representatives to Parliament. It has 77 livery companies owning property of the aggregate value of £15,000,000, with a total annual income of nearly £800,000. It is estimated that 1,500,000 persons enter the central portion of the city every day, 91,000 of whom—as well as 12,000 vehicles—pass along Champs-Élysées; while over 15,000 pass through Holborn. There is an average of 351 births and 66 deaths per day in London. Within the City proper the portion preserved over by the Lord Mayor and Corporation, there are 484 miles of crowded streets, with a day population of 350,000, and a night population of 26,000. The number of foreigners permanently resident in London is over 200,000. In the hospitals and dispensaries of London 2,269,578 patients are treated every year, involving a total ordinary expenditure of about £800,000. There are 1,056 elementary schools in London, with accommodation for over 800,000 children. The various railways running into London carry in and out of it every day 720,000 passengers; the omnibuses, now mainly of the motor class, carry another 38,000 passengers; while the different tramways—those of the County Council and the combined services of the various private companies running services—are responsible for fully half-a-million more. These figures do not take account of short journey "bus, tram and "tube" traffic, but simply give an idea of the number of workers and business men who proceed daily from the suburbs to Central London. London has about 11,000 cabs, including motors and taxicabs. Nearly 8,000 articles (including 27,000 umbrellas) are left in public cases every year. There are more people in London streets between six and seven in the evening than at any other time, when 174,958 workers are setting off, on the average, from their employment for home. There are 100,000 females working within the London area under the Factory Acts' cognisance, while there are 300,000 one-room dwellers, and about 2,000 people who are homeless. The earning capacity of the workers of London is £173,391,000 per annum. The landowners of London number 34,000, the largest landowners being the Crown, the Ecclesiastical Commissioners, and the City Corporation, who own together 39 sq. miles. There are in addition 283 large landowners owning on the average 1/4 of a sq. mile each, the remaining owners possessing about an acre each.

Worsted, the name given to a fabric made from long wools or wools mixed with cotton or other fibrous material. This class of fabrics was first manufactured at, and derived its name from, Worsted, in Norfolk, in the 14th century. Norwich was, until the latter part of the 18th century, the headquarters of this industry, but now for more than 200 years the worsted manufacturing centre has been Bradford.

Wrasse, a sea-fish of the Labridæ family. The family has numerous species, all of which are thick-lipped. The British species are the balloon wrasse and the red wrasse.

Wren, a class of small passerine birds possessing up-turned tails, and most abundant in South America. The British species is an interesting singing bird with a surprisingly loud note for its size.

Wroth Silver is the name given to certain annual payments made by tenants of the Duke of Buccleuch on the 18th of November each year at Knightlow Hill, in Warwickshire.

Wryneck, a tree-creeper bird of the Woodpecker family, only one species of which visits Britain. It is of pretty plumage and gains its name from its curious habit of curving its neck.

X

Xanthamide, a crystalline substance, produced by passing ammoniacal gas into an alcoholic solution of xanthic ether.

Xanthia, a genus of moths with brilliant yellow markings found in America and the West Indies.

Xanthic Acid, the name given to various ether acids, and consisting of an oily liquid of an astringent character yielding a yellow colour.

Xanthurus, a genus of American jays, green in colour, mingled with yellow, blue and white, and attaining a length of from 12 to 14 inches.

Xebec, a light three-masted vessel most favoured in former times by the Algerian corsairs of the Mediterranean.

Xema, a beautiful snow-white sea-gull, with a forked tail, inhabiting the northern shore of the American Continent.

Xenopus, a lively small bird of the Tree-creeper family, common in South America and peculiar in having an upturned bill.

Xenurus, one of the Armadillos of tropical America. It lives in burrows.

Xenylene Alcohol, or diphenylic acid; a diatomic alcohol, obtained by the action of water on diazobenzidine nitrate.

Xerus, an African ground squirrel with a rather bristly fur, and an enormous bushy tail.

Xeonon, the name given to sculptured wooden images of the time of the ancient Greeks.

Xenallite, a Mexican mineral, tough and greyish white, found associated with bustamite and apophyllite.

X Rays. (See Roentgen Rays.)

Xylograph, the name given to an engraving on wood or an impression thereof.

Xyloidine, an explosive compound much recently used in gun-cotton, prepared by trituration starch with fuming nitric acid and reducing it to an in-odoriferous powder.

Xylophone, a musical instrument comprising a series of tuned wooden bars supported on bands, and usually played with wooden hammers.

Xystarch, an Athenian officer, who presided over the gymnastic exercises of the xyst, or covered portico under which the athletes performed.

Y

Yacht, a light kind of vessel now much used for pleasure trips and racing. The first yachting club was the Cork Harbour Club, started about 1790, and it was not until 1812 that the Royal Yacht Squadron was founded at Cowes. The Royal Thames Yacht Club dates from 1823. There are about fifty other yachting clubs in this country. The yacht-racing competitions of greatest interest in recent years have been those for the America Cup, for which Sir Thomas Lipton has unsuccessfully completed three times on behalf of England, and is a challenger for 1914.

Yak, a curious, long-haired ox, found in Tibet, and there employed as a beast of burden.

Yale University was established in 1701, and is one of the leading universities of the United States.

It received its name from Elihu Yale, who endowed it largely in 1716.

Yam, the root of various kinds of diascoræa, a plant which grows in Asia, America, Africa and Australia; used as a substitute for the potato, roasted or boiled. It also furnishes a flour for bread or pudding making.

Yankee, a term applied to residents in the New England States, and said to have been derived from a corrupt pronunciation of the word English by Indians. Other definitions have been given, but the one referred to seems to be most likely.

Yard, a standard measure of 36 inches, the word being derived from the Saxon *gyrd*, or rod. The yard was anciently regarded as the circumference of the body, but Henry I. decreed it should be the length of his arm.

Yarn is the textile thread or fibre spun into the form of weft or warp ready to be woven into fabrica.

Yataghan, a peculiar kind of sword with a curved edge, but without guard or cross-piece. It is worn by soldiers and others in the Turkish principalities, and by Turks and Arabs in other parts. The word is also written "ataghan."

Yawl, the jolly boat of a ship, also the name given to any small yacht of the cutter class.

Year. (See Calendar.)

Year-Books, containing annual reports of legal cases, common in England, and used back to the 11th century, and formed the first attempt to establish legal reports. In modern times the title has been given to almost any kind of annual publication.

Yearling, a young horse or other animal in the second year of its age.

Yeast, a substance that sets up fermentation, and discovered in 1836 to be a fungoid or vegetable cell. It is the potent agent in the production of alcohol from sugar; added with warm water to flour it commences the process of fermentation that gives sponginess to the loaf in bread-making.

Yeast-Powder, a preparation of soda, phosphates, and other substances that cause fermentation, and is used for leavening bread. Baking-powders are similar preparations.

Yellow-Bird, a name frequently given to the golden oriole (*g. o.*).

Yellow-Hammer, a common British bird of the bunting family, which builds on the ground. Its plumage is mainly yellow, and it is a fine singer.

Yen, the Japanese monetary unit, represented by a gold coin of the value of about 25. 0.1d. English.

Yeomen of the Guard (commonly called "Beefeaters"—a corruption of "Buttlers") is a body of Foot Guards established in the reign of Henry VIII. for the protection of the Royal Person. These soldiers are now few in number, and their duties are those of attendants at the Tower and appearing in full dress upon ceremonious State occasions. They still wear the style of dress of the Tudor period.

Yew, an evergreen tree, the wood of which was in former days in very great demand for bow-making. Held sacred in Nepal.

Yezdegird, the name of the old Persian king which began in 632, when Yezdegird was made King of Persia. The Parsees of India still use the term.

Yezidees, a sect of devil worshippers inhabiting certain parts of Mesopotamia.

Yoga, a section of the Hindoo philosophy which proclaims the emancipation of the soul through a junction with the universal spirit. The Yogis are a Salvafite sect, founded by Goraknath. They have a temple at Gorakhpore.

York Minster, one of the oldest and finest of English cathedrals, is 524 feet long, its nave is 240 feet broad, and the central tower is 216 feet high. The present edifice, in parts, dates back to the 12th century, but a church stood on the site in the 7th century. In 1823 it was set on fire by a lunatic named Jonathan Martin, and the destruction that then took place cost £60,000 to restore.

Young England Party, a term applied to a number of young Tory politicians of the Corn Law days, who not only opposed the repeal of the Corn Law, but proposed to bring about a closer relationship between the upper and lower classes.

Young Men's Christian Association was founded in 1844 largely by the efforts of Mr. George (later Sir George) Williams. It has to-day 7,823 branches in over 40 countries, and a total membership of 82,209, the United Kingdom alone 120,500 members. Its headquarters are at the "George Williams House," Russell Square, W.C.

Young Women's Christian Association, formed on the lines of the Young Men's Christian Association, has a British membership of nearly 100,000, and a total membership of 275,000.

Yttria, a metallic oxide found in combination with cerium, erbium, didymium, and gadolinite in Sweden and Norway. It is a grey-white powder.

Yuga, one of the periods into which, in Hindoo chronology, the history of the world is divided. There are four:—the Satya Yuga, which contained 1,728,000 years; the Treta Yuga, 1,296,000 years; the Dwapara Yuga, 864,000; and the Kali Yuga, now in progress. This began about B.C. 3094, and will extend to 432,000 years in all, according to the Hindoo beliefs.

Z

Zabra, the name of a small coasting vessel used in the Mediterranean and elsewhere.

Zaccheans, an obscure sect of Gnostics, mentioned by Epiphanius.

Zalophus, a genus of eared seals, in which is included the common sea-lion of the Californian coast.

Zamboni's Pile, a dry voltaic battery, invented by Zamboni, retaining potentiality for a lengthy period.

Zanzaleans, a Syrian sect of the 6th century-follower of Zanzalee who opposed water baptism, and urged baptism by fire, or by the application of hot iron; at one time very numerous.

Zebra, an African quadruped of whitish-grey colour, with regular black stripes, perhaps the most beautiful member of the Equine family. Rather larger than an ass, and smaller than the horse, it has a tufted tail, is of light build, wild, and fleet of foot; there are several species, and the Quagga and Burchell's Zebra (ground colouring yellow), as well as the True Zebra, belong to the group.

Zebu, a species of oxen having a large hump on the shoulder and short horns. In India and some parts of Africa these animals are domesticated and used as beasts of burden. They are of a light grey colour and very docile. Their flesh makes good food-meat; the Hindoos, however, do not slay them, but regard them with much veneration.

Zemindar, the name given to a class of revenue-farmers once common in India, but now to a great extent superseded.

Zemstvo, a local territorial assembly in Russia for dealing with matters of taxation, schools, roads, etc., under the control of the provincial governors.

Zemane, the portion of dwelling in India where the female members of the family are kept, and to which strangers are not admitted.

Zend-Avesta, the name given to ancient sacred books of the Zoroastrians or Parsees. They originally numbered twenty-one, but only three survive.

Zenith, the highest point in the heavens above where an observer stands, the opposite pole to the Nadir.

Zeoilites, a class of mineral found in volcanic rocks. Crystalline substances which melt under heat, they are composite silicates of alumina and alkalies.

Zeriba (or *Zarabeh*), a military enclosure of prickly brushwood, used with effectuality by the British troops in Egypt in 1882.

Zero, the cypher signifying nothing in Arabic numbers. On a Centigrade or Réaumur thermometer the zero line marks the melting point of ice; on a Fahrenheit zero is 32° below the water-freezing point.

Zets, the name given in former times to the closet or

room, above a church porch, where the sexton lived and guarded the documents of the church.

Zinc, a familiar metal, known to the ancients, and used by them in the making of brass. It occurs in sulphide or carbonate of zinc and other forms. The ores of zinc are crushed and roasted. In combination with copper it constitutes the familiar alloy called brass, and zinc itself is much used for roofing and other protective purposes.

Zionists, the name given to a body of Jews whose object is to re-establish their race in Palestine. The movement has been largely taken up, and already numerous settlements of Zionists have been formed in the Holy Land.

Zippelite, a mineral found at Joachimsthal, in Bohemia, as an alteration product of uraninite; it is essentially a hydrated sulphate, shaded yellow, of sesquioxide of uranium.

Zirconium was discovered in the sand of the rivers of Ceylon in 1789, and is the metallic base of Zirconite. It appears generally in the form of a black powder, after chemical modification.

Zither, a stringed musical instrument of the dulcimer kind, having strings of metal which are played upon with the right hand, a plectrum being used for striking the strings.

Zodiac, the belt of the firmament enclosing the circuit over which the principal planets travel. It is divided into 12 equal spaces of 30 degrees each, comprising respectively the 12 signs of the Zodiac—Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpio, Sagittarius, Capricornus, Aquarius, and Pisces.

Zootrope, an optical instrument of a cylindrical shape, exhibiting pictures in such a form that the figures in them seem to be endowed with motion.

Zollverein, a commercial federation of German States, dating from 1818, for the maintenance of uniform duties and tariffs as against foreign countries and of Free Trade between themselves. It is now co-extensive with the German Empire.

Zone, an imaginary geographical belt encircling the earth. There are five of these zones—the Torrid Zone, from tropic to tropic; two Temperate Zones, from the tropics to the Polar Circles; and two Frigid Zones, from the Polar Circles to the North and South Poles respectively.

Zoolatry, animal worship, which in ancient times prevailed among the Egyptians and other primitive races. The zebu is still an object of adoration amongst the Hindoos, and snake-worship survives on the African west coast.

Zoological Gardens of London were opened in 1827, and belong to the Zoological Society of London. They contain one of the largest and most varied collections of living animals in the world.

Zoology, the science of animal biology, treating of the structure, classification, and distribution of the various members of the animal kingdom.

Zoomorphism, characteristic exhibition of the forms of the lower animals, as distinct from man, an element entering largely into classic mythology.

Zoophyte, the name given to a class of organisms combining the nature of both plants and animals, such as corals, sponges, sea anemones, etc.

Zorilla, a small African quadruped of the Skunk order, usually striped or spotted, and possessing the power of ejecting a noxious odour.

Zouaves, a body of French soldiers first organised in Algeria, and then consisting exclusively of Herber natives. They were a fine body of troops, and did good service both in Algeria and Europe. As now constituted, the Zouave regiment are almost exclusively French.

Zulus, a native African people occupying Zululand, now included in the colony of Natal. They are a brave race, and in a war with Great Britain in 1879 inflicted severe defeats upon our troops. The Zulu King, Cetewayo, was finally defeated and taken prisoner, and his country annexed.

Zymoscope, an instrument for testing the fermenting power in yeast, invented by Zeaseck.

PEARS' DICTIONARY
of
PROMINENT PEOPLE.

Pears' Dictionary of Prominent People Past and Present

A BIOGRAPHICAL DICTIONARY, GIVING PARTICULARS OF THE
LIVES AND LEADING ACHIEVEMENTS OF THE MOST DISTINGUISHED
MEN AND WOMEN OF ALL AGES AND COUNTRIES.

Abbas II., Khedive of Egypt (b. 1874), succeeded his father, Tewfik Pasha, 1892.

Abbey, E. A., R.A. (b. Philadelphia, U.S.A., 1852, d. 1912). Came to England 1878. A great painter and book illustrator, and a literary man of ability.

Abbot, George, Archbishop of Canterbury in 1611, and one of the translators of the authorised version of the Bible.

Abd-el-Kader, Emir of Mascara (b. 1807), of princely rank. Violently opposed French occupation of Algeria from 1830 to 1844. Made prisoner 1847, released 1852; d. at Damascus 1883.

Abdul-Aziz, Sultan of Turkey from 1861 to 1876.

Abdul-Hamid II., Ex-Sultan of Turkey (b. 1842), succeeded his brother 1876. Began his reign with proposals of reform, but after the Russo-Turkish War (1877-1878) assumed autocratic rule. Went to war with Greece in 1897, and was victorious. Conceded a constitution in 1898, but, becoming the tool of a reactionary movement, in April, 1909, was deposed by his brother and heir, Mohammed Reshid (q.v.), succeeding him.

Abdul-Medjid, Sultan of Turkey from 1839 to 1861.

Abdurrahman Khan (b. 1830), proclaimed Ameer of Afghanistan 1880; d. 1901.

A'Becket, Thomas, Archbishop of Canterbury under Henry II. (b. 1118). A powerful and ambitious prelate who boldly supported the authority of the Pope against the dictates of the King, and was assassinated in Canterbury Cathedral December 29th, 1170, being canonised two years later.

A'Beckett, Gilbert Abbott (1811-1856). Well known by his contributions to *Punch* and as the author of some comic histories. Was a London stipendiary magistrate.

Abel, Sir Frederick, Bart. (1827-1902). Became Professor of Chemistry at the Royal Military Academy in 1861, and in 1864 was appointed chemist to the War Department, holding that office until 1888. Joint inventor, with Prof. Dewar, of cordite.

Abelard, Peter (1079-1142), scholar, philosopher and theologian. The romantic attachment between him and Héloïse, mainly set forth in the Letters of the latter, has been more written about than perhaps any other love affair. Their remains now lie in one tomb at Père Lachaise, to which they were removed after the Revolution.

Abencerrages, a Moorish faction, prominent in Granada in the 15th century. The hall of the Abencerrages in the Alhambra is said to have been the scene of the massacre of this noted family by King Abu Hassam.

Aberconway, Lord (b. 1850), formerly the Rt. Hon. Sir Charles B. McLaren, largely interested in leading steel, coal, ship-building, granite and other industries, and from 1880 to 1911, when he was raised to the peerage, an active Liberal M.P.

Abercorn, Duke of (b. 1869), succeeded his father, the 2nd duke, 1913. M.P. for Londonderry, 1906-13. Treasurer to H.M.'s Household, 1903-05.

Abercrombie, James, a British general who led an expedition against the French in Canada in 1748, and suffered defeat by Montcalm at Ticonderoga.

Abercromby, Sir Ralph, an English general who gained a victory over the French at Alexandria in 1801, but died from wounds received in the battle.

Aberdeen, Rt. Hon. Geo. Hamilton Gordon, 4th Earl of (1784-1860). The distinguished statesman and Prime Minister, grandfather of the present Earl, was appointed British Ambassador-Extraordinary to Austria, and signed the preliminary treaty at Töplitz in 1813, and the next year the Treaty of Paris. Was Foreign Secretary under Wellington, and Colonial Secretary under Peel first, and then Foreign Minister for the five years from 1841 onwards, becoming Premier in 1852 and resigning in 1855, his Ministry being formed of a coalition between the Whigs and Peelites.

Aberdeen, Rt. Hon. Sir John Campbell Gordon, 7th Earl of (b. 1847), Lord-Lieutenant of Ireland January to July 1886, and also from 1905 to 1914. Governor-General of Canada (1893-1898). A prominent Liberal peer. The Countess of Aberdeen (b. 1857) is a leader among women Liberals, and an ardent advocate of social reform.

Abernethy, John (1764-1831), one of the most celebrated surgeons of his time, noted as much for his eccentric manners as for his professional skill.

About, Edmond F. V. (1828-1885) eminent French novelist and journalist.

Abraham, Rt. Hon. William, P.C., M.P. (b. 1841). Originally a working collier; since 1885 has been representative of the Rhondda Valley Div. in Parliament. President, S. Wales Miners' Federation.

Abruzzi, Duke of the (b. 1873), is the third son of Amadeo, Duke of Aosta, and has greatly distinguished himself by Arctic exploration. In 1899 he advanced nearer to the North Pole than any previous explorer had done, his expedition reaching 85 degrees 34 minutes N. latitude, or 20 minutes beyond Nansen's 1893-1896 achievement. Peary, the American explorer (q.v.), has, however, since eclipsed this record. In 1896, the Duke of the Abruzzi made the ascent of Mount St. Elias, Alaska; and in 1906 he conducted an expedition to Ruwenzori, the great mountain range in the heart of Africa.

Abt, Franz (1819-1885). A German composer of popular songs which acquired a world-wide reputation; d. at Wiesbaden. One of his best known songs is "When the Swallows Homeward Fly."

Acland, Francis Dyke, M.P. (b. 1874). Under-Secretary for Foreign Affairs since 1911, previously Financial Secretary to the War Office. Son of Rt. Hon. A. H. D. Acland. Represented N.-West Cornwall.

Acton, Lord, 1st Baron (1834-1902). Brought up in the Roman Catholic faith, and became celebrated for his historical studies and theological writings. In politics was an earnest supporter of Mr. Gladstone. Became Regius Professor of Modern History at Cambridge in 1895. Had a most extensive library, which was bought at his death by Mr. Andrew Carnegie, by whom it was presented to Mr. John Morley, who in turn gave the greater portion of it to Cambridge University.

Adams, John, succeeded Washington as President of the United States, and was the first of the Republic's ambassadors to England, d. 1846.

Adams, John Couch (1819-1892), an eminent English mathematician and astronomer. Co-discoverer with Leverrier of the planet Neptune.

Addison, Joseph (1673-1719). The son of an English clergyman, he achieved fame both as a writer and a politician. Held many offices under various statesmen, and was government and by his famous essays, first in the *Tatler*, and afterwards in the *Spectator*, made an undying name. His tragedy "Cato" was a brilliant success.

Adelaide, Queen (1792-1849). Princess of Saxe-Coburg-Meiningen, wife of the Duke of Clarence, afterwards King William IV. of England. Became Queen in 1830, and was Queen-Dowager from 1837 till her demise, her reignhood being spent in works of benevolence and charity.

Adler, Dr. Hermann (1830-1911). Chief Rabbi United Hebrew Congregations of British Empire from 1891 until his death. Was an active worker in all prominent Jewish movements.

Adey, General Sir John (1819-1900), entered the Royal Artillery 1836, made Captain ten years later, went through the Crimean War, where he achieved much distinction. Served in the Indian Mutiny, and remained in India until 1866. From 1870 to 1875 director of artillery at the War Office. K.C.B. 1873.

Æschines (380-314 B.C.). A great Athenian orator, contemporary and opponent of Demosthenes.

Æschylus, the father of the Greek tragic drama (450-325 B.C.). Composed seventy plays and gained the prize for dramatic excellence thirteen times.

Æsop (b. in Greece about 650, d. 544 B.C.). His fables are the most celebrated productions of the kind.

Æsio, F. G. (b. 1870). A well-known English writer on natural history and sport.

Agassiz, J. L. R. (1807-1873). Born in Switzerland, this noted naturalist became a student of and writer upon Ichthyological pursuits, his first great work being a history of the fresh-water fishes of Central Europe. Visited England in 1834. Appointed professor of Natural History at Neuchâtel in 1838. Went to America in 1846, and remained in that country up to his death, having occupied many important offices and done much good work for the extension of his favourite branch of study.

Agatha, St., a Sicilian virgin martyr who was put to death at Palermo, A.D. 251.

Agha Khan, Sultan Mahomed Shah (b. 1877), head of the Ismailiah Moslems, settled in British India. Created K.C.I.E. in 1897 and G.C.I.E. in 1902.

Agriicola, Gnaeus Julius (57-93 A.D.), became

Roman Consul of Britain 78 A.D. Strengthened the power of the Romans in this country, corrected many abuses, and did much to encourage trade and industry. Remained in Britain seven years.

Agrippa, Cornelius (140-153), soldier, diplomatist, and philosopher, achieved great eminence under the German Emperors Maximilian and Charles V. As a theologian he incurred the violent hatred of the Dominican monks; as a student of the occult he acquired the reputation of a magician.

Agrippa, Marcus Vipsanius (63-12 B.C.). At eighteen obtained important military appointments, and achieved such fame for his successes that he was chosen Ædile 33 B.C. He was the greatest military commander of Rome, after Julius Cæsar.

Agrippina (the Elder), daughter of Marcus Vipsanius Agrippa, wife of Germanicus, and mother of Caligula, was one of the most virtuous and heroic women of her time; remarkable for her bold defiance of the tyrant Tiberius. She died A.D. 33.

Agrippina (the Younger), daughter of the last named, and mother of Nero, was notorious for her abandoned licentiousness and perfidy. Claudius made her his consort in 48 A.D. Her career was one long course of intrigue and infamy. She was ultimately put to death by the order of Nero 60 A.D.

Aguinado, Emilio, a Philippine leader, who first commanded the native revolt against Spanish rule, and later opposed the United States forces, but after stubborn resistance was captured in March, 1902.

Ahmed Mirza, Shah of Persia (b. 1807), succeeded to the throne in 1909, on his father's abdication and flight, though not crowned until July, 1914.

Aidan, Saint, an early missionary who, in the 7th century, founded the monastery of Lindisfarne, and was known as the "Apostle of Northumbria."

Aida, Hamilton (1829-1905), painter, novelist and dramatist. Sometime an officer in the British Army; author of *Rita, Confidences*, and other clever novels; also of many poems, and of the plays of "Philip," and "A Nine Days' Wonder."

Aikin, Lucy (1782-1864), industrious and painstaking writer of historical and other studies, and niece of Mrs. Harbauld. Among her best known works are a *Life of Addison* and *Memoirs of the Court of Queen Elizabeth*.

Ainsworth, William Harrison (1805-1882). Between 1834 and 1850 his novels had considerable vogue. The best known are *Jack Sheppard*, *The Tower of London*, *Guy Fawkes*, and *Windward Castle*.

Aird, Sir John, Bart. (1832-1911), a contracting engineer of eminence, associated with the carrying out of many great undertakings in different parts of the world, the wonderful Assouan Dam, on the Nile, being one of his most remarkable achievements. Was M.P. for North Paddington, 1887-1905.

Airdale, Lord (1830-1911), was head of the well-known firm of Kitson & Co., of Leeds, locomotive builders, iron and steel manufacturers, and engineers. A prominent Liberal, who, as Sir James Kitson, Bart., sat in the House of Commons for many years as member for the Colne Division. Was a personal friend of Mr. W. E. Gladstone. Made baronet in 1886, and raised to the peerage in 1907.

Airy, Sir George (1817-1881), for many years astronomer royal, and the first to demonstrate the theory of the rainbow.

Akbar the Great, Mogul emperor from 1556-1605, and a monarch of great enlightenment and power.

A Kempis, Thomas (See Kempis).

Akenside, Mark (1721-1770), the son of a butcher of Newcastle-on-Tyne, a poet of some note in his day, whose "Pleasures of the Imagination" is still read. He was also a physician, and practised first in Northampton and then in London.

Alexander Douglas (See Chisholm Viscount).

Alaric, the famous chief who led the Visigoths against the Romans, and afterwards invaded both Greece and Italy. He took Rome in 410, died the following year, and was buried with a vast treasure in the bed of the River Busento, and so that the Romans might not discover his remains, the slaves who buried him were put to death.

Alban, St., who flourished in the latter part of the

3rd century, was born at Verulamium (where St. Albans now stands) and served as a soldier under Diocletian at Rome. Later he was converted to Christianity, and was for a time a renowned preacher of that religion, finally suffering martyrdom. Of a king of the Mericans, built a monastery to his memory near Verulamium, four or five hundred years later. St. Alban's Day in the Calendar of the Roman Church is June 22nd, and in that of the Anglican Church June 17th.

Albani, Madame, b. 1852, near Montreal. Made her first appearance on the lyric stage in England at Covent Garden in 1872. Married Mr. Ernest Gye in 1876, was for many years a leading prima donna, achieving great celebrity as *Isa* in "Lohengrin." As a concert room singer also reached high rank.

Albemarle, Duke of. (See Monk.)

Alberoni, Cardinal (1664-1752), minister of Philip of Spain, was an Italian of humble birth. For some years he exercised great influence. His object was to restore to Spain her ancient power, but he was too reckless in the conduct of foreign affairs to succeed. Plunging into war with Austria, he found himself confronted with the Quadruple Alliance—Austria, England, Holland, and France—and his plans were defeated. He was banished from Spain and died in his native town of Piacenza, leaving great wealth.

Albert, Prince Francis Augustus Charles Emmanuel, Consort of Queen Victoria (1819-1861). On his marriage with the Queen in 1840 Parliament granted him an income of £30,000 a year. The Prince adapted himself with considerable success to the difficulties of his position, and gradually secured the confidence and esteem of statesmen and public alike. He devoted himself to artistic pursuits and greatly interested himself in Science and Industry. The Great Exhibition of 1851 owed much of its success, if not its origin, to his efforts. The title of Prince Consort was conferred upon him in 1857. He was attacked by typhoid fever in December, 1861, and died after a very short illness. The Albert Memorial in Hyde Park forms a splendid national tribute to his memory.

Albertus Magnus (1193- some authorities say 1205-1280) was a distinguished German philosopher, and voluminous writer on the occult sciences. Bishop of Ratisbon from 1260. His dabblings in alchemy and astrology gained him wide notoriety.

Alcaeus, a Greek lyric poet of the 7th century B.C.

Alcester, Baron Frederick Seymour (1827-1895), commanded the British fleet that successfully bombarded Alexandria in 1882.

Alciades (b. circa 450 B.C., treacherously killed in battle at Melissa, Phrygia, B.C. 404), the celebrated Athenian statesman and general, pupil and friend of Socrates. Handsome, talented, capricious, and imperious; he sided with the Spartans after reaching distrust in Athens. Later he went over to the Persians, but soon returned to the Athenian army, winning brilliant battles against the Peloponnesians and Persians, but suffering defeat at Andros.

Alcuin (735-804) was an ecclesiastic and writer of much prominence. He sustained successive important offices in the English Church, and later went to France on the invitation of the Emperor Charlemagne, from whom he enjoyed much favour. His last years were passed at Tours, in the Abbey of St. Martin. The writings he left behind him were mainly theological and historical, and he is generally credited with the composition of the famous "Zarling's Books," which bear the name of Charlemagne.

Aldhelm, St., an English missionary and scholar of the 7th century, who was successively Abbot of Malmesbury and Bishop of Sherborne.

Aldred, a powerful ecclesiastic of the 11th century in great favour with the Conqueror, whom he crowned. Was Bishop of Worcester (1044-1060), and Archbishop of York (1060-69).

Alexander, Sir George (b. 1828); well known as an actor manager; made his first appearance in 1879 at Nottingham. In 188x was engaged by Irving, and for some years held a prominent position in the Lyceum company. In 1891 became manager of the

St. James's Theatre in London, achieving many successes. Elected a member of the London County Council, 1907. Knighted, 1911.

Alexander I. of Russia (1777-1825) succeeded his father, Paul I., and played an active part in the Napoleonic wars, joining the coalition against him in 1805 and again in 1812, and often taking active part in the military movements.

Alexander II. of Russia (1818-1881), succeeded his father, the Emperor Nicolas, in 1855. In 1861 he emancipated 23 millions of serfs. On March 13, 1881, was assassinated by bombs thrown beneath his carriage in St. Petersburg by Nihilists.

Alexander I. of Serbia (1876-1903), was the son of King Milan and succeeded his father on the latter's abdication in 1880, the rule of the country being carried on under a Regency until 1893. Alexander and his Queen Draga were both assassinated by military revolutionaries in 1903.

Alexander the Great (356-323 B.C.), King of Macedon, succeeded his father Philip in 336 B.C., and from the first showed himself fitted for mighty military exploits. He conquered in turn the Thians, the Persian Satraps, overthrew Darius, overran Syria and Phœnicia, possessed himself of all the cities along the shores of the Mediterranean, conquered Egypt, and founded Alexandria, and finally retired upon Babylon, intent on building up an Empire of which that ancient city should be the capital, but died eleven days later.

Alexandra, Queen (b. 1844), d. of Chris IX. of Denmark, married to the Prince of Wales (afterwards Edward VII.) on March 10, 1863. Queen from Jan. 22, 1901, to May 6, 1910.

Alexeff, Admiral (b. 1814), was Viceroy of the Russian Dominions in the Far East at the outbreak of the Russo-Japanese War in 1904.

Alfieri, Count Vittorio, the Italian poet (1749-1803), was the author of twenty-one tragedies and six comedies, and did much to revive the greatness of the Italian tragic drama.

Alfonso the Wise (1222-1284), a celebrated King of Leon and Castile, founder of the legal code which became the basis of Spanish jurisprudence, a liberal patron of literature and science, particularly of astronomy; dethroned by his son Sancho in 1282.

Alford, Henry (1809-1871), an eminent theologian and writer, Dean of Canterbury, and the first editor of the *Contemporary Review*.

Alfred the Great (849-901), succeeded his father, Ethelwulf, king of the West Saxons, at the age of twenty-two, and found himself in conflict with the Danes from the outset. After six years of unsuccessful effort he took refuge in the Isle of Athelney, but the following year was able to attack the Danes in great force at Edington (Eighthand), and was completely victorious. Subsequently he had some years of peace, and during that time did much to lay the foundations of the country's future greatness. Later, the Danes again invaded the country, and the rest of Alfred's reign was occupied in conflict. Alfred died at the age of fifty-two, after a reign of thirty years, and was buried at Winchester. He codified the laws, and gave England her first fleet.

Allison, Sir Archibald (1792-1869), was the author of a voluminous *History of Europe* from 1789 to 1815—a vast storehouse of facts rather ponderously handled—and of a continuation, to Napoleon III.

Albutt, Sir Thomas Clifford, K.C.B., Regius Prof. of Physic, Cambridge Univ., since 1892 (b. 1861). Inventor of the Short Clinical Thermometer and author of numerous works on medicine and surgery.

Allen, Charles Grant (1848-1899), a popular writer and novelist possessing a wide range of subjects, writing equally well on science, literature, and art, and achieving quite in the field of fiction.

Allerton (Rt. Hon. W. Lawrie Jackson), 1st Baron (b. 1840) was for many years successfully engaged in the leather trade at Leeds; entered Parliament, was Financial Secretary to the Treasury for several years, and Chief Secretary for Ireland in 1891-1892. An active and distinguished Chairman of the Great Northern Railway Company, he was raised to the peerage for his political services in

King Edward VII.'s Coronation year. Father of F. S. Jackson, the cricketer.

Alleyne, Edward (1565-1626), a famous actor, contemporary of Shakespeare and founder of Dulwich College.

Alma-Tadema, Sir Lawrence, R.A. (1836-1922), the son of a Netherlands notary, was educated at Antwerp, and came to England in 1869, where he soon made a name for himself as a painter of classical pictures of great beauty of colour and delicate design. He was elected R.A. in 1878. Knighted in 1892, and was a member of the Order of Merit. An exhibition of his works was held in 1913.

Alured (or Alfred) of Beverley was one of the early English historians, and flourished in the 12th century. His history of England was written in Latin, and covers the (chiefly fabulous) chronicles of the period from the Roman occupation to Henry I. It remained in MS. until 1716.

Alverstone, Baron Sir Richard Webster (b. 1842); educated at Charterhouse and Trinity College. Admitted to the Bar 1874, made Q.C. 1878, elected M.P. for Launceston in 1885, and became Attorney-General the same year; was re-appointed Attorney-General in 1891, and again in 1895. Master of the Rolls in 1902, in which year he was made a peer and Lord Chief Justice. Resigned 1913.

Ambrose, Saint, Bishop of Milan in the reign of Theodosius, whom he lured from the Church because of his massacre of the Thessalonians.

Amerigo Vesputi (1452-1512), an Italian navigator who made important voyages of discovery. In 1499 he reached America and explored the coast line for some hundred leagues, returning to Spain the same year. It was unknown to him that Columbus had landed in America the year before; that discovery being kept a State secret, so that Vesputi's narrative was the first information publicly given of the discovery of the continent.

Amery, Leopold C. M. S., M.P. (b. 1873); son of C. F. Amery, of the Indian Forest Department—born at Gorakhpur, educated at Harrow and Oxford. On Times staff since 1899, edited the *Times History of the War in S. Africa*, 1899-1900.

Amherst, General (1717-1797), won distinction in the conquest of Canada in association with Wolfe.

Ampère, André Marie (1775-1834), a celebrated French mathematician who devoted himself successfully to the study of electricity and magnetism, and was the first to propound the electro-dynamic theory.

Amphill, Baron (b. 1810), was private secretary to Mr. Chamberlain for some years, and in 1900 was appointed Governor of Madras. Became Viceroy and Acting Governor-General of India in 1904-1905 during Lord Curzon's absence. Son of the first Lord Amphill, ambassador to Germany.

Amundsen, Roald (b. 1873), Norwegian explorer, after graduating at Christiania University went to sea in sealing and whaling ships to gain polar experience, and in 1897 was a member of the Gerlach expedition. In 1906 navigated the North-west passage; in 1911 set out ahead of Captain Scott on a South polar quest, and early in 1912 the news came that he had succeeded in reaching the South Pole.

Anacreon (580-475 B.C.), the celebrated Greek poet whose Odes hold a high place in poetic literature.

Anaxagoras (500-428 B.C.) was a famous Greek philosopher of the Ionic School, among whose pupils were Socrates, Pericles, and Euripides.

Anaximander, a celebrated Greek philosopher (610-547 B.C.). He is said to have been the first to note the obliquity of the ecliptic, invented geographical maps, and laid down the theory that the moon shone with light borrowed from the sun.

Anaximenes, a Greek philosopher of the Ionic school, flourished 6th century B.C.; friend of Anaximander; regarded air as the principle of things.

Anaximenes (for Leontaeus), son of Aristotle (lived in 4th century B.C.); rhetorician, historian, and companion of Alexander the Great.

Andersen, Hans Christian (1805-1875). Perhaps the most gifted writer of fairy tales that the world has known. His *Tales for Children*, the *Wild*

Swans, *The Improvisatore*, and *The Ice-Maiden* are the daintiest productions in that class of literature; and his *Story of my Life* is as interesting as his fairy tales. Born and died in Denmark.

Anderson, Elizabeth Garrett (b. 1836), one of the first Englishwomen to enter the medical profession. Practised in London for many years. In 1900-10 was Mayoress of Aldeburgh, her native town.

Anderson, Mary (b. 1859) of Anglo-German parentage and Californian nativity, was for some years an actress of celebrity, appearing in America and England with great success. Retired from the stage in 1889 on marrying Mr. Antonio de Navarro.

Andrassy (1823-1890), a prominent Hungarian statesman, who, after being in exile from 1848 to 1851, was advanced to a leading position and was Prime Minister in 1867.

André, John (1751-1780) was an English officer who, while engaged on the British side in the American War of Independence, was arrested as a spy by Washington, tried by court-martial, and executed.

It is generally believed wrongfully, from a misapprehension of the facts. Washington himself declared André to be more unforlunately than a spy. In 1821 André's remains were brought from America and interred in Westminster Abbey.

Andrea del Sarto (1480-1531). This celebrated son of a Florentine tailor was one of the great Italian artists of his time, known as the "faultless painter." Most of the famous galleries of the world contain examples of his magnificent fresco and other painting, mainly dealing with religious subjects.

Andrée, Salomon August, a Swedish explorer who attempted in 1807 to reach the North Pole by balloon, but, except for a message by pigeon despatched two days after his ascent, was never heard of again.

Andrews, Lancelot (1525-1626), a distinguished English prelate who was first Bishop of Ely, Chichester, and Winchester, and one of the translators of the authorised version of the Bible.

Angelico, Fra (1391-1442), a famous Italian painter of religious subjects, mostly in the form of frescoes, of which the best examples are at Florence.

Angelo, Michael. (See Michael-Angelo.)

Anglesey (Henry Paget), first Marquis of (1768-1854), a celebrated British general, who led the cavalry at Waterloo and achieved much distinction by his tact and bravery.

Anne Boleyn. (See Boleyn, Anne.)

Anne, Queen (1604-1714), Queen of Great Britain and Ireland from 1702 to the time of her death, was a daughter of James II., and succeeded William III., her cousin. During her reign, England, in alliance with Austria, Holland, Prussia, Savoy and Portugal, entered upon the War of the Spanish Succession. It was in this war that Marlborough achieved his great victories, and his wife, Sarah, for a long time was Anne's favourite, and wielded an immense influence at Court, the Queen being too weak in self-reliance to take much interest in her own affairs. Anne's reign has been called the Augustan Age of Britain because of the many eminent men of letters who flourished during that period. She was the last of the Stuarts to occupy the British throne, and the first monarch to be styled Sovereign of Great Britain, the union between Great Britain and Scotland dating from 1707. Anne was married to Prince George of Denmark, and their numerous progeny all died in childhood.

Anselm, Archbishop of Canterbury (1033-1109), was a native of Aosta, and succeeded Lanfranc as English Primate. He was in serious conflict with William Rufus on the question of ecclesiastical rights, and for a time suffered exile. Under Henry I. he regained power, making a compromise with that monarch which enabled him to carry on his theological work in comparative harmony. He died at Canterbury, and was canonised later, his day being celebrated in the Roman Church on April 21st.

Anson, Lord George (1693-1761), a navigator of great eminence, whose "Voyage Round the World" is still a popular book of adventure. He won many victories, obtained a peerage, rose to full Admiral's

rank in the Navy, and served two terms as First Lord of the Admiralty.

Anson, Sir Wm. R., Bart., P.C., M.P. (1733-1794). Represented Oxford University in Parliament from 1781, was Parliamentary Secretary to the Board of Education, 1792-1795, and is the author of books on the Law of Contract and Constitutional Law.

Anstey, Christopher (1724-1805), was a poet and wit of repute, whose "New Bath Guide"—in which the fashionable frequenters of Bath, their habits and surroundings, were depicted with much shrewd humour—was a great success.

Antonelli, Cardinal (1806-1876), was the first Premier of the first Constitutional Ministry of Pius IX. In the long trouble between the Pope and the French, and during the Garibaldian campaign, he had a very difficult part to play, but he displayed considerable diplomatic power, and it was he who wrote requesting the Italians to occupy Rome.

Antoninus Pius, Emperor of Rome from A.D. 138 to 161, was the successor of Hadrian, and formed an agreeable contrast to most of the Roman Emperors, in that he endeavoured to govern more with an eye to the public well-being than his own personal pleasure. It was during his reign that the wall between the North and Clyde was built.

Antony, Mark (circa 83-30 B.C.), celebrated Roman triumvir and general; a prominent adherent of Caesar; but engaged in intrigues after the latter's death, and was opposed by Brutus and Cassius. His association with the Egyptian Queen Cleopatra made him a prominent figure of historic romance. Committed suicide after defeat by Octavian.

Antony, St. (or Anthony) (circa 251-356), was a native of Upper Egypt, and according to his own account spent much time in conflict with the devil. He is one of the best known saints of the Roman calendar, and his festival is on January 17th. He was believed to give relief to those who appealed to him when suffering from erysipelas, from which tradition the name St. Anthony's Fire is given to the disease.

Apelles, the famous Greek painter, flourished in the time of Alexander the Great, whose friendship he enjoyed. His "Aphrodite Anadyomene," painted for the temple of Asclepius in Cos, has been accounted the most perfect picture of antiquity.

Aquinas, Thomas (1225-1274), the "Father of Moral Philosophy," was a native of Southern Italy and came of a noble family. In 1243 he joined the Dominicans, and the remainder of his life was spent in religious pilgrimages and disputations. In 1263 he visited London. He left behind him numerous theological and philosophical writings of great power. He was canonised in 1323.

Arabi Pasha (1839-1911), was the leader of the Egyptian rebellion of 1881, and defended Alexandria against the British fleet. Later he suffered defeat and was captured at Tel-el-Kebir, was banished to Ceylon, but released in 1907.

Arago, François Jean Dominique (1786-1853), a French astronomer and natural philosopher of great eminence, whose researches added much to our knowledge of electricity and magnetism. His expositions of the polarisation of light did much to advance that branch of science. In the field of astronomy he also achieved much distinction. He was awarded the Copley Medal of the British Royal Society. Arago was an ardent Republican, and was made a member of the Provisional Government after the Revolution of 1848, becoming Minister of War and Marine. On the accession of Louis Napoleon he refused to take the oath of allegiance.

Aram, Eugene (1704-1759), was a schoolmaster of considerable learning, and lived at Knaresborough, in Yorkshire, from 1734 to 1745, in which latter year a friend of his, one Daniel Clark, suddenly disappeared. Soon after, Aram also quitted Knaresborough. In 1759, while Aram was teaching in a school at Lynn, a skeleton was discovered at Knaresborough, and it was declared to be that of Daniel Clark. This was denied by a man named Houseman in such a manner as to cause suspicion to fall upon him, and he was arrested, whereupon he

confessed that Clark had been murdered in his presence by Aram, and that his body would be found in St. Robert's Caves. Search disclosed the actual skeleton, and Aram was also arrested, tried at York, found guilty, and executed. His defence was powerful and eloquent, but availed him nothing. Lord Lytton's novel, *Eugene Aram*, and Toni Hood's dramatic poem, *The Dream of Eugene Aram*, effectively deal with the romantic story.

Arbuthnot, John (1667-1735), a prominent wit, doctor, and littérateur of the Queen Anne period. His *History of John Bull* is his best known work.

Arch, Joseph (b. 1826), the founder of the National Agricultural Union, was for many years an agricultural labourer, and championed the cause of his class with great ability. Sat for some years as M.P. for N.W. Norfolk, finally retiring in 1900.

Archer, Fred (1857-1886), a favourite jockey for several years, winner of many leading races, his first Derby falling to him in 1877.

Archer, William (b. 1850), educated at Edinburgh University, and settled in London in 1878, acting as dramatic critic of the *London Figaro* from 1879 to 1881. From 1881 to 1905 dramatic critic of *The Herald*, now of the *Spectator*, and has published many volumes on dramatic matters. The first to make Ibsen known to the British public.

Archimedes (287-212 B.C.), a Greek geometrician and philosopher of remarkable power, to whom we are indebted for the discovery of the principles of the lever and of specific gravity, and for the invention of the famous archimedean screw.

Ardlau, Baron (1840-1915), the head of the Guinness family of Dublin, and owner of the Muckross Abbey Estate, Kilmaree, was M.P. for Dublin 1868-1869 and 1874-1880, created baronet in 1868, and raised to the peerage in 1880.

Argand, Aime (1733-1803), inventor of the lamp bearing his name, which for the first time introduced a current of air to penetrate and increase the power of the flame, by using a chimney glass and circular wick. He was a Swiss physician.

Argyll, Duke of (1845-1914), married H.R.H. Princess Louise in 1871; was for some time (as Marquess of Lorne) M.P.; Governor-Gen. of Canada from 1878 to 1883; Gov. of Windsor Castle, 1897-1901. Wrote a *Life of Palmerston*. Succeeded his father in 1901.

Argyll (George Douglas Campbell), Duke of (1823-1900), a prominent statesman, scientist, and writer, and a member of several Liberal Governments, down to 1881, when he declined to follow Mr. Gladstone on the Home Rule question. His books *The Reign of Law* and *The Philosophy of Belief* rank high amongst books of their class.

Argyll, Marquis of (Archibald Campbell) (1598-1661), was a strong supporter of Charles I. in the Civil War, and opposed Cromwell to the last, but his open support of the Covenanters and other acts caused him to be impeached in 1661, when he was found guilty and executed.

Ariosto, Ludovico (1474-1533), the author of *Orlando Furioso*, was one of the most celebrated of the Italian poets. In addition to his famous epic he wrote many comedies, satires and poems.

Aristeides (or Aristides), a Greek writer, and founder of the school of prose romance; flourished in the 2nd century B.C. His *Mæstian Tales* are among the most celebrated works of fiction.

Aristides, the Athenian general, was of noble descent, and first achieved fame at the battle of Marathon, 490 B.C. He was renowned not less for his valour than for his scrupulous honesty and a desire to do justice to others; hence he was surnamed "the Just." He took part in many campaigns and missions, was sometimes high in favour, at other times suffered banishment, but he never swerved from the path of duty.

Aristippus (344-335 B.C.) founded the Cyrenaic school of philosophy, which taught that sensual pleasure was the only happiness. He was a native of Cyrene, in Africa, but became a pupil of Socrates, and settled in Athens.

Aristophanes (448-380 B.C.) was one of the

foremost Athenian play-writers and the greatest of the Greek comic poets. He is said to have composed fifty-four plays in all. Eleven of these only have survived. They are full of satire, and deal unsparingly with the people and institutions of his time.

Aristotle (384-322 B.C.). This, the most famous of all the Greek philosophers, was a disciple of Plato, after whose death he retired from Athens, and later on undertook the education of Alexander, afterwards known as Alexander the Great. Subsequently at Athens he established the Lyceum and founded the Peripatetic school of philosophy, which has had great influence upon the expansion of thought.

Arkwright, Sir Richard (1732-1792), was a native of Preston, and in early life a barber and travelling hairdresser. Becoming interested in mechanical problems, he set himself the task of inventing an improved cotton-spinning machine. Hargreave's spinning-jenny was then the leading machine, but the yarn it produced could only be used for warp; it was not compact enough for weft. Arkwright therefore experimented until, by adopting an arrangement of rollers that moved with different velocities, he succeeded in perfecting his 'spinning-frame,' which accomplished the desired end. He took out his first patent in 1769, and, entering into partnership with Mr. Jedediah Strutt, of Derby, became a manufacturer on a large scale, in 1771 establishing the first spinning-mill worked by water-power. He was knighted in 1786.

Armstrong, Edward (1817-1896), a well-known R.A. and historical painter, who contributed some of the frescoes in the Houses of Parliament, and achieved a considerable reputation as a painter of battle scenes.

Armstrong, H. E. (1828-1908), one of the most distinguished of modern British sculptors, was the sculptor of the south and east sides of the podium of the Albert Memorial, of external decorative work at the Colonial Offices, and a vast number of other works in marble, wood, bronze, and silver. Was elected R.A. in 1879.

Armstrong, Lord (1810-1900), was a solicitor at Newcastle, when his attention was drawn to certain mechanical problems, and he devoted himself to the invention of the hydraulic crane and other machinery for the better utilisation of water power. During the Crimean War he studied the subject of guns, and produced his famous "Armstrong gun," the biggest that had up to that time been constructed. He introduced many improvements in gun construction, and in 1859 was appointed engineer of Rifle and Ordnance, and received the honour of knighthood. Later his immense works at Elswick became the chief establishment in this country for the manufacture of guns and ships of war. He was raised to the peerage in 1887.

Arns, Dr. J. A. (1770-1778), an English musical composer of considerable merit, and of great popularity in his day. He composed numerous ballad operas, and at Drury Lane, Covent Garden, and Vauxhall organised the chief performances for long periods. His best known opera was "Artaxerxes," and his most popular songs were "Rule, Britannia!" and "Where the Bee Sucks."

Arnold, Sir Edwin (1832-1904), educated at University College, Oxford, where he gained the Newdigate Prize in 1852; was at the Government Sanskrit College, Poona, for some years, and, returning to England in 1861, became connected with the *Daily Telegraph's* editorial staff. He was the author of the "Light of Asia" and numerous other poems, and wrote several books of travel that were very popular. Created K.C.I.E.

Arnold, Matthew (1822-1888), son of Dr. Thomas Arnold, achieved a high reputation as poet and critic. In 1857 he was appointed Professor of Poetry at Oxford, where in 1843 he had won the Newdigate Prize, and in 1845 had been elected Fellow of Oriel. For some years filled the position of Government Inspector of Education. As the propounder of the principles of "sweetness and light," as well as by his graceful verse, he secured a high place amongst the literary men of the Victorian era.

Arnold, Thomas, D.D. (1795-1842), headmaster of Rugby from 1828 to his death. His influence at Rugby was such as to give that institution a supreme position among English public schools. A man of intense spiritual feeling, of a sympathetic and lovable nature, yet possessed of all the necessary attributes of scholarship, he was greatly esteemed and venerated. His "Lectures on Modern History," delivered at Oxford, were of great merit, and were subsequently published. He was the author also of a History of Rome.

Arnold-Forster, The Rt. Hon. H. O., M.P. (1855-1909), grandson of Dr. Arnold, and adopted son of the late Rt. Hon. W. E. Forster, was educated at Rugby and Oxford, and for some years was a director of Cassell & Co., Ltd. Was elected for West Belfast in 1902, and from the first showed a keen interest in the public services. Was appointed Parliamentary Secretary to the Admiralty in Mr. Balfour's Ministry in 1900, and became Secretary for War in 1903. Was the author of numerous works bearing on public questions. In 1907 published *Letters on Socialism*.

Arnott, Nell (1788-1874), was a native of Arbroath, and, after studying at Aberdeen, settled in London and acquired fame as a doctor and practical scientist. He was a prolific writer on Natural Science, and invented many useful appliances.

Arrol, Sir William (1830-1913), the well-known contractor and engineer, whose firm built the Tay, Forth, and London Tower Bridges. Originally a pleicer in a cotton-mill, and later a working blacksmith. He was knighted in 1890, and represented South Ayrshire from 1895 to 1906, as a Liberal Unionist, retiring at the latter date from Parliamentary life.

Artaxerxes was the name borne by several ancient Persian kings, some of whom achieved great distinction. The first Artaxerxes was the son of Xerxes, and reigned from 465 B.C. for 40 years; he was succeeded by the second Artaxerxes, who was the son of Darius II., and reigned 45 years. The last to bear the name of Artaxerxes was the founder of the Sassanid dynasty, A.D. 223.

Artemus Ward. (See *Brown, C. F.*)

Arthur, a famous British chieftain and supposed king, who is stated to have flourished in the 6th century, and around whose life many beautiful legends have been written, including Lord Tennyson's "Idylls of the King."

Arundel, Thomas, Archbishop of Canterbury, in the reigns of Richard II. and Henry II., previously Bishop of Ely and Archbishop of York, and for a time Lord Chancellor. An active politician and bitter enemy of heresy.

Ashbourne, Baron (1837-1913), a prominent political lawyer, who was Lord Chancellor of Ireland in four Conservative Governments.

Ashmole, Elias (1673-1693), founder of the Ashmolean Museum, Oxford, was a noted antiquary and astrologer, and a native of Lichfield.

Aske, Robert, the leader of the Pilgrimage of Grace, directed against the Reformation, was a man of power, and might have been a serious danger to Henry VIII., had he not accepted the king's pardon for himself and followers. Advantage was taken of his later rising, in which he had no share, to secure his arrest and execution in 1537.

Askew, Anne (1521-1546), was one of the Protestant martyrs who were burned at the stake with three others in Smithfield. She was a Lincolnshire lady who clung to the Protestant faith, despite the fact that her husband and father were avowed Romanists.

Askwith, Sir George Ranken, K.C.B. (b. 1861), appointed in 1911 Comptroller-General of the Commercial, Labour, and Statistical Departments of the Board of Trade, having been for some years previously engaged in arranging important trade, railway, shipping, and other disputes.

Assaia, an Ionian woman of great intellectual power, beauty, and influence, the companion of Pericles, was born at Miletus, but went to Athens and there became distinguished.

Asquith, The Right Hon. H. H., K.C., M.P. for East Fife since 1880 (b. 1852 at Morley in Yorkshire), Prime Minister and First Lord of the Treasury since 1908, was educated at the City of London School and Balliol College, Oxford; afterwards called to the Bar, entered Parliament in 1886 and in 1892 appointed Home Secretary, Chancellor of the Exchequer 1905-8. His Premiership has been marked by a strong forward policy, of which the Parliament Bill abolishing the veto of the Lords, the Home Rule Bill, and the Welsh Church Bill are prominent examples. Assumed in addition to the Premiership the post of War Minister on the resignation of Col. Seely, March, 1914, relinquishing it to Lord Kitchener on the outbreak of war in the following August.

Asser, John, a Welsh monk of the 10th century, noted for having been tutor, friend and biographer of King Alfred. He was made bishop of Sherborne.

Astbury, Samuel (1648-1743), was the uncle of Josiah Wedgwood, and towards the middle of the 18th century made great improvements in the pottery manufacture at Burslem.

Astor, John Jacob (1763-1843), the founder of the Astor family of millionaires, was a native of Heidelberg, and emigrating to America went out to the North-West, where, being trading in furs, soon building up a large fortune which he wisely invested in New York real estate, which rapidly increased in value, enabling him to leave his son William £1,000,000, and £70,000 for the founding of a public library.

Astor, Hon. William Waldorf (b. 1848), is the son of the second John Jacob Astor, the American millionaire, but for many years has resided in this country, and become a naturalised British subject. He is the author of several novels including *Soyez and Pharaoh's Daughter*, and for many years has owned the *Daily Mail Gazette*. From 1882 to 1885 was United States Minister to Italy. Has given £20,000 to Oxford University.

Athanasius, St. (296-373), was Bishop of Alexandria and Primate of Egypt. He spent much of his time in bitter theological controversy, and was condemned several times for his opinions, and finally driven from Alexandria; taking refuge in a desert, he wrote numerous letters in support of Christian doctrine, and under Emperor Julian was recalled to Alexandria. The Athanasian Creed is supposed to reflect his belief, but was probably not written by him.

Athelstan (895-940), grandson of Alfred the Great, was crowned King of England in 925, and was the first ruler of all England.

Atterbury, Francis (1662-1739), a noted churchman and Jacobite, who for refusing to sign the declaration of allegiance to George I. and other acts was condemned to perpetual banishment.

Attila (406-453), King of the Huns, was a warlike leader, who achieved many conquests over the Roman forces, committing great ravages and laying large tracts of country waste. He marched through Germany and Gaul, and died as he was preparing for another invasion of Italy.

Auber, D. F. E. (1782-1871), was a distinguished French composer of light operas. Many of his works are still performed, such as "Masaniello," "Fra Diavolo," "Le Domino Noir," and "Les Diamants de la Couronne," etc.

Audley, Thomas, Lord Chancellor of England, temp. Henry VIII. Previously Speaker of the House of Commons (1559), and Lord Keeper (1559) in succession to Sir Thomas More.

Audubon, John James (1781-1851), was an artist and ornithologist of great ability, who published the *Birds of America*, as the result of fifteen years' enthusiastic labour. It is a colossal work of ten volumes, in which all the figures are depicted life-size.

Augustine (354-430) was Bishop of Hippo for over thirty years. He was born in Africa, but went to Rome, and under the influence of St. Ambrose became deeply religious, writing much on doctrinal subjects, and his works are held in great esteem.

Augustine, St., was the missionary monk who was sent to Britain by Gregory the Great in 597. He succeeded in converting King Ethelbert, after which

he made good progress with the people generally, and became the first Archbishop of Canterbury. He died in 604.

Augustus, Gaius Octavianus (63 B.C.-14 A.D.), was the first Emperor of Rome, succeeded Julius Caesar. After a triumvirate of twelve years, in which he was associated with Mark Antony and Lepidus, he became supreme ruler and for forty-five years exercised a beneficent and powerful sway. He was a devoted patron of Horace and Virgil. The Augustan Age is still held among the most memorable in the history of letters.

Aurelian, Lucius Claudius Domitius (212-275), a distinguished general under Claudius II., whom he succeeded as Emperor. Originally a private soldier, he rose to the highest possible position, and was called the "Restorer of the Roman Empire."

Aurelius, Marcus Antoninus (121-180), Emperor of Rome, a man of great intellectual power, and a disciple of the Stoics. He died while attempting to suppress a rebellion fomented by his wife, Faustina.

Aurangzeb, the last of the Great Moguls, Emperors of Hindustan; succeeded his father Shah Jehan in 1658 and reigned until his death in 1707. He was a ruler of ability, and greatly extended his empire by conquest, but his zeal for Mohammedanism aroused the hatred of the Hindus, and when he died the disruption of the vast Mogul territory followed rapidly.

Austen, Jane (1775-1817), an English novelist regarded by many as the ablest female fiction writer that England has produced. Lord Macaulay, Scott, and other critics have awarded her works the highest possible praise.

Austin, Alfred (1835-1913), Poet Laureate, was educated at London University, and in 1864 published a satire called *The Season*, which contained some vigorous verses of undoubted vigour. For some years he was connected with *The Standard* as leader writer, and also wrote for the *Quarterly Review*. Between 1870 and his death some half-dozen volumes of poems were issued by him, all displaying a deep love of nature, and no little of the true poetic feeling. He was appointed Laureate in 1866, after the office had been vacant four years.

Autolycus, a Greek astronomer of the 4th century, B.C., whose writings on the fixed stars and the revolving sphere were valuable contributions to astronomical science.

Avebury, Rt. Hon. Lord (1834-1913), banker, scientist, and politician. Best known to the world under the name he bore until 1900 of Sir John Lubbock. His writings cover a considerable field, and are marked by a keen observation of natural phenomena, and animal and vegetable life, and his style is at once sympathetic and lucid. As a member of the House of Commons he was identified with several important legislative measures, and had the credit of securing the statutory observance of Bank Holidays.

Aytoun, William Edmonstone (1813-1865), collaborated with Sir Theodore Martin in the "Bon Gaultier" Ballads, and was the author of "Lays of the Scottish Cavaliers." He was a native of Edinburgh.

B

Babbage, Charles, eminent mathematician (1791-1871). Was Professor of Mathematics at the University of Cambridge, and attracted much attention by inventing a calculating machine, which, however, only partially realised its designer's aims, and never came into use. His works on *Logarithms* and *On the Economy of Manufactures and Machinery* were highly valued, and his autobiographical *Passages from the Life of a Philosopher* contains much that is interesting.

Baber (1483-1530), founder of the Mogul dynasty which ruled Northern India for three centuries, and a descendant of Tamerlane.

Babington, Anthony, a Derbyshire Roman Catholic who headed a conspiracy against the life of

Queen Elizabeth, and was arrested and executed at Tyburn in 1586.

Bach, Johann Sebastian (1685-1750), one of Germany's greatest musical composers, his "Passion Music," "Preludes and Fugues," and other compositions being unrivalled in their class.

Bacon, Francis, Lord Verulam, and Viscount St. Albans (1561-1626), was one of the greatest of English philosophers and statesmen, who was Attorney-General to Elizabeth, and under James I. became Lord Chancellor. His political career was tarnished by certain acts of corruption, for which he paid the penalty, but his writings were marked by keen insight, brilliancy of language, and a depth of thought which place them in the first rank of philosophical literature. His *Novum Organum* and his *Essays* are splendid monuments of learning and wisdom.

Bacon, John (1740-1799), a British sculptor of eminence, to whom we owe some notable monuments, including those to Lord Chatham in Westminster Abbey and the Guildhall, and that of Dr. Johnson in St. Paul's.

Bacon, Sir Nicholas (1510-1579), was the father of Francis Bacon, and held the position of Lord Keeper to Queen Elizabeth with much distinction.

Bacon, Roger (1214-1294), generally alluded to as "Friar" Bacon, was a man of remarkable genius. The invention of gunpowder has been ascribed to him, and he is also said to have invented the air-pump, and was acquainted with the principle of the telescope. For a long time he was looked upon as an alchemist, and only in modern times have his discoveries been rightly appreciated.

Baden-Powell, Lieut.-Gen. Sir Baden F. S., C.B., C.V.O. (b. 1857), attained great popularity by his brilliant defence of Mafeking during the Boer War.

After the war he organised the South African Scouts, and was later appointed Inspector-General of Cavalry in 1903. Founded the B.P. Scouts organisation in 1908.

Baffin, William (1584-1622), was a distinguished explorer who, in 1616, discovered the north-east coast of British North America from Greenland, and bears his name.

He was killed in the service of China.

Bagshot, Walter (1810-1877), was editor of the *Illustrated London News* from 1855 to his death, and made a great reputation as a writer on financial subjects.

Bailhache, The Hon. Sir C. M., Judge of the High Court since 1911 (b. 1859). Educated City of London School and London University.

Bailey, Sir Aba (b. 1804), a Rand millionaire. He presented the Salvation Army with an estate of 80,000 acres in South Africa. He was born in Cape Colony and fought in the Boer War with the South African Light Horse, which force he largely helped to finance. Is proud to be known as one of Kruger's "traitors," who was released from prison on payment of a fine of £2,000.

Bailey, P. J. (1810-1904), author of *Poems*, a poem which ran through many editions. The poem was published when the author was twenty-three, but his future work did not fulfil his early promise.

Baillie, Joanna (1702-1851), a Scotch poetess and dramatist of considerable merit, who, in her day, was highly extolled. Her dramas are marked by much beauty of expression and nobility of thought, but the "Grecian" style rather than the stage. Sir Walter Scott greatly admired Miss Baillie's works. She lived in Hampstead for over half a century.

Baily, E. H. (1788-1857), a sculptor of many successful monuments and sculpture figures. He was the sculptor of the Nelson statue, and of the bas-reliefs on the south side of the Marble Arch. Some of his exhibited pieces, such as "Eve at the Fountain," "Girl preparing for the Bath," and "The Graces," were much admired.

Baily, Francis (1774-1844), an astronomer, and one of the promoters of the Astronomical Society, who devoted himself with great assiduity and success to the various branches of his favourite science.

Bain, Alexander (1818-1903), a psychologist of great attainments, who wrote *The Senses and the*

Intellect and The Emotions and the Will, two books which give him a high position as an original thinker. He occupied the Chair of Logic in the University of Aberdeen for twenty years.

Baird, Sir David (1757-1829), a British general who served under Moore at Corunna and was commander of the force which captured Cape Colony in 1806.

Baker, Sir Benjamin (1840-1907), an eminent engineer who was connected with some of the most notable enterprises of modern times. He was consulting engineer to the Egyptian Government for the Assouan Dam, was joint engineer with Sir John Fowler of the Forth Bridge, and engineer of the Central London Tube Railway.

Baker, Sir Samuel White (1821-1893), a traveller and author of special note, whose books are full of charm and whose services as an explorer will long be remembered. In the "fifties" he spent much time in Ceylon, and wrote two interesting books on the island; in the "sixties" he set out to explore Central Africa, and achieved the discovery of Lake Albert Nyanza. He was knighted in 1866. In 1869 he was in command of a military expedition to Central Africa for the suppression of the slave trade, and the Khedive made him Governor-General of the new territory for four years at a salary of £10,000 a year, being succeeded by General Gordon.

Balcanquhall, Lord. See Crawford, Bal of.

Balfe, Michael William (1808-1890), the most popular composer of English ballad operas of the 19th century. His "Bohemian Girl," "Siege of Rochelle," "Satanstoe," and "The Rose of Castile" are among the most notable of his compositions. He had a fine gift of melody.

Balfour, Rt. Hon. Arthur James, M.P. (b. 1834), was educated at Eton and Cambridge. He entered Parliament in 1874, and for a time was private secretary to his uncle, Lord Salisbury. About 1880 he obtained a seat in the House of Commons as a member of what was known as the "Fourth Party"; but was not until Lord Salisbury became Prime Minister in 1885, and made Mr. Balfour President of the Local Government Board, that he began to be regarded as a serious politician. Later, he was Chief Secretary for Ireland. In 1891 he became First Lord of the Treasury, a position which he held also under Lord Salisbury's next Government in 1895 and 1901. On Lord Salisbury's resignation in 1902, Mr. Balfour assumed the post of Prime Minister, which he held until the close of 1905.

He gave place to a Liberal Government under Sir H. Campbell-Bannerman. During his Manchester seat at the General Election in the early days of 1906, he was subsequently returned at a by-election for the City of London, and Leader of the Opposition in the House of Commons until Nov. 8, 1911, when he resigned that post. Among his published works the *Principles of Political Economy* and *Foundations of Reform* are the most remarkable. President of the British Association in 1904; delivered Romanes Lecture in 1909 on "Criticism and Beauty"; Gifford Lecturer, Glasgow Univ., 1913-14.

Balfour, Rt. Hon. Gerald W. (b. 1853), brother of the above, M.P. for Central Leeds, 1885-1900; Chief Secretary for Ireland, 1895-1900; President Board of Trade, 1900-1905. Suffered defeat at the General Election of 1906.

Balfour of Burleigh, Lord (b. 1840), was Secretary to the Board of Trade and Secretary for Scotland with a seat in the Cabinet between 1895 and 1903, resigning in the latter year because of disagreement with his colleagues on the Fiscal Policy proposals of Mr. Chamberlain.

Balhol, Sir John De, founder of Balhol College, Oxford (and father of John Balhol, the claimant to the Scotch throne), after an unsuccessful attempt to overcome Simon de Montfort, was condemned to certain penalties, and died in exile in 1266.

Balhol, John (1599-1744), competitor with Robert Bruce for the Scotch throne, and Edward I. decided in his favour. Only reigned four years, when Edward deposed him, committed him to the Tower, and finally banished him from the country. He retired to Normandy. His son, Edward Balhol, recovered

- his father's kingdom in 1332, and was upheld by Edward III. whilst very unpopular by reason of his having given up the south of Scotland to the English. He renounced his title and throne in 1356, and retired to England on an annuity.
- Bail, John**, the excommunicated priest who took a leading part in the Wat Tyler insurrection of 1381, and was arrested and executed.
- Bail, Sir R. S., LL.D., F.R.S.** (1840-1913), a distinguished astronomer and mathematician, and Lowndean Professor of Astronomy and Geometry at Cambridge. Wrote many books on astronomical subjects and was a popular lecturer. Knighted 1896.
- Balzac, Honoré de** (1799-1850), one of the greatest of French novelists, and the author of over eighty novels, to which he gave the covering title of "La Comédie Humaine." His stories are faithful depictions of almost every phase of French life, and in character delineation he has never been excelled.
- Bampton, John** (1689-1751), an eminent divine, who founded the Oxford Bampton divinity lectures.
- Bancroft, George** (1800-1891), American historian and statesman. Was secretary of the Navy in 1845, and in 1846 was Minister to London. His *History of the United States* is a monumental work, conceived in a philosophical spirit, and highly valued.
- Bancroft, Richard** (1544-1610), a stern upholder of ecclesiastical rights and a bitter enemy of the Non-conformists. Was Archbishop of Canterbury from 1604 to 1610, and was largely responsible for the text of the Authorised Version of the Bible.
- Bancroft, Sir Squire** (b. 1841), one of the best known actors and managers of the later Victorian period. Managed the old Prince of Wales's theatre in London, in conjunction with Marie Wilton (Lady Bancroft), for many years, producing there the popular Robertsonian comedies; afterwards, held the Haymarket Theatre for several years, and retired in 1885. Knighted in 1897.
- Banger, Bishop of.** (See Williams.)
- Banim, John** (1798-1842), the most popular Irish novelist of his time, whose tales of the "O'Hara Family," written in conjunction with his brother Michael, are realistic and powerful.
- Banks, Sir Joseph** (1743-1820) was president of the Royal Society for upwards of forty years. As a naturalist he was one of the most eminent men of his time, and encouraged science in every form. When Captain Cook made his voyage to the South Seas in 1768, Sir Joseph accompanied him for the purpose of observing the transit of Venus. He left very valuable botanical collections to the British Museum.
- Barbara, St.**, an early Christian martyr, who lived in the 3rd century, and was beheaded by her own father, he being killed immediately afterwards by lightning. She is the patron saint of artillery.
- Barbauld, Anna Letitia** (1743-1825), an industrious authoress, who wrote numerous acceptable and highly devotional works for young people, and was a poetess of note in her time.
- Barbour, John** (1316-1395), a Scottish divine and historian, whose poem, "The Bruce," is a composition well calculated to inspire national enthusiasm.
- Barclay, Mrs. Florence L.**, authoress of many bright and popular novels, including *The Rosary*, and *The Upland Tree*. She is the wife of the Rev. C. Barclay, Vicar of Little Anwell.
- Barham, Richard Harris** (1768-1845), a Kentish-born clergyman who gained a deserved reputation as a humorist by his *Inglorious Legends*.
- Baring-Gould, Rev. Sabine** (b. 1834), is the author of numerous novels, the majority of which have been highly successful, including *John Herring*, *Court Royal*, and *Mehalah*. Has also published many volumes of travel, folk-lore, fairy tales, etc.
- Barnabas, St.**, was a native of Cyprus, and is credited with having introduced Christianity into Antioch, and suffered martyrdom A.D. 61.
- Barnard, Lady Anne** (1750-1825), was the eldest daughter of James Lindsay, fifth Earl of Balcarres. Her "Auld Robin Gray" is one of the most tender of our ballads of humble life, was written when she was a girl of twenty-two, published anonymously, and assumed to be an ancient piece. She revealed the secret of its authorship in a letter (8th July, 1823) to Sir Walter Scott.
- Barnardo, Dr. T. J.** (1845-1905), the founder of the well-known homes for orphan-wards, for some forty years devoted himself to the protection, education, and advancement of destitute children. At the time of his death he controlled over a hundred homes, and left in full working organisation an emigration scheme by which boys are regularly drafted out to Canada.
- Barnato, Barnett Isaacs** (1852-1897), a South African diamond magnate, who by a few lucky strokes lifted himself from poverty to affluence. Returning to England broken in health he leaped into the sea and was drowned.
- Barnes, William** (1800-1880), clergyman and poet, who gained a high reputation for his "Poems of Rural Life in the Dorset Dialect," which revealed true poetic qualities and much quaint humour.
- Barnum, Phineas T.** (1810-1891), was America's most famous showman, the exhibitor of "Tom Thumb," the impresario of the Jenny Lind American tour, and originator of Barnum and Bailey's "Greatest Show on Earth."
- Barrae, Paul F. J. M., Comte de** (1755-1799), a prominent actor in the first French Revolution. One of the men who voted for the execution of the King, and later on was a bitter enemy of Robespierre.
- Barrett, Lawrence** (1839-1891), American actor-manager, associated with Edwin Booth for a lengthy period, and produced many plays with success.
- Barratt, Wilson** (1846-1904), a favourite English actor of the romantic school. He was also a dramatic author of some pretensions, and had a long career of popularity, making much money out of the "Silver King" and other plays of a sensational cast.
- Barrie, Sir J. M., Bart.** (b. 1830, at Kirriemuir); after passing through Edinburgh University entered journalism, and later published a series of essays and sketches which at once made him popular. He followed these up with some very clever novels, including *All in a Row*, *Thru the Little Minister*, *Sentimental Tommy*, etc., and in more recent years has achieved considerable success as a dramatist, "Peter Pan" being amongst his most popular plays.
- Barron, Major Gen. Sir H., K.C.M.G.**, Governor of Western Australia since 1913 and former Governor of Tasmania (b. 1850). Was for some years chief instructor at Shoeburyness.
- Barrow, Isaac** (1627-1697), a famous divine, mathematician, Greek scholar, and tutor of Sir Isaac Newton. His "Sermons" are amongst the finest in the language. He was buried in Westminster Abbey, and was for many years Vice-Chancellor of Cambridge University.
- Barrow, Sir John** (1704-1819), Secretary to the Admiralty from 1804 to 1845, was a native of Ulverston. He was a prolific writer of Naval Biographies, and his Autobiography, published at the age of 83, is a book of valuable reminiscences.
- Barry, Sir Charles** (1795-1860), the architect of the present Houses of Parliament, which occupied twenty years in building, one of the finest specimens of 19th century architecture. He was knighted in 1852, and was buried in Westminster Abbey.
- Barry, Sir John Wolfe, K.C.B.** (b. 1837), the eminent engineer, has designed and carried out some of the most prominent undertakings of the time, including Barry Dock, Tower Bridge, Blackfriars Railway Bridge, and Kew Bridge.
- Barry, Canon W. F.** (b. 1840), rector of St. Peter's, Leamington, and author of "The New Antigone" (1887) and other romantic novels of later date. His books on Newman and Renan rank high in Roman Catholic literature.
- Bartholomew, Fra** (1460-1517), the distinguished Florentine painter and friend of Savonarola, at whose death he became a monk. Examples of his work are in the National Gallery and the Louvre, but the finest are at Florence.
- Bartholomew, Francesco** (1790-1819), a Florentine engraver who came to England in 1794, and for many years was engaged upon engravings, of which he produced an enormous number, many of them of great artistic merit and highly valued by collectors.

to-day. Was a member of the British Royal Academy, and died in 1850.

Barton, Rt. Hon. Sir E. (b. 1849), is a native of Sydney, and became a member of the New South Wales Parliament in 1879. Was Speaker from 1883 to 1887. Afterwards became Attorney-General. Devoted himself earnestly for many years to the cause of Federation, and was Premier of the first Australian Commonwealth Ministry, 1901-1903, becoming in the latter year Judge of the High Federal Court.

Bashkirtseff, Marie (1800-1881), a clever, emotional diarist and painter, of Russian parentage, whose *Memoirs*, published in Paris, caused considerable sensation by their remarkably vivid revelations of an abnormal temperament.

Basil the Great was Bishop of Cæsarea in the 4th century, and a strong opponent of Arianism.

Bath and Wells, Bishop of. (See Kennion.)

Battenberg, Prince Henry (1858-1895), husband of Princess Beatrice, youngest daughter of Queen Victoria. Was stricken with fever while on an expedition in Ashanti in 1895, and died at sea.

Battenberg, Admiral Prince Louis of (b. 1854), is a son of Prince Alexander of Hesse, and married to his cousin, Princess Victoria, daughter of Princess Alice of England, and the Grand Duke of Hesse. Has had a successful career in the British Navy, which he entered in 1868. Appointed to the command of the Second Cruiser Squadron in 1904; second in command Mediterranean, 1906; commander-in-chief Atlantic Fleet, 1908. First Sea Lord, 1912.

Baur, Ferdinand (1792-1860), a German theologian of great eminence and influence, the founder of "The New Theological School of Theology."

Baxter, Richard (1615-1691), a Great Nonconformist, remarkable for the ability and boldness of his writings. He was constantly persecuted, and was ill-treated by Judge Jeffreys. Baxter's *Saint's Everlasting Rest* is a masterpiece.

Bayard, Pierre du Terrail, Chevalier de (1475-1524), a French knight of exemplary conduct and remarkable for his chivalry. Fell at the Battle of Sesia, and was named "Le Chevalier sans peur et sans reproche."

Baylis, Sir Wyke (1835-1906), achieved much distinction in connection with church decoration and religious art, and was elected President of the Royal Society of British Artists in 1888. Knighted in 1897.

Bessane, François (1811-1888), the French general who commanded the army of the Rhine in the Franco-German War of 1870-1871, and after Sedan retired to Metz, was under siege there with all his troops for some months, and ultimately surrendered to the enemy. Later he was condemned to death by court-martial, but the sentence was commuted to life imprisonment. Subsequently he escaped and lived in Madrid.

Benson, Sir Benjamin Disraeli, Earl of (1804-1881), statesman and novelist. Was the son of Isaac Disraeli, and after being privately educated, passed some time in a lawyer's office, and then took to authorship, meeting with but indifferent success until he published his *Curran Grey*, which was so judiciously clever that it at once made him a name. He was then only twenty-one. Drifting into Society he was made much of because of his brilliance, and after a few more essays in novel writing he entered Parliament in 1852, and in long afterwards became a prominent and picturesque figure in that assembly. He allied himself with the Tory party, and ultimately became one of its chief leaders. He was made Premier in 1868 on the retirement of Lord Derby, and again in 1874, retaining office until 1880, dying the following year. His foreign policy, particularly on the Eastern question, was aggressive. He was raised to the peerage in 1876.

Benson, David (1404-1540), was the leader of the Anti-Reformation party in Scotland, and held the important position of Cardinal and Archbishop of St. Andrews. He was assassinated.

Bleat, James (1735-1803), a Scottish poet of genius, who wrote "The Minstrel," and was also author of numerous essays and philosophical writings which

were much esteemed and gained him a pension of £300 a year from George III.

Beatty, Rear Adm. Sir David, K.C.B. (b. 1871), Commander of the first Battle Cruiser Squadron since 1912. Formerly Naval Adviser to the Army Council; served with distinction in the Sudan and China. On Aug. 28, 1914, made a dash with his squadron into a portion of the German fleet in the Heligoland fight, sinking two German cruisers and two destroyers, and seriously damaging another.

Beaufort, Cardinal (1370-1447), was half-brother of Henry IV, and four times Lord Chancellor. He wielded great power, and was a powerful factor in the political movements of the time. Was successively Bishop of Lincoln and Winchester.

Beauharnais, Eugene de (1781-1824), son of Josephine Beauharnais, who afterwards became the wife of Napoleon. Napoleon made him his Aide-de-Camp, adopted him, and showed him great favour.

Beaumont, Adm. Sir Lewis A. (b. 1847), has held several important commands in the Navy, which he entered in 1860. Was Director of Naval Intelligence, 1891-1899, and in 1904 was appointed commander-in-chief at Devonport. In 1905 sat on the North Sea Inquiry. Retired 1912.

Beaumont and Fletcher contemporary dramatists with Shakespeare, and joint authors of many plays, including "The Maid's Tragedy" and "Philaster." Beaumont (sole author of "The Faithful Shepherdess") was buried in Westminster Abbey; Fletcher, who died in 1625, was interred in St. Saviour's, Southwark.

Bebel, Ferdinand Aug. (1840-1913), the foremost German Socialist leader, a native of Cologne, and a member of the North German Parliament of 1867. In 1872 was condemned to two years' imprisonment for treason, and was imprisoned for aspersing the Emperor. A noted political orator.

Beckford, William (1760-1844), the eccentric author of *Vathek*. Spent his later years as a recluse on his estate at Fonthill, on which he expended £273,000. His father, also named William, served as Lord Mayor of London in 1769 and 1769.

Bede, "The Venerable" (673-735), a monk of great influence and ability whose historical works cover a great range and are valuable in the outline they give of the early history of this country.

Becham, Thomas (b. 1790), musical conductor and operatic impresario. Educated at Rossall and Wadham College, Oxford. Founder of the Becham Orchestra. Has done much for operatic art.

Becher, Henry Ward (1813-1887), an eminent American preacher and lecturer, whose church at Brooklyn was for many years the most popular in the United States. Brother of Mrs. H. B. Stowe.

Bechey, Frederick William (1796-1856), an Arctic explorer who accompanied Franklin on an expedition in 1845, and made voyages on his own account subsequently. Bechey Island in Melville Sound was named after him.

Beerbohm, Max (b. 1872), was educated at Charterhouse and Merton College, Oxford. Is a brilliant critic and caricaturist, who has contributed largely to the *Saturday Review*.

Beethoven, Ludwig van (1770-1827), born at Bonn, died in Vienna. One of the kings of musical composition, whose symphonies, sonatas, overtures and operas all reach the highest standard of musical imagination. He received lessons from Mozart.

Begbie, Harold (b. 1871), has won his way in journalism and literature by a variety of good work, from humorous "By the Way" jottings for the *Globe* to serious war poems.

Behring, Emil von (b. 1853), a distinguished German scientist, Professor at Strassburg; discoverer of an anti-toxin for diphtheria, and claimant to a cure for phases of tuberculosis.

Behring, Vitus (1686-1741), was a Danish navigator who entered the Russian service and in 1748 discovered what is called Behring's Strait, afterwards being wrecked on Behring's Island, where he died.

Beit, Alfred (1853-1900), a South African magnate of great wealth, made his way to South Africa in 1875, associated himself with diamond mining.

made a vast fortune. Was a man of great force of character and public spirit, and a munificent patron of imperial and charitable institutions.

Bake, Charles T. (1800-1874), a distinguished diplomatist and traveller, who spent many years in Abyssinia, afterwards publishing the result of his researches, which were of great value. He also visited and wrote upon the Holy Land. Was British Consul in Saxony 1836-1838.

Bellarius (505-565), a famous Roman general under Justinian. His defeats of the Goths and Vandals, and of the Persians, were great achievements.

Bell, Alexander Graham (b. 1847 in Edinburgh). Went to America in 1870, and became Professor of Physiology in Boston University. In 1876 he exhibited an invention which was developed into the telephone as we now know it. He also invented the phonograph, and has devoted much attention to the improvement of the education of the deaf.

Bell, Andrew (1753-1839), was born at St. Andrews, and was a highly successful educationist. While superintendent of an orphanage school at Madras, he introduced the system of monitor assistants which was afterwards universally adopted.

Bell, C. F. Moberley (1847-1911), was from 1865 to 1880 *Times* correspondent in Egypt, and contributed to the leading journal a succession of brilliant letters. Coming to England he became assistant manager and later manager of the paper, and from 1898 was managing director. His books on Egyptian questions were of great value at a critical period.

Bell, Sir Charles (1774-1842), an eminent anatomist to whom we owe the discovery of the distinct functions of the sensory and motor nerves. His *Bridgewater treatise on the Hand* is well known.

Bell, Sir Hugh, Bart. (b. 1843), an engineering director of Bell Brothers, Limited, iron and steel manufacturers, Middlesbrough. President of the Iron and Steel Institute in 1907. Unsuccessfully contested the City of London in opposition to Mr. Balfour in 1910. His wife, Lady Bell, is a writer of some note, and for her book, *At the Works*, published in 1907.

Bell, Richard (b. 1859), was M.P. for Derby from 1900 to 1910, and General Secretary of the Amalgamated Railway Servants from 1897 to 1900. Took a prominent part in the dispute between the railway companies and their men in 1907, materially helping matters to a settlement. Now Unemployment Insurance Officer to Board of Trade.

Bellini, Gentile (1421-1508), a celebrated Venetian painter, whose "Preaching of St. Mark at Alexandria" in St. Mark's College, Venice, is one of the best of the 15th century.

Bellini, Giovanni (1476-1516), brother of the last-named, and more celebrated. His religious pictures, of which there are several in this country, including three in the National Gallery, are of great importance.

Bellini, Vincenzo (1806-1883), an Italian operatic composer of great popularity during the first half of the 19th century. His "La Sonnambula," "Norma," and "I Puritani," are still frequently performed.

Belloe, Hilaire (b. 1870), author of several clever and entertaining works, including the *Bad Child's Book of Beasts*, *The Modern Traveller*, *The Old Road*, and *Hulls*, and the *Sea*. Has published also valuable studies of Danton and Robespierre and has recently made a high reputation for a series of vigorous war articles.

Belzoni, Giovanni B. (1778-1823), a renowned explorer of Egypt who settled in England at the beginning of the 19th century. After a precarious existence began to turn his attention to hydraulic experiments, and went to Egypt with the view of getting the Government to sanction a scheme of his for raising the water of the Nile. He was then attracted to the study of Egyptian antiquities, and engaged in highly successful researches.

Bombay, Admiral (1623-1702), was commander of the British fleet in the East Indies till 1702. His attempted capture of the French fleet was frustrated by the treachery of some of his officers, but even after he had lost his leg in the action he insisted on directing the operations on deck.

Benckendorff, Count (b. 1810), Russian Ambassador to Great Britain since 1902, and remembered in connection with the settlement of the Roskdestvensky Dogger Bank incident.

Benedict, Sir Julius (1804-1888), a composer of mark who came to England from Germany in 1835, and for many years occupied a prominent position as conductor and composer. Among his operas may be mentioned "The Lily of Killarney," "The Crusaders," and "The Gypsy's Warning." He was knighted in 1871.

Benedict, St. (480-543), built twelve monasteries, and founded the Order of the Benedictine Monks, at Monte Cassino, near Naples.

Bennett, Arnold (b. 1867), one of the ablest of our younger novelists, whose stories of the Pottery Town, where he was brought up, are of high merit. *The Old Wives Tale*, *Laymanster*, and *Hilda Lessways* are among his most successful efforts. His story *The Life of Nath Nicklin* was written for Pears' Annual for 1914. He has also written plays, including *Milestones* and *The Great Adventure*.

Bennett, James Gordon (b. 1843), proprietor of the *New York Herald*, and a famous yachtsman and motorist. The races for the Gordon-Bennett Cup were leading events in motor history a few years ago. Mr. Bennett lives in Paris mainly. He sent out St. Louis on the expedition which resulted in the finding of Livingstone.

Bennett, Sir W. Sterndale (1816-1875), an English composer of eminence, who did much for the advancement of musical art in this country. Schumann pronounced him to be "the most musical of all Englishmen." His *Caratas* are among the best produced in England, and include "The May Queen" and "The Woman of Samaria."

Benson, A. C. (b. 1873), poet of Magdalene College, Cambridge. Son of Archbishop Benson. Was joint editor with Lord Lytton of *Queen Victoria's Letters* (1907), and has written many charming books of essays, including *From a College Window*, *The Union Letters*, *The House of Queen*.

Benson, Edward Frederic (b. 1859), one of our popular novelists, and an archaeologist. His first novel, *Dodo*, published in 1883, was the fiction sensation of the year, and has been followed up by a succession of clever stories. *Dodo the Second* was issued in the spring of 1914.

Benson, Edward White (1820-1898), was headmaster of Wellington College in 1859. In 1877 became Bishop of Truro, and in 1882 was appointed Archbishop of Canterbury. He was a Prelate of great sincerity of purpose, and a great ecclesiastic.

Bentham, Jeremy (1748-1832), the founder of the school of political philosophy, the tenets of which were extended by John Stuart Mill. His works on *Government*, *Usury*, and *The Principles of Morals and Politics*, expound the Utilitarian system with great lucidity.

Bentham, Lord George (1792-1848), a devoted Protectionist, who attracted much attention by his uncompromising opposition to Sir Robert Peel. He died suddenly when his political career seemed full of promise, and his life was written by his friend, Benjamin Disraeli (Lord Beaconsfield).

Bentley, Richard (1662-1747), was an eminent scholar and critic, who filled the positions in succession of Master of Trinity College and Keeper of the Royal Library at St. James's. He was a great controversialist and critic, to whom Dean Swift paid handsome tribute in his *Battle of the Books*.

Béranger, the eminent French poet (1780-1856), was the most popular song-writer that France has produced. His songs were often written to serve some passing political purpose, and were invariably in harmony with popular sentiment.

Berthold, Count, Foreign Minister in the Austro-Hungarian Government. Succeeded the late Count Aehrenthal in 1912.

Beresford, Admiral Lord Charles (b. 1846), second son of the Marquis of Waterford. He had a varied and distinguished career. In 1875-1876 accompanied the late King, then Prince of Wales, on his visit to India. At the bombardment of Alexan-

dria did distinguished service in command of the *Condor*, and in 1884 was on Lord Wolsley's staff in the Nile Expedition. Later he commanded the Naval Brigade at the battles of Abu-Klea, Abu-Kru, and Metemneh; headed the expedition which rescued Sir Charles Wilson's party in the Sudd; and became a Lord Commissioner of the Admiralty in 1886. Has been in Parliament, when not on active service, off and on since 1885, when he was returned for Marylebone. Lord Charles possesses three medals for life-saving, and among his literary works may be mentioned *The Life and Times of Nelson*, which was published as *Pearse's Annual* for 1915. Succeeded to the command of the Channel Fleet in 1907, retiring from that position in 1909. M.P. for Portsmouth since 1910.

Bergson, Henri Louis (b. Paris, 1859), a philosopher of bold ideas whose writings and lectures arouse much discussion. Professor at the Collège de France since 1900. L lectured in London in 1913, and was Gifford Lecturer at Edinburgh in 1912.

Berkeley, Bishop (1624-1753), the propounder of the philosophy that the only things that are real are our ideas of what is presented to our senses. In support of this philosophy he wrote several works of great ingenuity of argument, chief among them being his *Alciphron*, or *the Minute Philosopher*.

Berlioz, Hector (1803-1869), was an eccentric but highly endowed French musical composer who studied in Paris and Rome, and afterwards, settling in Paris, devoted himself to conducting and composing with much energy. He suffered hardship and humiliation before he got a hearing, but his originality and his ardent romanticism fascinated such men as Paganini and Liszt, and though musical convention to a great extent prevented the realisation of his plans, he ranks as one of the great musical geniuses of the 19th century. His "Damnation of Faust" and his "Roméo and Juliet" symphony are his most inspired productions. His wife was an English actress, Miss Smithson, for whom he formed a romantic attachment while she was appearing in black-and-white parts in Rome.

Bernadotte, Jean Baptiste (1764-1844), was a French commander of great distinction who served under Napoleon, and in 1810 was chosen heir to the throne of Sweden. In 1818 he succeeded as Charles XIII, and was a capable ruler.

Bernard, St. (1072-1153), took an active part in promoting the crusade of 1149, and founded the monastic order of the Bernardines.

Bernhardt, Sarah (b. 1845), the most renowned tragedienne of her time. Became a member of the Comédie Française after the Siege of Paris, and thereafter occupied a specially prominent position as an actress. Her first performance in London was in 1870. Among her most conspicuous successes are "Théodora," "Fédora," and "La Toxica," while she also appeared as Hamlet with distinction.

Borrie, Rt. Hon. Sir F. E. (b. 1844), entered the Foreign Office in 1871, and held several important secretarieships. In 1904 was appointed Ambassador to Italy, and in 1904 British Ambassador in Paris. Is brother to the Earl of Abingdon.

Bertillon, M. Alphonse (b. 1853), an ingenious Parisian police prefect, who invented the anthropometric method of criminal detection, which has been adopted extensively in Britain and other countries.

Besant, Mrs. Annie, President of the Theosophical Society since 1907, previously associated with Bradlaugh in secular movements. Of late years has been actively engaged in theosophical and educational projects in India.

Besant, Sir Walter (1836-1901), a prolific author and novelist, whose first stories were written in collaboration with Mr. James Rice. The best known works which he wrote alone are *All Sorts and Conditions of Men*, *Dorothy Foster*, and *Armour of Lyonesse*. He also wrote several critical and biographical works, and a number of books on ancient London.

Bessemer, Sir Henry (1813-1898), an inventor who became rich and famous by his invention of the well-known process of converting cast-iron direct into

steel. His invention entirely revolutionised the steel manufacture, greatly reducing cost of production and making it possible to utilise steel in many directions where previously iron only had been used. It was knighted in 1879. Many other inventions stand to his credit, but they are insignificant in comparison with that of the steel process, which will always remain identified with his name.

Bethmann-Hollweg, Theobald von, Chancellor of the German Empire since 1909 (b. 1856). In directing the Imperial policy in regard to Moroccan and other foreign affairs, he has shown a masterful capacity for attaining his object, despite much opposition and many entanglements.

Betty, William Henry (1791-1874), an Irish actor of singular precocity who as the "Infant Roscius" was famous on the stage at eleven. For some years, he enjoyed a marvellous success and made a considerable fortune, retiring in 1824.

Beust, Count Frederik von (1809-1886), was for a number of years Chancellor of the Austro-Hungarian Empire, retiring in 1871.

Bewick, Thomas (1753-1828), earned great fame as a wood engraver, and the works which he illustrated now realise high prices. All his works were remarkable for breadth of treatment and fidelity to nature. His *History of British Quadrupeds* and *History of British Birds*, and his illustrated editions of Goldsmith's *Deserted Village* and *Traveller*, *Æsop's Fables*, etc., are of great value.

Beza, Theodore (1519-1603), a Calvinist reformer of great influence, who provided upon the King of Navarre to aid the French Protestants, and was president of the synods of French Reformers at Nîmes and Rochelle.

Biddle, John (1715-1782), the founder of English Unitarianism, was imprisoned for denial of the Trinity, but released by Cromwell. He reformed, preached, and succeeded in establishing a Unitarian Church. Later on he was again sent to gaol, and died there.

Birkbeck, George (1776-1841), physician, philanthropist, and philosopher. A Yorkshireman who settled in London in 1804, and became the chief founder of Mechanics' Institutes. The Birkbeck Institute was his own special work.

Birmingham, Bishop of. (See Wakefield, Russell.)

Birmingham, G. A. (See Hannay, The Rev. Canon.)

Birrell, Rt. Hon. Augustine, K.C., M.P. (b. 1851), the accomplished author of *Obiter Dicta*; entered Parliament in 1889. In addition to *Obiter Dicta*, he has written a *Life of Charlotte Brontë*, *Men, Women and Books*, etc. He was sometime Professor of Law at University College, London, and became Education Minister in the Government of Sir Henry Campbell-Bannerman in 1905. In 1907 he succeeded Mr. Bryce as Secretary for Ireland.

Bishop, Sir Henry Rowley (1798-1863), composer of many popular ballad operas and songs, "Maid Marian," "Guy Riquering," and "The Miller and his Men," are his best known operas. He was also a very successful glee-writer, and was the composer of "Home, Sweet Home." He was knighted in 1842.

Bismarck, Prince Otto E. L. von (1815-1898), the most prominent and capable of the German statesmen of the 19th century, entered the diplomatic service in 1851, and filled positions in succession at Vienna, St. Petersburg, and Paris. In 1862 he was appointed Minister of Foreign Affairs, from which time dates the strong Bismarckian policy which was destined to achieve so much for Prussia. As Imperial Chancellor he may be said to have directed the destinies of his country down to the death of the Emperor William in 1888, when the present Emperor began to assume direct control, which Bismarck resented, and in 1890 the old pilot "was drowned," to use a figure of speech made memorable by one of Tanel's cartoons. Bismarck retired to his country estates, and did not again interfere seriously in political affairs. Made Count in 1865 and Prince in 1871.

Germany has over two hundred monuments to him. He presided at the famous Berlin Conference of 1878. His son, Count Herbert von Bismarck (1849), was appointed German Foreign Minister in 1885, but, like his father before him, did not get on well with William II.

Bizet, Georges (1838-1875), a French musical composer who gave the operatic stage several operas full of charming melody, and who in "Carmen" achieved one of the leading operatic triumphs of the latter half of the 19th century.

Björnson, Bjørnstjerne, the Norwegian poet, dramatist, and novelist (1832-1910), is one of the great names in modern European literature, his poems, plays, and stories being marked by a strong intellectuality and a rich imagination. Many of his works have been translated into English.

Black, William (1841-1898), an English novelist, of great popularity in his day. His best novels are: *A Daughter of Beth*, *Madcap Violet*, *Kilmeny*, and *A Princess of Thule*.

Blackie, John Stuart (1809-1895), an eminent and outspoken Scottish writer, philologist, and poet; Professor of Greek at Edinburgh, 1852-1882.

Blackmore, Richard Doddridge (1825-1900), a novelist who in 1866 made a great reputation with his romantic story of *Fora Dione*.

Blackstone, Sir William (1723-1780), was a Justice of the Court of Common Pleas. His great work, *Commentaries on the Laws of England*, became one of the British classics.

Blair, Robert (1700-1766), a noted Scottish poet, whose poem, "The Grave," entitles him to a place in all collections of British poetry.

Blake, Robert (1808-1857), a great English naval commander, who distinguished himself by repeated defeats of the Dutch and the capture of the plate-ship of Spain. He was buried in Westminster Abbey, with a magnificent public funeral; but his remains were removed therefrom, with those of other Commonwealth notables, after the Restoration.

Blake, William (1757-1827), painter, poet, and mystic, whose "Songs of Innocence" and scriptural drawings reveal an intense spirituality and much original power.

Blanc, Louis (1811-1882), a French Socialist politician who was Minister of Labour after the Revolution of 1848, but found his views too advanced for Louis Napoleon, who lived in exile until the fall of the Second Empire, when he returned to France and died at Cannes in 1882. He was a man of genial and amiable personality, and the author of several important historical works.

Blatchford, Robert (b. 1852), an able and trenchant Socialist writer, and editor of *The Clarion*. His chief books are *In Defence of the Bottom Dog*, *Merric England*, and *The Sorcery Shop*. During the war has contributed a full page article of vigorous criticism each week to the *Weekly Worker*.

Blavatsky, Helena Petrovna (1831-1891), a noted Theosophist of Russian birth, who claimed to possess spiritualistic power, and exercised considerable influence up to the time of her death over a small but devoted band.

Blessington, Marguerite, Countess of (1789-1849), an Irishwoman of literary taste who, with the Count d'Orsay (q.v.), established a sort of salon at Gore House, Kensington, where she held fashionable receptions, and was a liberal patron of things literary and artistic. Her novels of high life had quite a vogue in her lifetime, but are not now read.

Blind, Karl (1826-1907), was a native of Mannheim, and in 1847 associated himself with the German revolutionary movement, but was arrested and imprisoned. Gaining his liberty, he resided in Brussels for a time, and afterwards settled in London, remaining in close touch with men like Mazzini and Louis Blanc, and by pen and speech constantly advocating political freedom.

Blondel, troubadour servant to Richard I., who is said to have discovered the king's place of imprisonment in Austria by singing beneath the window, afterwards securing Richard's release.

Blondin, Charles (1824-1897), a famous French rope performer, who crossed Niagara Falls on a

tight-rope, and was for many years the most popular acrobat of his day, living mostly in England.

Blood, Thomas (1688-1689), the officer who attempted to steal the Royal Regalia from the Tower, and was captured and imprisoned. Charles II. not only pardoned him, but granted him a pension of £500 a year.

Bloomfield, Robert (1766-1823), a peasant poet, who attained considerable fame by his "Farmer's Boy," and other rural pieces, in which the love of Nature was gracefully and tenderly expressed.

Blücher, Field-Marshal L. von (1749-1819), was the famous Prussian commander who, after a long and brilliant military career, joined forces with Wellington in the final campaign against Napoleon, and materially helped to win the great victory of Waterloo by advancing to Wellington's support. After the peace he retired to his country seat in Silesia, and was seen no more in active service.

Blunt, Wilfrid Scawen (b. 1840), best known for the active part he took in Egyptian affairs in 1882-1883 and his continued support of what is called the Egyptian national movement. He was a devoted admirer of Arabi Pasha, and spent much money in his defence. In 1907 he published his *Secret History of the English Occupation of Egypt*, which aroused much controversy. Published a book of *Reminiscences* in 1912. At his Sussex seat he keeps the finest stud of Arab horses in the world. His wife is a grand-daughter of Lord Byron.

Blyth, Lord (b. 1847), an eminent authority on agriculture, and practical experimenter in farming methods. Is a director of W. and A. Gilbey, Ltd., a member of several learned and agricultural societies, and has large experimental farms in Essex. Made a baronet in 1895, and was raised to the peerage in 1901.

Boadicea, queen of the Iceni tribe of Britons, who raised an army against and defeated the Roman invaders, but was afterwards vanquished by Suetonius and committed suicide.

Boccaccio, Giovanni (1313-1375), an Italian author who has often been called "The Father of Novel Writing." He had a lively imagination and graceful style, and his famous *Decameron*—condemned by two Popes and by the Council of Trent—has been a fount of inspiration to poets and story tellers from Shakespeare to Keats.

Boehm, Sir Joseph Edgar (1843-1890), a successful Austrian sculptor who settled in London in 1862, and was afterwards entrusted with numerous important commissions, his best known statues being those of Queen Victoria, Wellington, and Carlyle.

Bolleau-Despreaux, Nicolas (1696-1711), a French poet who was contemporary with Molière, and wrote many classical imitations which were highly thought of in his own time and later, and are still frequently referred to.

Boito, Arrigo (b. 1842), an Italian poet and musical composer. He wrote the libretti of "Otello" and "Falstaff" for Verdi, and for his own operas of "Mefistofele" and many others.

Boleyn, Anne (1507-1536), queen of Henry VIII and mother of Queen Elizabeth; originally maid-in-waiting to Queen Catherine, who was divorced by Henry to make way for her. She was a promoter of the Reformation, but fell from favour with her fickle spouse, and was beheaded on a charge of treason.

Bolingbroke, Henry St. John, Viscount (1698-1751), a statesman and litterateur of the days of Queen Anne, whom he served both as Secretary of War and Foreign Secretary. Was exiled after the accession of George I. because of his devotion to the Stuarts, but later on was pardoned and returned to this country, spending the remainder of his days in literary pursuits. His *Study of History, Letters on Patriotism, and Idea of a Patriot King*, were works of power and influence.

Bolívar, Simon (1783-1830), the first President of Venezuela, and subsequently Dictator of Peru; commonly called the Washington of South America.

Bonaventure, St. (1221-1274), a Franciscan monk of great learning and piety, and a leading Schoolman. He was called "the Seraphic Doctor."

Bond, Rt. Hon. Sir R. (b. 1857), Premier of Newfoundland 1900-1909, and has been a member of the Newfoundland Legislature since 1882. Has borne a prominent part in all negotiations of late years for the settlement of the Newfoundland fisheries questions, and attended the Imperial Conference in London in 1907.

Bonheur, Rosa (1822-1899), a native of Bordeaux, and one of the most noted animal painters of the 19th century. "The Horse Fair" is probably the most popular picture of the kind.

Boniface, St. (680-755), a native of Devon, spent most of his life in Germany in Christianising missions, and became Archbishop of Mainz. He and a number of followers were massacred in Friesland.

Bonner, Edmund (1588-1656), the notorious Bishop of London in the reign of Mary Tudor, and the prime mover in the persecutions of the Protestant martyrs. He remained faithful to his religion after Elizabeth came to the throne, and passed the last ten years of his life a prisoner.

Bonnivarde, François de (1496-1570), a Republican monk, and author of a history of Geneva, his native city; suffered a long incarceration in the Castle of Chillon, and was the subject of Byron's poem, "The Prisoner of Chillon."

Booth, "General" Bramwell (b. 1866), eldest son and successor of "General" William Booth as head of the Salvation Army. Was chief of staff from 1880 to 1912. His wife, **Mrs. Bramwell Booth**, is also a great personality and an active force in the organisation.

Booth, Rt. Hon. Charles, P.C. (b. 1840), a Liverpool merchant and shipowner who has devoted many years and much of his fortune to the collection of facts concerning the poor of London, of which ten volumes have appeared. In 1904 he was made a Privy Councillor.

Booth, Edwin (1833-1891), an American tragedian of great eminence, son of Junius Brutus Booth, the English tragedian, and brother of John Wilkes Booth, who assassinated President Lincoln. As a Shakespearean actor Booth took high rank, and is said to have played Hamlet oftener than any other actor. He visited England several times.

Booth, "General" William (1829-1912), while quite a young man became a Methodist local preacher, and a travelling evangelist. Founded the Salvation Army in 1878, which under his enthusiastic and eminently practical direction became an organisation of world-wide influence. President at an International Salvation Army Congress in London in 1904. Had the Freedom of the City of London granted to him in 1905, in 1907 visited Japan, and in 1908 South Africa. He died in August 1912.

Borden, Robert Laird, K.C., M.P. (b. 1854), Premier of Canada since 1911, defeating Sir Wilfrid Laurier, the general election on the Reciprocity Bill, has been the leader of the Conservative party in the Canadian House of Commons since the resignation of Sir Charles Tupper in 1896. Has had a distinguished career at the Bar also. Accompanied by some of his Ministers he visited England in 1912 and arranged a new Canadian naval programme with the Imperial Government, which, owing to opposition, has been delayed.

Borgia, Caesar, the masterful and unscrupulous son of Pope Alexander VI., who paved his way to power by the murder of those who stood in his way, and aided by Louis XII. of France, became ruler of Romagna, the Marches, and Umbria. Pope Julius II. banished him from Rome, and he was imprisoned in Spain, but escaped to find a soldier's death in the army of Navarre in the invasion of Castille, in 1507.

Borgia, Lucrezia, sister of Caesar, was deemed almost as blood-guilty as her brother, and there can be no doubt that many crimes were committed in her name if not by her own hand.

Borsosio, Carlo Saint (1758-1821), Cardinal Archbishop of Milan, was a nephew of Pius IV., and of great benevolence. Canonised in 1614.

Borrow, George (1803-1881), was for many years travelling agent for the British and Foreign Bible

Society, and in the course of his wanderings made a special study of gypsy life, and wrote some of the most charming and picturesque books about the Romany tribes we possess. His *Lavengro* and *Kennedy* are classics.

Boscawen, Admiral (1717-1761), was one of the most gallant of our 18th century naval commanders, and known as "Old Dreadnought." He was in command of the fleet that took Madras, and in the operations at Cape Finisterre, Quebec, and Louisbourg, Cape Breton, did signal service.

Bossuet, J. B. (1627-1704), an eminent French Bishop and theologian, whose sermons are of striking eloquence, and whose historical and controversial works are of high literary merit.

Boswell, James (1740-1795), made himself famous by writing *The Life of Dr. Johnson*, for which purpose he came to London from Scotland, and devoted himself assiduously to studying Johnson's character, spending some years in close intimacy with the great lexicographer and produced what is probably the finest biography in the language.

Botha, General the Hon. Louis (b. 1863), the Boer general who succeeded Joubert in the chief command against the British forces. On parliamentary government being granted to the Transvaal in 1907 he became the first Prime Minister, and attended the Imperial Conference in England the same year. In 1910 made first Premier of the South African Confederation. Took strong action, January, 1914, in deporting nine strike leaders to England. After the outbreak of war with Germany took the field at the head of a Union force and in addition to putting down a rebel movement, engineered by Germany, successfully invaded German African territory.

Boticelli, Sandro (1445-1510), Italian painter and disciple of Savonarola, the devout monk. Produced many notable pictures, and assisted in the decoration of the Sistine Chapel. His illustrations to Dante's *Divine Comedy* are world-famous.

Boucicault, Dion (1822-1890), a prolific playwright and capable actor, who at twenty years of age made a hit with "London Assurance," and during the later period of his life won fame and fortune by the writing of Irish dramas, including "The Colleen Bawn" and "Arrah-na-Pogue."

Bouguereau, W. Adolphe (1825-1905), a celebrated French painter, whose pictures of classical and religious subject gave him celebrity. "The Triumph of Venus," "The Martyr," "Sappho," and "The Golden Age" were among his masterpieces.

Boulanger, General G. E. J. (1837-1921), was for a few years the most popular man in Paris, if not in France. Was made War Minister in 1886, and converted by a violent attitude towards Germany and a flattery of the mob, to attract much attention. In 1889 he may be said to have denounced French politics, and many expected that he would become *chef d'état*, and become dictator of France; but his courage was not equal to his opportunity, and he rapidly fell out of favour and left the country in order to avoid arrest. His career was over, and in 1901 he committed suicide at Brussels on the grave of Mdm. Bonnemain, with whom he had formerly lived.

Boulton, Matthew (1728-1806), a Birmingham engineer and inventor, who provided capital for James Watt in order to develop the steam engine. The two were in partnership for many years. It was to Boulton's practical business qualities that Watt owed much of his success.

Bourget, Paul (b. 1851), a French novelist, poet and critic, who has spent much time in England, and written some interesting books on the country and its people. His novels are remarkable for their artistic qualities, but are mostly of sombre tone.

Bourne, The Most Rev. Francis, Roman Catholic Cardinal Archbishop of Westminster, was born in 1801, and became a priest in 1824. In 1896 was appointed Bishop of Exeter, and in the following year Bishop of Southwark. In 1903 he succeeded Cardinal Vaughan at Westminster.

Bowler, Thomas (1754-1825), a pious English physician, who issued expurgated editions of Shake-

speare and Gibbon, eliminating all expressions which he considered offensive to good taste and morality. From this came the term to "Bowdlerise."

Bowles, Thomas Gibson (b. 1849), an active politician who represented King's Lynn in Parliament from 1892 to 1901, re-elected in 1901, and lost the seat again the same year. An incisive writer, for many years proprietor of *Vanity Fair*.

Boyce, William (1710-1779), a composer and organist of note who produced much Church music and collected more, and was a song-writer of repute, his "Hearts of Oak" being well-known.

Boyd-Carpenter, Rt. Rev. Sir Wm. (b. 1841), D.D., Canon of Westminster since 1912. Bishop of Ripon 1894-1911. Author of many religious works, recipient of many honours, and a gifted preacher.

Braddon, Mary Elizabeth (Mrs. Maxwell) (b. 1837), began to write stories in 1861, and has a record of over sixty novels, many of which had a great success, among them being *Lady Audley's Secret*, *Aurora Floyd*, and *Henry Dunbar*.

Bradlaugh, Charles (1833-1891), a secularist writer and lecturer, who was very popular with the working classes. Was elected M.P. for Northampton in 1880, and after an undignified conflict in regard to taking the oath, became recognised as a useful representative, and esteemed by all parties.

Bradshaw, John (1586-1659), the Justice who presided at the trial of, and delivered sentence upon, Charles I. He subsequently quarrelled with Cromwell and was removed from office. At the Restoration his body was exhumed, with those of Cromwell and Ireton, and hung on a gibbet.

Brahe, Tycho (1546-1601), a celebrated Danish astronomer, who founded the planetary system which bears his name, and compiled a list of 777 fixed stars.

Brahms, Johannes (1833-1897), a German musical composer of deserved eminence, and the friend and pupil of Schumann. His compositions are of a varied order, most classical in form, and possess deep intensity of expression and poetic significance. His pianoforte music covers a wide range. He wrote some 300 songs, and among his more serious works the "German Requiem," the "Triumphlied," and the "Rhapsodie" are the best known.

Bramah, Joseph (1749-1814), was a native of Stanborough, Yorkshire, and, inventing himself to invention, introduced numerous mechanical improvements, including the hydrostatic press, a liquid-pumping apparatus, a most ingenious series of safety locks, and bank-note printing machines.

Brampton, Lord (1817-1907), long known to the public as Sir Henry Hawkins. Was famous as an advocate, and took part in many celebrated cases, including the Tichborne trial. Was made a judge in 1876, and on his retirement in 1898 was raised to the peerage. His *Reminiscences*, published in 1904, was one of the books of the year. He lived to the age of ninety. His wife, Lady Brampton, died a few months later, leaving the main portion of the Brampton fortune to Roman Catholic churches and charities.

Brassey, Earl (b. 1836), son of Thomas Brassey, came into prominence as a politician under Mr. Gladstone, having been both Civil Lord of, and Secretary to, the Admiralty. Is a recognised authority on naval matters, his *Naval Annual* being a standard book of reference. Has been Governor of Victoria. His famous yacht *Sunbeam*, and the story of its earlier voyages, written by the late Lady Brassey, are well remembered.

Brassey, Thomas (1805-1870), achieved great fame as a railway contractor, constructing the Great Northern Railway and others in this country, the Grand Trunk in Canada, and others in France, India, Australia, etc.

Bremer, Frederika (1801-1865), a Swedish novelist, whose works attracted much attention in this country as well as in her own. Her best known stories are *The H. Family*, *Barkers and Sisters*, and *The Proserpine*. The stories—as translated by Mary Howitt—are simple pictures of domestic life and full of charm.

Brennan, Louis C. B. (b. 1853), successful inventor; obtained £100,000 from the British Government for his torpedo; and is the inventor of a gyroscopic railway from which much utility is anticipated. The War Office provided him with a completely equipped factory for the carrying on of his experiments.

Brewster, Sir David (1781-1868), a Scottish philosopher of great scientific attainments who edited the *Edinburgh Encyclopedia* in 1808, invented the kaleidoscope in 1816, and gave permanent form to the stereoscope. Was one of the founders of the British Association, and a voluminous writer on science. Made important discoveries respecting the polarisation of light.

Bridge, Sir E., organist of Westminster Abbey (b. 1844), educated at Rochester, studied music under Sir John Goss, and since 1875 has been conductor of Westminster Abbey. He has composed numerous cantatas, anthems, etc., and was appointed Gresham Professor of Music in 1900. His marriage in the spring of 1914 was an event.

Bridges, Robert, M.A. (b. 1844), was appointed poet laureate after the death of Mr. Alfred Austin in 1907. Practised medicine successfully up to 1880, thenceforward devoting himself mainly to literature. Has published several volumes of poems and plays of a high merit, displaying a refined fancy and a broad philosophic spirit. Was born at Walmer and educated at Eton and Oxford.

Bridget, St., or St. Bride, an Irish saint of the 6th century, who was so beautiful that she desired to be made ugly in order to be free from temptation. St. Bridget's day is Feb. 1.

Bridgewater, Francis Egerton (1736-1803), 3rd (and last) Duke of. The projector of the famous Bridgewater Canal, which was the beginning of the great English canal system, and yielded his family enormous wealth; was absorbed in 1807 by the Manchester Ship Canal Company, who paid £1,750,000 for it.

Bridgewater, Francis, Earl of (1756-1820), grand-nephew of the last-named, and founder of the famous *Bridgewater Treatise*, written by the most celebrated divines and scientists of the day, and devoted to demonstrating the power, wisdom, and goodness of God, as manifested in the Creation.

Bright, John (1811-1889), a Radical Quaker statesman and orator, one of the chief promoters of the Reform movement which led to the introduction of Free Trade. Was President of the Board of Trade, and later Chancellor of the Duchy of Lancaster under Mr. Gladstone until the Home Rule policy was introduced, and was famed as a Parliamentarian and platform speaker.

Brindley, James (1715-1772), an eminent engineer who constructed or laid out 400 miles of navigable waterways in England, including the Bridgewater and Grand Trunk Canals.

Bristol, Bishop of. (See Browne.)

Broadbent, Sir William (1815-1907), was physician to the late King, and consulting physician to St. Mary's Hospital, and to the London Fever Hospital. Wrote on subjects of medical science with distinction.

Broadhurst, Henry (1840-1911), was one of the oldest and most respected of the Liberal-Labour members, an able speaker, and possessed of administrative capacity. He sat for Leicester from 1892 to 1905, when he retired. In Mr. Gladstone's 1880 Government he was Under-Secretary for the Home Department, and was Secretary to the Parliamentary Committee of the Trades Union Congress for fifteen years. Started life as a blacksmith.

Brook, Sir Thomas, R.A. (b. 1847), was the pupil of Foley, and has achieved a high reputation as a sculptor, among his latest work being the Queen Victoria Memorial in front of Buckingham Palace.

Brodie, Sir Benjamin C. (1783-1862), the leading English surgeon of his time, and author of numerous medical works of a standard description. He was medical adviser in succession to George IV., William IV., and Queen Victoria. Was President of the Royal Society, and created a baronet in 1834.

Brown, Charlotte (1816-1855), one of the most gifted novelists of the 19th century. Her *Yanée Eyre*, published in 1847, attracted universal notice, and her

- other novels, *Shirley*, *Villette*, and *The Professor*, are all marked by the force of strong genius. Her sisters, Emily and Anne, also wrote novels and poems, Emily's *Wuthering Heights* and some of her verse showing exceptional power.
- Brooke, Sir James** (1803-1868), an adventurous Englishman who showed great enterprise and administrative ability in his handling of the affairs of Sarawak, of which place he became Rajah, and also Governor of Labuan. His nephew, Sir Charles Brooke (b. 1829), succeeded him, and achieved great success in the suppression of piracy and head-hunting.
- Brooke, The Rev. Stopford A.** (b. 1832), was at one time a popular Church of England preacher and Chaplain to Queen Victoria. In 1880 he separated himself from the Church and became minister of Bedford Chapel, Bloomsbury, but retired in 1895. His leisure has been devoted to literary work, and he is the author of numerous able books, including a *History of Early English Literature*, and *The Life Superlativæ*, a volume of powerful sermons published in 1906. He published a work on Venice in 1907.
- Brougham, Lord** (1778-1868), one of the chief legal luminaries of the 19th century, who made a great name by defending Queen Caroline against George IV., and afterwards rose to political eminence. Was an eloquent advocate of Reform, and became Lord Chancellor in 1830. Contributed to the *Edinburgh Review*, and was an ardent promoter of education.
- Brown, John**, "of Ossawatimie" (1800-1859), the hero of Harper's Ferry, whose action in inciting certain negro slaves to rebel in 1859 struck the note of alarm which resulted in the Civil War. His attempt to take the Arsenal at Harper's Ferry was defeated, and he was hanged, being afterwards regarded as a martyr by the Abolitionists.
- Browne, Charles Farrer (Artemus Ward)** (1834-1867), was one of the most whimsical and amusing humorists America has produced. In addition to his books he wrote and delivered exceedingly funny lectures, and was making an English tour with them when he was seized with his fatal illness, and died at Southampton.
- Browne, Hubert K.** (1815-1889), best known as "Phil." Was the illustrator of Dickens's novels, from the Picken period down to *Little Dorrit*. He caught the humour of Dickens very happily, and his name will always be associated pictorially with that of the great novelist.
- Browne, Rt. Rev. George Forest**, Bishop of Bristol 1897-1914 (b. 1833), educated at Cambridge, Proctor of Cambridge University 1870-1871, 1877-1878, and 1879-1880, Canon and Treasurer of St. Paul's, 1891; and Bishop Suffragan of Stepney, 1895. Has written much on Church History, and is author of a standard work on *the Lives of France and Switzerland*.
- Browne, Sir James Crichton** (b. 1820), a famous specialist in mental disorders, and Visitor in Lunacy for the Lord Chancellor's department for thirty years.
- Browne, Sir Thomas** (1605-1682), the author of antiquary, whose works still attract the devout.
- Browning, Elizabeth Barrett** (1806-1861), an English poetess of eminence who, between 1830 and 1850, wrote many poems, showing great intellectual grasp and imaginative fervour. Some of her works, such as "The Cry of the Children," "Lady Geraldine's Courtship," "The Ransom of the Pigeon," and "Bertha in the Lane," are sure of immortality, and her "Aurora Leigh," a novel in poetic form, is, in portions, on a high level of poetic execution. She was married to Robert Browning in 1846, and afterwards lived mostly in Italy.
- Browning, Oscar** (b. 1837), a versatile man of letters, University Professor, and educationist, whose pen has covered a wide range of subjects. Is author of *Cornelius Nepos*, a *Life of George Eliot*, *Guelphs and Ghibellines*, *Charles XII. of Sweden*, *History of Educational Theories*, *History of Europe*, 1814-1843, etc., and a volume of Reminiscences published in 1910.
- Browning, Robert** (1812-1889), one of the two greatest poets of the later Victorian era. His earlier poems and dramas, though marked by singular insight and power, were far less popular, mainly because of a somewhat obscure and involved style from which he only occasionally freed himself. His "Strafford," and "The Blot on the Scutcheon" were both produced by Macready, and attained some measure of stage success; but Browning was essentially a poet to be read, rather than acted. Some of his dramatic characterisations are of striking power. From about 1864 to 1870 he published many works, and knew at last what it was to be an appreciated poet. His "Men and Women," "Dramatis Personæ," and "The Ring and The Book," contained some of the finest poetry of modern times.
- Bruce, James** (1730-1794), a celebrated African traveller of Scottish birth who successively explored Syria, the Nile Valley, and Abyssinia, and reached the source of the Blue Nile; published in 1790 a notable five-volume work on his discoveries.
- Bruce, Robert** (1810-1895), competed with John Balliol for the Crown of Scotland, and had a distinguished career on both sides of the border.
- Bruce, Robert** (1874-1899), grandson of the above, took part with Wallace in the revolt against Edward I., later leading the popular cause, achieving one victory after another, until at Bannockburn he overthrew the English army and ultimately secured Scottish independence. He reigned twenty-two years as King Robert I.
- Brummell, George** (1778-1840), "Beau" Brummell, the fashion leader in English Society when George IV. was Prince of Wales; was a *bon vivant* and gambler whose excesses involved him in imprisonment and ultimate bankruptcy.
- Brunel, Isambard Kingdom** (1806-1889), a prominent engineer who constructed the more difficult portions of the Great Western Railway, and many other important works, also achieved eminence as a designer of steam-ships, beginning with the Great Western, one of the first steamers to cross the Atlantic, and ending with the Great Eastern, by far the largest vessel that had been built up to the time of its completion in 1859.
- Brunel, Sir Mark Isambard** (1779-1849), father of the last-named, and constructor of the Thames tunnel, finished in 1843.
- Brunner, Rt. Hon. Sir John, Bart.** (b. 1849), a politician and philanthropist engaged with Dr. Ludwig Mond in a great alkali enterprise, and greatly interested in technical education and public affairs; was made a Privy Councillor in 1900, and was M.P. for Northwich from 1885 to 1910, when he retired.
- Brutus, Lucius Junius**, Roman Consul conjointly with Collatinus, 509 B.C. He was celebrated as the avenger of Lucretia, and for his patriotism in putting to death two of his own sons, who had conspired against Collatinus. Expelled the Tarquins and established the Republic, but fell in battle.
- Bryan, Wm. Jennings** (b. 1856), was Democratic candidate for the American Presidency in 1896 and again in 1900, but was defeated both times by McKinley. In 1907 was adopted for the third time Democratic candidate for the Presidency, but was unsuccessful against W. H. Taft. Under the Presidency of Woodrow Wilson in 1913 he received the appointment of Secretary of State.
- Bryant, William Cullen** (1794-1878), an eminent American poet and editor. His first poem, "Thanatopsis," was welcomed both in his own country and in England as the work of a serious poetic mind.
- Bryce, Rt. Hon. James, Viscount** (b. 1838), P.C., O.M. For many years Professor of Civil Law at Oxford. Was Under-Secretary for Foreign Affairs in 1886. Chancellor of the Duchy of Lancaster in 1892, and President of the Board of Trade in 1894. From 1905 to 1907 was Chief Secretary for Ireland; and from 1907 to 1912 British Ambassador to the United States. Among his historical writings his works on *The American Commonwealth* and *The Roman Empire* hold high rank. Published a work on the South American Republics in 1912, and in the same year paid a visit to Australia.

Bucer, Martin (1491-1551), was a noted German follower of Luther, who came to England on the invitation of Edward VI., and was made Professor of Theology at Cambridge.

Buchanan, George (1506-1582), the Scottish historian and tutor to Prince James, afterwards James I.; was the nephew of George Heriot and Moderator of the General Assembly.

Buchanan, James (1707-1768), American diplomatist and statesman, at one time United States Minister in London, and subsequently (1857-1861) President of the United States.

Buchanan, Robert W. (1841-1901), first attracted attention by some books of poems of great merit dealing mainly with humble life, and afterwards blossomed forth as a critic, novelist, and dramatist, being more or less successful in each line. His novel, *The Shadow of the Sword*, and his dramas, "Lady Clare" and "The Charlatan," are prominent examples of his work.

Buckingham, George Villiers, Duke of (1592-1628), the well-known favourite of James I., who afterwards got into disgrace under Charles I., and was assassinated by Felton.

Buckingham, George Villiers, Duke of (1629-1688), son of the last-named. An evil and unscrupulous politician and intriguer, who, after a few years of brilliant existence at the Court of Charles II., retired to his Yorkshire estate and died from fever succeeding a chill caught while hunting. His demise occurred, not in "the worst man's worst room," as Pope put it, but in the house of a tenant at Kirby Moorside. He was the organiser of the unpopular "Cabal" ministry of 1667-1673.

Buckland, Francis T. (1826-1880), son of Dean Buckland, was an instructive and entertaining writer on natural history, and a great authority on everything relating to fishing. He was Inspector of Salmon Fisheries from 1874 down to his death.

Buckland, William (1784-1861), an English clergyman and geologist (father of the foregoing) who held the Deanery of Westminster from 1845 to 1856, and wrote the Bridgewater treatise on *Geology and Mineralogy* and other learned works.

Buckle, George Earle (b. 1854), was educated at Oxford, and made a brilliant start on the editorial staff of the *Times*, becoming editor on the death of Thomas Chertsey in 1884, a position which he held up to 1912, when he retired. Wrote Vol. III. of *The Life of Disraeli*, of which Vols. I. and II. were written by the late Mr. Moneybags.

Buckle, Henry Thomas (1821-1892), the author of *The History of Civilisation in England*, one of the most vigorous productions of the 19th century.

Buckmaster, Sir S. O., M.P., K.C., Lord Chancellor, May, 1915; Solicitor-General 1913-15 (b. 1861), elected for the Keighley Division in 1911. Is an able speaker and has done good service to his party.

Buffon, G. L., Comte de (1707-1788), devoted his life to the study of natural history, and his famous work in thirty-five volumes gave a more elaborate description than had theretofore been published concerning the animal kingdom.

Bull, John (1563-1628), was organist to James I. and composed much acceptable music, including, it is supposed, our National Anthem "God save the King." In his later years was cathedral organist at Antwerp.

Buller, General Sir Redvers (1829-1908), served in many campaigns, and received numerous honours. In China, Ashanti, the Zulu War, Egypt, and the Sudan he won distinction, and in 1889 was Under-Secretary for Ireland, Quartermaster-General from 1887-1890, Adjutant-General 1890-1897. On the outbreak of the Boer War was made commander of the British forces, but owing to reverses, Lord Roberts went out and took supreme command. General Buller afterwards relieved Ladysmith and took an active part in later engagements. After his return to England he displeased his superiors by some remarks at a public dinner, which ended in his being retired on half-pay.

Bülow, Prince Bernhard von (b. 1849) after a distinguished career in Rome, Vienna, St. Petersburg, Roumania, Spain, and elsewhere, from 1900 to 1909

was Chancellor of the German Empire and Prime Minister of Prussia.

Bulwer-Lytton, Edward. (See *Lytton, Edward Bulwer-Lord*.)

Bunsen, Baron Christian von (1791-1880), a German diplomatist and scholar, who was Prussian ambassador to England from 1842 to 1854, and wrote numerous historical works of importance.

Bunsen, Robert Wilhelm (1811-1899), noted German chemist, discoverer of the metals cesium and rubidium, and inventor of the Bunsen burner, battery, and pump. Made many important observations in spectrum analysis.

Bunyan, John (1628-1688), was originally a travelling tinker and fought with the Cromwellians. Joining a Baptist Society in Bedford in 1655, he became imbued with religious enthusiasm and was for some years a popular preacher. After the Restoration he was thrown into prison, and there wrote his *Pilgrim's Progress* and *The Holy War*, the two finest allegorical works in this or any language.

Burdett-Coutts, Baroness (1814-1906), youngest daughter of Sir Francis Burdett, and granddaughter of Thomas Coutts, the banker, whose vast fortune came to her in 1837, through the Duchess of St. Albans, who had been Coutts's wife. The Baroness's public and private munificence covered almost every department of charitable effort. She married in 1881 Mr. W. L. Ashmead-Bartlett, who assumed the additional surname of his wife. She was buried in Westminster Abbey.

Burgh, Hubert de, one of the Magna Carta barons, and Regent during the minority of Henry III., and for some years afterwards chief Minister.

Burghley, Cecil, Lord (1520-1598), Secretary to Lord Protector Somerset, an influential statesman under Edward VI. and Queen Mary, and subsequently Queen Elizabeth's favourite Minister for forty years.

Burke, Edmund (1730-1797), the son of a Dublin attorney, went to London in 1756, and made his mark in literature by his famous work on the *Sublime and Beautiful*. Later on was private secretary to the Marquis of Rockingham, then Premier, and entered Parliament, where he quickly made a name. An able and earnest debater, he took part in all the great movements of his time, and in 1795, after his retirement, was awarded a handsome pension from the Civil List.

Burnard, Sir Francis Cowley (b. 1837), was educated for the bar, drifted into journalism and play-writing and for many years was a highly successful burlesque-writer, as well as the author of numerous plays. Joined the staff of *Punch* when twenty-seven, and was subsequently editor of that journal for a quarter of a century. He was knighted in 1902, and retired from *Punch* in 1906. A Civil List pension of £500 was conferred on him in 1907.

Burne-Jones, Sir Edward (1833-1898), an English painter of singular power, who at first modelled himself upon Rossetti, whose influence is more or less visible in most of his works. A sad mysticism dominates his pictures, but the colour scheme, the design, and the poetic charm are always evident. His most famous works are "The Days of Creation," "The Mirror of Venus," "The Briar Rose," and "King Cophetua." He was elected A.R.A. in 1885 but resigned in 1893, and was made a baronet in the following year.

Burnet, Bishop Gilbert (1643-1715), was a prominent prelate and historian of the time of William and Mary, being appointed to the see of Salisbury. His *History of the Reformation and History of His Own Times* are valuable contributions to the sum of historical knowledge.

Burnett, Frances Hodgson (b. 1849), is a native of Lancashire, but ranks with American novelists, having lived in the United States since 1865. *That Last Lord's*, published in 1877, established her fame as a novelist, since which she has written *Little Lord Fauntleroy*, *Little Saint Elizabeth*, and many others of merit and distinction.

Burney, Charles (1736-1814), achieved celebrity as the writer of a history of music, and as the father of

Frances Burney (Madame D'Arbly) the authoress of *Evelina* and other novels.

Burney, Frances. (See *D'Arbly, Madame.*)
Burnham, Baron. (b. 1833), has been connected with journalism all his life, being the son of the late Mr. J. M. Levy, whose connection with the cheap press is well known. Baron Burnham has for many years been chief proprietor of the *Daily Telegraph*, a paper which, under his direction, has obtained a world-wide reputation and an enormous circulation.

Burns, Rt. Hon. John, M.P. (b. 1838), the most prominent of parliamentary Labour representatives. A working man and a friend of working men, and came into special prominence during the great strike of dockers. Has represented Battersea in Parliament since 1892, and was for a number of years an active member of the London County Council. Was President of the Local Government Board, 1905-1914, in March, 1914, became President of the Board of Trade, but resigned the office when the war broke out in Aug. 1914.

Burns, Robert (1759-1796), Scotland's greatest poet. Started the world with a little book of poems in 1786 which proclaimed him a true son of the muses. With the £500 that his book yielded him he bought a farm, obtained an appointment with the Excise in 1789, and for the last five years of his life lived at Dumfries. In his career he poured forth song after song of emotional tenderness, and made himself immortal. It was a glorious humanity of which he was the inspired mouthpiece.

Burritt, Ellhu (1810-1870), the "Learned Blacksmith," was a well-known American linguist, writer and publicist, and founder of "The League of Universal Brotherhood"; was U.S. Consul at Birmingham for many years.

Burrows, Rt. Rev. L. H., D.D., Bishop of Sheffield since Feb. 1914 (b. 1857). Educ. Charterhouse and New College, Oxford. Successively Vicar of Wrecklesham, Goddington, Croydon, Hove, and Suffragan Bishop of Lewes.

Burt, Rt. Hon. Thomas, M.P., P.C. (b. 1837), was a pit-lad, and later became a trades-union official of the old school, and was returned M.P. for Morpeth in 1874, holding the seat for nearly forty years, and winning wide esteem for his straightforwardness and sturdy political conduct.

Burton, Sir Richard (1821-1890), explorer, Orientalist and diplomatist, who became famous after making a pilgrimage to Mecca in 1853 disguised as a Mohammedan. Later he did much exploring in Central Africa, and wrote some of our most popular books on that region. Entered the Diplomatic Service in 1861 and was successively Consul at Fernando Po, Santos in Brazil, Danavos, and Trieste. Perhaps his greatest work was the translation of the *Arabian Nights* in their fullness. This work is in sixteen volumes.

Butler, Samuel (1612-1680), renowned as the author of "Hudibras," one of the wittiest poems in the language, and one of the most quoted. His last years were spent in poverty, and he was buried in the Churchyard of St. Paul's, Covent Garden, and given a memorial in Westminster Abbey, "that he who was destitute of all things when alive might not want a monument when dead."

Butler, Lieut.-General Sir William (1838-1901), soldier, traveller, and author, saw service in many lands; Canada (1870); Ashanti (1871); Zulu War, Egypt, etc.; appointed to command in South Africa, Dec. 1898, but a few months later resigned; in 1899 was given command of the Western District, finally retiring from the army in 1905. Among his books, *The Great Lone Land* (1872) and *The Wild North Land* were conspicuous successes. His wife (née Elizabeth Thompson) painted "The Roll Call."

Bust, Madame Clara (b. 1823), the leading English contralto, made her first professional appearance in London in 1852. Her success was immediate. She was married to Mr. Kennerley Rumford—also an able vocalist—in 1900.

Buxton, Rt. Hon. Sydney C., Lord, Governor-General of South Africa since 1914 (b. 1853), M.P.

for Poplar 1886-1914; Colonial Under-Secretary 1892-1895; Postmaster-General (with Cabinet rank) 1905; President Board of Trade 1910-1914. Served on Royal Commission on Education, 1886-1889; member of Income Tax Committee, 1904. An active Liberal political writer and speaker.

Buxton, Sir Thomas Fowell, Bart. (1785-1845), a philanthropist and abolitionist, the friend of Wilberforce, and a distinguished prison reformer. He was made a baronet in 1840, and there is a statue to his memory in Westminster Abbey.

Syng, John (1704-1757), son of Viscount Torrington, after a brilliant career in the navy was made—like his father before him—an Admiral, and sent on an expedition to Minorca, to attack the French who were besieging the place. For some reason he failed to perform the duty entrusted to him. Was tried by court-martial and sentenced to death, being shot on shipboard at Spithead.

Byron, Henry James (1834-1884), an assiduous playwright for the last twenty years of his life, producing numerous burlesques of a class then in vogue, and also writing a number of comedies, some of which attained great success, notably "Our Boys," which ran from January, 1875, to April, 1879, in London, and proved equally popular in the provinces.

Byron, Lord (1788-1824), was the poet who exercised the greatest influence upon European thought during the early part of the 19th century. Educated at Harrow and Cambridge, he published his "Hours of Idleness" at twenty, a volume which was violently attacked by the *Edinburgh Review*, and provoked the retaliatory "English Bards and Scotch Reviewers," which caused a great sensation because of its unparing criticisms of the writers of the day. His "Childe Harold's Pilgrimage," the first two cantos of which were published in 1812, at once placed him in the front rank of poets, and thenceforward to the time of his death he continued to produce poems, most of which were marked by an intense Republican sentiment, yet full of passion and charm and beauty. He made an unhappy marriage in 1815 with the daughter of Sir Ralph Milbanke, from whom he parted after a twelvemonth. He lived abroad for the rest of his life, and died at Missolonghi, whither he had proceeded with the view of aiding the Greeks in their battle for national independence.

C

Cabot, Sebastian (1477-1497), a naval explorer of note who was born at Bristol, and discovered Labrador in 1497. Later he closely surveyed 1,500 miles of American coast, and entering the service of Spain, made further voyages of discovery for the Emperor Charles V. His later years were spent in England, Edward VI. granting him the appointment of Grand Pilot. He was the son of John Cabot, an Italian navigator in the English service, and with his father was engaged in the search for the north-west passage to India under the patronage of King Henry VII.

Cadbury, George (b. 1839), a prominent member of the Society of Friends, a well-known philanthropist, an ardent Liberal, chief proprietor of the *Daily News and Leader*, and head of the firm of Cadbury Bros., Bourneville. Has taken the lead in the Garden City project, and the village of Bourneville may be regarded as the first enterprise of the character to be practically completed; it has an endowment of over £500,000.

Cade, John, an adventurous Irishman who, in 1495, headed an insurrection, and entered London with 30,000 men, defeating the Royal forces at Sevenoaks on the way, and committing the wildest excesses. Cade was himself killed the same year near Heathfield in Sussex by a Kentish sheriff named Iden. Cade assumed the name of Mortimer, and it was from the "London Stone" in Cannon Street that he harangued his followers.

Cadmus, founder of Thebes, 550 B.C., was a Phœnician, and is said to have introduced the alphabet into Greece.

Cadogan, Earl (b. 1840), Conservative statesman; has been Lord-Lieutenant of Ireland and Lord Privy Seal, previously serving in the minor Ministerial offices of Under-Secretary for War and the Colonies. First Mayor of Chelsea, 1900.

Cædmon, an Anglo-Saxon monk of Whitby, and the first of our native poets. He paraphrased the Scripture with poetic effect, and wrote the story of King Lear and his Daughters. He died about 680.

Cæsar, Julius (100-44 B.C.), achieved fame as a Roman general, and afterwards exercised great influence in Rome by his oratory. Was appointed successively military tribune, quaestor, ædile in 65, and pontifex maximus in 63. A year later he was prætor, and then formed one of the first triumvirate. His military exploits continued to fill the Romans with admiration. He invaded Gaul and Britain, and afterwards entered upon the Alexandrine war, which brought him into contact with Cleopatra, whose power over him did not cease till his death. On his return from Africa in 44 the Crown was offered to him, a circumstance which caused the aristocratic party to compass his assassination.

Caigiostro, Count (1743-1795), an Italian charlatan whose real name was Joseph Balsamo, who for a time had an extraordinarily successful career at the different courts of Europe. He came to grief in connection with the Marie Antoinette diamond necklace scandal, for which he was imprisoned in the Bastille, but escaped. He was afterwards imprisoned in the London Fleet and at Rome, and died in the fortress of San Leone.

Caine, Hall (b. 1853), the well-known novelist, who after spending some years as a journalist joined Dante G. Rossetti, with whom he lived until his death in 1882. Subsequently published some sonnets and critical books, and in 1885 produced his first novel, *The Shadow of a Crime*, which was successful and clearly indicated that he had found his vocation. Since then he has produced numerous novels, including *The Deerstalker*, *The Manxman*, *The Christian*, and in 1904 *The Prodigal Son*. His *The Woman Thou Gavest Me* was one of the fiction sensations of 1913. Several of his novels have been dramatised by himself. He has made a considerable fortune by his writings.

Caird, Edward (1835-1908), was for twenty-eight years Professor of Natural Philosophy at Glasgow University. On the death of Professor Jowett he succeeded him as Master of Balliol College, but retired in 1907.

Caird, Mrs. Mona, a dating writer on marriage problems and novelist, whose story, *The Wings of Israel*, published in 1889, created considerable stir, and has been followed by numerous other notable novels.

Cairns, Earl (1819-1885), was one of the ablest lawyers of his day, who, on entering Parliament in 1859, soon gained a high reputation for eloquence and statesmanship. He was appointed Solicitor-General in 1858 by Lord Derby, was subsequently Attorney-General and a Lord Justice of Appeal, and under Mr. Disraeli became Lord Chancellor in 1868, serving in the same capacity in the second Disraeli Administration. In 1878 he was elevated to an Earldom.

Claus, Dr. John (1510-1573), was physician to Edward VI. and Queens Mary and Elizabeth, and nine times President of the College of Physicians. His name is commemorated in Claus College, Cambridge.

Calamy, Edmund (1600-1666), a Puritan theologian who engaged with much enthusiasm in the religious controversies of his time. Although he was one of the Assembly of Divines, and continued a Nonconformist, he was made one of the King's Chaplains at the Restoration, but became a seceder under the Act of Uniformity and died in retirement.

Caldecott, Randolph (1846-1880), a book-illustrator of great merit and humour. Left a position as bank clerk at Manchester in 1872, and settled in London, where for the rest of his life he was a successful producer of black and white illustrations.

Calderon de la Barca, Pedro (1600-1681), a Spanish dramatist of great eminence whose plays

number nearly 200. He was writer of court spectacles for Philip IV.

Caligula, Calpurnius Cæsar, was the third of the Roman Emperors, who from a peaceful beginning in A.D. 37, worked up to a sanguinary and licentious ending. He was murdered in A.D. 41, after having disgusted the people with his monstrous acts.

Calcott, Sir Augustus Wall (1779-1844). Attained great eminence as a landscape painter, being elected R.A. in 1810 and knighted in 1837.

Calcott, John Wall, Mus. Doc. (1766-1821). Brother of the preceding. A composer to whom we owe many delightful glees and a musical grammar.

Calvé, Madame Emma (b. 1866). One of Europe's most famous *prime dorees*; made her first appearance as Marguerite in Coucou's "Faust" at Brussels in 1882; sang in Mascagni's "Cavalleria Rusticana" at Covent Garden ten years later. Her greatest part is Carmen.

Calverley, Charles Stuart (1831-1884), was educated at Harrow and Oxford, and from 1858 to the time of his death published numerous verses and translations, which enjoyed much favour. As a writer of society verses he particularly excelled.

Calvin, John (1509-1541), one of the leading Reformers of the 16th century. Was born in France and attained great popularity as a preacher in Paris, but was expelled, and subsequently lived at Geneva, where he continued to preach the new doctrine giving it that special shape which resulted in the formation of the Calvinist body, distinguished by its greater austerity from that of the Lutherans. Calvin's writings comprise fifty-three volumes.

Cambron, M. Paul (b. 1843), French Ambassador in London from 1898, and one of the authors of the French Treaty with Great Britain.

Cambridge, H. R. H. the Duke of (1819-1904), was grandson of George III. and cousin to Queen Victoria. Entered the British Army in 1837, receiving the rank of colonel, and held various appointments in Ireland and elsewhere. In 1854, four years after he had succeeded to the dukedom, was sent to the Crimea to take up a command, and was present at the battles of the Alma, Balaklava and Inkermann. In 1862 was appointed Commander-in-Chief, a post which he held with no little distinction for 33 years. He resigned in 1895.

Camden, William (1551-1623), an antiquary, historian, and master of Westminster School, whose researches, especially in the field of topography, have been of the greatest value. He became Clarenceux King-at-Arms, and was buried in Westminster Abbey. The Camden Society is named after him.

Cameron, Richard, one of the Scottish 17th century preachers who raised the standard of revolt in defence of the Solemn League and Covenant; he was after many vicissitudes, slain in combat near Aird's Moss, Ayrshire, in 1660. The members of the Reformed Presbyterian Church were afterwards called "Cameronians."

Cameron, Verney Lovett (1844-1894), a noted African explorer who was the first to cross the African continent from east to west. Explored Lake Tanganyika, and made many valuable geographical discoveries. In 1872 went out to find Livingstone, and in 1873 met a party of natives bearing the dead body to the coast.

Camillus, Marcus Furius, was five times Dictator of the Roman Republic, a supporter of the patrician order, and one of the most successful of the Roman generals. He died of the pestilence, B.C. 396.

Camões, Luis de (1524-1579), the author of the "Lusiad," the great epic poem of Portugal, which sets forth the adventures of the discoverers of India, and celebrates the achievements of the principal personages in Portuguese history.

Campbell, John, Baron (1779-1861), an eminent lawyer who entered Parliament in 1830. Became Attorney-General in 1834, Irish Chancellor in 1841, Chancellor of the Duchy of Lancaster in 1846, Chief Justice of the Queen's Bench in 1850, and Lord Chancellor in 1859. He inaugurated important legal

- reforms in connection with newspaper libel and the power of arrest in cases of disputed debt; and also wrote the *Lives of the Lord Chancellors*; and the *Lives of the Chief Justices*.
- Campbell, Rev. R. J.** (b. 1867), one of the popular Congregationalist preachers of the day, and pastor of the City Temple, London, succeeding the late Dr. Parker. A man of great earnestness and eloquence, and one of the religious forces of the time. A keen politician of Socialistic tendencies, and propounder of what is called the "New Theology."
- Campbell, Thomas** (1777-1844), the well-known poet who at twenty-two published "The Measures of Hope," a British classic. Many of his lyrics and songs take high rank, notably "Ye Mariners of England," "Hohenlinden," "The Battle of the Baltic," and "The Exile of Erin." He was granted a Crown pension of £200 a year, and was buried in Westminster Abbey.
- Campbell-Bannerman, Rt. Hon. Sir Henry** (1836-1908), Premier and First Lord of the Treasury in the Liberal Ministry formed by him in December, 1905, until shortly before his death in April, 1908. Was educated at Glasgow University and Trinity College, Cambridge. Entered Parliament in 1868. From 1871-1874 was Financial Secretary at the War Office and again from 1880-1882; Secretary to the Admiralty 1882-1884; and Chief Secretary for Ireland 1884-1885. In 1889 he was Mr. Gladstone's Secretary for War, and filled the same office also in 1892-1895 under Lord Rosebery. Upon the defeat of the Rosebery Ministry in 1895, Sir Henry was forced into Opposition, and was chosen subsequently to succeed Sir William Harcourt as Leader of his Party. He became Prime Minister at the close of 1905, and formed a Government which received a very large majority at the ensuing General Election. A statue of Sir Henry was unveiled at Stirling by Mr. Asquith, Nov. 1, 1912.
- Canning, Charles John, Earl and Viscount** (1782-1828), third son of George Canning, was Postmaster-General 1823-1825, and Governor-General of India 1825-1826.
- Canning, George** (1770-1827), entered Parliament in 1793 and became a great orator and a devoted adherent of Pitt, and without his services first as Under-Secretary of State and later as Treasurer to the Navy. He was Secretary for Foreign Affairs under the Duke of Portland, and in 1807 became Prime Minister, but died four months later.
- Canning, Viscount Stratford de Redcliffe** (1786-1838), cousin of George Canning, was the distinguished diplomatist who carried out many difficult and delicate missions abroad with brilliant success, and was apostrophised by Tennyson as "the voice of England in the East." The statues of the three Cannings stand side by side in the North Transept of Westminster Abbey.
- Canova, Antonio** (1757-1822), an Italian sculptor, whose influence was highly marked, and whose works achieved the first eminence. In 1802 was appointed chief curator of Roman works of art by Pope Pius VII., and afterwards was made Marquis of Ischia.
- Canterbury, Archbishop of.** (See **Davidson**.)
- Canute the Great** (905-1035), invaded England with a Danish force, and in 1033 succeeded in dethroning Ethelred the Unready, and setting up his own father, Sweyn, in Ethelred's stead. Sweyn dying in 1044, Canute claimed the crown, but it took him some years to firmly establish himself. He developed into a wise and beneficent sovereign, and reigned until 1035 peacefully.
- Caracalla, Marcus Aurelius** (A.D. 188-217), a native of Gaul, who became Roman Emperor in succession to his father, Severus, when the latter died at York in 211. Caracalla made evil use of his opportunities, proved himself excessively selfish and cruel, and was assassinated by one of his guards.
- Caractacus** was the name by which a Prince of ancient Britain became famed for his resistance to the Romans in the 1st century. He was ultimately captured and taken prisoner to Rome, where the Emperor Claudius was so moved by his dignity of bearing that he pardoned him.
- Carew, Bamfylde Moore** (1693-1770), the son of a Devonshire clergyman, acquired notoriety by long association with gypsies, who styled him their "King."
- Carew, Thomas** (1529-1639), a poet of great tenderness whose graceful songs were highly popular in their day, and long retained their place in collections of British poetry.
- Carey, Henry**, was an illegitimate son of George Savile, Marquis of Halifax, and was very popular for a number of years as a writer of light dramatic pieces, in which lyrics formed a chief feature. His best known song is "Sally in Our Alley," still familiar to everyone. Died in 1743.
- Carey, William, D.D.** (1761-1831), the first Baptist missionary to proceed to India, and from 1800 to 1830 Professor of Oriental Languages at Port William College, Calcutta. Became famed as an Oriental scholar, and published twenty-four different translations of the Scriptures.
- Carleton, William** (1708-1869), an Irish novelist whose stories had great vogue during the first half of the 19th century. His *Traits and Stories of the Irish Peasantry* are probably unequalled in true depiction of the lives, trials and amours of the Irish people of the novelist's time. He for many years enjoyed a crown pension of £200.
- Carlike, The Rev. Prebendary W.** (b. 1847), is Rector of St. Mary-at-Hill, and founder of the Church Army, which was started in 1882, and has upwards of 800 trained workers, the organisation involving an expenditure in mission work, distributions and relief of £170,000 a year. Mr. Carlike is an indefatigable worker in this cause.
- Carlike, Bishop of.** (See **Diddle**.)
- Carlyle, Thomas** (1795-1881), was educated at Edinburgh University, and, after passing through some years of teaching drudgery, settled in London in 1824 and began the career of a serious man of letters; but, marrying Jane Welsh in 1826, returned to Scotland and spent the next few years on a farm at Craigenputtock, coming to London again in 1834. Meanwhile he had written much that had attracted serious attention in the highest literary circles, and was generally regarded as equipped for future literary greatness. His *Sartor Resartus* was published in 1833-1834. In 1837 he gave a series of historical lectures in London, and in 1839 his *Charmian* appeared. From that time forward his pen never relaxed. His *French Revolution, Past and Present, Life and Letters of Oliver Cromwell, Latter-Day Pamphlets* and *Frederick the Great* were works of noble conception, of undoubted brilliance, and lofty aspiration.
- Carmen Sylva** (b. 1843), the pen name of the Queen of Rumania, who has achieved no small fame as a poetess, and for good deeds and noble charities.
- Carnegie, Andrew** (b. 1835; in Dunfermline, Scotland), emigrated to America with his father in 1848, and after passing through much menial employment became connected with the Pennsylvania Railroad, as Divisional Superintendent at Pittsburgh, and ultimately established the Carnegie iron works, from which he retired in 1901 with a fortune of many millions. His munificent gifts for Free Libraries, educational work, and charitable objects generally are well known. In 1912, at the opening of the Palace of Peace at the Hague, of which he bore the cost, he was the recipient of many honours. His Scotch seat is Skibo Castle, Sutherlandshire.
- Carnot, General Lazare** (1753-1823), was a prominent figure in the French Revolution, and member of the Committee of Public Safety under Robespierre. Later on was Minister of War under Napoleon, while the latter was consul.
- Carnot, Marie Françoise S.** (1829-1894), grandson of the last-named. Elected to the French National Assembly in 1879 and in 1887 became President of the Republic. Was assassinated by an Anarchist at Lyons in 1894.
- Caroline, Queen**, wife of George IV. (1768-1821), was married to her husband in 1795 while he was

Prince of Wales. The Royal couple lived together only a very short time. When George succeeded to the throne in 1830 the Queen took steps to assert her position, and the King retaliated by having a Bill introduced to dissolve the marriage; the result was the famous trial before the House of Lords, when Lord Brougham distinguished himself by a most eloquent defence of the Queen. The Bill was passed by a narrow majority, but public feeling was too strong on the side of the Queen to admit of its being enforced, and she died the following year.

Carpenier, William Benjamin (1813-1885), an eminent doctor and scientist, whose *Principles of Physiology* is a standard text-book, and whose deep-sea dredging expeditions yielded rich results.

Carrington, Earl of. (See **Lincolnshire, Marquess of.**)

Carson, Rt. Hon. Sir E., M.P. (b. 1854), has had a highly successful career first at the Irish and then at the English Bar, being called to the former in 1877 and to the latter in 1893. Was elected M.P. for Dublin University in 1902; in 1904 was made Solicitor-General and knighted. Was before that first Solicitor-General and then Attorney-General in Ireland. From 1910 to the outbreak of the war in 1914 led a semi-militant organisation in Ulster against the Home Rule Bill.

Cartier, Jacques, the famous 15th century navigator, born at St. Malo, whose exploration of Canada, and especially of the gulf and river of St. Lawrence, proved of great geographical importance.

Cartwright, Edmund, D.D. (1743-1823), was rector of Goadly Marwood, and while visiting Buxton had his attention drawn to certain mechanical problems, and set to work and invented the power loom, and later on also invented a wool-counting machine. Although these inventions were ultimately developed into fortune-making instruments, they benefited their inventor but little, and in 1809 Parliament made him a grant of £10,000. In 1904 a Cartwright Memorial Hall was opened at Bradford, the gift of Lord Masham, in commemoration of Cartwright's achievements.

Caruso, Signor, the celebrated tenor, was born in Florence, and made his first operatic appearance in his native city. His success has been unbounded. Besides being a great singer, he is a man of many activities, and, among other things, is a clever caricaturist.

Casabianca, Louis (1754-1798), captain of the French flagship *L'Orient* at the battle of the Nile. He and his ten-year-old son died together in the burning ship, refusing to quit the vessel.

Cassel, Rt. Hon. Sir Ernest, G.C.B., P.C., etc. (b. 1852), one of King Edward VII.'s personal friends, and a great financier. Endowed, in his Majesty's name, a sanatorium for convalescents at a cost of £200,000. He made a gift of a similar amount for the benefit of poor Germans in England and poor English in Germany.

Cassius, Longinus, a distinguished Roman general who opposed the Dictatorship of Julius Caesar, and took part in his murder. He died in 42 B.C., after being defeated by Mark Antony.

Castlereagh, Lord (1769-1822), British Minister of War and Foreign Secretary during the Napoleonic wars, who incurred much unpopularity because of the disastrous condition of home affairs. Succeeded to the Marquessate of Londonderry in 1821, and ended his life by suicide the following year.

Catherine, St., was the name borne by a celebrated virgin of Alexandria, who was put to death in 307 for professing Christianity, being, according to some accounts, tortured on a spiked wheel before execution, though other authorities aver that the intended torture was miraculously prevented. From this we get the term "St. Catherine's wheel." Her festival is on November 25th.

Catherine of Aragon (1489-1536) first wife of Henry VIII., having previously been the wife of Arthur, Henry's elder brother, who died shortly after the marriage. She was the daughter of Ferdinand and Isabella of Spain. The king divorced her in 1536.

Catherine II., Empress of Russia (1729-1796), wife of Peter III., who was murdered; succeeding him, she proved herself a capable ruler for a time, but ultimately gave way to licentious excesses, which almost ruined Russia by her heavy cost. She was called the "Semiramis of the North."

Catherine de' Medici (1519-1589), wife of Henry II. of France, and a woman of commanding power and influence, especially during her Regency, which continued while her son Charles IX. was in his minority. Her antagonism to the Protestants led to the Massacre of St. Bartholomew. In spite of her cruelty, she was an able woman, and showed a great appreciation of art and literature.

Catiline, Lucius Sergius (108-62 B.C.), made himself notorious for the conspiracy he plotted, but failed to carry to success, against the Consul Cicero. He was impeached before the Senate, expelled from Rome, and ultimately slain in battle.

Cato, Marcus Porcius (234-150 B.C.), a Roman statesman, soldier, and writer, of strict virtue, simplicity and wisdom, who strongly condemned the luxury of his time. He was surnamed "the Censor." He wrote a history, still extant in fragments.

Cato, Marcus Porcius, the Younger (95-46 B.C.), great-grandson of the last-named; after some military experience was elected Tribune, and on the outbreak of the Civil War in 49 sided with Pompey. Being in danger of capture, he retired to his tent, read portions of Plato's *Phaedo*, and then slew himself rather than be taken by the enemy.

Cattermole, George (1800-1868), a noted book-illustrator and water-colour artist, whose drawings for Scott's novels, Shakespeare's plays, and other works were marked by much delicacy.

Catullus, Gaius Valerius (87-54 B.C.), an elegant Roman poet, whose lyrics to Lesbia are amongst the finest compositions of the kind in literature.

Cavaignac, Eugene Louis (1802-1857), a prominent French general of Republican principles who, on the outbreak of the Revolution of 1848, was made Dictator of Paris, and unsuccessfully opposed Louis Napoleon for the office of President. After that he lived in retirement, and refused to take the oath to the Emperor after the Coup d'Etat.

Cavendish, Lord Frederick Charles (1835-1889), adopted a political career, and gave promise of future eminence, but in 1889, after being appointed Chief Secretary for Ireland, was assassinated along with Mr. Burke in Phoenix Park.

Cavendish, Sir Thomas (1757-1902), an adventurous English navigator who, in addition to adding considerably to the geographical knowledge of his time, made many daring attacks upon the Spaniards and secured much booty. He died at sea.

Cavour, Count di (1810-1861), a distinguished Italian statesman, who, as Premier and adviser to Victor Emmanuel, did much to secure the unification of Italy.

Cawdor, Earl (1847-1911), an Ecclesiastical Commissioner 1895-1905, chairman of the Great Western Railway, and First Lord of the Admiralty, 1905.

Caxton, William (1422-1491), was born in Kent and employed in commerce for a time. While visiting Flanders he obtained an insight into the then new invention of printing, and afterwards set up a printing-press of his own at Westminster, where he published a number of black letter books.

Cecil, Lord Hugh, M.P. (b. 1863), son of late Marquis of Salisbury, was educated at Eton and Oxford, and represented Greenwich in Parliament 1895-1906, proving himself a clever debater and a Free Trader. He was elected M.P. for Oxford University in 1910.

Cecil, Lord Robert, M.P. (b. 1864), fourth son of the third Marquis of Salisbury, whose private Secretary he was. Took an active part in the Home Rule and Welsh Disestablishment discussions, and was a prominent member of the Marconi Committee. Sat for East Marylebone from 1906 to 1910. Returned for Hitchin, 1911.

Cecilia, St., the patron saint of music. Was a Christian martyr of the 3rd century. She is said to have been the first to introduce instrumental with

vocal music into Christian worship. Her festival day is November 22nd.

Cardie, a Saxon who invaded Wessex in the early part of the 6th century, and made himself ruler of that kingdom, becoming ancestor of the English Royal line. He conquered the Isle of Wight in 530.

Cervantes (1547-1616), famous throughout the world as the author of *Don Quixote*. He had a most adventurous career, taking part in many military expeditions, and not turning to literature until his retirement from the profession of arms. In spite of the great success of his work, he died in poverty.

Chad, St., was Bishop of York and subsequently of Mercia in the 7th century, and won much renown for his piety and learning.

Chalmers, Sir Mackenzie Dalzell, K.C.B., C.S.I. (b. 1847), was permanent Under-Secretary of State for the Home Department 1903-8. Educated at King's College, London, and Oxford, and is a son of Dr. F. S. C. Chalmers. Called to the Bar 1869 and has served the offices of Revising Barrister, Counsel to the Board of Trade, County Court Judge, law member of the Council of the Viceroy of India, and Chief Justice of Gibraltar.

Chalmers, Thomas, (1759-1847), a Scottish Free Church Minister and philosopher who made a great name as preacher and writer on theology.

Chamberlain, Rt. Hon. Joseph (1836-1914), was born at Camberwell Grove, London. Made a fortune in screw manufacture in Birmingham, after which he did much active municipal work at Birmingham. In 1876 he entered Parliament, and became a national political figure. At first he was an enthusiastic Liberal with Republican tendencies, and served various offices under Mr. Gladstone. When the Home Rule split occurred, he became the most active member of the Liberal Unionist party. In 1895 he accepted office as Secretary of State for the Colonies under Lord Salisbury, and in that post won a great reputation, notwithstanding the fact that during his term of office he had the Boer War to contend with, and that outside his own party he was regarded as being the chief author of the trouble. In May, 1903, he caused great sensation by suddenly advocating a scheme of fiscal reform, involving a partial return to Protection. This policy, for the better advocacy of which he resigned the Colonial Secretaryship, was adopted as one of the leading planks of the Unionist platform.

Mr. Chamberlain was incapacitated by illness from parliamentary duties for some years prior to his death.

Chamberlain, Rt. Hon. J. Austen, M.P. (b. 1863), eldest son of Mr. Joseph Chamberlain, was educated at Rugby and Cambridge, and has represented East Worcestershire since 1892. Has filled the positions of Civil Lord of the Admiralty, Financial Secretary to the Treasury and Postmaster-General, and in 1905 became Chancellor of the Exchequer, which position he sustained until the Liberals came into power at the end of 1905.

Chambers, Robert (1802-1871), the younger of the brothers William and Robert Chambers, the well-known publishers of popular literature and founders of *Chambers's Journal*. Early showed literary gifts and, besides being a chief contributor to the *Journal* and other publications issued by the firm, was the author of *Vestiges of Creation*, a work published anonymously that went through many editions before its author's name was known.

Chambers, William (1800-1889), brother of the last-named. Was the business genius of the firm, and by his high character and public spirit was much esteemed by his fellow citizens, becoming Lord Provost of Edinburgh, and living to receive the offer of a baronetcy, which he died before he was able to accept.

Chambers, Sir William (1726-1793), a British architect, who rebuilt Somerset House in 1775.

Chambers, Henri Charles, Comte de (1850-1893), son of the Duc de Perri, was regarded as the Bourbon claimant to the French throne after the overthrow of Napoleon III., and there were times when success seemed almost within his grasp, but he allowed opportunities to pass, and lived in retirement during the later years of his life.

Champlain, Samuel de, a French navigator who founded Quebec in 1608, and in the following year discovered the lake known by his name.

Chancellor, Richard, the trade pioneer and seaman, who in 1753 made his way to Moscow and negotiated a trading treaty for England with Russia, and led to the formation of the Muscovy Company.

Channing, William Ellery (1780-1842), an American Unitarian minister and writer, whose efforts in the cause of slavery abolition were greatly appreciated, and whose sermons and writings displayed great power and earnestness. His nephew (also called William Ellery) was a gifted journalist, poet, and general writer (1818-1901).

Chantrey, Sir Francis (1781-1841), a renowned English sculptor who contributed many fine statues to Westminster Abbey and St. Paul's. He was made an R.A. in 1818, and received a knighthood in 1836. He left a considerable fortune to the Royal Academy, to take effect after Lady Chantrey's death, and to be appropriated in the purchase of works of art for the encouragement of sculpture and painting.

Chaplin, Rt. Hon. Henry, M.P. (b. 1842), entered Parliament in 1868 and sat as a Lincolnshire county member for thirty-eight years; during which period he successfully filled the offices of Chancellor of the Duchy of Lancaster, President of the Board of Agriculture, and of the Local Government Board. Has been a consistent Protectionist from the first, and advocated Mr. Chamberlain's subsequent Fiscal Policy long before that gentleman had any thought of abandoning Free Trade. Mr. Chaplin has perhaps won more renown as a sportsman than as a politician. He lost his old seat in 1906, but has sat for Wimbledon since 1907.

Chapman, George (1559-1634), an Elizabethan dramatist, who acquired more fame by his translation of Homer than by his plays. Keats's sonnet on reading Chapman's "Homer" is a splendid tribute to the old dramatist.

Charlemagne (742-814), the celebrated ruler, general, and statesman, who from being King of the Franks became Emperor of the Romans, and governed an empire comprising Gaul, Italy, and large parts of Spain and Germany. His rule was as wise as it was powerful.

Charles Edward (Stuart), the "Young Pretender," as he came to be called (1745-1788), grandson of James II., and the hero of 1745, lived in exile after Culloden, and his later career was mainly one of dissipation.

Charles I. (1600-1649), succeeded his father James I. as King of England in 1625, and from the first was in more or less conflict with Parliament. His monetary demands, and unjust taxation led to the violent opposition which resulted in the Civil War, the story of which is known to every reader of history. He was beheaded in front of the Banqueting House at Whitehall, Jan. 30, 1649.

Charles II. (1630-1685). Was in command of the Royalist forces in the West during the Civil War, and escaped to the Continent after Naseby. Subsequently he became the King at the Restoration, and, following upon the sober quietude of the Commonwealth period, formed an acceptable change to the people at large until, by his excesses, of one kind and another, he proved his unkingliness of character. He contrived to keep himself fairly popular, however, despite his extreme selfishness.

Charles V. (1500-1558) was the dominating European figure for many years, being Emperor of Germany and King of Spain, at a time when his tactful policy enabled him to guard the interests of both Catholics and Protestants with considerable success.

Charles XII. of Sweden (1682-1718) was a brave but impulsive monarch whose rule was distinguished for a fearless and often foolhardy policy of war, in the execution of which he sometimes sustained severe defeat. Peter the Great was victorious over him at Poltava, and he was killed at the siege of Frederickshall, Norway.

Charlotte, Princess Augusta (1706-1817), only daughter of George IV., married Leopold I. of Belgium in 1816 and died the following year.

Chassepot, Antoine, was the inventor of the breech-loading rifle bearing his name, and used by the French army against the Germans in 1870-1871, but now long superseded.

Chateaubriand, François René (1768-1848), had an adventurous and somewhat eccentric political career, but in the midst of it all he contrived to write a number of stories, poems and essays, which give him a prominent place in French literature. His *Atala* and *The Martyrs* are works of genius.

Chatham, William Pitt, Earl of (1708-1778), had a long and distinguished career as a statesman, and was the most eloquent Parliamantarian of his time. In the long conflict with France that preceded the American War of Independence, Chatham showed great resourcefulness and vigour, but his patriotic efforts were of little avail against the obstinacy of the King and his party, and he ultimately retired from contention, only making a last appearance in the House of Lords to urge a greater resistance to the American Colonists, and, after a powerful speech, fell back in an apoplectic fit and died a few weeks later, being buried in Westminster Abbey.

Chatterton, Thomas (1752-1770), "the marvellous boy who perished in his pride," was the son of a Bristol sexton, and astonished the world as a youth in his teens by copying a number of MSS. poems, ballads and records as having been unearthed by him from an old monument chest in the Church of St. Mary, Redcliffe. These writings were afterwards proved to be the composition of Chatterton himself, and at once gave him a position as a poet. He went to London, but met with such ill success that in his despair he poisoned himself.

Chaucer, Geoffrey (littera 1340-1400), known as the "Father of English poetry." Achieved immortality by his "Canterbury Tales," supposed to be related by different classes of pilgrims, and giving a most graphic description of the life and characters of his time. He was buried in Westminster Abbey.

Chelmsford, Bishop of. (See **Watts-Ditchfield, The Rt. Rev. J. E.**)

Cherubini, Maria L. Zenobi, C. S. (1760-1842) an Italian musical composer who spent the best part of his life in Paris, and there wrote operas, Masses, and other compositions distinct with melodic grace and fervour of expression.

Chesler, John. (See **Jayne.**)

Chesfield, Earl of (1604-1733), the fourth Earl, and a statesman of note. His fame rests, however, upon his *Letters to his Son*, which for purity of style and grace of expression have seldom been excelled, though the moral they point is not always one that modern ideas would endorse.

Chesterton, G. K. (b. 1874), one of the most active of our younger writers. Contributes a weekly essay to the *Illustrated London News* and keeps himself in evidence in many literary and journalistic quarters; handles social questions, art, politics, and criticism with equal dexterity and audacity. Has published studies of the lives and works of Robert Browning and Charles Dickens.

Cheyne, Rev. T. K., D.Litt. (b. 1841), Fellow of Balliol College, and in 1885 appointed Oriel Professor at Oxford and Canon of Rochester. Was a member of the Old Testament Revision Company, and is a well-known and prolific writer on Biblical subjects. One of his latest works, published in 1907, was *Traditions and Beliefs of Ancient Israel*.

Chillingworth, William (1602-1644), a divine whose *Religion of Protestants* was an influential book. Had a rather curious career, in later life being converted to Romanism from Protestantism, and then turning to Protestantism again and joining the Royal forces on the breaking out of the Civil War, when he was taken prisoner and died.

Chilton, Viscount (formerly the Right Hon. A. Akers-Douglas) (b. 1851). Conservative statesman, who served in turn as Parliamentary Secretary to the Treasury, First Commissioner of Works, and Home Secretary. Was also an efficient Party Whip. Raised to the Peerage, 1912.

China, Dowager Empress of (1835-1908), was a slave child, afterwards found her way into the

Emperor's harem, and after a time was promoted to the position of leading wife. On the Emperor's death she became Regent, an office which she filled with much administrative ability until the termination of the late Emperor's minority in 1899. In 1898 she dethroned him, however, and ruled in his stead up to November, 1908, when they both died suddenly.

Chippendale, Thomas, a celebrated designer of furniture whose examples are now highly prized and fetch big prices. He was a native of Worcester-shire (born in 1706), but made his name in London, having a shop in St. Martin's Lane.

Chisol, Sir Valentine (b. 1852), director of the foreign department of the *Times*, 1899-1912, and a writer of special weight and authority on Eastern subjects.

Chisholm, Hugh, editor of the "Encyclopædia Britannica" (b. 1866), educated at Felsed and Oxford (Corpus Christi), is on the editorial staff of the *Times*, and a frequent contributor to the chief reviews.

Choate, the Hon. Joseph Hodges (b. 1832), an eminent American lawyer and politician, who was United States Ambassador to Great Britain from 1896 to 1905, and filled the position with great distinction. Mr. Choate is a cousin of Rufus Choate, a great American lawyer (1795-1858) who succeeded Daniel Webster as a Senator in 1842.

Chopin, Frédéric F. (b. at Warsaw, 1809, d. in Paris, 1840). A celebrated composer and pianist, who settled in Paris in 1831 and immediately took up a prominent position, and in the next few years gave to the world some of the most beautifully fascinating compositions for the piano ever written. He lived a life of romance, and died of consumption at 39.

Christie, Sir W. H. M. (b. 1845), was educated at Trinity College, Cambridge, of which he became a Fellow. In 1875 was appointed Chief Assistant at the Royal Observatory, and was Astronomer Royal from 1881 to 1910. Has written a *Manual of Elementary Astronomy*, and is the inventor of valuable improvements in instruments of astral observation. Made K.C.B. in 1904.

Christopher, St. was a martyr of the 3rd century, to whom great feats of strength were attributed; he belongs both to the Roman and Greek Churches. His festival day in the latter is July 25th and in the latter May 13th.

Chrysostom, St. John (347-407), a prominent father and saint of the Greek Church who was made Archbishop of Constantinople, and was famous for his eloquent preaching and persuasive writing.

Churchill, Lord Randolph (1849-1895) was the second son of the sixth Duke of Marlborough. Entered Parliament in 1874 and four years later became prominent on the Conservative side for his scathing attacks on what he called the "Old Gang" of his own Party, and was one of Mr. Gladstone's most severe critics. In 1878 he became Secretary for India, and in the following year was Chancellor of the Exchequer and leader of the House of Commons, but after a few months of brilliant work resigned on some difference of opinion with his colleagues, and never again held office. After 1891 failing health diminished his powers, and he died in 1895, without having quite fulfilled his splendid promise.

Churchill, Rt. Hon. Winston S., M.P., First Lord of the Admiralty 1911-15 (b. 1874), son of the last-named, has since his nineteenth year been a prominent public figure. He went through the Spanish Campaign in Cuba. Was with the British force during the Indian frontier troubles of 1897-1898, served in the Sudan Campaign, and during the Boer War had many dramatic adventures and wrote some excellent letters to the papers. During the last few years has been a prominent figure in Parliament, and worked heartily for the Conservatives until Mr. Chamberlain brought out his Fiscal proposals, when he declared against them in the most emphatic manner, and eventually joined the Liberal ranks. In 1905 was appointed Under-Secretary for the Colonies, and has since been a leading member of the Liberal Government in the House. In 1908 was made President of the Board of Trade, and, losing his seat at Manchester, was returned for Dundee. Became

Home Secretary in succession to Lord Gladstone on the latter being appointed to the Governor-Generalship of South Africa in 1910. Made a Privy Councillor in 1907. Has proved a resourceful and indefatigable First Lord.

Cibber, Colley (1671-1757), a London actor and dramatist of great repute in his day. "The Careless Husband" and "Love's Last Shift" are considered the best of his comedies. He was Poet Laureate from 1730 to his death.

Cicero, Marcus Tullius (106-43 B.C.), a great Roman Republican orator and philosopher, whose works won him great fame and are assured of immortality. His younger brother, Quintus Tullius Cicero (102-43 B.C.), was a Roman soldier of some note. Both were slain.

Cid, the name given to the famous Spanish knight, Don Rodrigo Diaz, Count of Rivas (1026-1099), whose exploits in battle and adventure made him the national hero. He drove the Moors out of Spain before he had completed his twentieth year.

Cimabue, Giovanni (1240-1302), a celebrated Florentine painter, master of Giotto, and the leader of the movement which led to the formation of what is called the Florentine school. His frescoes are of great beauty.

Cincinnatus, Lucius Quinctius (510-439 B.C.), a noble Roman of simple life who was chosen Dictator while following agricultural pursuits, and led the Roman army against the Arimians and quickly defeated them; then, after only sixteen days of Dictatorship, he returned to his farm. He was called upon to fill the office a second time, twenty years later, at the age of 80, but died shortly afterwards.

Clare, John (1793-1864), a humble Northamptonshire peasant poet, whose "Poems of Rural Life and Scenery" and "The Village Minstrel" contain some very beautiful sentiments and depictions. His later years were spent in a lunatic asylum.

Clarendon, Edward Hyde, 1st Earl of (1609-1674), a statesman of great ability who filled the office of Lord High Chancellor under Charles II., and for a time was in high favour, but, refusing to pander to Charles's whims, was dismissed and went to live in retirement. His *History of the Rebellion* is a valuable work, having the advantage of being written by one who was a witness of, and often an important figure in, the events described. His daughter Anne was the wife of the Duke of York, afterwards James II., and it was her daughter who became Queen Anne. Clarendon died in exile at Rouen.

Clarendon, George Wm. Fredk. Villiers, 4th Earl of, (1800-1870), an English diplomatist and statesman; Minister to Spain 1833-1839, Lord Privy Seal in 1840, and subsequently Lord Lieutenant of Ireland, Plenipotentiary in Paris, and three times Foreign Secretary under Palmerston, Russell, and Gladstone respectively.

Clark, Sir Andrew Bart. (1826-1897), one of the most distinguished doctors of his day, who became physician to the London Hospital in 1854, and soon afterwards acquired one of the largest practices in fashionable London, and was a great authority on lung diseases. Sir Andrew was a Scotsman.

Clarke, Sir Edward, K.C., F.C. (b. 1841), one of the most eminent counsel of the day. Entered Parliament in 1880, and was Solicitor-General from 1886 to 1892. As the General Election in 1906 he was returned for the City of London, with the Hon. A. Gibbs, the latter shortly afterwards retiring in favour of the Rt. Hon. A. J. Balfour, who had been defeated at Manchester. Sir Edward eventually resigned his seat. He received his early education at the City of London College and evening classes of King's College, London. Retired from the Bar, 1914.

Clarke, Sir George Sydenham. (See Sydenham, Lord.)

Clarkson, Thomas (1760-1846), was one of the leaders of the Negro Emancipation movement, to which he devoted the main part of his life.

Claude de Lorraine (1600-1682), the most famous landscape painter of his century. His real name was

Claude Gellée, and he was born at Chamagne in the Vosges, going from France to Rome as a lad, and there laying the foundation of his world-wide celebrity. He lived in Rome most of his life.

Claudius I. (to B.C.-A.D. 54), Emperor of Rome, who succeeded his nephew, Caligula. He was the grandson of Tiberius Claudius Nero, erected many imposing buildings in Rome, and visited Britain. In his later years he became the tool of favourites, and was poisoned by his wife, Agrippina.

Clay, Frederic (1840-1889), an English musical composer of light operas of a very tuneful character. Best known by his "Princess Toto" and "The Merry Duchess."

Clay, Henry (1777-1850), an American orator and politician, three times candidate for the Presidency of the United States, and long Speaker in Congress. Served also as Peace Commissioner at Ghent, and was author of the Compromise Tariff of 1833.

Clemenceau, Georges Eugene (b. 1841), a prominent French statesman and editor of strong Radical tendencies who supported General Boulanger for a time and then bitterly opposed him. Is still a leading exponent of French Radicalism, though he sacrificed his independent position to become Premier and Minister of the Interior in October, 1906, after he had had a large hand in the making and unmaking of governments for over three decades. He held the Premiership until 1909. He is a great orator, and was a sturdy defender of Dreyfus.

Clemens, Samuel ("Mark Twain") (1835-1910). After the Civil War drifted into journalism, making himself popular as a humorist in 1859 by his *Innocent Abroad*, the result of a trip to Europe. From that time he was actively employed in producing works of humour and editing. Among his other works may be mentioned *A Tramp Abroad*, *Tom Sawyer*, *Huckleberry Finn*, and *Pudd'nhead Wilson*. Visited England in 1907 and was made a D.C.L. of Oxford.

Clement, St., Bishop of Rome in the 1st century, and according to tradition, the third prelate of the Holy See after St. Peter. He was a prominent Presbyterian of the Christian congregation, and is by some identified with the Clement mentioned by St. Paul as his fellow labourer.

Cleon flourished in the 5th century B.C., and from being an Athenian demagogue became a successful general. He fell at Amphipolis, 429 B.C.

Cleopatra (69-30 A.C.), the famous Egyptian Queen whose beauty fascinated Julius Caesar, whom she accompanied to Rome. After Caesar's death, she returned to Egypt and subdued Antony as she had subdued Caesar, and on Antony's death ended her life by poison, the tradition is, by applying an asp to her bosom.

Cleveland, Grover (1837-1908), President of the United States from 1885 to 1889 and from 1893 to 1897. A strong Democratic statesman whose commencement of his second Presidency convened an extra session of Congress, which repealed the purchasing clause of the Sherman Silver Bill.

Clifford, Rev. John (b. 1836), worked in a lace factory as a boy, entered the General Baptist College in 1855, qualified for the ministry, and became pastor of Praed St. Church, Paddington, afterwards taking degrees at London University. Westbourne Park Chapel, opened in 1877, was the next scene of his ministrations, and he still preaches there. Is an ardent political Nonconformist. Has written numerous religious works, and been twice President of the Baptist Union, and also President of the National Council of Free Evangelical Churches.

Clinton, Sir Henry (1738-1795), was one of the generals commanding British troops in the American War of Independence and fought at Bunker's Hill, succeeding Howe as Commander-in-Chief. Was afterwards Governor of Gibraltar, where he died.

Clive, Robert, Lord (1725-1761), went out to India as a clerk in the service of the East India Company when, and during the diplomatic difficulties which arose between England and France attracted the attention of his superiors by some able suggestions for the curbing of the French influence. In the war that

followed he was given a command and displayed such remarkable military genius that he virtually became Commander-in-Chief. In the troubles that followed with the native rulers, he was equally resourceful, and succeeded in laying the foundation of the British Empire in India on a secure basis. On his return to England in 1760 he was raised to the peerage. His latter years were marked by mental disturbance and ultimately he committed suicide.

Clotilda, St. (475-545), was the wife of Clovis, King of the Franks. She converted the king to Christianity and lived so good a life that she was canonised after her death.

Clough, Arthur Hugh (1819-1861), an English poet of great earnestness of purpose and breadth of mind. His best known poems are "The Bothie" and "The Tragedy of Dipsychus." Matthew Arnold's "Thyrsis" is dedicated to his memory.

Clovis (465-511) was the founder of the Merovingian line of French kings, and a convert to Christianity. He defeated the Burgundians and West Goths, and fixed his court at Paris.

Clyde, Colin Campbell, Lord (1793-1863), a British general who served in the Peninsular and Crimean wars, and made a great reputation as commander-in-Chief in India during the Mutiny, after which he was raised to the peerage and granted a pension of £2,000 a year.

Cobbe, Frances Power (1822-1904), a talented and powerful writer on a wide range of social and religious subjects, including women's rights and vivisection. She had strong convictions and the full courage of them. She was a native of Dublin.

Cobbett, William (1762-1835), a politician and controversialist, who, through the medium of his *Political Register*, attacked both Radical and Tory in turn, and by mercurial personalities frequently got himself into trouble. In 1832 he entered Parliament as member for Oldham, and by his trenchant speeches and writings always kept himself full in the public eye.

Cobden, Richard (1804-1865), the son of a Sussex farmer, who afterwards became a commercial traveller, and during the Corn Law Agitation came into great prominence as an advocate of Free Trade. He devoted himself completely to this cause, that for some years he entirely neglected his business affairs and in recognition of his services a subscription of £20,000 was raised for and presented to him. He entered Parliament in 1847, and except for an interval of two years remained a member till his death. In 1860 he negotiated a commercial treaty with France which was of great benefit to the trade of this country. Titles and other honours were offered to him, but declined.

Cockburn, Sir Alexander J. (1802-1880), after a most successful career as a barrister and M.P., twice filling the office of Attorney-General, he became Chief Justice of the Common Pleas in 1855, and Chief Justice of the Queen's Bench three years later, holding that high office with distinction for twenty-four years. He represented the British Government at Geneva on the Alabama arbitration, and dissented from the award.

Cocker, Edward (1631-1695), a famous arithmetician, whose arithmetic went through 12 editions. "According to Cocker" is still a popular phrase.

Codrington, Admiral Sir Edward (1770-1851), a British admiral who saw much active service and greatly distinguished himself. He commanded a ship at the Battle of Trafalgar, was engaged in the American War of 1812-14, and had command of the allied fleets at Navarino.

Coke, Sir Edward (1552-1634), an eminent English judge, and author of the legal classic, *Coke upon Littleton*. He served as Speaker of the House of Commons and as Attorney-General before he became Chief Justice, and was the merciless prosecutor of Sir Walter Raleigh and of the Gunpowder plotters; but made a fine fight for English freedom in Parliament against Buckingham, towards the close of that ill-fated Royal favourite's career.

Colbert, Jean Baptiste (1619-1683), a great French statesman and financier, who achieved much

for his country in advancing the arts and sciences and promoting commercial and industrial development. His son (also called Jean Baptiste) was Marquis de Seignelay and Minister of Marine.

Colenso, John William (1812-1883), was Bishop of Natal from 1853 to the time of his death, and became noted for his criticisms on the Pentateuch, concerning which a fierce controversy raged for some years. Colenso was condemned by a tribunal of South African Bishops, which he refused to recognise, and continued in his position with the general approval of the English Church.

Coleridge, Samuel Taylor (1772-1834), one of the great poets of the early part of the 19th century, whose "Ancient Mariner" and a few other poems stand unsurpassed for poetic beauty and originality.

Coleridge-Taylor, S. (1875-1912), musical composer, who was trained at the Royal College of Music, and in 1898 had an "Orchestral Ballade" performed at the Gloucester Festival. The following year he produced his cantata, "Hiawatha's Wedding Feast," and in 1912 composed the music for Alfred Noyes's "Peace Poem."

Colet, John (1467-1529), was Dean of St. Paul's and founder of St. Paul's School. Among his pupils were Milton, Chubb, Haller, and Pepy.

Colling, Gaspard de (1817-1879), a famous French admiral, soldier, and statesman, and one of the leaders of the Protestant party, who fell a victim in the Massacre of St. Bartholomew. His father (same name) was Marshal of France.

Collings, Rt. Hon. Jesse (b. 1831), was a successful Birmingham merchant until 1870, when he retired, filling the office of Mayor of Birmingham the same year. Entered Parliament in 1880, and was Parliamentary Secretary to the Local Government Board in 1887, after his Small Holdings Amendment to the Address had caused the resignation of Lord Salisbury's Government. From 1895 to 1902 was Under-Secretary to the Home Office. Retired from Parliament, 1914.

Collingwood, Cuthbert, Lord (1750-1810), was one of Nelson's famous commanders, taking part in most of the leading engagements of the period, and being second in command at Trafalgar, having a peerage conferred upon him for his services. He was native of Newcastle and was a vicar at St. Paul's.

Collins, Rt. Hon. Lord (1842-1911) was Lord of Appeal in 1907, previously a Judge of the High Court, and Master of the Rolls; was arbitrator on the Venezuela Boundary Question and a Lord Justice of Appeal.

Collins, Mortimer (1827-1876), poet, novelist, and miscellaneous writer, and at one time mathematical master at Elizabeth College, Guernsey.

Collins, William (1721-1759), the author of the *Odes to the Passions, Oriental Eclogues, &c.*

Collins, William (1788-1847), noted landscape and figure painter, and father of Wilkie Collins.

Collins, W. Wilkie (1824-1889), the novelist, was for many years associated with Charles Dickens, and wrote some of his best stories for *Household Words* and *All the Year Round*, including *The Dead Secret*, *The Woman in White*, and *No Name*.

Colman, George (1732-1794), a dramatist of considerable versatility, whose "Jealous Wife" and "The Clandestine Marriage" (the latter written in conjunction with Garrick) long held the stage.

Colman, George, the younger (1760-1831), son of the foregoing and also a dramatist of considerable repute. He wrote "The Poor Gentleman," "The Heir-at-Law," and other pieces, and was an exacting examiner of plays under the Lord Chamberlain.

Colonna, Vittoria (1400-1547), an Italian poetess of noble family, who after her husband's death devoted her life to celebrating his virtues in poetry of great power.

Colt, Samuel (1814-1862), of Hartford, Connecticut, invented the revolver and patented it in 1835. It was some time before its utility was recognised, but after being used with great effect in the war with Mexico it was universally adopted.

Columba, St. (521-597), the founder of the monastery

of Iona, was a native of Ireland. From his lonely island shrine he made frequent missionary journeys to the Highlands of Scotland, where he made many converts and was greatly revered.

Columbus, Christopher (1497-1506), the famous navigator, who after much adventure, struggle and trial, succeeded in prevailing upon Ferdinand and Isabella of Spain to bear the expense of an expedition of discovery, and set out on his first voyage in 1492. He first discovered the Bahamas, Cuba, and other West India Islands, and, on his third voyage in 1498, landed on the lowlands near the mouth of the Orinoco in South America—this being the first actual debarkation, probably, by any voyager in the New World below the equator.

Combe, Andrew (1797-1847), a celebrated physician, who was the author of several works on phrenology and physiological science, and was appointed physician to Queen Victoria in 1838.

Combe, George (1788-1857), elder brother of the above; an eminent philosopher and author, who first introduced phrenology into Britain. Both the brothers Combe were born in Edinburgh.

Combe, William (1741-1823), a clever and witty poet, the author of "The Tour of Dr. Syntax"; he was an adventurer, and passed forty-three years within the King's Bench Prison, as a debtor.

Combes, M. Emile (b. 1839), a leading French statesman, who after spending some years in the medical profession, turned to political life and made a prominent position for himself. In 1885 he was made Senator; in 1891 was Minister of Public Instruction, and in 1902 became Premier of France.

Comte, Auguste (1798-1857), a French philosopher and founder of the "Positive" school of philosophy. He has exercised great influence upon modern political economy, and his system of philosophy was warily taken up in this country.

Condé, Louis II. (1691-1686), called the Great Condé, was a distinguished military commander, engaged at first in the war of the Fronde on the side of Anne of Austria, and at a later period opposed to her. Subsequently he entered the service of Spain. In 1699 he made his peace with the Court of France, and was appointed Governor of Burgundy.

Congreve, William (1670-1739), was a famous Restoration dramatist, whose comedies of manners reflect the grossness of his age only too closely, but are redeemed by the brilliancy of wit. He was buried in Westminster Abbey.

Congreve, Sir William (1774-1838), invented the Congreve rocket, which gave him fame and fortune. He was a lieutenant-colonel in the British Army, and retired in 1816.

Connaught and Strathearn, H.R.H. the Duke of (b. 1850), third son of Queen Victoria. Entered the army, and held a command in the Egyptian Expedition of 1882. Was made Field-Marshal in 1902. Was Commander-in-Chief at Aldershot from 1893 to 1898, and in 1904 was made Inspector-General of the Forces. In 1907 was appointed Field-Marshal Commanding in Chief the Mediterranean Forces, but retired from that post in 1909. In 1910 he visited South Africa to open the Parliament of the new South African Confederation; and since 1911 has been Governor-General of Canada. Spent the summer of 1913 in England.

Conrad, Joseph (b. 1857), is a novelist and master in the merchant service, who has written some fine sea stories, strong in plot, and full of the true salt flavour. He is a Pole, but has for many years resided when on land in England. His first novel of note was *Almayer's Folly*, 1895.

Constable, John, R.A. (1776-1837), was a native of East Bergholt, Suffolk, and became one of the greatest of English landscape painters. He had long to wait for recognition, but ultimately attained high honour, and exerted a strong influence in the development of landscape art.

Constant, Benjamin (1845-1909), a famous French painter of Oriental subjects and portraits. He was "Prisoner" in Morocco, "The Harem" and "The Emir's Favourite," are among his more celebrated pictures.

Constantine, the Great (272-337), Emperor of Rome from 305 to the time of his death. He espoused Christianity with much fervour, and showed great daring as a commander, extending the Roman Empire eastward to Byzantium, which was afterwards called Constantinople in his memory.

Conway, Hugh (1847-1885) a novelist who sprang into sudden fame in 1884 by a shilling novel entitled *Called Back*, and followed this with *Dark Days*, which well sustained his reputation. His death in the following year ended a promising career.

Conway, Sir Martin, M.A., F.S.A., F.R.G.S. (b. 1856), an intrepid mountain climber and explorer, having climbed the Himalayas (23,000 ft.), Aconcagua (23,000 ft.), and the Swiss Alps at all the more difficult points. A prolific writer on mountaineering.

Cook, Sir Edward Tysan, M.A. (b. 1857), an eminent journalist and author, who has edited in turn the *Pall Mall Gazette*, the *Westminster Gazette*, and the *Daily News*. Has written a *Handbook to the National Gallery*, *Sketches in Russia*, and other able works on art, has edited a complete edition of Ruskin's works, and in 1911 published a *Life of the great critic*. Knighted in 1912.

Cook, Eliza (1818-1896), an English poetess, and editress of *Eliza Cook's Journal*.

Cook, Captain James (1728-1779), an adventurous navigator, whose *Voyages Round the World* is a classic. He made many discoveries in the name of Great Britain, including the Sandwich Islands. He was murdered at Hawaii by natives. Statue erected to his memory at Whitby in 1912.

Cooke, Thomas Foster (1786-1864), an English actor noted for his romantic impersonations of "William" in "Black-Eyed Susan" and "Long Tom Coffin" in "The Pilot."

Cooke, Sir William Forthgill (1866-79), an English electrician, associated with Wheatstone in the perfection of the telegraph.

Cooke, Sir Austley (1768-1841), one of the greatest surgeons of his time, and the author of several important medical text books. Was elected President of the College of Surgeons in 1827.

Cooper, James Fenimore (1783-1851), was a very popular American novelist, who from about 1820 to the time of his death produced a succession of stirring stories of adventure, which enjoyed much popularity, among them *The Spy*, *The Last of the Mohicans*, *The Red Rover*, and *The Deer Slayer*.

Cooper, Thomas (1805-1896), poet, lecturer, and Chartist advocate; once a prominent sceptic, but later a Baptist preacher. His *Purgatory of Suicide* attracted considerable attention.

Cooper, Thomas Sidney (1803-1902), a highly gifted animal painter who began to exhibit in the Royal Academy in 1833 and was represented on its walls so late as 1897. Elected R.A. in 1867. His pictures of cattle and sheep are always masterly.

Cooke, Sir Eyre (1720-1783), a distinguished Anglo-Indian general, who brilliantly defeated Hyder Ali at Porto Novo in 1781.

Copernicus, Nicolaus (1473-1543), the famous astronomer who propounded the astronomical system which bears his name. He was a Prussian doctor and canon of the chapter of Frauenburg.

Coppée, François (b. 1842), one of the most popular of modern French writers, who as poet, novelist and dramatist, has been successful.

Coquelin, Benoît C. (1841-1899), eminent French actor ("Coquelin aîné"), and Coquelin, Ernest ("Coquelin cadet"), his younger brother (1848-1909), were leading lights of the Théâtre Français.

Corday, Charlotte (1768-1793), a member of a noble Norman family, who conceiving a bitter hatred against Marat, whom she regarded as the author of the terrors of the French Revolution, assassinated him, and was afterwards guillotined.

Corselli, Marie, a novelist whose works have a very extensive circulation and cover a wide field of observation. Since the publication of her first novel, *A Romance of Two Worlds*, in 1886, she has constantly been before the public. *Barabbas*, *The Sorrows of Satan*, *The Master Christian*, and *The Treasures of Heaven*; and *A Romance of Riches* are

perhaps her most characteristic works. She lives at Stratford-on-Avon.

Coriolanus, Caius Marcius, the hero of one of Shakespeare's plays, who, after conquering Corioli, was condemned to exile by the Roman Senate, took refuge with the Volscians, and led their army against the Romans, but was prevailed upon to retire by the entreaties of his mother and wife. He lived in the first half of the 5th century B.C.

Cornellie, Pierre (1606-1684), the French tragic dramatist, whose "Cid," "Polyeucte," "Le Menteur," and other plays marked a new era in French dramatic production.

Cornwallis, Marquis (1733-1805), has a place in history because of his position as Commander of the British forces which surrendered to the Americans at Yorktown in 1781, and ended the War of Independence; and as Commander-in-Chief in India during the time that Tipu Sultan was giving so much trouble. Was twice Governor-General of India.

Cortot, Jean Baptiste (1795-1875), a French landscape painter, whose works are considered to rank with those of Claude and Turner.

Correggio, Antonio Allegri da (1494-1534), the great Italian painter of the Lombard School, whose "Ecce Homo" is in the British National Gallery.

Cortés (or **Cortez, Hernando**) (1485-1547), a Spanish adventurer who earned great renown by capturing Mexico for Spain, and held that country in subjection for ten years. Later on he was employed in an expedition to Algiers.

Cort, Henry (1740-1800), was a native of Lancaster, and settled in Hampshire in 1775, and, by his invention of the "puddling" process for converting pig-iron into malleable metal, entirely revolutionised the iron manufacture. The Government took up his invention for the dockyards at Portsmouth, and it was expected that Cort would make a large fortune, but Mr. Jellison ruined him by a series of frauds, and Cort ultimately retired to Hampstead, and lived on a Government pension of £300 a year.

Costa, Sir Michael (1810-1884), a composer and conductor of note, who came from Italy to England in 1830, and thenceforward to his death was a prominent member of the English musical world. As conductor of the Handel and other Festivals he was of great service, and his oratorios "Eli" and "Naaman" showed distinctly qualities without any special inspiration. He was knighted in 1860.

Courtney of Penwith, Rt. Hon. Leonard H., 1st Baron (b. 1832), was educated for the Bar, and sat for 24 years in Parliament, retiring on the Boer War question. Was Under-Secretary of State for the Home Department 1886-1887, and subsequently served in the Colonial Office and as Financial Secretary to the Treasury. He acted as Chairman of Committees and Deputy Speaker from 1886 to 1892. Was raised to the peerage in 1905.

Courtney, William (b. 1829), an editor, author, and critic of eminence, whose books on philosophical and literary subjects are of great merit. Is editor of the *Fortnightly Review* and on the staff of the *Daily Telegraph*.

Cousin, Victor (1792-1867), a celebrated French philosopher who founded what is called the Eclectic school of Modern Philosophy. His writings traverse nearly the whole field of philosophy. He was made a peer of France, filled certain Government offices, and spent his last years in retirement in the Sorbonne.

Cousins, Samuel (1801-1887), the greatest mezzotint engraver of his day, whose plates after Reynolds, Millais, Landseer, and Hogarth reach the highest point of this kind of art work. He was elected R.A. in 1855.

Coverdale, Miles (1488-1568), one of the early English Reformers, was born in Yorkshire, and afterwards became a monk of Norwich and later Bishop of Exeter. He collaborated with Tyndale in translating the Bible; the Psalms still used in the Prayer Book were taken from his translation.

Cowdrey, Lord of Mithurst, formerly Sir Wernham D. Pearson (b. 1856), one of the most famous of living contractors and engineers, and president of the firm of S. Pearson and Son, Ltd.

His firm constructed the Blackwall Tunnel, the East River Tunnel, New York, the National Harbour at Dover, and numerous other important public works, railways, harbours, etc., in Great Britain, Mexico, and elsewhere. He represented Colchester in Parliament from 1895 to 1910, and in the last-named year was raised to the peerage.

Cowan, Sir Frederic H. (b. 1829), an English composer with a very graceful turn for melody, who has contributed many cantatas, operettas, anthems and ballads to the stock of English modern music.

Cowen, Joseph (1831-1900), was for a long time a prominent figure in English politics. He was a vigorous speaker, took an intense interest in movements for the good of the people, and was also an ardent disciple of Mazzini. Was owner of the *Newcastle Daily Chronicle*, and a mine owner.

Cowley, Abraham (1618-1667) a celebrated English poet of the Charles I. and II. period, and a loyal supporter of the Stuarts. Much of his poetry is of great beauty. After the Restoration he had a pension of £300, and was buried in Westminster Abbey.

Cowper, William (1731-1800), an English poet imbued with much purity of sentiment and a remarkable poetic talent. His "Task" is one of the great poems of the 18th century; received a pension of £300 a year from George III.

Cox, David (1783-1859), an eminent landscape painter—son of a Birmingham blacksmith—whose pictures display genius of a very high order, and are thoroughly English in spirit and treatment.

Cox, Harold (b. 1800), was for several years, secretary of the Cobden Club, and has written largely on Free Trade and the economic side of political questions; was elected Liberal member for Preston in 1905, but lost his seat in 1910. Is editor of the *Edinburgh Review*.

Coxwell, Henry Tracy (1800-1900), an enterprising aeronaut who made 700 balloon ascents, and in company with Mr. Glaisher, the astronomer, made the highest recorded ascent of 7 miles in 1862.

Covens-Hardy, Rt. Hon. Sir H. M., Master of the Rolls since 1907 (b. 1838), was M.P. for N. Norfolk from 1885 to 1899. Judge of the Chancery Division, 1890-1901. Lord Justice of Appeal, 1901-1907. Chairman of Hist. MSS. Comm.

Crabbe, George (1754-1832), a poet of rural life and scenes noted for his laud pictures and characterisation no less than for the soundness of his sentiments. After enduring many struggles and privations he obtained the patronage of Burke and was promoted to a curacy at Alderburgh.

Craik, Diana Maria (1820-1897), a well-known English novelist who under her maiden name of Miss Mulock wrote *John Halifax, Gentleman*, *A Life for a Life*, and other novels, all distinguished by depth of feeling and clever characterisation.

Craik, George Lillie (1798-1866), a vigorous writer who, in conjunction with Charles Knight, issued a number of historical and literary works of value. From 1819 to his death he was Professor of History and English Literature in Queen's College, Belfast.

Cranbrook, Earl of (1814-1905), entered Parliament in 1835 as Mr. Gathorne Hardy, and quickly made a name for himself as a Conservative politician and statesman. Was President of the Poor Law Board in 1866, Home Secretary in 1867, Secretary for War in 1874, Secretary for India in 1878, and President of the Council 1885-1892.

Crane, Walter (b. 1845), first President of the Arts and Crafts Exhibition Society, and holder of the Albert Gold Medal. Has painted many notable pictures, and his works on decorative art are of great value.

Cranmer, Thomas (1489-1536), Archbishop of Canterbury under Henry VIII. and Edward VI.; an ardent promoter of the Reformation, but on Mary's accession at first consented to return to the old faith, but when called upon to make public avowal of his recantation, refused, and was burnt at the stake.

Cranshaw, Richard (1612-1649), an English poet whose works indicate much eloquence of diction and purity of thought. Known chiefly by his "Steps to the Temple" and "Delights of the Muses."

Crawford, 27th Earl of (b. 1871), succeeded his father in Jan., 1913. As Lord Balcarres won a considerable reputation in the House of Commons, succeeding Lord St. Aldrich as Chief Conservative Whip in 1911. A trustee of the National Portrait Gallery.

Crawford, F. Marion (1854-1909), an American novelist who obtained considerable eminence by his stories of Italian life, including *A Roman Singer*, *Sarcinesca*, *A Cigarette Maker's Romance*, and *Sant' Ilario*. Resided in Italy, where he was born.

Cressay, Sir Edward S. (1812-1898), author of *The Fifteen Decisive Battles of the World* and other historical works; was a barrister and Professor of History at London University. From 1860 to 1873 he was Chief Justice of Ceylon.

Craigton, Mandell (1841-1901), Bishop of London. Was educated at Durham Grammar School and Oxford. In 1895 was appointed Dixie Professor of Ecclesiastical History at Cambridge; in 1891 made Canon of Windsor, and in the same year appointed to the See of Peterborough, and succeeded Dr. Temple as Bishop of London in 1897.

Cramer, Sir W. R. (1838-1908), an ardent advocate of International Arbitration and founder of the Inter-Parliamentary Union. For over thirty years he was secretary of the International Arbitration Union, and in 1902 was awarded the Nobel Peace Prize, which he devoted to the furtherance of the cause with which his name was so long identified.

Creswick, Thomas, K.A. (1811-1865), was one of the most prominent landscape painters of his day, as well as a book illustrator. He is represented by several works in the National Gallery and South Kensington Museum.

Crews, Marquess of (b. 1858), was Lord President of the Council from 1905 to 1908, and in the latter year became Colonial Secretary, Lord Privy Seal, and Liberal Leader in the House of Lords. Made Secretary for India in 1910. He was Lord-Lieutenant of Ireland from 1902 to 1905. Married Lady Margaret Primrose, Lord Rosebery's daughter, as his second wife in 1899.

Crichton, James (1759-1822), a Scotsman, who earned considerable renown for his gifts of learning and general accomplishments and was called "The Admirable Crichton." He was assassinated when only twenty-two years of age in Mantua under romantic circumstances.

Crispi, Francesco (1819-1901), a noted Italian statesman, who aided Garibaldi, and was his supporter throughout. Was Premier for many years, and active in his country. He was immensely popular, and active to the last.

Crispin, St., a saint of the Roman Church and patron of shoemakers. In the 3rd century he and his brother, natives of Rome, settled in Soissons, France, and there preached Christianity, supporting themselves by shoemaking. Suffered martyrdom in 287, by being thrown into a cauldron of molten lead; commemorated on Oct. 25.

Crockett, S. R. (1806-1914) was for a number of years a Scottish Free Church Minister at Penicuik, and in 1893 made a great success with his story *The Shetland Minister*. For many years he was one of the most prolific of the Scottish novelists, producing, among other stories which have had great vogue, *The Laid Sunbonnet* and *The Standard Bearer*.

Croesus, the last King of Lydia, who reigned fourteen years, and acquired such immense wealth that his name has ever since been proverbial. He was a wise king, whose memory still survives in his wise sayings. Solon was his friend, and it was Solon's name that he uttered three while standing before the pyre on which Cyrus had condemned him to be burnt. This touched Cyrus, who spared his life and made him his companion. He succeeded his father Alyattes on the Lydian throne 600 B.C.

Croft, William (1678-1727), a musician (born in Warwickshire) whose antient and other sacred compositions are much esteemed. Was organist in Westminster Abbey, and was buried there.

Crofts, Ernest, R.A. (1847-1921), was keeper of the Royal Academy, and one of the most noted painters of battle pictures. His first Academy picture was

exhibited in 1874, "A Retreat." Among his other best known works are "The Morning of Waterloo," "Cromwell at Marston Moor," and "Queen Elizabeth Opening the first Royal Exchange," one of the Royal Exchange frescoes.

Croker, John Wilson (1780-1857), was one of the founders of the *Quarterly Review*, and a controversialist of note. Was in Parliament for some years, and was Secretary to the Admiralty.

Crome, John (1769-1821), from being a humble house-painter became eminent as a painter of landscape. His "Mousehold Meath," a characteristic example, is in the National Gallery. He was a native of Norwich.

Cromer, Earl (b. 1841), a diplomatist who won celebrity in the post of British Comptroller-General in Egypt from 1881 to 1907. It was a stupendous task that he had imposed upon him, but he resolutely devoted himself to it, with the result that Egypt was lifted from financial difficulty and internal disorder to a condition of prosperity. He was Sir Evelyn Baring up to 1892, when he was made Baron Cromer, becoming Earl in 1901. Retiring in 1907 because of ill-health, he received a grant of £50,000. On Oct. 28, 1907, was presented with the Freedom of the City of London. In 1908 published *Modern Egypt and Ancient Modern Imperialism* in 1910. An original member of the Order of Merit.

Crompton, Samuel (1753-1827), was a poor cotton worker at Bolton, and invented the spinning mule, which greatly increased the power of cotton production. Was awarded a Parliamentary grant of £5,000, but died in poverty at Hall-in-the-Wood.

Cromwell, Oliver (1599-1658), Lord Protector of England from 1653 to his death. At one time contemplated emigrating to America, but, entering Parliament, and becoming enthusiastic in the popular cause, obtained recognition as one of the Parliamentary leaders, and ultimately, on the outbreak of the Civil War, became General of the Roundheads. How he gained battle after battle, and after the execution of Charles I. was installed at the head of the Commonwealth, is familiar history.

Cromwell, Richard (1628-1712), son of the foregoing, and his successor in the Protectorate, which he was only able to sustain for a few months.

Cromwell, Thomas, Earl of Essex (1478-1540), an English statesman, originally a priest of Wolsley. Rose to high office and in 1537 began the suppression of the monasteries. Later was beheaded.

Crookes, Professor Sir William (b. 1832), President of the Royal Society since Nov. 1913. An eminent British scientist, whose discoveries in chemistry and electricity have been of the greatest importance. Is a past president of the British Association, the author of many books on chemical subjects. The discoverer of thallium and inventor of the radiometer.

Crooks, Will (b. 1852), a prominent East London labour leader and Member for Woolwich 1903-1910, and re-elected 1911; Mayor of Poplar 1901.

Crossley, Sir Francis, Bart. (1817-1872), was a successful carpet manufacturer of Halifax, and a man of great public spirit and philanthropy. He sat in Parliament as M.P. for Halifax, and gave a People's Park to the town.

Cruden, Alexander (1701-1770) was an eccentric Aberdonian who settled in London as a bookseller, and became the author of the famous *Concordance to the Holy Scriptures*.

Cruikshank, George (1792-1878), a celebrated book illustrator who was for a time associated with Charles Dickens, and later on illustrated numerous works of other novelists of his day, showing great humour and power of character-delineation. In his later years he was an enthusiastic temperance supporter.

Culme-Seymour, Admiral the Rt. Hon. Sir Michael, Bart., P.C., G.C.B. (b. 1835), entered the Navy in 1850, and saw much active service in various seas during the next ten years. Was appointed private secretary to the First Lord of the Admiralty in 1874, and passed through the three admiral degrees between 1882 and 1893, and has commanded successively the

Pacific, Channel, and Mediterranean Squadrons, and was Commander-in-Chief at Portsmouth 1897-1901. In 1902 was appointed Vice-Admiral.

Gunnard, Sir Samuel (1787-1868), the founder of the Cunard Line of steamers, was a native of Nova Scotia. In 1840 he obtained a government contract for the mail service between Liverpool and Halifax, Boston and Quebec, and showed such ability of organisation that in a few years, aided by Mr. George Burns (afterwards Lord Inverclyde), he succeeded in establishing the first Atlantic steamship service.

Junningham, Sir Alexander (1814-1893), an English military engineer and archaeologist, son of Allan Cunningham the poet. Served in India for twenty-one years, and wrote several valuable works on Oriental subjects.

Junningham, Allan (1784-1842), a well-known poet and prose author, whose songs were greatly admired by Sir Walter Scott. In his early life he was a stone-mason.

Curie, Prof. Pierre (1859-1905), and **Madame Marie** (b. 1867), arcuamates that have been deservedly prominent during recent years as those of the joint discoverers of radium. M. Curie was a Frenchman, but his widow is a Pole; they have both been indefatigable scientific investigators, holding important professorial appointments in France. Madame Curie succeeded in separating radium from barium extracted from several tons of pitch-blende.

Curran, John Philpot (1750-1877), an Irish barrister and orator, whose defence of Wolfe Tone brought him into fame, and thenceforward he became identified with the Irish popular cause and had a brilliant career.

Curwen, John (1816-1880), was a Nonconformist minister of musical gifts, who in 1841 introduced the Tonic-Solfa system, and devoted the best part of the remainder of his life to its advocacy. The system was widely adopted, and still has many adherents.

Currie, Sir Donald, G.C.M.G. (1825-1909), was the founder of the Castle Line of steamships, and became head of the combined Union-Castle Line. Was in Parliament from 1880 to 1900, and knighted in 1887. In 1904 gave £30,000 for a Medical School at University College, London, and £20,000 additional for a Nurses' Home to the London Hospital.

Currie, Lord (1834-1906), a distinguished diplomatist who, as Sir Philip Currie, carried out successfully many important tasks and embassies in different capitals, and was raised to the peerage after 45 years in the public service at home and abroad in connection with the conduct of foreign affairs.

Curzon of Kedleston, Earl (b. 1859), Governor-General of India 1899-1905 (reappointed 1904). Entered Parliament in 1886, and, having filled numerous minor offices with distinction, made a vigorous Imperial-minded Viceroy. In 1904 returned to England for a brief holiday, which was saddened by the serious illness of Lady Curzon at Warner Castle, where Lord Curzon was temporarily residing as Warden of the Cinque Ports. Some friction which arose respecting military control caused Lord Curzon to seek relief from the heavy cares of the Viceroyalty before his second term of office had been far proceeded with; and having received the Prince and Princess of Wales (their present Majesties), on their tour in India, he and Lady Curzon returned home, and the latter shortly afterwards died. In March, 1907, he was elected Chancellor of Oxford University, and early in 1908 elected an Irish representative peer; made earl in 1911.

Cuthbert, St. (635-687), a famous monk who became prior of Melrose, and afterwards of Lindisfarne. For a time he lived in seclusion on one of the Faroe Islands, but from 664 was Bishop of Hexham.

Cuvier, Baron (1759-1829), a French naturalist who founded a system of classification in zoology, and originated the science of comparative anatomy. He was a voluminous and able writer, and was held in high esteem by Napoleon I., Louis XVIII., and Louis Philippe in turn, the last-named monarch conferring a peerage upon him.

Cuyper, Albert (1655-1691), a famous Dutch landscape painter, several of whose works are in the National Gallery.

Cymbeline was the father of Caractacus, and remembered chiefly as the central figure of one of Shakespeare's plays.

Cyprian, St., was an eminent ecclesiastic of the 3rd century, who was made Bishop of Carthage, and wrote several notable treatises on matters of Christian doctrine. He was beheaded in 258, at an advanced age, and the present English calendar commemorates him on Sept. 26.

Cyrus the Great founded the Persian monarchy in the 6th century B.C. and greatly distinguished himself by his conquests of Media, Assyria, Babylon, parts of India, Arabia, and Asia Minor, and was eventually slain in battle. It is believed, with the Messagates on the river Jaxartes.

Czerny, Karl (1791-1857), an Austrian pianist and composer, many of whose pieces enjoy much popularity with music students.

D

Daguerre, Louis J. M. (1789-1851), a French artist, who acquired fame as the inventor of the earliest photographic process, and then devoted himself to scene-painting, and became part proprietor of the Diorama in Paris. Daguerre's perfected process of obtaining permanent pictures by sun-action was communicated to the French Academy in 1839.

Daimler, Gottlieb (1834-1890), inventor with Otto of the Otto Gas Engine, and in his later years eminent as the inventor of the motor-car that is called after him.

Dale, Sir David (1829-1906), was a distinguished worker in various fields of advancement, especially in connection with promoting conciliation and arbitration in industrial pursuits. He was a colliery owner and director of the North-Eastern Railway Co.

Dale, Rev. R. W. (1829-1895), a Congregationalist minister who made a great name in Birmingham for his eloquent preaching and public services, was for a number of years editor of *The Congregationalist*, and served as chairman of the Congregational Union 1886-1890.

D'Alembert, J. (1717-1783), a Parisian mathematician and philosopher who achieved great eminence by his numerous scientific works, including *The Theory of the Winds* and *The Precision of the Equinoxes*.

Dalhousie, Marquis of (1812-1860). The tenth Earl and first Marquis of Dalhousie was one of the most famous of India's Governor-Generals. He controlled the affairs of India during a period of great difficulty, and annexed the Punjab after the second Sikh War; later on also annexing Nagpur, Jhambhi, Pegu and other States. He left India in 1856, and the following year the Mutiny broke out.

Dalton, John (1766-1844), a famous chemist and mathematician—son of a Cumberland weaver—who in 1803 published his *New System of Chemical Philosophy*, in which the "Atomic Theory" was first propounded. He made many other contributions to scientific knowledge, and received a Government pension of £300.

Damen, Father Joseph (1840-1889), a Belgian missionary who, going out to Honolulu in 1864, and witnessing the terrible sufferings of the lepers confined on the Island of Molokai, obtained permission to take spiritual charge of the Government settlement, and remained there working nobly for this wretched community, until in 1889, he himself was stricken with leprosy and died.

Damiens, Robert Francois, the Frenchman who in 1757 made an unsuccessful attempt to assassinate Louis XV., and was afterwards put to horrible tortures and executed.

Damocles, the flatterer and favourite of Dionysius of Syracuse. The legend related by Cicero concerning him is that one day after expressing envy of Dionysius, he was invited to a banquet, where he found himself sitting beneath a naked sword suspended by a single hair. Hence the familiar simile, "the sword of Damocles." The incident is referred to the first half of the 4th century B.C.

Dampier, William (1652-1729), an adventurous privateering English navigator, who discovered a number of small islands off the coast of Australia, and published *A Voyage Round the World*.

Dandolo, Enrico (1795-1865), was elected Doge of Venice when seventy-seven, and ten years later, when almost blind, joined the Crusades, and succeeded in planting the standard of St. Mark on the walls of Constantinople.

D'Annunzio, Gabriele (b. 1864), the Italian poet, dramatist and novelist, and one of the most remarkable literary men in Europe. Is known in this country by translations of his "Triumph of Death," and "La Gioconda." The author's real name is Gaetano Rapisarda.

Dante Alighieri (1265-1321), the greatest of Italian poets, whose "La Divina Commedia" is world-famous, and has been translated repeatedly into all languages. Gustave Doré executed his most memorable illustrations to this celebrated work.

Danton, Georges J. (1759-1794), a famous member of the National Convention at the period of the first French Revolution. Was made President of the Committee of Public Safety, but Robespierre attacked and supplanted him. Danton being consigned to the guillotine shortly afterwards.

D'Arblay, Frances (1752-1840), made a great sensation while quite young and unmarried, under her name of Frances Burney, by her novel *Evelina*, which opened the doors of Society to her and gained her the friendship of Dr. Johnson. She married M. D'Arblay, a French officer. Her *Diary*, published after her death, is a valuable picture of her time.

Darius was the name borne by three Persian kings. The first reigned from 521 to 485 B.C., and was defeated by the Greeks at Marathon. The second was a natural son of Artaxerxes Longimanus, and having obtained the crown by the murder of his brother, reigned from 424 to 405 B.C. The third Darius was the last of the Persian kings, reigning only from 336 to 331 B.C., when Alexander the Great invaded his kingdom and defeated him in two great battles. Darius was soon afterwards assassinated.

Darling, Grace (1815-1842). By the performance of her heroic deed in putting off in a small boat from the lighthouse on one of the Farne Islands, of which her father was keeper, to the rescue of the shipwrecked crew of the *Forfarshire*, whose lives she saved, she made herself an enduring name. She was only 23 years of age at the time, and died four years later of consumption.

Darnley, Earl of (1546-1567), was married to Mary Queen of Scots—as her second husband—in 1565. Two years later, after Mary had entered into an intrigue with Bothwell, he was murdered.

Darwin, Charles Robert (1809-1882), the distinguished scientist, whose *Origin of Species* first clearly formulated and elaborated the theory of evolution. His first work (1829) described a five years' cruise in the *Beagle*, which the Government had sent out for scientific purposes. His *Origin of Species* appeared in 1859, and, though defended and supported by the scientific thought of the time generally, was much attacked by theologians. In 1871 Darwin issued his *Descent of Man*, a still further elaboration of the evolution theory. His other principal works were *The Expression of Emotion in Man and Animals* (1872), *Insectivorous Plants* (1878), *Different Forms of Flowers* (1877), and *Hormes* (1881). He was buried in Westminster Abbey.

Darwin, Sir George H. (1845-1911), son of the foregoing, and Plumian Professor of Astronomy and Experimental Philosophy at Cambridge. President of the British Association, 1905, when he opened the bridge over the Victoria Falls of the Zambezi.

Darwin, Erasmus (1731-1802), grandfather of Charles Darwin, the Naturalist, was an English physician, practising at Derby, and a poet of considerable repute, whose "Loves of the Plants" was exceedingly popular.

Darwin, Sir Francis, M.A., F.R.S. (b. 1848), President of the British Association meeting of 1908. Third son of Charles Darwin, and biographer of his

father. An eminent authority on botany, and author of numerous works on that science. Knighted 1873.

D'Aubigne, Jean, H. M. (1798-1872), a Genevan pastor and professor, whose *History of the Reformation* holds high rank amongst the historical works of the 19th century.

Daudet, Alphonse (1840-1897), the celebrated French humorist and novelist, all of whose works have been translated into English, and achieved much popularity. His best known works are *Le Nabab*, *Les Rois en Exil*, *Sapho*, and the "Tartarin" series.

Davenant, Sir William (1605-1668), a dramatist and poet of much note in his time, who filled the office of Poet Laureate in succession to Ben Jonson. He was buried in Westminster Abbey.

Davay of Farnhurst, Rt. Hon. Sir Horace, Lord (1833-1907), was Solicitor-General in 1866, Lord Justice of Appeal 1893, and Lord of Appeal in Ordinary 1894. A great Chancery lawyer when at the Bar, and distinguished himself by his antagonism to street betting.

David I. (1124-1153) was King of Scotland and uncle of Matilda, daughter of Henry I., and took up arms against Stephen on his repudiation of Matilda's claims to the English crown.

David, I. (1244-1371), King of Scotland from 1329 to 1370. He was the son of Robert Bruce, and in conflict with the English army at Neville's Cross, in 1346, was defeated and made prisoner by Queen Philippa.

David, Jacques Louis (1748-1825), a celebrated French painter of classic and historic subjects, who was an ardent supporter of the Revolutionary movement. Many examples of his work are to be seen at Versailles and at the Louvre.

David, St., whose festival falls on March 1st, lived in the 6th century in Wales, and founded various monasteries. Is the patron saint of the Principality.

Davidson, John (1857-1909), born at Barrihead, Went to London in 1880, and, after a course of journalism, began to attract attention by his verse, and published various volumes disclosing a marked poetic gift, together with the power of treating ordinary subjects in a vivid and illuminating manner. Much sensation was caused by his mysterious disappearance in 1909. His body was discovered some time afterwards, and he is supposed to have committed suicide in a fit of despondency.

Davidson, Dr. Randall T. (b. 1848), Archbishop of Canterbury from 1903. Previously Dean of Windsor 1883-1891, Bishop of Rochester 1891-1895, and Bishop of Winchester 1895-1903. Was for a long period Domestic Chaplain and Clerk of the Closet to Queen Victoria, and married in 1878 the daughter of Archbishop Tait, whose private secretary he had been, and whose biography he wrote.

De Vinci, Leonardo. (See *Leonardo Da Vinci*.)

Davis, Jefferson (1808-1889), an American statesman, who on the breaking out of the Civil War, was made President of the Confederate States. After the war he was a prisoner in the hands of the Federals, put on his trial for treason, and subjected to much indignity, but was ultimately discharged and wrote (1881) *The Rise and Fall of the Confederate Government*.

Davis, John (1550-1605), one of the great Elizabethan explorers and discoverers of Davis' Strait, the channel between the Atlantic and Arctic Oceans on the west of Greenland. Invented the backstaff, or Davis' quadrant.

Davitt, Michael (1846-1906), after a hard-working and precarious bringing up this ardent Irish Nationalist attracted much notice by the bitter speeches he made on behalf of the Fenian Brotherhood, and in 1870 was sentenced to fifteen years penal servitude for treason-felony, but was released on ticket of leave in 1877. Was one of the founders of the Irish Land League, 1879. In 1881 was sent back to penal servitude, but released again in the following year. Was elected to Parliament while a prisoner at Portland but disqualified. Succeeded in entering Parliament in 1892, and resigned in 1899.

Davy, Sir Humphry (1778-1829), the inventor of the safety-lamp. Was an eminent chemist, whose researches and discoveries were of great scientific importance. Was the first to employ the electric current in chemical decomposition, and discovered nitric oxide or laughing gas. Began life as an apothecary's apprentice.

Deák, Ferencs (1803-1876), a distinguished Hungarian statesman who filled many high offices, and was leader of the Moderate party of the Diet.

Deakin, Alfred (b. 1836), first Attorney-General of the Commonwealth of Australia, 1901-3; Prime Minister, 1903-4, 1905-8, 1909-10; leader Federal Opposition, 1910-13. Refused a knighthood; was prominent at the Colonial Conference of 1907.

Deane, Sir Henry Barge (b. 1846), Judge of the Probate, Divorce, and Admiralty Division, since 1905. Recorder of Margate, 1885-1905.

Decamps, A. G. (1803-1860), an eminent French painter, who produced numerous historical paintings of great value.

Decius, Roman Emperor from 249 to 251, notorious for his cruel persecution of the Christians.

Defoe, Daniel (1660-1731), the son of a London butcher who, after a very varied business career, became a novelist and novelist, obtaining world-wide fame by his *Robinson Crusoe*, written when he was nearly sixty years of age. This was followed by several other novels, all of great merit, though not free from serious defects of taste.

Delacroix, Ferdinand (1798-1863), a French painter of great imaginative and dramatic force, and one of the chief ornaments of the romantic school.

Delane, J. T. (1817-1879), the famous editor of *The Times*, who, though he did not write himself, made his paper the greatest journal in the world. He was in position from 1847 to 1877.

De la Ramé, Louise. (See "Ouida.")

Delarocche, Paul (Hippolyte) (1797-1856), an eminent French historical painter, examples of whose work are to be found in many galleries.

Delcassé, Theophile (b. 1815), the eminent French statesman, entered the Chamber in 1848, and in 1853 was Under-Secretary for the Colonies. In 1868 was appointed to the Foreign Office, where his position he filled with great success. In 1903 he accompanied the French fleet on a visit to England. Resigned in 1905 on the Moroccan difficulty. Ambassador to Russia, 1903, and in 1911 became Foreign Minister once more.

Delibes, C. P. L. (1836-1891), a French composer of much graceful and refined music, including two or three operas, numerous operettas, and some exquisite ballet music of very delicate texture.

Delolme, J. L. (1741-1806), a Swiss politician and author, who resided some years in England, and wrote a work on *The Constitution of England*, which was a leading legal text from 1847 to 1877.

Democritus (460-370 B.C.), the Greek philosopher to whom the conception of the Atomic theory is attributed. His cheerful disposition led to his being styled "the laughing philosopher," and the tradition tells that he put his eyes in order to prevent being distracted in his speculations.

De Morgan, Augustus (1806-1871), a mathematician of great eminence, who held the position of Professor of Mathematics at University College, London, for over thirty years.

De Morgan, William (b. 1826), son of the preceding, was engaged in artistic pursuits until 1866, when he surprised the novel-reading world by a remarkably clever story of humour, character, and observation entitled *Joseph Vance*. His later novels include *Abce-for-Short* (1907), *Somehow Good* (1908), and *I Phen Ghost Meets Ghost* (1914).

Demosthenes (385-322 B.C.), the famous Grecian orator, statesman and warrior. Sixty-one of his orations were preserved, and are regarded as perhaps the finest examples of their kind.

D'Enghien, Eugène (1772-1804), a Bourbon prince, whom Napoleon suspected of complicity in the Pichegru conspiracy for the Bourbon restoration, and had him shot in Paris in the same year that he himself was crowned Emperor.

Denham, Sir John (1615-1669), a Royalist poet, whose descriptive poem "Cooper's Hill" achieved much popularity. Was knighted by Charles II., and honoured with burial in Westminster Abbey.

Denis, St., the patron saint of France, over whose grave the abbey of St. Denis was erected. He lived in the 3rd century, being beheaded, according to legend, at Paris in 272.

Denman, Lord, P.C., K.C.V.O., Governor-General of Australia 1911-14 (b. 1874). Was Lord-in-Waiting to the King, 1907-11, and Deputy Speaker of the House of Lords.

Dentatus, M. Curius (d. 270 B.C.), the Roman consul, who in 260 B.C. drove Pyrrhus out of Italy, and afterwards lived a simple life in the capital.

Depew, Chauncey M. (b. 1844), a well-known American lawyer, senator and railway magnate, who first came into prominence as the legal adviser of the Vanderbilts, especially as regards the New York Central and Hudson River Railroad Companies.

De Quincey, Thomas (1785-1859), an eminent essayist and critic, the friend of Coleridge, Wordsworth, and Southey. His "Confessions of an Opium Eater" is a British classic.

Deby, Edward Stanley, 14th Earl of (1799-1850), was an eminent statesman who served as Prime Minister in the Government of 1852, 1858, and 1866. From a Whig he blossomed into a staunch Tory and had little sympathy with democratic Toryism.

De Reszke, Jean (b. 1853) and **De Reszke, Edouard** (b. 1856), two famous operatic singers, the first a tenor, the second a baritone, who achieved high fame and immense fortunes by their singing in various parts of the world. They are Poles.

Derwentwater, Earl of (1769-1779), the leader of the English Jacobite movement for placing the Pretender on the English throne. The rising took place in 1745, but was completely crushed by the Battle of Preston, and Derwentwater was beheaded.

Descartes, René (1596-1650), the famous French philosopher, mathematician, and author, Cartesian philosophy, the basis of which is up in the words "Cogito, ergo, sum" ("I think, therefore I exist"), well known.

Desmoulins, Camille (1760-1793), was one of the foremost of the French Revolutionary leaders, and from the destruction of the Bastille to the days of the Terror was unflinching in his onslaughts upon the aristocrats and the priesthood. He fell under the dagger of Robespierre, however, and was sent to the guillotine along with Danton.

Detaille, Jean B. Edouard (1848-1912), a French battle painter, who produced numerous thrilling pictures of scenes in the Franco-Prussian War.

Deutsch, Emmanuel (1820-1873), a German Orientalist, who resided for the best part of his life in England, filling the position of Assistant Librarian in the British Museum, and making many acceptable contributions to Oriental Literature.

Devonport, Lord (b. 1850), formerly Sir Hudson Kearsley, M.P. and Parliamentary Secretary of the Board of Trade, 1905-06, has been Chairman of the Port of London Authority (without salary) since 1909; in 1912 in handling the Dockers' Strike showed great firmness in the face of much strong personal attack.

Devonshire, Spencer Compton Cavendish, 8th Duke (b. 1833-1908). Entered parliament in 1877, as the Marquis of Hartington, and speedily made a name as a Liberal politician, being Under-Secretary for War in 1864, War Secretary in 1869, Postmaster-General in 1868, Chief Secretary for Ireland, 1871, Secretary for India, 1880. War Secretary, 1882. Separated from Mr. Gladstone on the Home Rule question, and in 1895 entered Lord Salisbury's third Ministry as President of the Council, which position he held up to the time of Mr. Chamberlain's declaration of Fiscal Policy, when he declared himself a Free Trader. He succeeded his father as Duke of Devonshire in 1901.

Devonshire, Victor Christian William Cavendish, 9th Duke (b. 1868), nephew to the above, whom he succeeded in 1908. Was M.P.

for Derbyshire W. 1891-1908, and has been Treasurer of the Royal Institution, Financial Secretary to the Treasury, and Junior Conservative Whip.

Dewar, Professor Sir James (b. 1842), a prominent chemist, and a native of Kincardine. In 1877 was appointed Fullerton Professor of Chemistry at the Royal Institution, and in 1888, jointly with Sir Frederick Abel, invented cordite. He has attracted great notice by his experiments with liquid gases, in 1884 illustrated the liquefaction of oxygen and air by means of special apparatus, and in 1891 obtained liquid oxygen by the fount.

Dewey, Admiral George (b. 1827), was a comparatively unknown American naval commander until his opportunity came in 1898 during the Spanish-American War, when he captured and destroyed the Spanish Fleet in Manila Bay.

De Witt, Jan (1625-1672). An eminent Dutch statesman, who carried on war with England and later negotiated the Triple Alliance, but was overthrown by the Orange Party and murdered—with his brother Cornelius—by the mob.

De Witte, Bergius (b. 1840), a Russian Statesman of great ability; became Minister of Ways in 1892 and Minister of Finance in 1893, retired from office when the War Party gained the ascendancy, and opposed the war with Japan.

Diaz, Porfirio (b. 1830), ex-President of Mexico. In the Revolt against the French authority in 1857 he greatly distinguished himself, and in the Insurrection of 1875 against Juárez, he led his party to victory, and was elected President in 1877; a position which he held until deposed by the revolution of 1911.

Dickin, Charles (1746-1814), actor, dramatist and popular entertainer; gained great popularity by his sea songs, written at the time when the British Navy was engaged with the power of France.

Dicklin, Sir T. J. C. (b. 1851), a C.E. (b. 1851), Dean of the Court of Appeal, was educated at Cambridge, afterwards was called to the Bar, enjoyed a large Chancery practice, and was made K.C. in 1901. Has filled the Chanceryships in turn of Rouncester, Exeter, and Durham, and was appointed to his present post in 1903.

Dick, Thomas, L.L.D. (1774-1857), a Scotch minister and scientist, whose astronomical writings, intended to support Christian teaching, were greatly read. His principal work was the *Christian Philosophy*.

Dickens, Charles (1812-1870), the most popular novelist of the 19th century. Although very humble beginnings worked himself up by sheer genius to the high position in the world of letters. His literary output was enormous. From the time of the publication of the *Pickwick Papers* down to his death in 1870, covering a period of thirty years, he produced over a hundred novels, all possessing the original Dickensian characteristics, yet each wonderfully different from the rest, and his popularity continues undiminished. He did so much for the cultivation of the true sentiment of Christmas, that, whenever that season comes round, his name is recalled with honour and homage, and in several issues of *Pears' Annual* his Christmas writings have been revived with ample accompaniments, not only of the original illustrations, but with the addition of personal contributions by eminent later artists. As a reader of his own works Dickens claimed a marvellous dramatic gift, and in that capacity at home and in America made highly successful tours. He was buried in Westminster Abbey.

Dicksee, Frank, R.A. (b. 1854), well known as the painter of numerous pictures, which rank high amongst the productions of our time, including "Barrenness," "Romeo and Juliet," and "The Funeral of a King." First exhibited in the Academy in 1896. Was made R.A. in 1901.

Diderot, Denis (1713-1784), the famous French philosopher and editor of the *Dictionnaire Encyclopédique*, which occupied him thirty years.

Digby, Sir Everard (1591-1606), was concerned in the Gunpowder Plot, for complicity in which he was executed.

Digby, Sir Kenelm (1603-1665), son of Sir Everard Digby, was a scientist of great repute, who filled many diplomatic posts under Charles I.

Diggle, Rt. Rev. John William, Bishop of Carlisle since 1904 (b. 1847), was educated at Manchester Grammar School and Oxford; ordained 1871; Vicar of Mossley Hill, Liverpool, 1875-1896; Canon of Carlisle, 1896; and Archdeacon of Birmingham, 1903-1904. Is author of *Bishop Fraser's Lancashire Life*, and other works.

Dillon, Rt. Hon. Sir Charles W., M.P. (1843-1911), was a prominent member of the Liberal Party, who entered Parliament in 1868, and was made Under-Secretary for Foreign Affairs in Mr. Gladstone's Government of 1880. From 1882 to 1885 was President of the Local Government Board, and supported Mr. Gladstone generally on all public questions, including Home Rule. Was one of the best informed men in the House on Army and Navy matters and Foreign affairs. Wrote numerous books, and was the proprietor of the *Athenaeum*.

Dillon, John, M.P. (b. 1851), a prominent member of the Irish Nationalist Party, who did good service to his side under Parnell and suffered imprisonment in respect of the famous "Plan of Campaign."

Dinwiddie, Robert (1692-1770), a Scotch diplomatist who from 1752 to 1758 was Governor of Virginia. It was at his suggestion that the territory of Ohio was annexed.

Diocletian (A.D. 245-313), Roman Emperor from 284 to 305. Inaugurated the system of partnership Emperors, dividing the Empire into four sections, administered by himself in the East, Maximian in Italy and Africa, Constantius in Britain, Gaul, etc., and Galerius in Illyria. Abolished in 305. Was a great persecutor of the Christians.

Diogenes (412-322 B.C.), the celebrated Greek cynic philosopher who is said to have lived in a tub, wearing the coarsest clothing and eating on the plainest food. Many of his sayings have been preserved, and serve for occasional quotation.

Dionysius. Two of the tyrants of Syracuse bore this name. The first was a great soldier and statesman, as well as a poet and philosopher, and lived from 430-367 B.C. The second Dionysius was his son and successor, but was of such a cruel disposition that he was driven from the throne and died in obscurity in 357.

Disraeli, Benjamin. (See *Beaconsfield*.)

D'Israeli, Isaac (1756-1818), the father of Benjamin. Was an interesting worker in a special literary field, and produced some exceedingly interesting volumes dealing with authors and their writings. His best known work is his *Curiosities of Literature*.

Dixon, W. Hepworth (1821-1879), was editor of the *Athenaeum* for many years and wrote several historical works and books of travel.

Dobell, Sydney (1824-1871), an English poet, who between 1850 and 1853 published three volumes of verse—"The Roman," "Baldie," and "England in Time of War," which contained many poems of real beauty and imaginative force. He was a Cheltenham wine-merchant.

Dobson, Henry Austin, L.L.D. (b. 1810), was in the Civil Service from 1850 to 1861, and is the author of several dainty volumes of society verse and some equally dainty prose works, dealing chiefly with the 18th century.

Dodd, Dr. William (1720-1777), a clergyman who attracted much notice by a volume entitled *Beauties of Shakespeare*, and won unfortunate notoriety later by being condemned and executed for forging the signature of the Earl of Chesterfield, his former pupil, to a bond for £4,200.

Doddridge, Philip (1702-1751), a popular Non-conformist preacher and writer, now best remembered by many beautiful hymns which rank high in all English collections, and also by his work on *The Rise and Progress of Religion in the Soul*.

Dodgson, C. L. (1812-1898), a writer and Professor of Mathematics at Oxford, who, under the pseudonym of Lewis Carroll, achieved lasting fame by his *Alice's Adventures in Wonderland*, one of the most delightful books for children ever written.

Dods, Marcus, D.D. (1834-1909), one of the best known of modern Biblical scholars and expositors, who was before the public as an author from about 1860. From 1899 to 1907 he was United Free Church Professor of New Testament Theology, Edinburgh, and in 1907 Principal of New College, Edinburgh.

Dolci, Carlo (1616-1686), the famous Florentine painter, examples of whose Madonnas and saints are to be found in most national collections.

Dollinger, J. J. I. von (1799-1890), a German theologian and historian whose writings caused great controversy, his opposition to the doctrine of Papal Infallibility being much discussed.

Dominic, St. (1170-1221), founder of the Order of Dominicans, or Black Friars, who devoted much energy to the conversion of the Albigenses, but meeting with small success, instituted a policy of persecution after the manner of the later Inquisition.

Domitian (51-96), a Roman emperor who, after many cruel and tyrannical acts, aroused the enmity of the people and was finally assassinated.

Donald, Robert (b. 1861), a journalist of note, who has gathered his experience in many quarters at home and abroad, and is an authority on municipal work, trusts, and London life and labour. Is editor of the *Daily Chronicle*, *Lloyd's Newspaper*, and the *Municipal Year Book*.

Donatello (1386-1466), the famous Italian sculptor, whose works are to be seen chiefly at Florence, though several examples are at South Kensington.

Donizetti, G. (1797-1848), the Italian composer to whom we owe the operas of "Lucia di Lammermoor," "La Fille du Régiment," "La Favorita," and others.

Donne, John (1573-1631), a clergyman and religious writer whose poems are still held in esteem.

Dore, Gustave (1833-1893), the well-known French artist, famous for his colossal scriptural paintings and his powerful illustrations to the works of Dante, Milton, and Tennyson.

D'Orosy, Count Alfred (1798-1892), a Society dandy who married into the Blessington family, and later on, at Kensington Gore, with Lady Blessington formed a literary coterie, which for a time was of great influence. The Count was a versatile man, but of such extravagant habits that he ultimately became bankrupt, and retired to Paris, where Louis Napoleon did something to help him, and only a few days prior to his death had appointed him Director of Fine Arts.

Douglas, Archibald (1449-1514), ancestor of Lord Darnley, husband of Mary Queen of Scots. He retired to a monastery in late life at Galloway, and died there.

Douglas, Sir James (1286-1330), known as Black Douglas, was a noted Scottish raider, and held a commander's post at the Battle of Bannockburn. Travelling through Spain to Palestine to deposit Bruce's heart at Jerusalem, he was attacked and killed.

Doulton, Sir Henry (1800-1867), the inventor of Doulton ware, and one of the leading potters of modern times. His factories and works at Lambeth and Rowley Regis ran among the great industrial establishments of the country.

Dow, Gerard (1613-1695), a great Dutch painter, follower and pupil of Rembrandt, whose works display a remarkable fidelity to nature.

Dowden, Edward, M.A. (1843-1913). Well known for his critical and other writings, mainly dealing with the lives and works of the poets, and showing keen insight and appreciation, together with much beauty of style. Was Professor of Literature at Trinity College, Dublin, for 37 years.

Doyle, Sir A. Conan (b. 1859), the novelist who reached the point of highest popularity in his present-day detective sketches, in which "Sherlock Holmes" is the central figure. Served as Senior Physician of the Langman Field Hospital in the South African War, of which campaign he wrote a history. Has also written plays.

Doyle, Richard (1824-1883), an artist of much humor and fancy, who was exceedingly popular while on the staff of *Punch*, from 1842 to 1860. He also illustrated some of Thackeray's works, and the familiar cover of *Punch* is his work.

Drake, Sir Francis (1540-1596), the great admiral of Queen Elizabeth's time, who made many adventurous voyages, bent partly on discovery and partly on plunder. He was a leading figure—under Lord Howard—in the attack on and destruction of the Spanish Armada in 1588.

Drayton, Michael (1563-1631), author of *Polyolbion*, a poetic description of various parts of England, and of great interest for its topographical pictures and references. He was Poet Laureate, and was buried in Westminster Abbey.

Dreyfus, General Alfred, a French officer, condemned by a military secret tribunal on a charge of divulging secrets in 1894 to a foreign power, and condemned to imprisonment for life on Devil's Island, in French Guiana. At a sensational new trial in 1899 he was again found guilty, and sentenced to a mitigated term of incarceration for ten years; but strenuous efforts on his behalf secured a pardon later. In 1906 he was entirely exonerated and reinstated in the army, with the rank of General, and made a Chevalier of the Legion of Honour.

Drummond, Henry (1817-1897), a Scottish religious writer, who endeared himself to the Christian community by his two works, *Natural Law in the Spiritual World* and *The Ascent of Man*. Although no formidable antagonist to Darwinism, his writings possess great charm.

Drummond, James (1675-1790), took a leading part in the Jacobite rebellion of 1715, and, escaping with the Pretender, spent the remainder of his life in exile at St. Germain.

Drummond, William (1785-1849), a Scottish poet—lord of Hawthornden—whose works dealt largely with political matters, but revealed considerable poetic power. Ben Jonson walked from London to Scotland to pay him his respects.

Dryden, John (1631-1700), one of the most vigorous and prolific of English poets and writers, and a popular dramatist. He excelled in satire, and drew some powerful pictures of the statesmen of his day. His translation of Virgil ranks with Pope's translation of the "Iliad." He was buried in Westminster Abbey. Originally a Parliamentarian he went over to the Royalists, and was laureate and historiographer-royal, 1670-88.

Du Barry, Countess (1741-1793), the favourite of Louis XV., who exercised great influence over the King, but after his death, and the breaking out of the Revolution, took refuge in England for a time. Being tempted to return to Paris in 1793 she was arrested and guillotined.

Dublin, Roman Catholic Archbishop of. (See Walsh.)

Du Chailu, Paul (1837-1904), a noted African traveller who was chief of General Gordon's staff in 1874, and wrote many valuable books of travels, his studies of the gorilla being especially interesting.

Dudley, Earl of (b. 1866), Governor-General of the Australian Commonwealth since 1908, was Lord-Lieutenant of Ireland, 1902-1905, in which position he showed a tactful sympathy which made him highly popular. Previously he had been for a short period Parliamentary Secretary to the Board of Trade. He was in sympathy with the Devolution Policy, and Chairman of the Commission on Congestion in Ireland.

Dufferin and Ava, Marquis of (1826-1902), was a diplomatist of great experience, a writer of undoubted brilliance, and filled many high offices with distinction and success, including those of Governor-General of Canada, Viceroy of India, and Ambassador to France, Russia and Turkey.

Dugdale, Sir William (1603-1686), the English antiquary famed for his *Monasticon Anglicanum*. Was knighted by Charles II.

Du Guesclin, Constable of France (1314-1380), achieved great fame in the wars with Edward III, and the Black Prince, ultimately driving the English out of France.

Dumas, Alexandre (1802-1870), the famous French novelist and dramatist, who published more volumes than any man of his time, the greater part of them of high merit. In the field of historical

romance he showed wonderful power and resource, and his thrilling story *Monte Cristo* is one of the great novels of the 19th century.

Dumas, Alexandre, fils (1824-1895), was the son of the last-named, and attained almost equal fame with his father, both as novelist and dramatist. His stories and dramas dealt mainly with the current time, and were often written round some striking social question. His *La Dame aux Camélias* was his most famous novel.

Du Maurier, George (1834-1896), one of the best known of the *Punch* artists during a long period, and author of the novels of *Peter Ibbotson*, *Trilby*, and *The Martian*. His pictorial satires of Society follies were sometimes scathing, and he owed a good deal to his early Parisian associations.

Dumouriez, Charles François (1739-1823), a celebrated French general, who, in the early period of the Revolution (1789-1793), distinguished himself in opposing the armies of Austria and Prussia.

Dunbar, William (1450-1525), a distinguished Scottish poet, author of "The Thistle and the Rose," and many other poetic pieces of a quaint fancy.

Duncan, Adam, Viscount Camperdown (1731-1804), won great renown and his title by a brilliant victory over the Dutch in 1797 off Camperdown.

Dundonald, Thomas Cochrane, 10th Earl (1775-1860), a British admiral who was dispersed and disgraced on a charge of fraudulently disseminating false reports, and subsequently commanded the Chilian, Brazilian, and Greek navies in turn. After being under a cloud for eighteen years, he was exonerated from all allegations made against him, and restored to his former rank and honours.

Dundonald, Lord (b. 1827), a distinguished English general who served in the Nile Expedition of 1884-1885, and in the Relief of Khartoum; also held a cavalry command in the South African War, and was afterwards in command of the Canadian Militia. His lordship is the 12th Earl, and like his ancestor last mentioned, and also the 9th Earl, is a man of invention and scientific attainments.

Dunn, J. Nicol (b. 1856), has had a large and varied journalistic experience, first in Scotland and afterwards in London. He was editor of *Black and White*, 1895-1897. Subsequently edited the *Morning Post*, later the *Manchester Courier*, and in 1911 accepted an editorial position in *S. Africa*.

Dunne, F. P. (b. 1857), an American humourist who has gained a wide reputation for his "Mr. Dooley" papers, which have been appearing for several years and contain much shrewd comment on the topics of the time. "Mr. Dooley" is an Irish-American saloon-keeper, who retails his views in conversation with "Mr. Hennessy," his customer and compatriot.

Dunrobin, Earl of (b. 1841), has had a very active career in many parts of the world. Was war correspondent during the Siege of Paris, and served in the South African War. Made two attempts to win the America (yachting) Cup, but without success. More recently he has been associated with the Irish Reform Association, of which he is chairman. In 1907 published *The Outlook in Ireland*.

Duns Scotus (c. 1225-1286), a famous scholastic, who was, according to tradition, born at Duns, in Berwickshire, and became a Franciscan friar and theological professor at Oxford. Later he was, it seems, regent of the University of Paris. He was the great doctrinal opponent of Thomas Aquinas.

Dunstan, St. (c. 924-988), the famous Abbot of Glastonbury and Archbishop of Canterbury, who lived through the reign of five kings, and exercised great political influence.

Dupleix, Joseph François (1697-1763), was governor of the French East Indian possessions at the time when Clive was guiding the fortunes of the East India Company, and after Clive's victory at Plassey Dupleix's day was over. He returned to France, and fell into disgrace and poverty.

Durand, Right Hon. Sir H. Mortimer (b. 1850), at one time political secretary to Lord Roberts, and filled many diplomatic positions, being Ambassador to Spain until 1904, when he was appointed to the post of British Ambassador at Washington. Sir

Mortimer's Indian and Afghan experiences are extensive, and he writes well on Oriental affairs.

Durham, John George Lambton, Earl of (1792-1840), a statesman who did great public service by undertaking the readjustment of administrative grievances in Canada in 1836, his wise suggestions served for the foundation of the self-governing principle in the Dominion.

Dürer, Albert (1471-1528), the great German painter and engraver, and friend of Luther. Many of his engravings are in the British Museum. Of Nuremberg birth, he may be regarded as the founder of the German school and the inventor of etching.

Duse, Eleanora (b. Venice, 1861), an Italian tragedienne of world-wide reputation, whose impersonations of various classic parts have greatly impressed the critical audiences of London, Paris, and New York. She has frequently performed for short seasons in London.

Duval Glaude (1649-1690), a notorious highwayman who, coming to England from Normandy in the Duchess of Richmond's service, took to "the road," and for a few years successfully evaded capture. He was hanged at Tyburn.

Dvořák, Antonín (1847-1904), the eminent Bohemian composer. Combined with a striking originality, his compositions show fine musical qualities. Made himself popular in this country by his "Stabat Mater" in 1880, and his cantata "The Spectre's Bride."

Dyer, Sir W. T. Thistleton (b. 1843), a great authority on flora and plant lore, and son-in-law of Sir Joseph Hooker, the botanist. Was for twenty years prior to 1905 Director of Kew Gardens. Has written learnedly on the flora of Middlesex and of Africa, and held, prior to going to Kew, first the Professorship of Natural History at the Royal Agricultural College, Cirencester, and then the Professorship of Botany at the Royal College of Science for Ireland.

Dyson, F. W., F.R.S. (b. 1868), Astronomer Royal since 1910. Was previously (1905-10) Astronomer Royal for Scotland.

E

Eadmer was the name of an English monk and historian, who lived in the latter part of the 11th century and commencement of the 12th. He was the friend of Anselm at Canterbury, and wrote the life of the latter, of Dunstan, and others, besides being the author of the *Historia Novorum*.

East, Sir Alfred, A.R.A. (1849-1913), a landscape painter whose works are deservedly popular, many of his paintings being distributed over the leading galleries of Europe.

Eastlake, Sir Charles L. (1793-1865), an eminent English painter who was made R.A. in 1820, and twenty years later became President of the Academy. His works were mostly of a religious character, and were much admired in their day. He was keeper of the National Gallery, 1843-1847.

Ebers, Georg M. (1837-1898), a well-known novelist and Egyptologist, who attained a world-wide reputation by his principal novels, especially *An Egyptian Princess*. Was Professor of the Leipzig University in 1870, and died in Bavaria.

Eck, Johann von (1486-1543), was one of the most vigorous opponents of the Reformation in Germany, and in pamphlets and public discussions showed great activity and resourcefulness, denouncing Luther with exceeding bitterness.

Eddy, Mrs. Mary Baker (1822-1911), founder of the "Christian Scientists," was the author of a work entitled *Science and Health*, which almost ranks as a sacred book with the millions of her adherents. There are said to be nearly 700 Christian Science Churches, and Mrs. Eddy was understood to possess in subscribed funds some millions of pounds. Mrs. Twain published a bitter attack upon her in 1907.

Edgar, King of England from 959 to 975, was a monarch of enlightened ideas, who under the influence of Dunstan was able to carry out many useful reforms.

Edgar Atheling, as grandson of Edmund Ironside, was the lawful heir of Edward the Confessor, but in the confusion of the Norman invasion he was unable to maintain his claim.

Edgeworth, Maria (1767-1849), a well-known authoress, whose stories of Irish life, *Castle Rackrent*, *The Absentees*, etc., were remarkable for their rich humour and tenderness. She also wrote, in collaboration with her father, Richard Lovell Edgeworth, on educational subjects, and, independently, a number of books for children.

Edison, Thomas Alva (b. 1847), the American inventor, who after an adventurous boyhood became a telegraph operator, and had his attention directed to electrical problems. Established himself in New York in 1869, and invented an improved printing telegraph. In 1876 set up an elaborate laboratory and factory at Menlo Park, New Jersey, from which place he has sent out many clever and some startling inventions, including a system of duplex telegraphy, afterwards improved into quadruplex and sextuplex transmission, the phonograph, and a method of preparing carbon filaments for the electric lamp.

Edmund Ironside (985-1016), the son of Ethelred, after years of contention with the Danes, made a compact with Canute to divide England between them, but dying shortly afterwards the kingdom was settled on Canute.

Edmund, Martyr and Saint, the last king of the East Angles, began to reign in 855, and was killed by the Danes in 870.

Edmund, St. (circa 1170-1240), Archbishop of Canterbury, championed the English Church against Papal encroachment; died in France; canonised 1247.

Edward the Confessor (circa 1004-1066), the Anglo-Saxon king who immediately preceded—save for the brief reign of Harold of less than a year—the Norman Conquest, and founded Westminster Abbey, where a smaller church, then dilapidated, had previously for a period, had a precarious existence. He was a religious-minded mystic, and was canonised in 1162, and given the shrine in the Abbey of his origination, which yet remains fairly intact, despite the ravages of Time and disturbing hands.

Edward the Elder was the son of Alfred, and succeeded him as King of the West Saxons in 901. He was successful in overcoming the Danes, and became overlord of the Northern counties.

Edward the Martyr (963-979) became king in succession to Edgar, but, although supported by Dunstan, was not able to prevail against his step-mother Elfrida, who had him murdered.

Edward I. (1239-1307) was king of England from 1272 to 1307. Took part in the Crusades, completed the conquest of Wales, overcame Scottish opposition—executing Wallace and receiving the submission of Bruce—and promulgated many wise laws. He was nicknamed "Longshanks."

Edward II. (1284-1327), the son of Edward I., succeeded his father when the latter died at Burgh-on-Sands in 1272. Suffered defeat at the hands of the Scotch at Bannockburn, and on account of his arbitrary disposition, cruelty, and lavish concessions to favourites, was deposed in 1327, and afterwards murdered at Berkeley Castle.

Edward III. (1312-1377) was one of the ablest of English monarchs who, although much taken up with long and bitter wars with France and Scotland, did much for the commercial interests of the nation, and was the means of introducing large numbers of Flemings into the country, who laid the foundation of the English textile manufactures. He married Philippa of Hainault, and was the father of Edward the Black Prince.

Edward IV. (1441-1483) attempted unsuccessfully to regain the lost English possessions in France, and resorted to many despotic expedients for obtaining supplies, but it stands to his credit that he entered into trading treaties with the commercial merchants of the Continent which were of benefit to his people.

Edward V. (1470-1483)—son of Edward IV. and Elizabeth Woodville—was the unfortunate king who was put to death in the Tower of London, and succeeded by Richard III., his unscrupulous uncle,

who had made himself "Protector" and assumed the Crown a little more than two months after the death of Edward IV., publishing the demise of the young King and his brother the Duke of York as having occurred in prison. The bones of the murdered boys were many years afterwards taken to Westminster Abbey for final burial.

Edward VI. (1537-1553) succeeded his father, Henry VIII., when in his tenth year, and died in his sixteenth year. The Reformation, under the Regency of Somerset first, and then of Northumberland, made considerable progress during his brief reign. He was induced during his last illness to name Lady Jane Grey his successor, with results disastrous to that unfortunate personage and many others concerned.

Edward VII. (1841-1901). His late Majesty was privately educated; afterwards passed through a course in succession at Edinburgh, Oxford, and Cambridge; travelled in Italy and Spain in 1860, visited the United States and Canada in 1860; and made a tour of the Holy Land in 1862. Was married to Princess Alexandra of Denmark in 1863. Undertook a tour to Egypt in 1869. Suffered from a severe attack of typhoid in 1871. Visited India in 1875, and from that time onward was constantly in the public eye, taking part in all kinds of functions. Succeeded to the throne on the death of Queen Victoria, Jan. 22, 1901. His Civil List was fixed at £400,000 a year. The Coronation which had been planned for June 22, 1902, had to be postponed in consequence of the King's sudden illness, but eventually took place on the 9th of August in the same year. The incidents of the King's nine years' reign are too familiar to need repetition. His Majesty was a powerful factor in the preservation of the peace of Europe, his friendly intercourse with the heads of the French, German, and other nations earning for him the title of "Edward the Peacemaker."

Edwards, John Penson (1823-1901), was for many years proprietor of the *Echo* and other London papers, and after acquiring a fortune devoted himself to public affairs and philanthropy. He was M.P. for Salisbury from 1880 to 1884. In the founding and development of free libraries and art galleries, as in many other charitable directions, he performed great and substantial service.

Edwards, Jonathan (1703-1758), was an American metaphysician who obtained a high reputation by his *Treatise on the Freedom of the Will*. He wrote many other books of a religious nature, and attained great eminence as a preacher. His son, Jonathan Edwards the younger (1745-1801), was an American Congregational clergyman of some eminence.

Edwin, King of Northumbria, killed in battle at Hatfield Chase, Yorkshire, in 634. He was baptised into the Christian faith at York in 667, and built a church there. He was canonised later.

Edwy was an Anglo-Saxon king, son of Edmund I. He succeeded his uncle, Edred, in 955, and died in 984, when under twenty years of age, after having undergone considerable cruelty at the hands of ecclesiastics who resented his wedding with a relative, Elgiva, who was put to death.

Egbert was a descendant of Cerdic, king of the West Saxons, and reigned from 802 to 839 in Wessex; in his latter years became the first king of all England. In 835 he had to drive the Northmen away from Cornwall.

Elagabalus was the Emperor of Rome from 218 to 217, and after a despicably wicked reign of less than four years was put to death by his soldiers.

Eldon, Earl of (1751-1838), was Lord Chancellor from 1801 to 1827 after a distinguished career at the Bar and in Parliament. He was a man of high integrity, whose father, William Scott, was a Tyneside coal-ster. John Scott was the third son, and went to Newcastle Grammar School. He applied himself so assiduously to general study and afterwards to the law, that he rose to the Wootton, being created in turn Viscount Encombe and Earl of Eldon. Another brother became a celebrated jurist also, and as Baron Stowell is noted for his decisions in international law.

Eleanor, Queen of Edward I. (d. 1290), was a woman of great piety and devotion. After her death the king had memorial crosses erected at the twelve places where her body rested on its way from Grant-ham to Westminster.

Elgar, Sir Edward (b. 1858), studied music, and settled at Malvern as teacher and composer. Since 1892 has composed many notable cantatas and other works, which have been performed at various festivals, achieving a high reputation by his "Caractacus," given at Leeds in 1898, "The Dream of Gerontius," produced in 1900, "The Apostles," performed at Birmingham in 1903, and "The Kingdom," given at the Birmingham Festival of 1906. In March, 1904, he was honoured with a three days' festival at Covent Garden, and knighted in 1904.

Elgin, James Bruce, 6th Earl of (1817-1883), a prominent English statesman, who filled in succession the important posts of Governor of Jamaica, Governor-General of Canada, and Governor-General of India, and also served in China and Japan with distinction.

Elgin, Thomas Bruce, 7th Earl of (1766-1841), a British diplomatist who brought to England from Athens the famous "Elgin marbles," now in the British Museum.

Elgin and Kincardine, Victor Alexander Bruce, 6th Earl of (b. 1849), Liberal statesman, Treasurer of Royal Household and First Commissioner of Works, 1886; Viceroy of India, 1894-1899; Colonial Secretary, 1905-1908.

Elmhurst, Master of. (See Murray, Lord.)

Eliot, Sir Charles (b. 1864), was appointed in 1888 third Secretary to the British Embassy at St. Petersburg, and later served at Tangier, Constantinople and Belgrade. In 1898 he was made a C.B. and transferred to Washington. Was on the Sanoa Commission and created a K.C.M.G. in 1900. More recently was Consul-General for the East Africa Protectorate, and since 1904 has been First Principal of the University of Hong-Kong.

Eliot, George, the pen name of Marian Evans, who between 1857 and her death in 1880, produced some of the most memorable novels of the 19th century, including *Adam Bede*, *The Mill on the Floss*, *Silas Marner*, *Middlemarch*, and *Daniel Deronda*.

Eliot, Sir John (1692-1693), was one of the leaders of the House of Commons opposition to the demands of Charles I., and with nine others was committed to the Tower, where he died in 1693.

Elizabeth, Queen (1533-1568), came to the throne in 1558 at the age of twenty-five, and reigned forty-five years. Was a fervid Protestant, a sincere lover of her country, a masterful and enlightened ruler—fickle as far as her favourites were concerned—and added distinction to a distinguished period. The defeat of the Spanish Armada, the execution of Mary Stuart, the naval supremacy of England, the extension of her colonies, and the glory of a great new literature of which Shakespeare was the brightest ornament, are features that associated with her reign.

Elizabeth, St. of Hungary (1207-1231), was daughter of Andrew II. of Hungary, and wife of Louis IV., Landgrave of Thuringia. Becoming a widow, she forsook the pomp of courts, and lived in retirement and poverty, dying at twenty-four, and afterwards being canonised.

Elizabeth Stuart, Queen of Bohemia (1596-1662), daughter of James I., and mother of the Prince Rupert and Princess Sophia (mother of George I.). She died a widow in London.

Elizabeth, Queen of France (1437-1492), Queen of Edward IV. of England, and mother of Edward V., to which ill-fated Prince she gave birth whilst within the shelter of sanctuary at Westminster.

Elliot, Ebenezer (1781-1849), the famous "Corn Law Rhymers," whose poems did much for the success of the Anti-Corn Law Agitation.

Ellis, Rt. Hon. John Edward, P.C., M.P. (1841-1911), was a prominent Liberal politician who was appointed Under-Secretary for India at the close of 1902 in Sir Henry Campbell-Bannerman's Government, but after one year's service resigned because of ill-health.

Elphinstone, Mountstuart (1779-1859), an Indian Administrator of great ability, who from 1819-1829 was Governor of Bombay. One of the chief founders of our Anglo-Indian Empire.

Emerson, Ralph Waldo (1803-1882), the American essayist and philosopher. His *Conduct of Life*, *Representative Men*, and *Essays*, are in their way, the most brilliant things that American literature has produced.

Emmyn Pasha (1840-1892), a noted African explorer of Jewish parentage and German birth. Was associated with Gordon Pasha in the pacification of the Soudan, and showed marked ability in the government of the equatorial provinces. He was menaced by the Mahdi and cut off from Egypt in 1883, but relieved by Stanley in 1889. Returning to Africa in 1890, he was eventually murdered by Arabs.

Emmet, Robert (1778-1804), the enthusiastic youth, who led the rebellion in Ireland in 1803, and was tried and executed in the same year for high treason. He is one of Ireland's patriotic heroes, and has been immortalised in song and story.

Emmott, Baron (formerly Rt. Hon. Alfred Emmott (M.P.), Chairman of Ways and Means, 1906-1911) (b. 1858). Raised to the peerage and made Under-Secretary for the Colonies (1911).

Ennius, Quintus (239-169 B.C.), the Roman epic poet and friend of Scipio Africanus the Elder.

Epictetus of Hierapolis, the Stoic philosopher who lived in the 1st century, and was a moral teacher of great repute and influence.

Epicurus (342-270 B.C.), the founder of the Epicurean philosophy, which taught that Virtue should be followed, because it leads to happiness, which is the highest good.

Erasmus Desiderius (1466-1536), the great Dutch philosopher and scholar, of whom it was said that he "laid the egg which Luther hatched." He was a formidable controversialist, and exerted great influence upon the advanced thought of his time.

Erastus, Thomas (1524-1583), was a German theologian who proclaimed a policy of Church restriction, which developed into what is known as Erastianism.

Ericsson, John (1803-1889), a distinguished Swedish engineer who entered into competition with George Stephenson in the first famous trial of locomotives. Later he settled in the United States, and devoted himself with much success to marine engineering.

Erskine, Thomas, 1st Lord (1750-1823), the eminent English lawyer, who after a brilliant success at the Bar was made Lord Chancellor in 1806.

Escher, Reginald Balol Brett, 2nd Viscount, G.C.B. (b. 1852), sat on the Royal Commission of Inquiry into the South African War, was chairman of the Army Organisation Committee, and edited, with Mr. A. C. Benson, the *Letters of Queen Victoria*. Deputy-Governor and Constable of Windsor Castle.

Essex, Robert Devereux, 2nd Earl of (1567-1601), became Queen Elizabeth's favourite after the death of Leicester, and for a time held many important posts, but, offending the Queen by certain actions in Ireland, was suddenly deprived of his honours and committed to prison. Later on, being liberated, he was implicated in a rebellious movement, for which he suffered death on Tower Hill.

Ethelbert, King of Kent at the close of the 6th century and commencement of the 7th. Famous for having accepted Christianity on the entreaty of St. Augustine. Published the first code of written laws in English. Ethelbert was afterwards canonised.

Ethelred I. was the Anglo-Saxon king who reigned from 866-871, and defeated the Danes at Ashdown.

Ethelred II., King of England from 979-1016, received the surname of "the Unready," because of his slowness to take action against the Danes, with whom he was more or less in conflict during the whole period of his reign.

Ethelwulf was the Anglo-Saxon sovereign who succeeded his father Egbert in 837. Died in 857, and was buried at Winchester.

Etty, William (1787-1829), a famous English R.A., who contributed to the Royal Academy some of its most admired pictures between 1820 and the time of

- his death. Among his famous pictures are "The Coral Finders," "Cleopatra," "Joan of Arc" (a series), and "Youth at the Frow and Pleasure at the Helm."
- Eucleid**, the famous Greek mathematician, who lived in the 3rd century B.C., and whose Elements of Geometry are as sure of Immortality as the "Iliad."
- Eugene, Prince** (1863-1935), a celebrated Austrian general who became associated with the Duke of Marlborough in the War of the Spanish Succession. A brilliant commander and capable statesman.
- Eugenie, ex-Empress of the French** (b. 1806), was the daughter of Count Montijo of Granada, and on the mother's side of Scottish descent. She married Napoleon III. in 1853, and for many years kept a brilliant court. On the outbreak of the Franco-Prussian War her husband and only son proceeded to the seat of war with great flourish of trumpets, but after Sedan the Empress had to make her escape from Paris in disguise, and took up her abode in England, where she was subsequently joined by Louis Napoleon. They resided at Chislehurst for a time, and there her husband died. Her son went out to the Zulu War in 1879, and was killed by a party of Zulus. When in England the Empress resided at Farnborough Hill, Hants.
- Euripides** (480-406 B.C.) was the greatest of Greek tragic poets. He wrote seventy-five plays, eighteen of which have been preserved, the most famous being "Alcestis," "Medea," "Iphigenia," and "Orestes."
- Eusebius** (264-340), an ecclesiastical historian of rare industry, whose works are still held in great esteem. His *Chronicon* is a history of the world down to his own time, while his *Ecclesiastical History* traces the chief events of the Christian Church over the same period. He was a native of Caesarea.
- Evans, Rt. Hon. Sir Samuel, M.C.** (b. 1859), President of the Probate, Divorce and Admiralty Courts since 1910. Was Solicitor-General, 1908-1910.
- Evelyn, John** (1620-1706), an English gentleman who wrote several scientific works, but is best known by his *Diary*, which covers a good part of the reigns of Charles I., Charles II., and James II., and is valuable for its shrewd pictures of the period.
- Eversley, Rt. Hon. G. J. Shaw-Lefevre, 1st Baron** (b. 1832), long one of the most active and prominent members of the Liberal side of the House of Commons. Served in turn as Civil Lord of the Admiralty, Secretary to the Board of Trade, Under-Secretary Home Department, Secretary to the Admiralty, First Commissioner of Works, Postmaster-General, and President of the Local Government Board. Introduced sixpenny telegrams.
- Ewald, Georg Heinrich August** (1803-1875), an eminent German scholar and theologian, whose studies in Biblical literature gained him great fame. He wrote on the *Poetical Books of the Old Testament* and a *History of the People of Israel*.
- Ewing, Frederick Hewitt** (1821-1895), was a native of Ecclefield, Yorkshire, and made a name as a writer of children's stories, many of which won very wide popularity, among them *The Land of Lost Toys*.
- Eyck, Jan Van** (1380-1440), a famous Flemish painter whose works are distinguished for their brilliance of colour and finish.
- Eyre, Edward John** (1815-1901), from being a traveller and explorer entered the Diplomatic Service, and became successively Lieutenant-Governor of New Zealand, Governor of the West Indies, and Jamaica, being appointed to the latter position in 1862. In 1865 a rebellion broke out among the natives, and this movement was repressed with a strong hand by Governor Eyre. Afterwards charges of cruelty were brought against him, and an inquiry was instituted, resulting in his acquittal.
- F
- Faber, Frederick William** (1812-1863), the hymn-writer and oratorian, was educated at Shrewsbury and Oxford for the English Church, but under the influence of Cardinal Newman went over to the Church of Rome, and founded the Wilfridian Brotherhood at Birmingham, subsequently taking them over to the Brompton Oratory. His hymns are remarkable for their lofty spirituality and beauty of form.
- Fabius Maximus** (d. 203 B.C.), the Roman Consul and Dictator, saved Rome from conquest by Hannibal by deliberate and well-planned strategic evasion of battle which in the end, after eight years of vain effort, caused Hannibal to withdraw his forces to Tarentum. There in 209 B.C. Fabius overcame the Carthaginian general, and Rome was safe. The term "Fabian Policy" is derived from Fabius's tactics.
- Faer, Thomas, R.A.** (1826-1900), one of the most successful of Victorian painters, won a great reputation for his Scottish subjects, especially those dealing with humble life, such as "The Miserable Barn," "Auld Robin Gray," etc.
- Fahrenheit, G. D.** (1686-1736), a Dutch scientist, who introduced quicksilver in the construction of thermometers, and laid down the Fahrenheit thermometric scale still used.
- Fairbairn, Dr. Andrew M.** (1838-1919), a famous theologian and member of the Welsh Church Commission. Head of Mansfield College, Oxford, from its foundation in 1886 to his retirement in 1908. Wrote and lectured extensively in Britain and America, and actively interested himself in educational legislation. Was Chairman of the Congregational Union in 1883.
- Fairbairn, Sir William** (1780-1874), mechanical engineer and inventor, born at Kelso, Roxburghshire, in very humble life, and worked for some years in various parts of the country as an engine-wright. Set up business in Manchester as an engineer, and, by the introduction of numerous mechanical improvements, and especially by the first utilisation of iron in shipbuilding, became eminent and wealthy, and was made a baronet in 1860.
- Fairfax, Edward** (1580-1635), son of a Yorkshire baronet, and translator of *Tasso*.
- Fairfax, Thomas, 3rd Lord** (1612-1671), a prominent leader of the Parliamentary army during the Civil War, who greatly distinguished himself at Marston Moor and Naseby; refused to march against the Scots in 1650; and lived to have a hand in effecting the restoration.
- Falconer, William** (1732-1759), a Scottish poet born in Edinburgh, who wrote the "Shipwreck," a stirring poem of many beauties, in which he described his own experiences on an East Indian voyage.
- Falkland, Viscount** (1610-1643), was at first a supporter of the Parliamentary cause in the disputes between the popular representatives and Charles I., but refused to co-operate with them in their later demands, and later fought for the king. Was killed at the first battle of Newbury.
- Fallicher, Clement Armand**, President of France, 1906-13 (b. 1841). At the time of his election, to succeed M. Loubet as the head of the Republic, M. Fallicher, who is a barrister of Gascon birth, was President of the Senate, a difficult position which he had sustained with dignity for some years. For a brief period in 1883 he was Premier, and in political leaning favoured the Republican Party.
- Faraday, Michael** (1791-1867), the eminent chemist, who was Professor of Chemistry in the Royal Institution, and acquired deserved fame for his brilliant experiments in connection with electricity, and his able and clearly-written scientific books. He was originally a bookbinder.
- Farrar, Frederic William** (1831-1903), Dean of Canterbury. Was a well-known divine and author, some of whose writings attained a large circulation, and exercised a considerable influence. His most popular publications were *The Life of Christ*, *The Life and Works of St. Paul*, and *Early Days of Christianity*.
- Farnwell, Rt. Hon. Sir George**, Judge of the High Court, 1890-1905; Lord Justice and Privy Councillor in 1905. Resigned Lord Justiceship, 1913. Was Chairman of the Boer War Stores Commission.

- Faure, François F.** (1841-1899), was a successful shipowner at Havre. Elected to the Chamber of Deputies in 1881, he was chosen President of the French Republic in 1895, which position he held at the time of his death.
- Fawcett, Henry** (1823-1884). The son of a farmer, he was educated at Cambridge, and entered for the bar. In 1859 he had the misfortune to be blinded by a stray shot from his father's gun, and to most men this would have been a block to a career, but Fawcett stuck resolutely to his first aim. Made himself known as an earnest publicist by producing a *Manual of Political Economy* in 1865; after which he was appointed Professor of Political Economy at Cambridge. In 1865 he entered Parliament, and became one of Gladstone's most trusted lieutenants, devoting himself largely to Indian finance, and economical questions generally. Was made Postmaster-General in 1880, and was the means of introducing the Parcel Post, Postal Orders, and sixpenny telegrams.
- Fawcett, Mrs. Millicent Garrett** (b. 1847), widow of the foregoing; a woman's suffragist and educational reformer, and a very capable writer on political economy. Is hon. LL.D. degree of St. Andrew's University, and was one of the commission of ladies who went out to South Africa during the war to examine the concentration camps.
- Fawkes, Guy** (1790-1866), a Yorkshire Catholic, who with Catesby and other conspirators planned the Gunpowder Plot. Although warned of the discovery of the plot, Fawkes persisted and was captured in the cellar of the Parliament House and hanged. (See *Gunpowder Plot*, General Information section.)
- Fechter, C. A.** (1824-1899), an actor of great power, who was born in London of French parents, and after varying success on the Paris stage, came to London, where first at the Princess's Theatre and afterwards at the Lyceum, he played in a series of melodramas, which placed him in the front rank of actors. Went to the United States in 1870 and died there.
- Feckenham, John de** (1518-1595), last mitred abbot who sat in the House of Peers, a tolerant Romanist dignitary who was Queen Mary's confessor, and displeased her by pl. acting for the Protestants.
- Feneion** (1751-1795), Archbishop of Canby and a writer of great distinction. His *Telemachus* is a French classic.
- Ferdinand V.** of Castile (1452-1516), who married Isabella of Spain, and with her reigned over that country during a period of great events. He saw the Moors expelled from Spain, equipped Columbus for the discoveries which led to Spain's vast colonial possessions, and instituted the Inquisition.
- Ferguson, James** (1710-1776), a Banffshire man of great ability and inventiveness, who, from being a shepherd-boy, educated himself in astronomy, mathematics, and portrait painting, so that he was able to support his parents, and became eminent as a scientific lecturer. He was made a Fellow of the Royal Society, and had a pension granted to him by the Government.
- Fergusson, Sir William** (1808-1877), President of the Royal College of Surgeons, and for thirty years Professor of Surgery at King's College (1840-1870). Was not only eminent as a surgeon but as a writer on surgery and an inventor of surgical appliances.
- Ferre, Francisco** (1809-1899), who was executed as the chief author of the Barcelona insurrection of 1890, won much acceptance for his system of "Scientific and Rationalist education," and was responsible with Haeckel for the International League which extended the system to other lands. By many he is regarded as a martyr.
- Ferrers, Earl** (1720-1760), condemned by the House of Lords for killing his steward, and hanged.
- Ferry, Jules** (1832-1893), Journalist and statesman of France. In 1869 was elected one of the Deputies for Paris. He became, after the fall of Napoleon III., one of the most vigorous members of the National Defence Committee; served in several prominent offices in later years, being Minister of Education in 1880 and Minister of Finance in 1890.
- Fichte, Johann G.** (1762-1814); was Professor of Philosophy, first at Jena and then at Erlangen, and later Rector of the University of Berlin. His works had great influence upon the thought of his time, the Idealist philosophy he taught being marked by much purity of conception. His chief works are *The Description of Man* and *The Way to the Blessed Life*.
- Field, Cyrus W.** (1819-1892), an American who took a prominent part in the development of submarine cables. In 1866 he connected the United States with Newfoundland by cable, subsequently organising the company which established the first successful Atlantic cable in 1866.
- Fielding, Henry** (1707-1754), the celebrated English novelist, author of *Tom Jones*, *Joseph Andrews*, and *Amelia*, as well as many plays.
- Fife, Duke of** (1849-1912), husband of the Princess Royal (eldest daughter of King Edward VII.). Was vice-chancellor of the Chartered Company of South Africa, but retired after the Jameson Raid.
- Fildes, Sir Luke, R.A.** (b. 1863), first attracted notice as a black and white artist, and illustrated Dickens's *Edwin Drood*. Exhibited at the Royal Academy in 1892, and at successive exhibitions was represented by many important works, including "The Casual Ward," "The Village Wedding," and "The Doctor." Elected R.A. in 1889, and knighted in 1906. Painted the State portraits of the King and Queen.
- Finlay, Rt. Hon. Sir Robert B.** (b. 1814), entered Parliament in 1835; from 1865 to 1897 was Solicitor-General, and succeeded Sir R. Webster (Lord Alverstone) as Attorney-General in Nov. 1900. Defeated in 1906, but re-elected in 1910. Died F.C. in 1906.
- Finsen, Prof. Niels Ryberg** (1861-1904), a Danish medical scientist whose light cure for lupus obtained the approval of Queen Alexandra and the encouragement of many philanthropists. He established an institute for the practice of his system at Copenhagen, and in 1890 received an appointment as anatomical professor.
- Firdausi, Abul K. M.** (941-1000), was the great epic poet of Persia. His "Book of Kings" contains 60,000 verses, and professes to relate the history of Persia from the beginning of things.
- Firth, Mark** (1819-1880), a great Sheffield steel maker, who was at the head of the Norfolk Ordnance Works, and was celebrated for his benefactions, including the Firth College and a public park.
- Fisher, Rt. Hon. Andrew** (b. 1852), Premier of Australia 1908-9 and again from 1910 to June, 1913, when he resigned, resuming the post in Sept. 1914; Leader of the Labour Party. Is a native of Kilmurck.
- Fisher of Kilverstone, Admiral Lord** (b. 1812). Has served most posts of honour in connection with the Navy and naval administration, and was appointed Senior Naval Lord of the Admiralty in 1904. First Sea Lord and Created Peer in 1909. Was on the Special Naval Committee of 1905. In 1914 resumed position of First Sea Lord on resignation of Prince Louis of Battenberg. Resigned May, 1915.
- Fitzmaurice, Lord** (b. 1846), was Under-Secretary for Foreign Affairs, an office which he accepted for a second time (with his peerage) from Sir H. Campbell-Bannerman, from 1905 to 1908, when he was appointed Chancellor of the Duchy of Lancaster, but resigned in 1909. Is brother to Lord Lansdowne.
- Fitzroy, Robert, Vice-Admiral** (1805-1865). Attained celebrity as a meteorologist, and in 1854 was made superintendent of the Meteorological Department, and was the introducer of the system of storm warnings which has developed into our present more elaborate weather forecasts.
- Fleming, John** (1646-1719) was the first English Astronomer Royal, and a close friend of Sir Isaac Newton, whom he aided in many of his experiments.
- Fleubert, Gustave** (1821-1880), the French novelist who won distinction by several notable books, among them *Madam Bovary*, *Salammbô*, and other works of genius.
- Flaxman, John** (1755-1826), a great English sculptor who was born at York, and at twenty was employed as Modeller by Wedgwood; showing great ability as a sculptor he went to Italy, and studied

there seven years. On his return was made an R.A. and Professor of Sculpture, and thenceforward his career was one of unqualified success.

Fletcher, John (1752-1805), the famous collaborator with Beaumont in numerous plays which were popular in their day, and take high position in the dramatic literature of the country, containing sterling poetic beauties allied with much vulgarity.

Fletcher, Lazarus, F.R.S. (b. 1754), Keeper of Minerals in the British Museum since 1820 and an authority on mineralogical science generally and meteorites in particular.

Flinders, Matthew (1774-1814), an explorer and navigator, who made important discoveries in and around Australia. He sailed through the Strait which he christened Bass Strait in honour of the surgeon accompanying his expedition, and was the first to ascertain that Tasmania was an island.

Flotow, Frederick von (1812-1883), the well-known composer of opera whose "Stradella" and "Martha" enjoyed much popularity, the last-named still remaining a favourite.

Foley, John Henry (1818-1874), born in Dublin, went to London while young; studied at the Royal Academy, and attained high rank as a sculptor, becoming R.A. in 1852. His statues of Hampden and Selden in the Houses of Parliament, that of the Prince Consort on the Albert Memorial, with his equestrian statues of Sir James Outram and Lord Hardinge, being among the best examples of his work. He was buried in St. Paul's.

Foot, Samuel (1720-1777), a clever actor and comic, who in his day did much to keep London in good humour. He was the author of numerous comedies, including the "Mayor of Garrat."

Forbes-Robertson, Sir Johnston (b. 1823), actor-manager, trained as an artist, but studied under Phelps, and went on the stage, and became a leading player with the Bancroft and Ilare companies, and then successfully entered into management on his own account. Gave a farewell season at Drury Lane in 1873. The clever actress, Miss Gutteridge Elliott, was his wife.

Ford, John (1586-1640), an English dramatist of considerable power, who wrote sixteen plays, of which "Perkin Warbeck" was perhaps the greatest.

Forster-Walker, General Sir F. W. E. (1824-1910), a soldier who had a brilliant army record in the Kafir and Zulu Wars, with the Bechuanaland Expedition, in Egypt, at home in command of the Western District, in South Africa as Lieut.-General, and afterwards Commander-in-Chief and Governor at Gibraltar.

Forster, John (1812-1875), an able and fascinating writer, who loomed large in the literature of the mid-Victorian period. He will be best remembered by his *Life of Charles Dickens*, *Life of Oliver Goldsmith*, and *Biography of Sir John Eddis*.

Forster, Rt. Hon. W. E. (1818-1885), entered Parliament as member for Bradford in 1861, and immediately made his mark. Was Under-Secretary for the Colonies 1865-1866, Vice-President of the Council from 1868-1874 under Mr. Gladstone, and Chief Secretary for Ireland from 1880-1882. The measures with which his name will remain associated are the Ballot Act of 1872 and the Elementary Education Act of 1870.

Fortuny, M. J. (1838-1874), a celebrated Spanish painter, who between 1860 and 1870 produced a number of pictures which for beauty of execution and brilliancy of colour take high rank. His "Choosing a Model," "The Snake Charmer," and "Moors playing with the Vulture" show great technical resource.

Foscarini, Francesco, Doge of Venice from 1423 to 1457. A great historical character, who governed Venice with a firm hand and increased her renown. The story of his condemnation of his son, and his stern refusal to exercise the prerogative of mercy in his favour, forms the subject of Byron's tragedy "The Two Foscari." He was driven to abdication by his rival Giacomo, and died very shortly afterwards.

Foscolo, Ugo (1778-1827), a well-known Italian author, who for his political opinions had to leave the

University of Pavia, and went to London and there employed his time in literary work. He produced many admirable translations, but ultimately died in poverty at Turnham Green. His remains were taken to Florence in 1872, and buried in the Church of Santa Croce with great honour.

Foster, John (1770-1843), was an eminent essayist and lecturer; his *Evils of Popular Ignorance* was a charming book, and is still read.

Fouquier, François Chas. (1772-1837), the famous French Socialist, who propounded a system of associative enterprise for giving everyone ample means on a system of communal industry. He made some attempts to carry out his Utopian ideas, but they did not succeed. He is best known by his *Traité de l'Association Domestique Agricole*.

Fowler, Sir John (1817-1868), an eminent civil engineer, son of a Sheffield land surveyor. He figured prominently in railway engineering during the 'forties and 'fifties of last century, and engaged in many large public undertakings. With Sir Benjamin Baker he was the engineer of the Forth Bridge, and was engineer of the Metropolitan Railway.

Fox, Charles James (1748-1805), was the second son of the first Lord Holland. Entered Parliament at nineteen, and became a Lord of the Admiralty in the following year. His opposition to the Royal Marriage Bill drew down upon him the displeasure of George III. Through the whole of Pitt's Premiership he was that statesman's most formidable opponent. He favoured American Independence; opposed the war with France; was one of the impeachers of Warren Hastings; denounced the Slave Trade and advocated Parliamentary Reform. After the death of Pitt in 1805 he was made Foreign Secretary, but died a few months later, and was buried in Westminster Abbey.

Fox, George (1624-1691), was the founder of the Society of Friends. His preaching often gained him trouble and imprisonment, but his religious zeal was beyond the power of mortals to suppress.

Foxe, John (1517-1577), the English martyrologist, whose "Acts and Monuments" (*Book of Martyrs*) is one of the best known books in the language. Born at Boston in Lincolnshire, he later became a clergyman of the Anglican Church and died in London.

Frampton, Sir George, K. A., an eminent sculptor who is represented by numerous notable works in different parts of the empire, including the statues of Queen Victoria and Queen Mary for Calcutta.

France, Anatole (b. Paris, 1844), one of France's notable writers of fiction, showing a great mastery of character portrayal and satire. Most of his works are translated into English. Visited England in 1913.

Francis I. (1491-1547) was King of France from 1515 to his death. He was involved in many wars, and was taken prisoner by Charles V. of Germany at the Battle of Pavia. After friendly relations had been established between Francis and Henry VIII., the two met on the "Field of the Cloth of Gold."

Francis of Assisi, St. (1182-1226), founded the Franciscan Order of Monks and devoted himself to a holy life. He is a saint of the Roman Church, having been canonised by Pope Gregory IX., and is commemorated on October 4th.

Francis, Sir Philip (1740-1818), an English statesman of repute who served seven years as a member of the governing council of Bengal. His last years were spent in retirement, during which period it is believed he wrote the famous *Letters of Junius*.

Franklin, Benjamin (1706-1790), the famous American statesman and philosopher, who after serving an apprenticeship as a printer attracted public attention by publishing his *Poor Richard's Almanac*. He then began a series of scientific experiments, inventing amongst other things the lightning conductor. He was for ten years a member of the General Assembly; then lived in Britain as agent for his State for eighteen years; returning to America he took part in framing the Constitution of the United States.

Franklin, Sir John (1780-1847), the famous Arctic explorer, whose final expedition in command of the *Erabus* and *Terror* ended disastrously, all the mem

bers of the expedition perishing. Many attempts were made to discover Franklin, but without obtaining anything save very fragmentary knowledge concerning his fate. He was born at Spilsby.

Frederick II. (1712-1763), usually called Frederick the Great, was King of Prussia from 1740 to the time of his death, and by his masterful government and military successes greatly increased the power of his country. He was a scholarly potentate, and his published works extend to thirty volumes.

Freeman, Professor E. A. (1823-1892), Professor of Modern History at Oxford; devoted a great part of his life to the study of early English history, and his *History of the Norman Conquest* is one of the most remarkable contributions to our annals.

Fremont, Colonel John Charles (1813-1892) was an indefatigable explorer of the Far West, and especially of the Rocky Mountain regions, before railways existed out there, and was of great service in planning out suitable routes.

French, General, Sir J. D. P. (b. 1852). Entered the Navy as a youth, afterwards passed into the Army, and in the Egyptian campaign of 1884-1885 made his mark as a cavalry officer, served in the South African War with splendid success, and later was appointed to the Chief Command at Aldershot. Inspector-General of the Forces, 1907-11. Chief of Imperial Staff from 1911 to 1914 when he resigned. When war broke out in 1914 was appointed Commander-in-Chief of the British Forces.

Freze, Sir Bartle (1812-1882). Did good service in India from 1834 to 1876, filling various important offices, including that of the Governor of Bombay, and in 1875 accompanied the then Prince of Wales to Egypt, and India, after which he was made a baronet. In 1878 he went out to Cape Town as High Commissioner, but, owing to misadventure landings at home, the *Admiral* was lost about 18 months with the *France* followed, when Sir Bartle went out, but met with little success. He died in May, 1904, and was buried in St. Paul's.

Frith, W. P. R.A. (1819-1910), early showed capacity for drawing. Went to London in 1835, began exhibiting in 1840, and for the next thirty years or more was one of the most prominent exhibitors. He was made R.A. in 1853. Among his large pictures, which were immensely popular when produced, may be mentioned the "Derby Day" and the "Railway Station." Published two highly entertaining books of *Reminiscences*.

Frisher, Sir Martin (1517-1581), was the earliest of British navigators to attempt to find the North-West passage to India, and his name is commemorated in Frisher's Strait, to the south of Bathurst Island. For his services in connection with the defeat of the Spanish Armada he was knighted.

Froebel, Friedrich Wilhelm (1774-1852), was the founder of the Kindergarten system of education, the object of which is to give children opportunity in harmony with their nature, to strengthen their bodies, to exercise their senses, and lead them up to the original ground of all life, to the idea of unity with themselves.

Froissart, Jean (1337-1400), a celebrated French writer who visited England in 1372, and was the author of the *Chronique des Rois de France*, which tells us so much of the achievement of the heroes of old.

Froude, James Anthony (1818-1893), the celebrated historian and biographer of Charles I. His *History of England from the 16th to the 18th Century* is a brilliant work, and a permanent addition to literature. His *English in Ireland in the Eighteenth Century*, and his *Deanna* together with his *Short Studies on Great Subjects*, are all notable books.

Fry, C. B. (b. 1872), a well-known cricketer and educated, editor, novelist, and writer on athletics. Edited at Oxford founder of *Fry's Magazine*, and a captain of the Surrey County Cricket Club.

Fry, Elizabeth (1783-1845), a Norwich Lady who devoted much of her life to the promotion of prison reform, and achieved considerable reputation as a preacher. She belonged to the Society of Friends

and was married to a London merchant, Joseph Fry.

Fry, Mr. Hon. Sir Edward, G.C.B. (b. 1827), now retired, was a Judge in the Chancery Division of the High Court from 1877-1883, and Lord Justice of Appeal from 1883-1891. Attended the Hague Conference of 1907 as British representative, and is a member of the Permanent Court of Arbitration.

Fuller, Thomas (1608-1661), the author of *Worthies of England* and a *Church History of Britain*, two well-known and valuable works. He was Chaplain to both Charles I. and Charles II.

Fulton, Robert (1765-1815), an inventive American engineer who distinguished himself by experiments in the application of steam to navigation, and finally, in 1807, launched the *Clermont* on the Hudson, which practically solved the problem.

Furness, Lord (1823-1921), formerly Sir Christopher Furness, a well-known shipbuilder and shipowner, and for many years an active Liberal M.P.

Furnivall, Frederick James (1825-1910), a lifelong student of and writer upon literature, and founder of the Early English Text, Chaucer, Ballad New Shakespeare, the Browning, and the Shelley societies. Was a member of the British Academy.

G

Gainsborough, Thomas (1727-1788), a celebrated English landscape and portrait painter, whose works are remarkable for their grace and refinement, especially his portraits. It was Gainsborough's "Duchess of Devonshire" which disappeared mysteriously from the room in which it was being exhibited in 1876, and its recovery in America some years later was not less mysterious.

Galen, Claudius (130-200 A.D.), famous physician, born at Pergamon, practised with great success at Rome, being medical adviser to the Emperor, Marcus Aurelius, and his colleague, Lucius Verus. **Galileo** (b. at Pisa 1564, d. 1642), the great Italian astronomer, who while still a youth discovered the law of pendulum vibration by seeing a lamp swinging from the roof of the cathedral in Pisa. He also constructed the first telescope, with which he made numerous astronomical discoveries.

Gell, Franz Joseph (1758-1828), the German physician who founded the science of phrenology.

Gallienus, Publius Licinius, was Roman Emperor from 260 to 268, but exercised his power with cruelty and revolting excess, and was at last slain by his own soldiers.

Gallo, Roman proconsul in Greece at the time of St. Paul's visit to Corinth, and held aloof from the dissensions which the preachings of the apostle created among the people.

Galsworthy, John (b. 1867), a novelist and dramatist of force, clarity, and originality, whose works have attracted much attention and discussion.

Galt, John (1770-1872), an admitted Scottish novelist best known by his *Annals of the Parish*.

Gallton, Sir Francis (1832-1911), an eminent seaman and traveller, whose studies in heredity and transmutation have been of great service, and whose experiments in regard to the markings of finger tips resulted in the adoption of what is known as finger print identification in police cases. Originated the study of " Eugenics," and bequeathed £25,000 to the London University for the endowment of a professorship of Eugenics. In 1903 published *Mencius of My Life*.

Galvani, Luigi (1737-1788), a distinguished Italian scientist, whose experiments during a course of lectures on anatomy at Bologna, discovered the principle of animal electricity, hence the term Galvanism.

Gama, Vasco da (1469-1524), the adventurous Portuguese navigator, who discovered the sea route to India in 1498, by doubling the Cape of Good Hope.

Gamaliel, Patriarch of the Jewish community in Palestine, and President of the Sanhedrin 80-111 A.D. He was grandson of Gamaliel the elder, at whose feet sat the Apostle Paul.

Gambetta, Leon M. (1838-1882) a French statesman

man who came into great prominence during the Siege of Paris in 1870-71. He became President of the Chamber in 1879, and in 1881 Minister of Foreign Affairs and Premier. He was at the height of his popularity when an accident caused his death.

Gapon, Father (b. 1870), the Russian priest who led the strikers in their attempt to obtain an interview with the Czar, in January, 1905. Escaped to France and England after the massacre, but later was murdered for betraying the cause.

Garcia, Manuel (1805-1906), a Spanish musician and singing-master, brother of Mutes, Malibran and Viardot, and tutor of many celebrities from Jenny Lind downwards. He published books on singing, and invented the laryngoscope.

Garcia y Iniguez, Calixto (1836-1898), Cuban insurgent general, planned the rebellion of 1868; captured and imprisoned in Spain, 1873; escaped to America, 1895; co-operated with the United States forces in the capture of Santiago, 1898.

Gardiner, Alfred G., editor of the *Daily News*, since 1902. Author of "Prophets, Priests and Kings," and "Pillars of Society"; an incisive writer of character sketches.

Gardiner, Bishop (1813-1855), was Bishop of Winchester in 1831, and Lord Chancellor under Queen Victoria. He was a bitter opponent of the Reformation. He was buried at Winchester.

Gardiner, Samuel Rawson (1838-1902), an English historian, whose works deal mainly with the period from the accession of James I. to the end of the Commonwealth. He published seventeen volumes in all, and his work shows fine sympathy, clear judgment, and a sincere love of truth.

Garfield, James A. (1831-1881), was President of the United States from March, 1881, to September of the same year, when he died from the effects of a shot received in the preceding July from a man named Gutzwiller. He had had a distinguished career as a Republican politician. Rose from a very humble position, and was a man of sterling qualities.

Garibaldi, Giuseppe (1807-1882), the famous Italian soldier and patriot. In 1834 he was condemned to death for being concerned in a plot to seize a Government vessel, but escaped to South America, and for some years was engaged in various conflicts for liberty in that hotbed of revolution. Returning to Italy in 1848, he joined the Roman Republican movement, but was ultimately compelled to fly for his life, and emigrated to New York. In 1854 he returned to Italy, and on the outbreak of war in 1859 had a command given to him, and scored several victories against the Austrians. The next year found him at the head of a great volunteer army, intent upon liberating Italy. This tremendous task he successfully carried through, earning the admiration of the world for his generalship and patriotism.

Garrick, David (1717-1779), the leading tragic actor of his time and a highly successful manager. Was buried in Westminster Abbey.

Garrison, William Lloyd (1805-1879), an eminent anti-slavery leader of America, who by his speeches and writings did much to further the cause.

Garvin, J. L. (b. 1868), editor of the *Pall Mall Gazette* and the *Observer*, and formerly editor of *The Outlook*. A trenchant writer and keen supporter of the Conservative cause.

Gascoigne, Sir William (1350-1412), the judge of Edward IV.'s days who incurred the displeasure of that monarch by declining to carry out his command to sentence to death Archbishop Scrope and Earl Mowbray, accused of fomenting rebellion.

Gaskell, Mrs. E. C. (1810-1865), an English novelist of acknowledged power, whose *Mary Barton*, *Ruth*, *Cranford*, and other stories—dealing largely with Lancashire life—achieved great popularity. Her *Life of Charlotte Brontë* was also a remarkable book.

Gaquet, Abbot (b. 1846), a learned Benedictine ecclesiastic whose knowledge of the history of monastic life is profound, and who has written extensively thereon. He is at the head of his order in England.

Gassendi, Pierre (1592-1655), a distinguished French philosopher and mathematician. Best known by his epicurean treatises and biographies of astronomers.

Garling, Richard Jordan, an American inventor (b. 1818), who invented the Garling quickfiring machine gun, and also numerous machines for saving labour in agricultural operations.

Gauss, Karl Friedrich (1777-1855), a famous German mathematician and astronomer who was appointed professor at Göttingen in 1807, which position, with that of Director of the Observatory, he held for the long period of forty-eight years.

Gautier, Theophile (1813-1872), was an eminent French critic and novelist who at one time filled the position of secretary to Balzac. His romance, *Mademoiselle de Maupin*, caused a great sensation at the time of its publication, and though of an extremely erotic tendency, possesses brilliant literary merits. He was a poet of considerable power and his writings were very numerous and varied.

Gaveston, Piers, the haughty Gascon favourite of Edward II. of England; was Vicar in Ireland; banished by Edward I. at the instance of the Barons in 1307, but returned on Edward II.'s accession, and was created Earl of Cornwall. Acted as Regent of England during the King's absence, but again so irritated the Barons as to provoke their rising, in the course of which he was captured and executed near Warwick in 1312.

Gay John (1688-1732), the English poet who penned "The Beggar's Opera" and the well-known collection of poetic fables. He was a writer of great wit and fancy, and much patronised by Society. His final years were spent in the companionship of the Duke and Duchess of Queensberry, and he was buried in Westminster Abbey.

Gay-Lussac, J. L. (1778-1831), a great French chemist, whose experiments in connection with gases and vapours were of much scientific importance. He was made Superintendent of the French Government gunpowder factories, and Chief Assayer of the Mint.

Geber, the famous Arabian alchemist, lived in the 8th century, and is believed to have made numerous discoveries valuable to chemical science. Not much is known of his life, and the vagueness of many of his acknowledged writings gave rise to the term "gibberish."

Ged, William (1690-1749), was one of the inventors of the process of stereotyping. He was a goldsmith and a native of Edinburgh, and lived for a time in York. His most important invention dates from 1725.

Geddes, Jenny, an Edinburgh vegetable-stall keeper who won fame by one characteristic incident in 1837. After Laud's introduction of a new service book into Scotch churches, Jenny was present at St. Giles' Church, and as soon as the Dean began to read out the collect from the new book she hurled her stool at his head. Serious riots followed.

Gelkie, Sir Archibald (b. 1835), has been one of the most noted geologists of our time, and has filled many important appointments, and written numerous works on geology, many of which may be regarded as standard books. Was made Secretary to the Royal Society in 1903, and presided at the centenary celebration of the Geological Society in 1907. President of the Royal Society 1904-13.

Gelkie, Professor James (b. 1839), brother of the foregoing, and his successor in the Chair of Geology at Edinburgh University in 1882. His work on *The Great Ice Age* is a notable one.

Gelon was the name of the Sicilian tyrant who, about 485 B.C., conquered Syracuse, five years later defeating the Carthaginians at Himera.

Genevieve of Brabant, St., wife of the Palatine Siegfried; flourished in the middle of the 8th century, and the heroine of a romantic medieval legend which alleges her to have lived in a cave for six years in the forest of the Ardennes, suffering under an unjust aspersion.

Genevieve, St., born at Nanterre, near Paris, in the 5th century, and devoted to a life of conversion. She is the patron saint of Paris, and is reputed to have saved the city from Attila by her prayers in 451.

Genesio, Vandal King of Spain in 419, after being

driven into Africa by the Visigoths, subdued the Roman provinces of North Africa, and afterwards crossed to Italy and sacked and pillaged Rome, doing irreparable damage to public monuments and sculptures. Hence the term "Vandalism."

Geoffrey of Anjou (1126-1170), founder of the Angevin dynasty of England, was son-in-law of Henry I. and father of Henry II., the first Angevin or Plantagenet king.

Geoffrey of Monmouth (1100-1154) was the author of the famous Old English chronicle which bears his name. He was born at Monmouth, and became Bishop of St. Asaph in 1125. His *Chronicon* is a compilation from older authors, and is notable for having contained the stories of King Arthur, King Lear, and Cymbeline.

George I. (1686-1727) was King of Great Britain from 1714 to his death, ascending the throne as direct descendant of James I. His reign saw many memorable events, including the Jacobite Rebellion, but the monarch himself, who could not speak English, cut no very dignified figure.

George II. (1683-1760), son of the last-named, was King of Great Britain from 1727 to 1760. His reign covered a prosperous period in spite of wars and rebellions, and saw the Empire extended in India and North America. The King was personally a man of limited power and achievement.

George III. (1738-1820), was the grandson of George II., and reigned from 1760 to 1820. He was a popular monarch for the most part, possessing all the domestic virtues, and of simple tastes. The war with America lasted from 1775 to 1782, when the American States gained their independence, and from 1793 to 1815 the war with France was kept up with but little interruption. On the other hand, the Empire in India was strengthened and enlarged, and the power of Great Britain on land and sea was splendidly shown.

George IV. (1762-1830) reigned from 1820 to his death, but held the position of Prince Regent for some years previously. The King's personal character, in spite of the fact that he was called "The First Gentleman in Europe," showed such a want of dignity, and such an abundance of licentiousness and frivolity, that he became very unpopular with the people.

George V., our present Majesty (b. 1859), is the second son of Edward VII. and Queen Alexandra. Entered the Navy as cadet in 1877, and spent two years on the training ship *Hibernia*, later making a three years' voyage round the world on the *Rachania*. On the death of the Duke of Clarence in 1892 he became heir to the throne. Was married to Princess Mary of Teck in 1893. On the accession of his father he became Duke of Cornwall and later Prince of Wales.

In 1901 made the tour of the Colonies with the Princess, in 1904 they visited India. Succeeded to the throne in 1901, and was crowned with great ceremony in 1911. His Majesty and Queen Mary visited India in December of that year, when at a Durbar at Delhi another splendid ceremony of crowning was gone through. Visited Berlin in 1913, with Queen Mary, for the marriage of Princess Victoria Louise, and visited Paris in April, 1914. After war broke out the King entered heart and soul into the country's cause, and in furthering the military, naval, and charitable needs of the time displayed the utmost energy and solicitude. He also visited headquarters in France, and inspected the Fleet on active service.

George, Henry (1839-1897), the American political economist who attained a great reputation by his *Progress and Poverty*, published in 1879. He advocated public ownership of land, with retention of the present landlorn system; but all land to be taxed upon its rent, with the idea of ultimately bringing about the abolition of all other taxes. Nothing made by man was to be taxed at all.

George, Lloyd. (See Lloyd George.)

George, Saint (the Sutorius saint), included, adopted by Edward III. He is believed to have been a native of Cappadocia and a vigorous champion of Christianity in the days of Diocletian, and to have suffered martyrdom at Nicomedia, 303 A.D. The dragon

which he is said to have slain symbolises the powers of evil, over which he is credited with having triumphed. He is commemorated on April 23.

Germanicus, Caesar (15 B.C.-19 A.D.), was son of Nero, commanded the army of the Rhine with great success, and on the death of Augustus would have been proclaimed his successor, but declined the honour. He died near Ephesus, under strong suspicion of having been poisoned.

Gérôme, Jean Léon (1824-1904), a famous French painter, whose works covered a great range of subjects, classical, historical, and popular. Among his best-known paintings are "The Duel after the Ball," "The Slave Market," and "The Age of Augustus."

Garvase of Tilbury was an English historical writer who flourished in the 13th century, and for his scholarship was appointed Marshal of Arles by Otto IV., for whom he wrote the work by which he is best known, *Otia Imperialis*.

Gervinus, Georg G. (1805-1871), was a noted German historian and professor, who wrote a *History of German Literature*, *A History of the Nineteenth Century*, and other works of value.

Gesner, Konrad von (1516-1565), a scholarly Swiss naturalist, and the father of the science of zoology. His most famous works were his *Historia Animalium*, a monumental production, and his *Bibliotheca Universalis*, a catalogue of all the writers then extant in Greek, Latin, and Hebrew.

Gibb, Sir George Stegmann (b. 1850), Chairman of the Road Board and a well-known expert in railway, electric, and marine affairs. Formerly, chairman of the Speyer Co., which controlled the District, Metropolitan, and Underground Electric Railways. Was on the Royal Commission on London Traffic.

Gibbon, Edward (1737-1794), the celebrated historian of the *Decline and Fall of the Roman Empire*. Represented Liskeard in Parliament for eight years. His great work is an enduring classic.

Gibbons, Grinling (1648-1720), an eminent sculptor and wood-carver, who came from Holland to England, and was patronised by Charles II.

Gibbons, Orlando (1833-1865), a noted English composer of Church music, who was organist of 'Chapel Royal.

Gibson, John (1791-1871), a prominent English sculptor, who studied under Canova and Thorwaldsen, and lived the greater part of his life at Rome. His portrait busts were highly successful, and he also produced many important classical and poetical studies, including "The Tinted Venus."

Gibson, Thomas Milner (1807-1884), was one of the prominent leaders of the Anti-Corn Law movement, and served as President of the Board of Trade under Lord Palmerston.

Giffen, Sir Robert (1837-1902), a prominent political economist and statistician who was first a solicitor's clerk, then a journalist, and later for many years at the head of the Statistical Department of the Board of Trade. Retired in 1897.

Gilbert, Alfred, R.A. (b. 1851), one of our leading sculptors, and a clever designer of gold and silver objects. Among his best-known sculptures are Perseus arming Icarus, the Shaftesbury Memorial, and the Duke of Clarence Memorial at Windsor.

Gilbert, Sir Humphrey (1830-1883), was knighted by Queen Elizabeth for his bravery in Ireland, and later on made voyages of discovery, and added Newfoundland to the British possessions. He was the step-brother of Sir Walter Raleigh, and was drowned eventually off the Azores, his memorable last words being, "We are as near to Heaven by sea as on land."

Gilbert, Sir John (1817-1887), a brilliant artist, who was successful alike with pencil, water colour at oils, and one of the most prolific artists of his time. His black and white work was prodigious in quantity and excellent in quality. His illustrations to Staunton's edition of Shakespeare are remarkable for their brightness and dramatic power. He was knighted in 1871, and made K.A. in 1876.

Gilbert, Sir William Schwanck (1836-1911): in 1861 began to contribute "Bab Ballads" to *Punch*, and a few years later commenced to write for the stage.

producing a number of light burlesques of the pattern then in vogue. He struck out a more original vein with certain fairy plays later, and also wrote a number of strongly conceived dramas and comedies. About this time also he began to collaborate with the late Sir Arthur Sullivan, starting with such slight essays as "Trial by Jury," and gradually extending to the famous Savoy series of operas, which for many years provided England and America with some of their brightest and best entertainments. "H.M.S. Pinafore," "Patience," "Iolanthe," "The Mikado," and the rest are unique, and almost beyond praise. Was knighted in 1907.

Gilbey, Sir Walter (1831-1914), a wine-grower and merchant, who largely interested himself in the improvement of horse-breeding and agriculture. Shire horses and hackneys were his practical hobby for many years.

Giles, St., the hermit saint of the 7th century—believed to have been a Greek who emigrated to France, and met with considerable honour in Great Britain. At Edinburgh is a castle dedicated to him; in Oxford, Cambridge and London churches bear his name; while throughout the country one may find some hundred others consecrated to this patron of all such as are in sickness and sorrow. So far back as the 12th century, Matilda, Queen of Henry I., founded that hospital in London which gave birth to the important parish of St. Giles-in-the-Fields.

Gillray, James (1757-1815), the eminent caricaturist of the time of George III., who produced upwards of a thousand political cartoons, some of which were highly popular, and aroused much sensation.

Giottto di Bondone (1267-1336), the famous Italian painter, sculptor, and architect, whose beautiful tower at Florence and his many works of art in various churches there, as well as the churches themselves, form splendid monuments to his memory.

Giraldus Cambrensis (1146-1222), a distinguished ecclesiastic whose *Topographia Hibernie*, *Itinerarium Cambrie*, and other works contain much valuable historical matter.

Girardin, Emile de (1806-1881), the brilliant French journalist and politician, who exercised great influence upon public opinion, both as a Republican in 1848 and as a supporter of Napoleon III.

Girouard, Sir M. F. C., K.C.M.G., High Commissioner and Commander-in-Chief of the East Africa Protectorate from 1909 to 1912, when he resigned. Was for six years Director of Soudan Railways, and after the Boer War became Railway Commissioner for the Transvaal.

Giulio Romano (1492-1546) was a pupil of Raphael, and himself a distinguished painter and architect. He built numerous palaces, and achieved important engineering works. One of his noted paintings, "The Infancy of Jupiter," is in our National Gallery.

Gladstone, Viscount of Hawarden (b. 1825), youngest son of the Liberal Prime Minister; entered Parliament as member for Louth in 1849, and became his father's private secretary. Made a Lord of the Treasury, 1881; Financial Secretary at the War Office, 1886; Under-Secretary, Home Office, 1892; First Commissioner of Works, 1894; and Home Secretary in 1905-10. In 1910 appointed Gov.-Gen. of South Africa and raised to the Peerage. Took firm stand in Rand labor troubles, of 1912. Resigned in 1914.

Gladstone, William Ewart (1809-1898), the great Liberal statesman of the latter part of the 19th century. The son of a Liverpool merchant, he studied at Eton and Oxford. Was elected, as a Tory, member for Newark in 1832. In 1834 was made a Lord of the Treasury under Peel, and in the following year became Under-Secretary for the Colonies. In 1841 Peel made him Vice-President of the Board of Trade, and in 1843 full President with Cabinet rank. In 1852 he was Chancellor of the Exchequer, having severed his connection with the Peel Party and become a member of the Coalition Ministry. In 1859 he was Lord Palmerston's Chancellor of the Exchequer, and on that nobleman's death became leader of the House of Commons under Earl Russell. In 1868 he was appointed Premier, for the first time. Passed the Irish Church Disestablish-

ment Measure in 1869, the Irish Land Act in 1870, and the Ballot Act in 1872. After 1874 he was in temporary retirement for a short period, but, stirred to indignation by the "Bulgarian Atrocities," he carried the country with him, and in 1880, at the general election, he was returned to power with an overwhelming majority. He then became Prime Minister for the second time. In 1886 he was out of office again, but returned to power in 1886 and became Prime Minister for the third time. It was then that he introduced his first "Home Rule" Bill, on which he was defeated and dissolved Parliament, and at the general election, the Conservatives had a majority, and it was not until 1892 that Mr. Gladstone was again in power. In 1893 he brought in his second Home Rule Bill, which passed the House of Commons but was defeated in the Lords. After that he resigned and took no further part in Parliamentary life. He died on the 19th May, 1898, and was buried in Westminster Abbey, his great political opponent, Lord Salisbury, being one of the pall-bearers. His body lay in state in Westminster Hall for two days and was viewed by no less than 95,000 people, who passed it in unbroken succession.

Glendower, Owen (1359-1415), a famous Welsh chieftain who proved a formidable opponent to Henry IV., and gathered around him a great following of Welshmen, whom he led with much bravery, though finally defeated in 1405.

Glennan, Lord (1830-1908), was an active politician and proprietor of the *Morning Post*, which, under his able direction, became one of the great successes of London journalism. He represented South Kensington in Parliament from 1886 to 1895. Was knighted (as Sir Algernon Borthwick) in 1880, created a baronet in 1889, and raised to the peerage in 1895. As President of the Newspaper Press Fund, and as one of the founders of the Primrose League, he did excellent service to his profession and his Party.

Gluck, C. W. (1714-1787), one of the most eminent composers of opera of the 18th century. His "Orfeo" and "Iphigénie" are his best-known works.

Godfrey de Bouillon (1061-1100) was the leader of the First Crusade, and after the conquest of Jerusalem, exchanged the title of King for that of "Protector of the Holy Sepulchre." He liberated the Holy Land, and was buried on Mount Calvary.

Godiva, Lady, was the pious and beautiful wife of Leofric, Earl of Chester and Lord of Coventry in 1040. Having appealed to her lord to remit certain impositions from the malcontents, he promised to grant her request if she would ride naked through the town. This she did, having first paved the word to have blind and slutters drawn at the appointed hour, and so obtained the people's ransom.

Godolphin, Earl of (1610-1712), was a page of honour to Charles II., and became first Lord of the Treasury under William III. during whose reign he kept up a secret correspondence with James II. in his exile at St. Germain's. Godolphin was again Premier under Queen Anne, but was dismissed in 1710 at the fall of the Marlboroughs.

Godwin, Earl of the West Saxons (900-1053), was one of the most influential noblemen of his time, and gave his daughter in marriage to Edward the Confessor, against whom he was afterwards in rebellion. Godwin's son, Harold, claimed the throne after Edward's death, but was killed at Hastings.

Godwin, William (1756-1826), a notable political writer and novelist of very advanced ideas. Is now best remembered by his novel *Caleb Williams*. His first wife was Mary Wollstonecraft, who wrote ably on the "Rights of Woman."

Goethals, Col. (b. 1859), after making a considerable success as a military engineer in the United States army was in 1907 appointed Governor-in-charge of the Panama Canal, in the carrying out of which he has shown a remarkable administrative capacity as well as a genius for constructive enterprise.

Goethe, Johann Wolfgang von (1749-1832), the most distinguished of German poets and writers. After producing the "Sorrows of Werther," and various poetical plays, he settled down in Weimar,

- received a Ministerial appointment, and began his famous dramatic poem "Faust," which in the course of years he concluded, presenting the world with one of its greatest literary works, which has been more written about than any other tragedy of modern days.
- Gouldie, Rt. Hon. Sir Geo. Paulman** (b. 1846), famous as the founder of British Nigeria. Elected President of the Royal Geographical Society in 1905. Was a Commissioner to inquire into the Boer War, and is President of National Defence Association.
- Goldsmith, Oliver** (1730-1774), the celebrated author of the *Vicar of Wakefield*, *The Deserted Village*, and *She Stoops to Conquer*. The son of a poor Irish curate, after much struggle and adventure he found his way to London in 1756, and subsequently devoted himself entirely to literature, being befriended by Dr. Johnson and held in great esteem by Reynolds, Burke, and other eminent men of the time. Of a lovable but thriftless nature he was generally in debt, died poor, and was buried in the churchyard of the Temple.
- Gooch, Sir Daniel** (1816-1889), a mechanical engineer, who learnt his business under the Stephensons, and in 1837 was made locomotive superintendent to the Great Western Railway. In 1864 he took up the problem of laying a telegraph cable across the Atlantic, after one failure, he succeeded, and was made a baronet. In 1866 he accepted the chairmanship of the Great Western Railway Company, which position he held with success up to the year of his death.
- Goodall, Frederick, R.A.** (1822-1904), was one of the most successful of English painters during the greater portion of his life, and achieved special eminence as a painter of Eastern subjects.
- Goodyear, Charles** (1800-1860), an American, discoverer of the art of vulcanising rubber, by which the utility of the material was greatly extended.
- Gordon, Adam Lindsay** (1833-1870), an Australian poet who wrote many stirring ballads and poems, his "Bush Ballads and Galloping Rhymes" being a great success. As a settler, however, he failed, and, after numerous unfortunate experiments with sheep and cattle and other things, committed suicide.
- Gordon, Charles George**, Major-General (1833-1885), a distinguished soldier, administrator, and earnest Christian, who had a most adventurous, useful, and self-sacrificing career. He saw active service in the Crimea, China, and India, and in 1873 was made Governor of the Equatorial provinces of Egypt. In 1877 he went out to the Sudan for the Egyptian Government, and in 1884 again proceeded thither on behalf of the English Government to deal once more with the difficulties which had arisen consequent on the Mahdi Rebellion. While holding Khartoum against the insurgent forces he was captured and killed.
- Gordon, Lord George** (1751-1793), was tried for treason as the instigator of the Anti-Popery riots of 1780, but acquitted on the ground that he had no treasonable intention. Some years later he was committed to Newgate for libelling Marie Antoinette and died there of fever.
- Gore, Mrs. Catherine** (1799-1861), a very prolific novelist and playwright, whose books were in great vogue at one time, but are now little read.
- Gore, Rt. Rev. Charles, M.A., D.D.**, Bishop of Oxford since 1911 (b. 1853), was educated at Oxford; Canon of Westminster, 1884-1902; Hon. Chaplain to Queen Victoria, 1898-1902; Chaplain in Ordinary to the late King, 1901; author of numerous theological books, including *Spiritual Efficiency* (1904) and *The Question of Divorce* (1911).
- Gorell, Baron; Rt. Hon. Sir John Gorell Barnes** (1848-1931), Judge of the Probate and Divorce Court, 1892-1905; President, 1905-1908; P.C., 1905; raised to the Peerage, 1909.
- Gorky, Maxim** (b. 1868), the Russian novelist and writer, whose works are remarkable for their realistic power. He first served an apprenticeship with a shoemaker, then became apprenticed to a designer, but finding little success in these lines, engaged as scullion on a packet boat in 1880. Three years later he was working in a bakehouse, and in 1886 was

- singing in the chorus of a strolling opera company. In 1889 he sold apples in the street. In 1888 attempted to commit suicide. In 1890 was copying clerk in a lawyer's office, and in 1892 was employed in a railway work-shop. In that year his first story was published, and he found his vocation. He is now perhaps the most popular of Russian authors. For his part in the disturbances in January, 1905, at St. Petersburg, when many were massacred, he suffered imprisonment.
- Gorst, Sir Eldon** (1861-1911), son of Sir John Gorst, and a financier who evinced hereditary administrative capacity in Egypt and at home. Was appointed Assistant Under-Secretary at the Foreign Office in 1904, and in 1907 succeeded Lord Cromer as British Agent and Consul-General.
- Gorst, Rt. Hon. Sir John** (b. 1835). From 1861-1863 was Civil Commissioner in New Zealand; after which he returned to England, entered Parliament, and obtained prominence as a member of the "Fourth Party." Later he filled the positions of Under-Secretary for India, Secretary of the Treasury, and Vice-President of the Education Council. A Free Trader who opposed the Fiscal policy of Mr. Chamberlain, he was of the numerous Conservative ex-Ministers to suffer defeat in the Liberal reaction of 1906.
- Gorschakoff, Prince** (1807-1881), was the most prominent Russian statesman of his time, and Foreign Minister during the Crimean War. In later years he became Chancellor of the Empire, and achieved many diplomatic victories. He resigned in 1882 and died the following year.
- Goschen, Viscount** (1831-1907). Educated at Rugby and Oxford. Entered Parliament in 1863 as Liberal Member for the City of London and for a number of years held various offices under Mr. Gladstone, from whom he separated on the Home Rule question. In 1886 he accepted office under Lord Salisbury and became Chancellor of the Exchequer, a post which he held from 1886-1892. Was First Lord of the Admiralty from 1895-1900, in which latter year he was raised to the Peerage. Was a Free Trader and a statesman of strong personality.
- Gosse, Edmund** (b. 1840), a distinguished poet and critic who has written lines of Gray, Congreve, and Dr. Donne, and his *History of 18th Century Literature and History of Modern English Literature* show great critical power and appreciation. Dr. Gosse was appointed librarian to the House of Lords in 1904, and since then has written a book on French literary men and a life of Sir Thomas Browne. In 1907 he published a work entitled *Father and Son*, being recollections of his father, the late Philip Gosse, and of his own early career. His Collected Essays (5 vols.) were issued in 1913.
- Gough, Viscount** (1779-1869), a British general who had a brilliant career, first in China, and later in India. He gained a victory over the Maharrats at Maharratpur in 1843, over the Sikhs at Sobrohan in 1845, and finally at Gujerat achieved the defeat which made the Punjab a British possession.
- Gould, Sir Francis Carruthers** (b. 1811). Perhaps the cleverest political caricaturist of the day, and has also done considerable journalistic work as assistant editor of the *Westminster Gazette*. He was for twenty years on the Stock Exchange, and for many years illustrated the Christmas number of *Truth*. His "Picture Politics," as his style of caricatures, appear mainly in the *Westminster*, but have an extensive circulation in a separate form. Knighted in 1906.
- Gould, Jay** (1836-1892), a well-known American financier and railway magnate, who acquired an enormous fortune and considerable notoriety in Wall Street speculations.
- Gounod, Charles F.** (1818-1893), the eminent French composer, who won a position of the first rank by his "Faust," produced in 1859, one of the most successful operas of the 19th century. Other famous operas of his are "Roméo et Juliette" and "Le Médecin malgré lui." He also composed much sacred music of an intensely spiritual character, including his oratorio, "The Redemption."

Gower, John (1325-1408), an English poet of the time of Chaucer, who wrote many elegant ballads and devotional poems. His "Confessio Amantis" was printed by Caxton in 1432. He was buried in St. Saviour's, Southwark.

Grace, Dr. William Gilbert (b. 1848), the most famous cricketer of his time, was born at Downend in Gloucestershire, educated for the medical profession, and for the long period of forty years held his supremacy as an exponent of the national summer game. In 1879 he was presented with £1,400 as a testimonial; and in 1895, on completing his "century of centuries" in first-class cricket, received a much larger financial recognition.

Graham, Sir James (1792-1861), a prominent Whig statesman, who filled several important Cabinet positions between 1830 and 1855.

Graham, John of Claverhouse, Viscount Dundee (1643-1689). Renowned for his sturdy adherence to the Stuarts, and headed a rebellion in Scotland against William and Mary, but was killed at the Battle of Killiecrankie. He was a stringent persecutor of the Covenanters, and suffered death at their hands at Drumclog in 1699.

Graham, Earl of, P.C., &c. (b. 1874) was Assistant Postmaster-General, and Master of the Horse. In 1912 was special Ambassador to announce King George V.'s accession to European Courts. Married the daughter of Mr. Ogden Mills.

Grant, James (1822-1887), was an eminent military novelist who achieved considerable distinction by his story *The Romaine of Ilar*. Wrote in all more than fifty historical novels, many of them concerned with Scottish subjects.

Grant, Sir James Hope (1808-1875), a distinguished British general, who saw much active service and won distinction in China and India, playing a prominent part in the crushing of the Indian Mutiny.

Grant, General Ulysses (1822-1885), the most distinguished American general of the Civil War. Became President of the United States from 1868, and was re-elected to that office in 1872.

Grantham, Sir Wm. (1853-1911) a Judge of the High Court from 1886. Represented East Surrey in Parliament from 1874 to 1885, and Croydon 1885-1886.

Granville, Earl (1815-1891). Granville George Leveson-Gower, and Earl (son of the 1st Earl), a distinguished diplomatist (in his time) was a prominent Liberal Statesman, who held many high Government positions between 1857 and 1886. He first entered Parliament in 1836, and was Colonial Secretary in Gladstone's first Ministry, and Foreign Minister from 1870 to 1874 in succession to Palmerston, again from 1880 to 1885 under Gladstone.

Grattan, Henry (1746-1820), an Irish orator and statesman who, first in the Irish Parliament, and afterwards in the Imperial Parliament, did memorable work for the cause of his country, and was presented with £5,000 by the Irish people for his services to the Irish cause.

Gray, Thomas (1716-1771), the English poet, whose "Elegy Written in a Country Churchyard" is one of the most beautiful in the language. His other poems were not numerous, but included a fine "Ode on a Distant Prospect of Eton College" and a notable "Ode to Adversity." Was a great friend of Horace Walpole's. Refused the laureateship.

Grealey, Horace (1811-1872), founder of the *New York Tribune* and a poetical writer of great power and influence. Was an unsuccessful candidate for the United States Presidency in 1872.

Green, John Richard (1837-1883), one of the most eminent of modern English historians. His *History of the English People* forms an accurate and picturesque narrative, both in the first short and later lengthier treatment, being fresh and distinctive at all points; whilst his *Making of England and Conquest of England* were both worthy works.

Greenaway, Kate (1846-1903), a gifted book illustrator and water-colour artist, whose drawings of children were full of charm and delicacy, and gained her great popularity and the warm approval of no less a critic than Ruskin.

Greene, Robert (1550-1590), an English poet and

dramatist who preceded Shakespeare, and is mainly remembered by his "Orlando Furioso."

Greenwell, Dora (1821-1882), a poetess and writer on devotional subjects, whose poems and essays were of a sweetly tender and thoughtful cast, and were much read and admired.

Greenwood, Frederick (1825-1900), first editor of the *Pall Mall Gazette* and subsequently founder of the *St. James's Gazette*. A journalist and writer of distinction and influence, whose action led to Britain obtaining the controlling interest in the Suez Canal.

Gregory, Dr. Robert (1819-1911), after having been twenty-three years Canon of St. Paul's was appointed Dean in 1861. Wrote a *History of Elementary Education*.

Gregory, St. (257-375), was founder of the Armenian Church, and spent his last years in a cave at the foot of Mount Sebuh.

Gregory the Great (540-604), first of the sixteen popes of that name, and, next to Leo I., greatest of the ancient Bishops of Rome. He was pope from 590 to his death. He arranged the Gregorian mode of chanting. Pope Gregory XIII. (1502-1585) introduced the Gregorian calendar.

Granville, George (1772-1790), was the Minister of George III., who was responsible for the introduction of the system of colonial taxation which led to the American War of Independence.

Granville, Sir Richard (1547-1591), the Elizabethan sea-captain, who with his one ship engaged a fleet of Spanish war-vessels off Flores, in 1591, for fourteen hours, and died in surrendering, an exploit celebrated in Tennyson's noble ballad, "The Revenge."

Gresham, Sir Thomas (1519-1579), was the wealthiest London merchant and financier of his time. He built the first Royal Exchange and founded Gresham College. The son of Sir Richard Gresham (Lord Mayor of London), he succeeded his father as King's Agent at Antwerp, and proved an astute money-finder for the Court in four successive reigns, ending as Queen Elizabeth's "Royal Merchant."

Greuze, Jean Baptiste (1725-1805) a French painter whose works display much delicacy and beauty of handling, especially his studies of girls.

Greville, Charles (1794-1868), author of a celebrated book of *Memoirs*, affording much insight into the political career, and social life of the long period during which he filled the position of Clerk of the Council (1822-1840).

Grey, A. H. George, 4th Earl (b. 1851). Administrator of Rhodesia, 1890-1907. Governor-General of Canada, 1904-1911. A Director of the British South Africa Company from 1898, and unveiled the Rhodes memorial in Rhodesia in 1912. An ardent Temperance Reformer.

Grey, Charles, 2nd Earl (1704-1845), a great English Whig statesman, under whose Premiership were passed the Reform Bill of 1832, the Bill abolishing slavery throughout the British Empire (1833), and the Poor Law Amendment Act of 1834.

Grey, Lady Jane (1537-1554), was the daughter of the Duke of Suffolk and great-granddaughter of Henry VII. On the death of Edward VI. she was proclaimed Queen, but only reigned for ten days, Queen Mary ousting her and maintaining the Tudor succession. Six months later Lady Jane and her husband, Lord Guildford Dudley, were executed.

Grey, Rt. Hon. Sir Edward, M.P. (b. 1862). Under-Secretary for Foreign Affairs in the Rosebery Government, and has since been a prominent leader of his party. Appointed Foreign Minister at the close of 1905, a position in which he has won universal approval for his masterly handling of the Balkan difficulties of 1912-1913, and all through the difficult strain which preceded Germany's rush into war, as well as in the arduous tasks since thrown upon him, has acquitted himself with marked ability, force and dignity.

Grey, Sir George, K.C.B. (1812-1898), an administrator of distinguished ability who was Governor of New Zealand from 1846 to 1861, from 1862 to 1865 Governor of the Cape of Good Hope, and from 1861 again Governor of New Zealand, being Premier of the colony from 1877 to 1884, and doing signal service

Grieg, Edward (1843-1907), a Norwegian musical composer, who presented the characteristics of his country's music with strong accentuation in numerous compositions of great melodic beauty.

Griffin, Gerald (1803-1840), a novelist and poet of Limerick birth, whose stories are remarkable for their forceful pictures of Irish life, and for their sympathetic vein of sentiment. It was from his story of *The Collegians* that Dion Boucicault wrote his play "The Colleen Bawn."

Grimaldi, Joseph (1779-1837), the most famous of British pantomime clowns, whose main successes were won at Sadlers' Wells in days when pantomime consisted almost entirely of what is called the harlequinade, now all but dispensed with.

Grimshorpe (Edmund Beckett), Baron (1816-1905), was long known as Sir Edmund Beckett, Bt., and at the Bar and in Parliament had a successful career. Raised to the peerage in 1866. Was a great authority on horology, and, with Professor Ayr, designed "Big Ben." He restored St. Albans Cathedral at his own cost.

Gripenburg, General Oscar C. (b. 1848), one of the leading Russian generals in the Russo-Japanese War. He saw active service in numerous campaigns in previous years, and commanded the Second Manchurian Army in 1904.

Grossmith, Arthur (1847-1912), the well-known actor and entertainer. Made his first appearance in 1870 at the Polytechnic Institution as an entertainer, and in 1877 became connected with Gilbert-Sullivan opera, continuing to appear in the principal operas of the series, and achieving uniform success in all. Later he devoted himself chiefly to humorous and musical recital. His father, George Grossmith the elder, was also a popular entertainer and lecturer, his brother, Weedon Grossmith, is an actor and artist of considerable attainments, and his son, George Grossmith, Junr., is a successful comedian.

Grote, George (1794-1871), was a London banker who devoted many years to the writing of the *History of Greece*, a work of pre-eminent merit. He was for a short period in Parliament and wrote acceptably on *Plato* and other *Companions of Socrates*. His wife (Harriet Lewin, who died in 1856) wrote his biography, and also published (in 1856) the *Life of Argyropoli*.

Grouchy, Marshal (1760-1847), a famous Napoleonic general who, at Holtzendorf, Wagram, and in the Moscow retreat rendered signal service. After Waterloo he led the defeated army back to Paris, and later lived in America for a few years, returning to France in 1819.

Grove, Sir George (1820-1900), was a distinguished engineer and bridge and lighthouse builder, but better known as an enthusiastic lover of music, the study and performance of which in England he did much to promote. He was for a number of years Secretary to the Crystal Palace, making that institution famous for its high-class musical performances. He was the first Director of the Royal College of Music, and was knighted while holding that position. His *Dictionary of Music and Musicians* is the leading work of its kind, and has recently been brought up to date and republished.

Grundy, Sydney (b. 1848), a well-known dramatist and author of numerous successful plays, including "Mammon," "A Pair of Spectacles," "Sowing the Wind," and "The Degenerates."

Guido, Reni (1575-1648), was one of the eminent Italian painters of the Bolognese school. His "Michael Vanquishing Satan," "Magdalene," and "The Massacre of the Innocents" are among the world's great pictures.

Guisot, F. (1787-1874), a French statesman and historian, who held important appointments under Louis Philippe, but spent his later years in literary work. He wrote a *History of Civilization*, a *History of Cromwell*, and also made a translation of Shakespeare.

Gull, Sir William (1816-1890), one of the most eminent physicians of his time. Professor of Physiology at the Royal Institution 1847-1849, and Physician and Lecturer at Guy's Hospital from 1847

to 1867. Was physician to the late King when, as Prince of Wales in 1872, he passed through an extremely critical illness.

Gully, Mr. Speaker. (See **Selby, Viscount.**) **Gustavus, Vasa**, King of Sweden, from 1523 to 1560, drove the Danes out of his country and gave to it a considerable degree of prosperity by his enlightened rule.

Guy, Thomas (1644-1794), founder of Guy's Hospital, was a dealer in Bibles, speculator and money-lender, who, after making a large fortune bequeathed £300,000 for the erection and endowment of the famous hospital.

Guyot, Yves (b. 1848), a French Socialist and Reformer, whose writings on political subjects have attracted much attention throughout Europe. He was Minister of Public Works in 1889, was editor of the *Siecle* 1892-1903; editor of *L'Agence Economique et Financière* since 1911.

Gwynne, Nell (1653-1687), was originally, it is said, an orange girl of provincial birth, and afterwards a sprightly London dancer and actress, who became mistress to Charles II. Her eldest son was made Duke of St. Albans.

H

Hadrian (76-138) was Emperor of Rome in succession to his uncle Trajan, and one of the greatest of Roman rulers. He visited Britain, and in A.D. 121 built the wall between Newcastle and Carlisle for protection of his dominions against the Picts and Scots.

Haeckel, Professor Ernst (b. 1833), an eminent German scientist and philosopher, and Professor of Zoology at Jena University. Has been an earnest supporter of the Evolution theory, and his writings have been popular throughout Europe. A Life of him by Holsie was published in 1907.

Haggard, Sir H. Rider (b. 1815), spent several years in South Africa in official positions in the "seventies," and returning to England began to write novels. After one or two failures made a brilliant success with *King Solomon's Mines* in 1886. This was followed by *She, Fies*, and others. He is deeply interested in agricultural subjects, on which he has written very ably, his book, *Back to the Land*, having excited much attention. Knighted 1912.

Hahnemann, S. C. (1755-1843), the German physician who founded the system of Homeopathy, to the exposition of which he devoted his life.

Hakluyt Richard (1553-1616), the first of English naval historians, by his *Divers Voyages touching the Discovery of America*, and *Principal Navigations, Voyages and Discoveries of the English Nation*, did much to help forward the colonising spirit.

Haldane, Viscount, K.C. (b. 1856), satirist Haddingtonshire 1885-1911, and after having made a name at the Bar, was appointed a Crown Counsel to inquire into the Featherstone murder in 1903. In 1901 a Vice-President of the Liberal-Imperialist League, and at the close of 1905 was made War Minister, which position he relinquished in 1912 on succeeding Lord Lorne as Lord Chancellor. Received his viscountcy in 1911. Went to Montreal in Sept., 1913, and gave an address to the American Bar Association at the McGill University. Also visited New York.

Hale, Sir Matthew (1609-1676), an eminent Judge of the Restoration period, who had been a member of Cromwell's Parliament. Is best remembered as the author of certain legal histories, which are still valued. He became Lord Chief Justice in 1671.

Halévy, Ludovic (1824-1903), a brilliant French writer who supplied Offenbach with libretti for some of his most famous comic operas; among them "La Belle Héloïse," "La Grande Duchesse," and "Barbe Bleue." In conjunction with Meilhac he wrote several notable plays, of which "Frou-frou" was perhaps the most successful.

Haliburton, Thomas Chandler (1796-1865), while Judge in Nova Scotia published a series of books of American humour under the pseudonym of "Sam Slick." Slick was portrayed as a clockmaker of a shrewd philosophy that admirably exploited some of the early 19th century Yankee's characteristics.

Halifax, Earl of (1661-1715) was an eminent statesman, who filled the office of Chancellor of the Exchequer in 1694, and established the Bank of England.

Halifax, Viscount (b. 1839), President of the English Church Union, and a strenuous worker for bridging the gulf between the Anglican and Catholic bodies of Christendom.

Hall, Marie (b. 1884), was born in Newcastle-on-Tyne, and studied the violin under several eminent teachers, including Sevcik of Prague, and on appearing in public in London in 1903 at once took up a position among the leading violinists of the time.

Hall, Rev. Newman (1816-1902), a Congregational divine, who from 1854 to 1896 preached with great acceptance at the Surrey Chapel in London, and thereafter to 1892 at Christ Church, Westminster Bridge Road, a splendid new edifice reared chiefly through his exertions.

Hallam, Henry (1779-1859), a graceful and scholarly historian who contributed several important works to the literature of his time. His *View of the State of Europe during the Middle Ages*, *Constitutional History of England*, and *Introduction to the Literature of Europe* are distinguished for their clearness of style and correctness of judgment.

Halle, Sir Charles (1819-1895), a distinguished pianist and conductor who was born in Westphalia. Went to Paris to study music in 1839, and in 1848 settled in London, where he soon became known as a piano-player of the first rank. He organised an orchestra of high-class talent, and for many years conducted it in London and the provinces. He married Madame Nonnan Neruda (d. 1911), the celebrated violinist, in 1888, and was knighted the same year.

Halley, Edmund (1656-1741), English Astronomer. Died from 1720 to his death. Discovered what is known as Halley's comet.

Halsbury, Harding Stanley Giffard, 1st Earl of (b. 1825), was a barrister in lucrative practice from 1850-1875, when he was appointed Solicitor-General. In 1885 was raised to the Peerage as Baron Halsbury, and became Lord Chancellor. Was raised to an earldom in 1898, and occupied the Woolsack in the Conservative Ministries of 1886-1892 and 1895-1905. Led the "Hardy" opposition to the Veto Bill in 1901. Chairman of the Murray-Marcou inquiry of 1904.

Hamerton, Phillip G. (1834-1894), an able and original painter and critic, who first attracted notice by his clever book *A Painter's Camp in the Highlands*. For a time he was art critic for the *Saturday Review*, and in 1890 established *The Portfolio*, a monthly art journal. He was author of two novels and some excellent studies of French painters.

Hamilton, Emma Lyon, Lady (1761-1815), was a woman of humble birth and great personal beauty who attained prominent notice by her association with Sir William Hamilton, British Ambassador at Naples, who married her, and afterwards with Lord Nelson, who conceived an infatuation for her. Romney painted her portrait frequently. She died in poverty at Calais, although Nelson had expressly directed that she should be taken care of.

Hamilton, Lieut.-Gen. Sir Ian (b. 1873), was one of the successful generals of the Boer War, and had previously had experience of active service in the Sudan and Burma. In 1901-1904 was Quarter-master-General, C. O. C-in-Chief Southern Command 1905-1906, and appointed Commander-in-Chief in the Mediterranean, 1910.

Hamilton, Lord George (b. 1845), was Secretary for India from 1896 to 1903, and had previously filled the position of First Lord of the Admiralty. He was Chairman of the London School Board 1904-1905. Is a Free Trader, and resigned on Mr. Chamberlain's Fiscal Policy. Captain of Deal Castle since 1899. He is a son of the 1st Duke of Abercorn.

Hamilton, Patrick (1594-1681), one of the Scottish Reformer martyrs, who, spending some time with Luther in Germany, returned to his native country, and was arrested and burnt at the stake as a heretic.

Hamilton, Sir William, Bart. (1788-1856), was Professor of Logic and Metaphysics in the Uni-

versity of Edinburgh from 1836 to his death. He was a profound scholar, and shed much light upon the subjects he wrote upon. His *Discussions in Philosophy* is a remarkable book, and influenced the thought of his time.

Hampton, John (1594-1643), the English patriot who opposed Charles I.'s "Ship Money" tax, and by his resistance and eloquent advocacy of the cause of the people materially helped the Parliamentary cause. He was mortally wounded while leading a regiment he had levied at Chalgrove Field. He was one of the "five Members" impeached by Charles I.

Händel, George Frederick (1685-1759), a German musical composer of great eminence, who passed most of his life in England, composing operas and musical compositions of many kinds, and ultimately achieving world-wide fame by his great series of oratorios, including "Esther," "Deborah," "Saul," "Israel in Egypt," "The Messiah," "Samson," and "Judas Maccabaeus." Undoubtedly the greatest oratorio writer the world has produced. Was buried in Westminster Abbey.

Hanway, Jonas (1712-1786), a well-known traveller and philanthropist, whose book on his travels in Persia and Russia was much read and discussed. His efforts on behalf of poor London children resulted in great good. The fact that he was the first man to walk about the streets of the metropolis with an umbrella has often been recorded.

Hannibal (247-183 B.C.), the renowned Carthaginian general, who led an army against Rome, and achieved many notable victories over superior numbers. Was defeated by Scipio at the Battle of Zama, and afterwards fell upon evil days, suffered exile, and poisoned himself to avoid being captured by his enemies.

Hannington, James (1847-1885), Bishop of Eborac, and East Africa, was not only a successful missionary but an ardent explorer, and it was while attempting to find a new route to Lake Victoria Nyanza that he was made prisoner by Mwangi and put to death.

Hansard, Luke (1752-1828), an English printer who for many years printed the Parliamentary reports which still bear his name.

Hansom, Joseph (1803-1882), a native of York and educated for an architect, but turning his attention to the question of an improved road vehicle, invented the cab which was called after him—"the gondola of London," as Beaconsfield styled it, now in its turn being superseded by the taxicab.

Harcourt, Rt. Hon. Lewis (b. 1863), son of the late Sir William Harcourt, and M.P. for Rossendale Division since 1904. Was appointed First Commissioner of Works, December, 1905, joined the Cabinet in March, 1907, and was made Colonial Secretary in 1910. A very popular Minister and successful Parliamentarian.

Harcourt, Sir William Vernon (1827-1904), a Liberal statesman. Entered Parliament in 1868 and continued, with but a short intermission, to be a member up to the time of his death. He was an enthusiastic supporter of Mr. Gladstone, whom he championed on all occasions. Was Solicitor-General in 1873, when he was knighted. Became Home Secretary in 1880, was Chancellor of the Exchequer from 1886, and again from 1892-1895. After Mr. Gladstone's retirement in 1894, he led his party in the House of Commons up to 1898. His death occurred suddenly, after he had intimated his intention of finally retiring from public life. His Finance Act of 1894 has resulted in large additions to the Revenue under the head of Death Duties.

Hardicanute (1019-1042), son of Canute the Great, was King of England from 1040 to 1042, and is unpleasantly remembered for having imposed the tax called Danegelt. He was the last Danish sovereign of this country.

Hardie, J. Keir, M.P. (b. 1856), a Radical politician and Labour representative, who acted as editor of the *Worker* and the *Labour Leader* from 1887-1904. During his early life worked in a Scottish coal-pit, but in 1882 became a journalist, and entered Parliament as member for West Ham in 1892. Founded the Independent Labour Party, and later sat for Merthyr Tydfil from 1900-1906, and onward. In 1907 made a

tour round the world, and caused considerable stir in various places in Australia, India, and South Africa by his speeches.

Hardinge, Fenshurst, Lord, formerly Sir Charles Hardinge (b. 1858), filled many important diplomatic appointments between 1880 and 1906—at Constantinople, Berlin, Washington, and St. Petersburg—and in the latter year became permanent Under-Secretary of State for Foreign Affairs. In 1910 was appointed Viceroy of India. On Dec. 23, 1912, his assassination was attempted by the throwing of a bomb as he was making his state entry into Delhi, but he was only slightly wounded.

Hardinge, Viscount (1785-1856), was Governor-General of India from 1844 to 1847, and in 1852 succeeded Wellington as Commander-in-Chief.

Hardy, Thomas (b. 1840), was educated as an architect, and practised for some time, but became known as a promising novelist in 1871 with his story *Desperate Remedies*. In 1874 his *Far from the Madding Crowd* was published, which at once made him a name. Following that, at short intervals, came a long series of powerful novels from his pen. Perhaps the most notable of his stories are *The Trumpet Major*, *The Mayor of Casterbridge*, *Jess of the D'Urbervilles*, and *Jude the Obscure*. In 1908 he completed a dramatic poem of epic dimensions entitled "The Dynasts," whose central figure is Napoleon.

Hare, Sir John (b. 1844), a well-known comedian, who was a leading figure in the first performances of the Robertsonian comedies in which he was associated with the Hancocks. From 1875 to 1900 he was in management on his own account at the Court, St. James's, Garrick, and Globe theatres in London in succession. Knighted in 1907.

Hargreaves, James (1720-1778), was a poor Lancashire-born mechanic who lived later at and died in Nottingham, and invented the spinning jenny, one of the revolutionising labour-saving contrivances of the latter half of the 18th century. It met with much opposition, however, and kept him poor, though the community afterwards reaped the advantage in a greatly improved industry.

Harley, Robert, Earl of Oxford (1661-1724), a distinguished Tory statesman—originally, however, a Whig—of the Queen Anne period, who fell into his peer after that Sovereign's death in consequence of being suspected of intriguing with the Stuarts. He served at different times as Speaker of the House of Commons, Chancellor of the Exchequer, and Lord Treasurer. "The Irish Collection" in the British Museum is a reminder of his cultured literary tastes.

Harold II. (1022-1066), the last of the Saxon Sovereigns of England, and the son of Earl Godwin, was crowned King in succession to Edward the Confessor in 1066. The coming of William the Conqueror, with his great machine, soon, however, put an end to the hopes of Harold and his followers; and the battle of Hastings terminated at once his life and Saxon way in this country.

Haroun-Al-Raschid, the famous Caliph of Bagdad (786-809), familiar to all by the references to him in the *Arabian Nights*, and memorable in history as a wise and powerful ruler, whose possessions extended from the Indus to the Nile and over a considerable part of North Africa.

Harraden, Beatrice (b. 1864), a novelist best known by her *Maids that Pass in the Night*, published in 1893. Born at Launceston, her mother was of Swedish and Spanish parentage, and her father, Mr. Samuel Harraden, a musician and scholar. Miss Harraden is a Bachelor of Arts of London University, and her published works include—besides that mentioned above—*In Varying Moods*, *The Fowler*, *Interplay*, and *Katherine Frenschman*.

Harris, George Robt. Canning, 4th Baron (b. 1821), has served his country at home as Under-Secretary for India (1855-1886) and Under-Secretary for War (1886-1889), and abroad as Governor of Bombay (1890-1895) and with the Imperial Yeomanry in South Africa in 1901. His lordship has also won considerable fame as a keen cricketer, in connection with the Kent County Club particularly.

Harrison, Benjamin (1833-1907), twenty-third President of the United States, and grandson of William Henry Harrison (1773-1841), the ninth President. Benjamin Harrison was a Brigadier-General in the Civil War, and served as President 1889-1893, failing to secure re-election in 1892.

Harrison, Frederic (b. 1831), as leader of the English Positivists, filled a prominent part in philosophical discussions, during the last quarter of the 19th century. He was a Professor of Jurisprudence under the Council of Legal Education from 1877 to 1889, and Alderman of the London County Council from 1889 to 1892. In 1907 he published *The Cress of a Layman* and *The Philosophy of Common Sense*, and in 1908 *Realities and Ideals*. Published *Autobiographic Memoirs* (1911).

Harrison, John (1623-1778), the inventor of the chronometer, for which he received the Government grant of £20,000, was a mechanician of great ingenuity, who effected many important improvements in clocks, watches, and other instruments. He was a native of Foulby in Yorkshire, and spent the last years of his life in retirement at Hampstead, where an interesting monument was erected over his grave in the parish churchyard.

Hart, Sir Robert (1826-1901), was Director of Chinese Imperial Maritime Customs at Peking, and for over half a century in the Consular and Customs service in the Celestial Empire, during which he became the most trusted Englishman in China. Retired 1901.

Harte, Francis Bret (1830-1922), the American poet and author, who leapt into popularity in the late 'sixties by his clever sketches and stories of Californian mining life, and maintained a high reputation as a writer for a considerable period. His last twenty years were spent in England.

Hartley, William (1572-1629), an English doctor and scientist who rose to great eminence both as an anatomist and physiologist, and became Physician Extraordinary to James I. He immortalised himself by discovering the circulation of the blood in 1616.

Hastings, Warren (1732-1818), at seventeen years old went out to Bengal and took a position as writer in the East India Company's service. Subsequently volunteered under Clive, and a year or two later became a Member of the Council at Calcutta. Manifesting great ability, he was advanced, from Post to Joint, and in 1773 became the first Governor-General of India. After twelve years of Governor-Generalship he returned to England, and was impeached on charges of excessive cruelty and corruption. The trial lasted seven years, and cost Hastings £70,000. He was ultimately acquitted, and the East India Company settled an annuity of £4,000 upon him, and he lived to see his plans for the security of British rule in the Orient publicly applauded.

Hatto, Archbishop of Mayence, a powerful but cruel prelate, who according to tradition was cast into the Mouse Tower still standing at Burgen on the Rhine, and there was worried to death by rats, as set forth in Southey's well-known ballad.

Hatton, J. L. (1809-1886), an English musical composer, who made a great name as a composer of songs, cantatas and glees. His "Simon the Cellarer" is perhaps his best remembered song.

Hatton, Joseph (1839-1907), a clever journalist, miscellaneous writer, and novelist, who produced a large number of readable books, his fiction including *Cybil*, *John Needham's Double*, *By Order of the Czar* and *Under the Great Seal*. His *Journalistic London*, *Reminiscences of F. L. Toole*, *The Nest Ceylon*, and *Henry Irving's Impressions of America*, exhibited a genial and graceful style.

Hatton, Sir Christopher (1540-1591), an English statesman who first attracted the attention of Queen Elizabeth by his dancing at a Court masque, and was by her appointed Lord Chancellor in 1587.

Hauptmann, Gerhart (b. 1862), one of the leading dramatic poets of Europe. A native of Silesia, he devoted himself first to agriculture, then to art, and subsequently to the drama, and has lived in Rome, Berlin, Switzerland, and the United States. Since 1885 he has produced many plays, including,

Hirsch, Baron Maurice de (1831-1896), a financier of remarkable success who amassed an immense fortune, the greater part of which he devoted to philanthropic objects, expending as much as £2,000,000 in 1891. Founded the Jewish Colonisation Association with a capital of £2,000,000, and a later endowment of £2,000,000 enabled colonies to be established in South Africa, Canada, and Asia Minor.

Hobbes, John Oliver (1867-1906), born in Boston, U.S., this lady, whose real name was Mrs. Pearl Mary Teresa Craigie, first attracted notice by her clever story *Some Emotions, and a Moral*, and subsequently kept prominently before the public with a succession of stories (and several plays) which more than bore out her early promise.

Hobbes, Thomas (1588-1633), was a famous philosophical writer, whose *Leviathan, or the Matter, Form, and Power of a Commonwealth*, appeared in 1651, and roused considerable sensation.

Hobhouse, Rt. Hon. Chas. Ed. Henry (b. 1862), Postmaster-General since April, 1914. P.C.: Chancellor of the Duchy of Lancaster, 1911-14; M.P. for East Bristol since 1900. Parly. Under-Sec. for India, 1907-8; Financial Sec. to the Treasury, 1908-11.

Hocking, Elias K. (b. 1859), a popular novelist, formerly in the Nonconformist ministry; author of *Her Beauty, The Awakening of Anarchy*, and countless other fascinating stories.

Hofer, Andreas (1767-1810), a Tyrolean patriot who led an insurrectionary movement against the French and Bavarians, but was betrayed and shot by order of Napoleon I. at Mantua.

Hogarth, William (1697-1764), the celebrated engraver and painter who satirised the follies of his time in a series of engravings instinct with character, humour and power. His "Harlot's Progress" of six engravings was published in 1732 and gained him immediate fame. In 1735 he produced his equally celebrated "Rake's Progress," a series of eight engravings. These were followed by numerous others, including "Marriage à la Mode," "Industry and Idleness," and "The March to Finchley." He was buried in Chiswick Churchyard.

Hogg, James (1770-1835), a Scottish poet of force and originality, who was known as the "Ettrick Shepherd," and assisted Scott in collecting the Border Minstrelsy.

Hogg, Quintin (1845-1909), was an educationist and philanthropist who, purchasing the old Polytechnic Institution in 1882, turned it into a popular college, providing efficient instruction in every department of education at moderate rates, and so building up an institution of great utility. He met his death by accidental asphyxiation.

Holbein, Hans (1447-1533), was born at Augsburg, and settled in London in 1530, where he succeeded in gaining the favour of Henry VIII., for whom he painted many portraits, and produced the famous "Dance of Death."

Holden, Sir Isaac (1807-1897), an inventor and manufacturer who achieved fame and fortune in connection with wool-combing inventions. He was in Parliament from 1865 almost to the time of his death, and was made a baronet in 1893. Succeeded by his son, Sir Angus Holden (1833-1912), who was M.P. for the Buckrose Division of Yorkshire for several years and became Lord Holden in 1908.

Hole, Dean Samuel Reynolds (1810-1904), educated at Newark Grammar School and Brunsen. Was Chaplain to the Archbishop of Canterbury in 1883, and Select Preacher to the University of Oxford from 1885 to 1886. In 1887 succeeded to the Deanery of Rochester. He was a busy writer from early years, and dealt with many subjects in a charming manner, but it is principally by his delightful *Book about Roses* that he will be remembered.

Hollinshed, R. (died circa 1580), was the author of *The Chronicles of England, Scotland, and Ireland*, published in 1577.

Holl, Frank (1845-1888), a noted English painter and R.A., who was the son of an artist, and between 1870 and 1880 produced some of the most admired pictures of his time. Among his best-known works are "No Tidings from the Sea,"

"Leaving Home," "Deserted," and "Ordered to the Front."

Holmes, Oliver Wendell (1809-1894), an American doctor and author of great humour and geniality, his *Autocrat of the Breakfast Table, The Professor at the Breakfast Table, and The Poet at the Breakfast Table* are works of infinite humour and quaintness. He was also the author of three novels.

Holroyd, Sir Charles (b. 1860), Director of the National Gallery and former Keeper of the Tate Collection. Himself an able artist and etcher, and a clever writer on Italian painting.

Holyoake, George Jacob (1817-1906), an eminent secularist lecturer and author, who was identified with many popular movements, especially Co-operation, of which he was the historian.

Horne, Rev. John (1722-1808), a Scottish clergyman and dramatist, whose tragedy "Douglas" attained great popularity, but cost him his benefice. A pension of £300 a year, however, atoned for this.

Homer, the most famous of all epic poets. Is supposed to have been a Greek who lived about 850 B.C., probably at Chios or Smyrna, and has generally been regarded as the author of the "Iliad" and the "Odyssey," though tradition rather than ascertained fact connects his name with those great poems.

Hone, William (1780-1842), was a writer and compiler of several most useful books of reference, including *The Every-Day Book, The Table Book, and The Year Book*, valuable for their immense fund of curious information regarding the manners and customs of former times.

Hood, Admiral (1724-1816), a successful British naval commander, who in 1793 was in command of the Mediterranean fleet, and showed great capacity in that post, taking and occupying Toulon, and capturing Corsica among other exploits.

Hood, Thomas (1790-1845), an English poet, who as a prolific writer of serious as well as humorous poems, stands in his own line unique. Of his serious verse, "The Song of the Shirt," "The Dream of Eugene Aram," and "The Bridge of Sighs," may be cited as the best examples, while his comic poems, notably those of the punning order, are unequalled.

Hook, Theodore Edward (1788-1841), an English humorist, whose breezy novels, *Gilbert Gurney and Jack Brag*, secured him a great reputation. As a young man he held for five years the position of Treasurer of Mauritius. He edited the *York Bull* newspaper, and was the original of "Mr. Wagg" in Thackeray's *Vanity Fair*.

Hooker, Richard (1554-1600), was Master of the Temple from 1585-1591, and afterwards Rector of Boscombe. Is famed for his great book on *Ecclesiastical Polity*, and, because of his exquisite choice of words, was known as "Judicious Hooker."

Hooker, Sir Joseph Dalton, G.C.S.I., C.H. (1817-1911), one of the most eminent of modern naturalists, and from 1855-1885, when he retired, was Director of the Royal Geographical Socy. Was President of the Royal Society from 1872-1877. His books on the Flora of Britain, British India, and New Zealand are standard works. Order of Merit, 1907.

Horace, or more properly **Flaccus Quintus Horatius**, (65-8 B.C.), the famous Roman satirist and poet, who was the friend of Virgil, and attained immortal fame by his "Satires," "Epodes," and "Odes," all of them distinguished for elegance of thought and dainty wit.

Horatius Coclès, a legendary Roman hero who, with two brave comrades—according to the tradition incorporated in one of Lord Macaulay's lays, gloriously held the bridge across the Tiber against the Etruscan army in the 6th century until the citizens cut it adrift, and so saved Rome.

Horsley, Samuel (1733-1806), a renowned English bishop and scholarly writer on theology.

Horsley, Sir Victor (b. 1857), educated at University College Hospital. Has achieved much distinction as a pathologist. Was Fullerian Professor from 1891-1893, and Professor of Pathology at University College from 1893-1896. He was knighted in 1902. Has championed vivisection and temperance reform.

Horton, Rev. E. F. (b. 1854), one of the most

prominent of living Congregational ministers, and a thoughtful and able writer. Has held a pastorate at Hampstead for over a quarter of a century with great acceptance. He is in much request as a preacher and lecturer, and has been President of the Congregational Union. Is M.A. and D.D.

Houdin, Jean Eugene (1805-1871), the most famous French "illusionist" and sleight-of-hand performer, who frequently appeared in this country. He was rewarded by the French Government for discovering and exposing the tricks by which Algerian priests had long kept up the pretence of miraculous powers to the natives.

Houghton, Lord (1809-1895), an English politician and poet. As Richard Monckton Milnes published a number of volumes of verse of great delicacy of thought. Was an active Liberal politician for many years, and the friend of Tennyson, Hallam, and Thackeray.

Howard, John (1726-1790), earned celebrity for his philanthropic efforts on behalf of prison reform, the pursuit of which eventually exposed him to a fatal fever attack in Russia.

Howard of Effingham, Lord, commander of the fleet which defeated the Spanish Armada, 1588, and took part in the capture of Cadiz, 1596.

Howe, Elias (1810-1867), an ingenious American who was the inventor of the first sewing machine, by which he made a great fortune.

Howe, Richard, Earl (1726-1799), the British admiral who in 1758 destroyed Cherbourg, and in 1794 won the famous victory over the French off Brest.

Howells, William Dean (b. 1837), one of the most eminent of modern American novelists and authors. His best-known works are *A Modern Instance*, *The Rose of Shiloh*, *Leah*, *The Landlord at the Lion's Head*, *A Fort Hope*, and (for English readers) *Certain Delightful English Towns*, published in 1907. He was U.S. Consul at Venice, 1861-1866.

Howitt, William (1795-1870), was a popular English author, who, independently and in conjunction with his wife, Mary Howitt, wrote many works of a popular character, such as *Homes and Haunts of the English Poets* and *Visits to Remarkable Places*.

Hubert, St., is the patron saint of huntsmen, and was himself an inveterate hunter, until a chance encounter with a stag bearing a crucifix converted him to a religious life. He died in 727 at Liège. His festival falls on November 3rd.

Hudson, George (1820-1871), rushed into prominence in the railway speculation mania of 1843-1845, and by a series of bold "moves" made large sums, becoming known as the "Railway King," and was elected M.P. for Sunderland. In later years his luck deserted him and he lost most of his wealth.

Hudson, Henry (1550-1610), was a famous English navigator who discovered the Hudson River, Hudson Strait and Bay, and his two books describing his voyages are of the greatest interest. He lost his life eventually in the region of his chief explorations, whilst searching for the North-West Passage.

Hudson, Sir Geoffrey (1619-1682), a court dwarf who was knighted by Charles I., and was only 20 inches in height when thirty years of age. He is introduced in Scott's *Peveril of the Peak*.

Huggins, Sir William (1824-1910), one of the most eminent of modern astronomers, who rose to the distinction of admission to the Order of Merit. He was President of the Royal Astronomical Society in 1876-1878, of the British Association in 1891, and of the Royal Society in 1910.

Hughes, Thomas (1822-1896), educated at Rugby, and at Oxford; practised at the Bar, and became a County Court Judge in 1882. His best-known works are *Tom Brown's School-days* and *The Scouring of the White Horse*.

Hugo, Saint (1135-1200) was a learned and pious French monk who settled in England and grew into high favour with Henry II., and became Bishop of Lincoln.

Huxley, Victor (1802-1882), the great poet, dramatist and novelist who headed the Romantic movement in France in the early part of the 19th century and made himself a name of the first eminence by his

various writings. His dramas of "Hernani," "Lucrèce Borgia," "Guy Rivas," and "Le Roy s'amuse" were in every sense great triumphs. Among his novels, *Notre Dame*, which belongs to his early period, and *Les Misérables*, *Les Travailleurs de la mer*, and *L'Homme qui rit*, belonging to his later life and written while he was living in exile, are all works of splendid genius.

Hullah, John (1823-1884), an English musical educationist who devoted his life to the spread of musical knowledge, establishing singing classes at Exeter Hall, and in many other ways popularising the art. He was also a Government Inspector of Music, and opposed Curwen's Tonic Sol-Fa system.

Humbert I. (1044-1050) was King of Italy from 1048, when he succeeded his father, Victor Emanuel. He was assassinated in July, 1050.

Humboldt, Baron Friedrich Heinrich Alexander von (1769-1859), the great German traveller and naturalist. Spent many years in the interior of South America and Mexico, and afterwards in Central Asia, and his books describing his travels and his various scientific discoveries—especially in geology and natural history—are among the most attractive works of the kind ever written.

Hume, David (1711-1776), the celebrated historian and philosopher whose *History of England* is a fascinating and comprehensive study, and long held the chief place in English historical literature. Hume's philosophical writings were no less famous, and widened the sphere of philosophical thought.

Hunt, Henry (1773-1835), a demagogue politician who was known as "Orator Hunt"; suffered imprisonment for advocating Chartism, and was later returned to Parliament.

Hunt, Leigh (1784-1859), an English poet, politician and essayist. In 1813 he was fined £500, and sentenced to two years' imprisonment for libelling the Prince Regent, and while in prison wrote one of his daintiest poems "The Story of Rimini" and other works. In later life he was a constant contributor to literature, and from 1847 enjoyed a pension of £200 a year from the Civil List.

Hunt, Wm. Holman (1827-1910), one of the three founders of the Pre-Raphaelite movement, and an artist who achieved distinction by several remarkable paintings, the chief of which is, perhaps, "The Light of the World," an allegorical work symbolising Christ knocking at the door of the human soul. Another of his great works is "The Finding of our Saviour in the Temple." Was member of the Order of Merit.

Hunter, John (1728-1793), one of the greatest surgical operators of his day, and Chief Surgeon at St. George's Hospital. His surgical museum bequeathed to the nation is of great value and interest, and now forms part of the Museum of the Royal College of Surgeons.

Huntington, Countess of (1717-1790), a rich and powerful lady who was so impressed with Whitefield's preaching that she devoted much of her fortune to establishing chapels and colleges for the promotion of the doctrines he expounded.

Huskisson, William (1770-1830), an English statesman who held office for many years under Peel and in 1828 was Secretary for Foreign Affairs. He was accidentally killed at Eccles at the opening of the Liverpool and Manchester Railway.

Huss, John (1366-1415), the celebrated Reformer, was a native of Bohemia and a steadfast advocate of the new religion. Sentenced to death or recantation, he suffered martyrdom on June 30th, 1415. His death caused a Civil War which lasted for many years.

Hutton, Richard Holt (1806-1897), an English writer who exerted considerable influence in the spheres of politics and religion. For some years he was a Unitarian minister, but afterwards connected himself with the Church of England, and from 1861 edited the *Spectator* with remarkable ability.

Huxley, Thomas Henry (1825-1895), an eminent scientist and author of numerous works covering a great range of research. After the publication of Darwin's *Origin of Species*, Huxley became an ardent evolutionist. His biological work, *Man's Place in*

Nature, and his numerous essays, were marked by great vigour and clearness of thought, and gave him a leading position. He held numerous important appointments, was President of the Royal Society in 1815, made Peary Councilor in 1822, and belonged to many learned societies.

Hyde, Edward, First Earl of Clarendon. (See Clarendon.)

Hypatia, who lived in the 4th century, was daughter of Theon of Alexandria, and attained great eminence by her lectures on philosophy. She excited the enmity of the monks, who raised an agitation against her, and she was put to death.

Hyndman, H. M. (b. 1842), the founder of the Social Democratic Federation, 1881, and of the newspaper *Justice*, has been an active propagandist and worker in the socialistic cause in many lands. Was the friend of Mazzini and Garibaldi. In 1911 published his *Record of an Adventurous Life*.

I

Ibrahim Pasha (1789-1848), an able Egyptian statesman, general, and viceroy, who, adopted by Mohammed Ali as his son, contributed largely to the success of Egyptian policy during the quarter of a century or more of his influence. His conquest of Syria was a notable feat of generalship. He died a few months after being appointed Viceroy.

Ibsen, Henrik (1828-1906), the Norwegian dramatist, whose works excited a considerable amount of interest in this country because of the singular problems they dealt with, the daring incidents upon which they hinged, and their very original characterisation. They outraged convention at every point, and occasionally their realism became exceedingly repulsive to English taste, yet there was a certain greatness about them that could not be denied. His chief works were *Her Gait*, *The Master Builder*, *A Doll's House*, and *Hedda Gabler*.

Ictinus, the architect of the Parthenon at Athens, and the temple of Apollo (c. 433 B.C.).

Idesleigh, Earl of (1818-1887), a Conservative statesman of great dignity of character and political sincerity. He was in the House of Commons from 1855 to 1885, when he was raised to the peerage. He was one of the most successful of Tory Chancellors of the Exchequer, and was Foreign Secretary from 1886 to the time of his death.

Ignatieff, Genl. Count Nicholas (b. 1832), a soldier-statesman, who won distinction in Russian diplomacy towards the close of the 19th century.

Ignatius, St., Bishop of Antioch, who suffered martyrdom at the hands of Trajan 107 A.D., being condemned to be eaten by wild beasts in the arena.

Ilbert, Sir Courtenay (b. 1841), Clerk of the House of Commons, and formerly on the Indian Council, and Parliamentary Counsel to the Treasury. An authority on Parliamentary procedure.

Illingworth, Percy Holden (1866-1915), was M.P. for the Shipley Division of W. Yorks. from 1906 to his death, and Chief Liberal Whip from 1912. Son of the late Henry Illingworth and grandson of Sir Isaac Holden. Educated Jesus College, Camb. (M.A., LL.B.).

Ins, a warrior king of Wessex who reigned in the 8th century and made many wise laws.

Inge, the Very Rev. W. Ralph, Dean of St. Paul's since 1911 (b. 1860). Ed. Eton and King's Coll. Camb. Assistant Master at Eton, 1884-1888. Lady Margaret Prof. Camb., 1907-1911. Has published some profound studies in Mysticism, and is regarded as an apostle of melancholy rather than of cheerfulness.

Ingelow, Jean (1830-1897), was an English poetess of great gifts. From the early 'sixties to her death, she was frequently before the public with poems, novels and fairy tales, all of high merit.

Ingila, Sir John (1814-1862), was a native of Nova Scotia, and a distinguished English general. During the Mutiny in India he had command of the Residency at Lucknow in succession to Sir Henry Lawrence, and held it until the arrival of Havelock.

Ingram, Rt. Rev. Arthur Foley Winnington, D.D., Bishop of London since 1901 (b. 1828).

Educated at Marlborough College and Oxford; was private chaplain to the Bishop of Lichfield from 1863 to 1869; Rector of Bethnal Green 1869, and Canon of St. Paul's 1869-1901. Among his published works are *Work in Great Cities* and *Christ and His Friends*.

Ingres, Jean A. D. (1781-1867), a great French historical painter who was elected to the Institute in 1824, and at his death was a Senator of France.

Innocent III., Pope (1216-1216), was one of the most powerful of the long line of Popes who succeeded in bringing all the monarchs of Christendom under his sway, including our own King John.

Inverclyde, John Burns, First Baron (1823-1901), was the son of Sir George Burns, who was associated with Sir Samuel Cunard in the founding of the Cunard Line of steamers. After the retirement of his father, Lord Inverclyde became head of the company and conducted its affairs with signal ability. The peerage dates from 1897.

Irton, Henry (1611-1651), the Cromwellian general, was the Protector's son-in-law. He was one of the judges at Charles's trial, and served in Ireland as Lord Deputy, dying during the siege of Limerick.

Irving, Edward (1792-1834), a Scottish Divine who from 1822 to the time of his death was one of the most notable preachers in London. Many of his views were in advance of those of his co-religionists, and towards the close of his career a charge of heresy was brought against him.

Irving, Sir Henry (1833-1905), The most prominent English actor of the close of the Victorian period. His first appearance in London was made in 1856, and his first distinct metropolitan success scored at the Vaudeville Theatre in 1870, when he appeared as Digby Grand in *The Two Roses*. From 1871 he was connected with the Lyceum Theatre, first with Mr. Bateman, and from 1879 under his own management. His record at this theatre covered a brilliant series of productions. *"The Bells"* was the first triumph, then followed *"Charles I."* and *"Eugene Aram."* and later a number of Shakespearean impersonations, in some of which—notably *"Shylock"* and *"Hamlet"*—Irving was really great. Among the original productions credited to him may be mentioned *Tennyson's "Queen Mary"* and *"Becket," Ravenswood, "Olivia," "King Arthur,"* and *"Robespierre."*

Irving, Washington (1783-1859), a writer of charming stories and miscellaneous works which won wide and well-deserved favour on both sides of the Atlantic. Among his biographical books may be mentioned *Lives of Goldsmith, Colman, Mahomed* and *Washington*. It was in his *Tales of a Traveller* and his shorter sketches, however, that he was most successful. His story of *Sleepy Hollow*, and his *Rip Van Winkle* are both miniature productions.

Isaacus, Rufus, (See Reading, Lord.)

Isabella of Castile (1451-1504), reigned jointly with Ferdinand V. her husband. During their thirty years' sway Spain was united as a single monarchy, and achieved the height of its greatness, the discovery of America, the Conquest of Granada, and the expulsion of the Moors from Spain being among the events with which Isabella was associated.

Islip, Simon (d. 1366), a noted ecclesiastic of his day, who was Archbishop of Canterbury from 1349 to the time of his death.

Islington, Lord, formerly Sir John Dickson Poynder (b. 1866), Governor of New Zealand 1910-12, M.P. for Clippenham Division, 1902-10. Made Chairman of India Public Service Commission, 1912.

Ismael Pasha (1830-1895), grandson of Mohammed Ali, was a man of modern ideas and great public spirit, whose policy rendered Egypt practically independent of Turkey, the Sultan confirming him in the position and title of Khedive in 1873. It was his adoption of the ideas of the Suez Canal that enabled that work to be successfully carried out. By reckless extravagance he involved himself in difficulties, entailing the sale of his Suez Canal

shares to England, the establishment of the dual control of England and France, and his own abdication in 1870, when his son Tewfik succeeded.

Ismay, Thomas Henry (1837-1899), was an eminent Liverpool ship-owner, and founder of the White Star Line.

Izvolaky, Baron (b. 1848), Russian Ambassador to France; was Foreign Minister in 1906. Visited London in 1908.

Ito, Prince (1838-1909), one of the most enlightened statesmen in Japan. Was four times Premier, and contributed in no small degree to the building up of his country's commercial, military, and naval greatness. Several times visited Europe, and was in London for a year when a young man of twenty-two. Assassinated in 1909.

Ivan the Great (1440-1505), the first Czar of Russia, succeeded in bringing the scattered provinces of Muscovy under one supreme governmental control, and put an end to Tartar rule. There was a good deal of the barbarian and tyrant in Ivan's composition, but he had views in advance of his time and country.

Irving, Lord (b. 1847), is a member of the well-known Guinness family of Dublin brewers, and a brother of Lord Ardilaun. A man of immense wealth, and a notable philanthropist, gave half-a-million sterling equally between Dublin and London for the building of improved dwellings for the poor, and celebrated the visit of the King and Queen to Ireland in 1903 by giving £50,000 to Irish hospitals.

Ives, John (1757-1776), a promising young numismatist who published a useful work entitled *Remarks on English Coins*, the year before his demise.

Ivory, James (1765-1842), a clever Scottish mathematician who obtained considerable recognition in his day.

Isaaks, Richard (1624-1700), a careful topographical writer, whose work *Antiquities of Exeter*, published in 1677, is still referred to.

J

Jackson, Andrew (1767-1845), an American General who was twice President of the United States, and one of the most able holders of that position.

Jackson, T. J. (1824-1893), popularly known as "Stonewall Jackson," was the most brilliant general on the Southern side in the American Civil War. Was accidentally killed by his own men at the Battle of Chancellorsville. The term "Stonewall" was applied to him because of his dogged resistance at the first Battle of Bull Run.

Jacobs, W. W. (b. in London, 1863), is a novelist of a quaint and peculiar humour, whose stories and sketches of East-end river side life and characters are unimitable. Mr. Jacobs was for some years a clerk in the Civil Service.

Jacquard, Joseph Marie (1732-1834), a French mechanic whose Jacquard loom provided a new and effective method of weaving designs in textile fabrics, and was an invention of the very first rank.

James I. of England (1566-1603) was the sixth Scottish sovereign of that name and the son of ill-fated Mary Stuart. He succeeded to the English throne in 1603 on the death of Elizabeth by virtue of his descent from Henry VII. Numerous plots were formed against him and his favourites and Government, including the Gunpowder Plot of 1605. He persecuted the Puritans, was generally in conflict with his Parliament, granted many monopolies, and saw the Authorised Version of the Bible published.

James II. (1633-1701) was King of England from 1685-1688, succeeding his brother Charles II. His reign was short, but his mistakes many. The Declaration of Indulgence, the Persecution of the Bishops, and other high-handed proceedings disgusted his people, and he ignominiously severed his connection with England by flight to France in December 1688, making way for William III. and his more vigorous rule.

James, George F. R. (1801-1860), one of the most

prolific novelists of his time. Some of his works enjoyed a good deal of popularity, but they contain little real reality, being modelled partly on Scott and partly on Dumas, without the strength of either. His *Kilnclaffer* was the first and also the best of his over 300 stories. He was appointed historiographer royal by William IV. and was British Consul in Venice at the time of his death.

James, Henry (b. 1843), an American novelist who has produced a number of notable stories, remarkable for their intellectual subtlety and careful characterisation. For the last thirty years he has resided mostly in London. His best-known novels are *The American*, *Daisy Miller*, *The Bostonians*, *The Portrait of a Lady*, and *What Maisie Saw*. In 1906 he revisited his native land, the result of which was *The American Scene* (1907). Since then he has published *Finer Grain* and *The Outcry*.

James of Hereford, Lord (1282-1291), held many distinguished positions, and in the last Salisbury Government was Chancellor of the Duchy of Lancaster. He was formerly a Gladstonian, and as such served as Solicitor-General in 1873. Attorney-General in the following year, and again from 1880-1885. He then broke with his old chief, declined the Lord Chancellorship, and became an active member of the Liberal-Unionist Party, from which, however, he separated on the Tariff Question.

Jameson, Anna (1794-1860), a writer on art subjects whose works were held in high esteem and showed an acute perception of artistic details. She wrote, among other works, *Sacred and Legendary Art. Lives of the Early Italian Painters*, and *Legends of the Madonna*.

Jameson, Sir Leander Starr (b. 1853), was for many years one of the most able men connected with South Africa, and was the close friend of Cecil Rhodes. It was he who led the famous raid on the Transvaal in December, 1895, and for that escapade suffered ten months' imprisonment in London. Previous to that was Administrator of Rhodesia. In 1904 was elected Premier of the Cape Parliament, but resigned in 1908. Was present at the Imperial Conference in 1907 in London. Retired from political life in 1912.

Januarius, Saint, was Bishop of Benevento in the 3rd century and suffered martyrdom under Diocletian, A.D. 305. His anniversary was September 19th, on which day two plaits of his blood, preserved in the Cathedral of Naples, are supposed to possess the miraculous power of liquefaction and are carried in procession.

Jaures, Jean (b. 1859), the leader of the French socialists in the Chamber of Deputies, of which he has been a member since 1895. A powerful speaker and writer, and edited a History of Socialism.

Jayne, Rt. Rev. Francis John, D.D., Bishop of Exeter 1839 (b. 1845), was educated at Rugby and Oxford; ordained, 1871; Tutor, Keble College, 1876-1879; Preacher at Whitehall, 1875-1877; Vicar of Leeds, 1880. Is a temperance reformer, and favours a modification of the Gothenburg system.

Jebb, Professor Sir R. C. (1841-1905), born at Dundee, and was M.P. for Cambridge University from 1891 up to the time of his death. In 1875 he was appointed Professor of Greek to the University of Glasgow, and in 1889 was elected Reginus Professor of Greek at Cambridge. He was the author of numerous important works, mostly on classical subjects, and was a member of the Order of Merit.

Jefferies, Richard (1848-1887), an English naturalist, who, between 1873 and the time of his death, wrote some of the most beautiful descriptions of natural scenery and the customs and habits of the rural world that we possess. His *Gamekeeper at Home* and *The Life of the Fields* are books of great power and sympathy.

Jefferson, Joseph (1829-1905), an American comedian who, from 1859 to the time of his retirement a short period prior to his demise, stood in his own line of parts unexcelled. In 1859 he produced *Rip Van Winkle*, a play in which he made well over 5,000 appearances, and which beat all stage records by earning a round million pounds.

Jefferson, President Thomas (1743-1826), took an active part in promoting the American Revolution, and drew up the Declaration of Independence. He was twice President of the United States.

Jeffrey, Francis Lord (1773-1850), was one of the founders and first editor of the *Edinburgh Review*. A writer of great culture and a lawyer of eminence, who was at one time in Parliament and became eventually a Lord Justice of the Court of Session.

Jeffreys, Judge (1648-1699), won for himself unenviable notoriety by his harsh and cruel judgments, when he held what is known as the "Bloody Assize," following the suppression of the Monmouth Rebellion. He was made Lord Chancellor, but fell into disgrace after the abdication of James II., and was committed to the Tower and there died.

Jenghiz Khan (1162-1227), the famous Mogul ruler who twice conquered China, forced the Turks into their present European confines, and effected the union of the leading Mongolian races.

Jenkins, Robert, an adventurous captain of a West Indian merchantman, whose report of an alleged attack upon his ship by Spaniards and their depriving him of his ears, which he produced in proof, led to the war against Spain in 1739.

Jenkinson, Anthony, a great Elizabethan trader and traveller, whose various expeditions to the Levant, Khiva, Bokhara, and Russia led to the formation of the English Muscovy Company and the opening up of the Levant trade.

Jenner, Edward (1749-1823), an English physician who became celebrated by his discovery of the vaccination system of alleviating smallpox, which has been of such incalculable benefit to mankind. Parliament made him grants amounting to £30,000.

Jenner, Sir William (1815-1868), for many years Physician in Ordinary to Queen Victoria, and one of the doctors attending Prince Albert in his fatal illness in 1861, and King Edward when Prince of Wales, during his attack of typhoid in 1871. Sir William was created a Baronet in 1868, and from 1881 to 1888 was President of the Royal College of Physicians.

Jerome, J. K. (b. 1856), a clever journalist and writer, who made his name as a humorist. He wrote *Three Men in a Boat*. He founded *The Idler* and *The Day*. His play "The Fawcett of the Third Floor Back" was a distinct success.

Jerome, St. (340-420), a noted theologian of the 5th century, whose Latin translation of the Scriptures ("the Vulgate") made him famous. He died at Bethlehem.

Jerrold, Blanchard (1821-1871), a journalist and author who wrote a *Life of Arthur* in 1871, and a number of plays, and succeeded by Alfred Douglas Jerrold, in the editorship of *Lloyd's Weekly*.

Jerrold, Douglas (1813-1871), dramatist and humorist, who enjoyed a long career of success by his contributions to *Punch*, including "Mrs. Caudle's Curtain Lectures"; his novels, of which *St. Giles and St. James* was his best; and his plays, of which "Black-eyed Susan" was the most popular. Edited *Lloyd's Newspaper* for five years prior to his death.

Jersey, Victor A. G. C. Villiers, 7th Earl of (b. 1845), Paymaster-General, 1889-1890, Governor of New South Wales, 1890-1891.

Jervis, Admiral Sir John, Earl of St. Vincent (1744-1823), won his earldom by his victory over the Spaniards off St. Vincent, 1797. He had previously seen active and noteworthy service at Quebec and in the West Indies.

Jessop, Rev. Canon Augustus (1821-1914), Chaplain in Ordinary to King Edward VII. from 1902-10. Rector of Searning, 1899-1911. Author of numerous works upon historical subjects, and on country life in olden times, of which he has given us some illuminating pictures full of sympathetic charm.

Jevons, Professor W. Stanley (1835-1882), a political economist and logician of great distinction, who published a number of works that did much to advance the sciences of which he was such a devoted student. Drowned at Hastings, whilst bathing.

Joachim, Dr. Joseph (1831-1907), a German violinist and composer, who came to England in 1844 and became prominent in musical circles. For many

years he was the heart and soul of a splendid series of classical quartettes at our popular concerts, and the greatest violinist of his time.

Joan of Arc (1412-1431), the remarkable girl whose heroism and devotional fervour enabled her to inspire the French soldiers with such enthusiasm that they drove the English out of Orleans, and enabled Charles to be proclaimed King at Rheims within two months of her first appearance among them. She was captured by the English in the following year, and was burned as a heretic in Rouen. Her beatification took place in 1909, and she has been an inspiring theme to many poets and writers.

John, St., the Baptist (executed A.D. 28), the forerunner of Christ.

John, St., the Evangelist, the son of Zebedee: retired to Patmos after the Crucifixion, but returned from exile to Ephesus later, and there died at a great age, probably circa A.D. 99.

John, surnamed "Lackland" (1167-1216), King of England from 1199 to his death at Newark after deposition by the Barons in 1216. One of the most detested of English monarchs, but whose reign stands out large in history because of his having granted, under compulsion, the Magna Carta, England's great bulwark of liberty.

John of Gaunt, Duke of Lancaster, son of Edward III., and father of Henry IV., was one of the most powerful English nobles, and was more or less concerned in the leading events of his time. In War Tyler's rebellion he had his palace in the Savoy destroyed and was long held in popular hatred.

Johnson, Dr. Samuel (1709-1784), the great lexicographer and writer, who for a number of years was the most prominent literary man in England. His *Dictionary* was published in 1755, before which he had attained eminence by several works, including the *Vanity of Human Wishes*. His *Rasselas* appeared in 1749, and for two years he published *The Idler*, a collection of essays after the style of the *Spectator*. His *Lives of the Poets* appeared in 1781. He was greatly honoured during his life, enjoyed a pension of £300 a year from 1762, at his death was buried in Westminster Abbey, and had the best biography in the language written upon him by James Boswell.

Johnston, Sir Harry H. (b. in London, 1858), has been a daring and successful explorer, and founded the British South African Protectorate in 1895. Was Commander-in-Chief for the Uganda Protectorate, and has led scientific expeditions into the interior of Africa. Is the author of many valuable works on travel and observation. Published in 1910 a History of the British Empire in Africa.

Jokai, Maurus (1825-1904), a distinguished Hungarian novelist, many of whose works have been translated into English, among them *A Modern Madam* and *Black Diamonds*.

Jones, Henry Arthur (b. 1851), was in commercial life for some years, and then took to play-writing, achieving his first distinct success in "The Silver King." Among his other plays may be mentioned "Saints and Sinners," "The Middleman," "The Liars," "Joseph Entangled," "The Hypocrites," and "Mary Goes First," the latter produced in 1913.

Jones, Inigo (1573-1632), a noted architect who became known as "the English Palladio," and built among other famous structures, the Banqueting Hall at Whitehall and the gateway of St. Mary's at Oxford. He was a Royalist, and suffered severely in the Civil War.

Jones, Paul (1747-1792), was a Scotsman, who early in life took to the sea, and during the American War of Independence commanded various ships on behalf of the Colonists, and was most daring in his onslaughts upon British vessels. He died in Paris.

Jonson, Ben (1573-1637), a friend of Shakespeare and one of the great poets and dramatists of his age. Was Poet Laureate from 1596. His best plays are "Every Man in his Humour," and "The Alchemist." He was buried in Westminster Abbey.

Josephine, Empress (1763-1814), was the wife of Napoleon I. until he divorced her in 1809 and married Maria Louisa. Josephine had previously been married

to Vicomte Alexandre Beauharnais, by whom she had two children.

Josephus Flavius (37-circa 95), a Jewish historian whose *History of Jewish War* and *Antiquities of the Jews* contained much valuable historical evidence bearing upon Biblical history. He was commander of the Jewish army, but was captured by Vespasian, who afterwards befriended him.

Joubert, Petrus Jacobus (1833-1900), the Boer statesman and general, who twice contested for the Presidency of the Transvaal with Krüger, and rendered good service in the field at Majuba, in the Jameson raid, and in the subsequent war, being Commandant-General in Natal.

Jowett, Professor Benjamin (1817-1893), an eminent theological writer of advanced views, who was one of the contributors to the famous *Essays and Reviews* published in 1850. Was Master of Balliol from 1870 to the time of his death, and attracted the devotion and esteem of many eminent people.

Jowett, Rev. J.H. (b. 1864), successor to Dr. Dale in the pastorate of Carr's Lane Chapel, Birmingham. A very powerful preacher, and the Chairman of the Congregational Union in 1906. In January, 1911, accepted the ministry of the Fifth Avenue Presbyterian Church, New York.

Julian (331-363), was Roman Emperor for the last two years of his life, during which period he was an avowed Pagan, though previously he had professedly been a Christian. Hence his title of "Julian the Apostate." He was slain by an arrow during an expedition against Persia.

Julius Cæsar. (See *Cæsar, Julius*.)

Junot, Androche, Duc d'Abbrantès (1771-1833). Was one of Napoleon's great generals and was brilliant, successful until defeated by Wellington at Vimiera.

Justinian I. (483-555), was the Roman Emperor of the East whose fame rests chiefly on his laws. His *Corpus Juris Civilis* remained the accepted textbook of Roman Law to the end of the 9th century, and is still the most important of all monuments of jurisprudence. He reigned from 527 to 565.

Juvénal (60-140), the famous Roman poet and rhetorician of the age of Trajan. His sixteen reburled "Satires" are the finest in classical literature.

K

Kant, Immanuel (1724-1804). German scientist and philosopher whose *Critique of Pure Reason*, published in 1781, was the subject of fierce discussion, and involved him in trouble with the Prussian Government as to his religious belief. His speculations and the transcendental theories he worked out revealed a marvellous capacity of mind, and his works were of immense influence in shaping the philosophical thought of the 18th and 19th centuries.

Matsura, Marquis (1849-1913). Japanese statesman and general, very successful in a march through Korea to Manchuria, was under Oyama Vice-Minister of War, and Prime Minister 1901-6, and in 1908. Achieved solid reforms in the Japanese army.

Kaulbach (1805-1874), an eminent German painter who was patronised by King Ludwig of Bavaria, and painted many notable works for that monarch.

Kay-Shuttleworth, Sir James (1804-1877), a native of Rochdale and a distinguished promoter of popular education. He was the first Secretary of the Committee of Council on Education (1839-1849), and devoted his life to the improvement of the condition of the people.

Kean, Charles John (1811-1868), an English actor-manager, son of the tragedian, Edmund Kean. Charles Kean married Ellen Tree, and in the 'fifties played with her in a remarkable series of spectacular revivals at the Princess's Theatre in London.

Kean, Edmund (1787-1823), one of the greatest tragic actors in the history of the British stage. For a time he carried all before him, but his later years were dimmed by excesses and he died in poverty.

Kents, John (1795-1821), the great English poet who though dying at the early age of twenty-five produced a number of poems which in richness of imagination and beauty of thought are not excelled by anything in the language. His "Odes," his two poems, "Isabella" and "The Eve of St. Agnes," together with his blank verse fragment "Hyperion," are exquisite in form and expression and marvellous as the production of one so young.

Keble, John (1792-1866), an English clergyman and poet whose "Christian Year," published in 1827 is one of the most notable works of its class. Keble College at Oxford was incorporated as a memorial to him, he having been ten years Professor of Poetry at the University.

Keene, Charles (1823-1891), one of the most talented of the *Punch* artists, who from 1851 to his death was constantly represented by drawings of irresistible humour in that journal.

Keltie, John Scott (b. 1840), Secretary Royal Geographical Society, author of *The Partition of Africa*, editor of *The Statesman's Year-Book* and of the *Geographical Journal*.

Kelvin, William Thomson, Lord (1824-1907), the famous scientist and inventor. Was born at Belfast, and after a course of study in Paris, London, and elsewhere, introduced the dynamical theory of heat in a paper read before the Royal Society of Edinburgh. Shortly afterwards he interested himself in submarine telegraphy, and invented numerous important improvements, also doing splendid work in the direction of electrical invention. Altogether he covered a vast field and earned a world-wide reputation. He was knighted in 1866 and raised to the peerage in 1892, and was a member of the Order of Merit.

Kemble, Fanny (1809-1893), was a noted actress in the early part of the 19th century. After several years of success in this country she went to America and resided there for the greater portion of her after life, devoting herself mainly to literary work. She was the daughter of Charles Kemble (1775-1854), who was also a celebrated actor, associated in many appearances with his brother John Philip Kemble and their talented sister Mrs. Siddons.

Kemble, John (1817-1857), was a distinguished writer, who studied the Anglo-Saxon period in great detail, and published *The Anglo-Saxons in England*, a work which holds a permanent place in English historical literature. He was the son of Charles Kemble, the actor.

Kemble, John Philip (1757-1823), was a famous tragedian, and for many years manager of Drury Lane Theatre in London. He was brother to Mrs. Siddons, who first played with—and overshadowed—him in 1783. He took over the management of Covent Garden in 1802, and remained in charge there till the building was destroyed by fire six years later. On the restoration of the theatre in the year following occurred the famous O. P. riots, which rendered John Philip Kemble for a while unpopular. He retired in 1817, and died subsequently at Lausanne.

Kempenfelt, Admiral Richard (1718-1782), an English naval officer who saw distinguished service, and sank with his ship the *Royal George* off Spithead, through a shifting of the guns when refitting, which caused the vessel to capsize. Some six hundred of the ship's company perished with their admiral.

Kemp, Thomas (1298-1471), a monk of the St. Augustine order, whose life was mainly spent at a monastery near Zwolle. He was the author of *The Imitation of Christ*, a work which has been translated into all languages, and forms a devotional course which is highly valued.

Ken, Thomas (1673-1711), was one of the seven bishops sent to the Tower by James II. for declining to read the *Declaration of Indulgence*. Is remembered in these days mostly by some beautiful hymns that he wrote.

Kensington, Rev. Geo. Wyndham, Bishop of Bath and Wells since 1894 (b. 1845), was vicar of All Saints' Bradford, (1876-1882), and Bishop of Adelaide from 1882-1894.

Kent, Edward Augustus, Duke of (1767-1800),

was the fourth son of George III. and father of Queen Victoria.

Kepler, Johann (1571-1630), a renowned German astronomer, who made numerous discoveries in regard to the motions of planets, which he afterwards published. The system he formulated received the name of "Kepler's Laws."

Keppel, Augustus, Viscount (1725-1785), an English admiral, second son of the second Earl of Albemarle, Commander of the Fleet at the abortive battle with the French in the Channel in 1778, for which he was court-martialled, but, being acquitted, became First Lord of the Admiralty in 1782.

Kidd, Benjamin (b. 1785), a prominent writer on social philosophy. In 1804 he published his *Social Evolution*, the result of ten years' research, and has more recently written the *Principles of Western Civilisation*. Herbert Spencer Lecturer at Oxford University, 1908.

Kidd, Captain William (circa 1660-1699), was a famous pirate who, taking advantage of an appointment to the captaincy of a British ship sent out for the suppression of piracy, engaged in numerous piratical expeditions under cover of the English flag. He was hanged at Execution Dock in London after a sensational trial at the Old Bailey for piracy and the murder of his crew.

Kingslake, A. W. (1830-1891), achieved celebrity as a writer by two works of a very different character—*Eothen*, a charming record of travel, and his *History of the Crimean War*, in eight volumes. He was in Parliament from 1857 to 1868.

Kingsley, Charles (1819-1875), an English clergyman and novelist who gained much popularity by his numerous novels, including *Hyppasia*, *Westward Ho!* and *Hereward the Wake*. He was an influential leader of Christian socialism, a poet of some ability, and a Canon, first of Chester and later of Westminster.

Kingsley, Henry (1820-1866), a younger brother of Charles Kingsley, and one of the popular novelists of his day. His *Ravenshoe* showed exceptional gifts.

Kingsley, Mary (1862-1900), niece of Charles Kingsley, was an observant traveller who wrote some notable books relating her experiences in West Africa, when that region was little known.

Kipling, Rudyard (b. 1865), poet, novelist, and miscellaneous writer. Made himself celebrated while yet a youth by some exceedingly clever and characteristic sketches of Indian life written for the most part while performing journalistic duties in India. He subsequently settled in London and produced a remarkable succession of stories, sketches, ballads, and poems, all marked by intense vigour and individuality, and now and then revealing a vein of patriotic sentiment which greatly stirred the national pulse. In 1907 he was awarded the Nobel prize.

Kitchener of Khartum, Earl (b. 1850), entered the Army in 1871, and has since had a brilliant and successful career in nearly all parts of the world where British soldiers have signalled themselves in recent years. In Cyprus, Egypt, India, and South Africa he has done memorable work, and from 1902 to 1909 was Commander-in-Chief in India. For his services against the Khalifa he was raised to the peerage, and accorded a grant of £30,000; and for his vigorous work during the campaign against the Boers received his viscounty and a further grant of £30,000. In 1912 succeeded Sir Eldon Gorst as British Agent and Consul-General in Egypt. On the outbreak of the war with Germany (Aug. 1914) he was made Secretary for War, and his splendid work in that position has won universal admiration.

Kitts, John (1804-1854), a noted English writer on Biblical subjects, whose *Cyclopædia of Biblical Literature*, *Pictorial History of Palestine*, and other kindred works have found much favour.

Kneller, Sir Godfrey (1647-1723), the most celebrated portrait painter of his day in England, who enjoyed the patronage in succession of Charles II., James I., William II., Anne, and George I. He painted the portraits of the members of the Kit-Cat Club, and was buried in Westminster Abbey.

Knight, Charles (1791-1873), was one of the most active spirits in the popularising of literature in the

first half of the 19th century. His *Penny Magazine*, *Penny Cyclopædia*, and many other cheap works of an instructive and entertaining character were sold in immense numbers. He was also the author of a popular *History of England*.

Knollys, Viscount (b. 1838), was for many years Private Secretary to King Edward VII., and held a similar position under the present King up to 1913. He was Gentleman Usher to Queen Victoria from 1868 to 1901.

Knowles, Sir James (1831-1900), founder and editor of *The Nineteenth Century and After*, before the advent of which he had edited the *Contemporary*, and been an architect.

Knowles, Sheridan (1784-1866), was a British dramatist whose plays were at one time in great vogue. The best known are "The Hunchback," "The Love Chase," and "Virginius."

Knox, John (1505-1572), the famous divine and Reformer, who stirred Scotland to mighty religious impulses in the reign of Mary Queen of Scots, whom he boldly denounced as a Papist and a Jesuit. The Regent Morton, as John Knox was laid in his grave at Edinburgh, exclaimed, "There lies he who never feared the face of man."

Knox, Rt. Rev. Edmund Archbishop, D.D., Bishop of Manchester since 1897 (b. 1827). Educated at St. Paul's School and Oxford; Fellow of Merton College 1860, vicar of Aston 1867, later hon. Canon of Worcester and Bishop Suffragan of Coventry, and Archdeacon of Birmingham.

Koch, Robert (1843-1910), the most noted bacteriologist of the time, whose discoveries in connection with the bacillus of tuberculosis have borne such good fruit. A member of the Sanitary Commission at Berlin, and Director of the Institute of Infectious Diseases, he also closely studied the cause of Asiatic cholera and of bubonic plague, with results that have greatly widened knowledge on these subjects.

Komura, Count Jutarō (1853-1911), the astute diplomatist who advised the Japanese Generalissimo during the war with China, and was Governor of Manchuria during the first Japanese occupation. Educated in the United States,

into the Ministry of Justice at Tokio at an early age, and later was the Mikado's Minister at Washington, Seoul, and Peking successively, returning to Japan to take charge of Foreign Affairs in 1900. He acted with great shrewdness through the war with Russia, and came as Ambassador to Britain at the termination of Viscount Hayashi's term of office in 1906-1908.

Kosciusko, Thaddeus (1756-1817), a Polish general and patriot who achieved great distinction in 1794 by his gallant leading of the Polish revolutionary forces against Russia. After his defeat and imprisonment he resided abroad, and died in Switzerland.

Kossuth, Louis (1802-1894), a Hungarian patriot and leader, who in the struggle for his country's freedom in 1849 was for a time successful, but ultimately had to acknowledge defeat, and fled first to Turkey and afterwards to England, where he lived for some years. He died in Turin at the age of 92, and was buried at Pesth, the occasion being made one of national demonstration.

Kotschue, A. F. F. von (1762-1819), was a popular German dramatist, many of whose plays were translated into English and performed in this country with success, amongst them "The Stranger." He was in the diplomatic service, and long resided in Russia. After a varied career, he was assassinated by a German student at Mannheim as "a betrayer of the Fatherland." He wrote nearly 300 plays.

Kropotkin, Prince Peter (b. 1842), a geographer and explorer, who after a distinguished career in Russia, his native country, was imprisoned for favouring the political action of a working men's association, but escaped to England. Since then he has written many important books on socialistic and geographical subjects.

Krugers, Paul (1824-1904), President of the Transvaal Republic from 1881-1900. Filled a conspicuous place in South African history. In the various disputes with England he showed both obstinacy and want of perception. After Majuba he altogether

underestimated Great Britain's real strength, and came to believe that in a contest with England the Transvaal would, either by itself or with assistance on which he counted, defeat Great Britain. The penalty for this mistake had to be paid. The Transvaal became a British colony along with what had before been the Orange Free State and is now the Orange River Colony. Mr. Krüger ended his days in Holland. Permission was given to transfer his remains to Pretoria and he was buried there, being accorded the honour of a public funeral.

Krupp, Alfred (1812-1887), the famous German engineer, founded the great gun factories at Essen, which are the largest in the world. By his introduction of the Bessemer plan of casting steel and the steam hammer into Germany, he brought about an important development in heavy breech-loading guns, and built up factories which employed at the time of his death 20,000 workmen, whereas the forge over which in 1848 he first obtained control at Essen was manned by but three smiths.

Kubelik, Johann (b. 1880), an Austrian violinist—the son of a market gardener at Miehle, near Prague—who from the age of twelve began to play in public, and is one of the most renowned instrumentalists of the day.

Kublai Khan (1216-1294), a famous Mogul emperor and grandson of Jenghiz Khan. He greatly extended the Mogul empire by conquest, and lived in unparalleled splendour.

Kuroki, General (b. 1845), one of the leading Japanese generals, who won much distinction in the China-Japanese War, and still more when in command of Japanese forces against Russia.

Kuropatkin, General (b. 1849), Commander of the Forces of the Czar both before and during the Russo-Japanese War. He was on the General Staff before he was made Chief of the Asiatic Bureau at St. Petersburg, and Major-General at St. Petersburg. He was Chief of Staff in the Russo-Turkish War. The failure of the Russian arms against Japan was a serious blow to his reputation, and after Mukden he was recalled.

Kuyp, Albert (1805-1891), a much esteemed Dutch landscape painter, examples of whose work are to be found in the leading European galleries.

L

Lablaache, Luigi (1794-1858), a famous bass singer and actor, who for many years held a chief position in opera in the capitals of Europe, and was especially popular in London. He for some time held the position of singing tutor to Queen Victoria.

Labouchere, Rt. Hon. Henry, P.C. (b. 1831-1912), was in the diplomatic service from 1854-64. Was in Parliament in 1866, and again in 1867; then became connected with journalism; was in Paris during the Siege, and wrote the *Diary of a Besieged Resident*; subsequently joined Edmund Yates in starting *The World*, and later founded *Truth*. Represented Northampton from 1880 to 1906, and was made a Privy Councillor on his retirement. His Life was published in 1913.

La Chaise, François de (1604-1709), a Jesuit who was the favourite and Confessor of Louis XIV., and it was after him that the famous Père Lachaise cemetery in Paris was named.

Lacordaire, Jean Baptiste (1802-1861), was a leading character in the religious developments in France from 1820 onward; both as a preacher and a writer he attained great celebrity.

Lafayette, Marquis de (1757-1834), a celebrated soldier and patriot who fought on the side of the Colonists in the American War of Independence, and, afterwards returning to France, was made Commander-in-Chief of the National Guard, and during the Revolution was very active, helping later in placing Louis Philippe on the throne.

La Fontaine, Jean de (1621-1695), the celebrated French poet and fabulist. His fables have been translated into all languages, and are unique.

Lagrange, Joseph L., Comte (1735-1813), was a noted French astronomer and mathematician, who

was ennobled by Napoleon I. for his contributions to science. His work on *Analytical Mechanics* is a standard treatise.

Lalande, Joseph G. L. de (1732-1807), was a famous French astronomer and director of the Paris Observatory. He founded the Lalande yearly prize for the best astronomical work or observation and wrote a well-known treatise on astronomy.

Lamarck, Chevalier de (1744-1829). A French naturalist who devoted himself with much success to the study of zoological and botanical science. His chief work was the *Histoire Naturelle des Animaux sans Vertèbres*.

Lamartine, Alphonse (1790-1869), a French writer and statesman who was prominent in the Revolution of 1848, and was a member of the provisional government. He was an unsuccessful candidate for the Presidency in 1871 and after that took little part in political affairs. He was a prolific writer, his best known works being a *History of the Revolution of 1848* and a *History of the Girondins*.

Lamb, Charles (1775-1834), one of the most delightful of our essayists. His *Essays of Elia* are characterised by great felicity of expression, much genial humour and an ardent love both of rural life and London life. He was a clerk in the office of the East India Company for thirty-five years. In some of his writings he was assisted by his sister, Mary Lamb, to whom he was greatly devoted.

Lambert, General (1619-1692), one of the ablest of Cromwell's generals and a native of Kirkby Malham in Yorkshire. He did distinguished service at Marston Moor, Dunbar, and Worcester. At the Restoration he was ordered into exile, and spent the remainder of his life on the island of Guernsey in the peaceful occupation of gardening.

Lancaster, Joseph (1778-1838), a zealous promoter of popular education, whose system of utilising monitors was widely adopted.

Lander, Richard Lemon (1804-1834), a native of Truro, was an adventurous and promiscuous explorer, the first to trace and describe the course of the Niger. His career was cut short by a wound inflicted by natives.

Landon, Letitia Elizabeth (1792-1838), an English poetess, whose verses, written above the signature "L. E. L.," were in great favour while she lived and are still occasionally read. She died at Cape Coast Castle, where she was residing with her husband, the Governor, Mr. George Maclean, her end being occasioned by prussic acid, but whether accidentally taken or otherwise has never been fully proved.

Lander, Arnold Henry Savage (born at Florence and grandson of the poet), is an enterprising traveller and explorer. The story of his capture, imprisonment and torture in Tibet is one of the most thrilling travel-books of modern times. His *In the Forbidden Land*, *Alone with the Hermit*, *Amu*, and *Tibet and Nepal* are full of adventure and information. In 1913 published a fascinating work on travels and explorations in "unknown Brazil."

Lander, Walter Savage (1775-1864), a writer and poet of strong genius. He wrote, a fine poetic tragedy "Count Julian" in 1812, and in later life published several other volumes of poems. The work by which he is best known, however, is his "Imaginary Conversations."

Landseer, Sir Edwin (1802-1871), the most celebrated English animal painter of his time. He was elected R.A. in 1830 and knighted in 1850. Many of his pictures are well known to the public by the frequency with which they have been engraved. He designed the lions for the base of the Nelson Monument in Trafalgar Square, and was buried in St. Paul's Cathedral.

Lane, E. W. (1801-1876), an English writer to whom we owe the most popular translation of the *Arabian Nights*. He was also the author of a number of books dealing with ancient Egyptian and Arabic subjects, and was one of the most prominent Orientalists of the 19th century.

Langfranc (1005-1085), an ecclesiastic who came to England with William the Conqueror, who made him

- his chief Counsellor, Lanfranc was successively Prior of Bec, Abbot of Caen, and Archbishop of Canterbury, and rebuilt the Cathedral.
- Lang, Andrew**, (1844-1919), one of the most versatile of modern authors. A graceful writer of Society verse, a brilliant essayist, an entertaining novelist, a successful historian, an author of numerous fairy tales, and a delightful handler of folk-lore, and ancient superstitions, he covered a vast extent of literary ground. In 1907 he finished his *History of Scotland*.
- Lang, Rt. Rev. Cosmo Gordon**, D.D., Archbishop of York since 1908 (b. 1864). Educated at Glasgow University and Oxford, Fellow of All Souls', Oxford, since 1888; Vicar of Portsea, 1896-1901; Canon of St. Paul's, 1901; Bishop of Stepney, 1901-1908.
- Langhorne, Dr. John** (1735-1779), was a noted divine and writer, whose translation of *Plutarch's Lives* is still the standard English version.
- Langland, or Langley, Robert** (circa 1330-1400), author of *The Vision of Piers Plowman*, which had a remarkable influence in bringing about the Reformation. He was a Fellow of Oriel College, Oxford, but beyond that little is known of him.
- Langton, Stephen** (1157-1228), was Archbishop of Canterbury from 1213, and one of the chief instruments in forcing the Magna Carta from John. His brother, Simon Langton, who died in 1248, was also a noted ecclesiastic who sided with the barons against the King and the Pope, but attained to great influence at Court under Henry III.
- Lankester, Professor Sir Edwin Ray** (b. 1847), one of the most learned of present-day scientists, and has written innumerable books on natural history subjects. He founded in 1881 the Marine Biological Association, and was appointed Director of the Natural History Departments of the British Museum in 1898, retiring in 1906, in which year he was President of the British Association.
- Landowne, Henry, 5th Marquis of** (b. 1845), has been a prominent member of recent Conservative Governments, having served as Secretary for War from 1895 to 1900, and was Secretary for Foreign Affairs from 1900 to 1905. He was Governor-General of Canada from 1889 to 1893, and from 1898 to 1899 was Viceroy of India. He is one of the trustees of the National Gallery. Leader of the Opposition in the House of Lords after the succession of the Liberals to power in 1906.
- Lao-Tse**, one of the ancient philosophers of China, who is supposed to have flourished about 600 B.C. The work upon which his fame rests, and which forms the foundation of the Tao sect, was entitled *The Path to Virtue*.
- Laplace, Marquis de** (1749-1827), a celebrated French astronomer whose writings were of great scientific value. He is regarded as the author of the nebular hypothesis, also propounded, independently, by Kant.
- Lardner, Dionysius** (1793-1859), was for a number of years Professor of Natural Philosophy and Astronomy at University College, London, and published a *Cabinet Cyclopædia of the Arts and Sciences*, which extended to over 130 volumes.
- Lardner, Nathaniel** (1804-1908), a noted English Nonconformist divine, author of a vigorous, defence of Christianity entitled *On the Credibility of the Gospel History*. He was born and died at Hawkhurst.
- Le Rochefoucauld, F., Duc de** (1613-1680), a renowned French statesman and writer of the Louis XIV. period. His *Reflections and Moral Maxims* is a classic.
- Latimer, Hugh** (circa 1485-1555), the English Reformer, who became Bishop of Worcester under Henry VIII., but when Mary came to the throne was condemned as a heretic, and burned at the stake with Ridley "at the ditch over against Balliol College" in the city of Oxford.
- Lea, William** (1823-1843), an eminent ecclesiastic, who, after filling minor bishoprics, was made Archbishop of Canterbury in 1843. He did much to direct the policy of Charles I., and when trouble followed, he was impeached by the Long Parliament and committed to the Tower. Was tried for treason and beheaded.
- Lauderdale, Duke of** (1616-1682), the son of the first Earl of Lauderdale, was one of the famous "Cabal" Ministry, and a notable supporter of Charles II. before the Battle of Worcester, during which engagement he was taken prisoner. Later he persecuted the Covenanters, lost royal favour and died in disgrace.
- Laurier, Sir Wilfrid** (b. 1841), Premier of Canada from 1896 to 1911, and the only French-Canadian, who has held that position. An ardent Liberal Imperialist, he was instrumental in 1897 in giving the Mother Country Preferential trade with Canada. Defeated at the general election of 1911 on the Reciprocity Bill. Was a prominent figure at the Imperial Conferences of 1907 and 1911.
- Lavater, Johann Kaspar** (1742-1801), an eminent Swiss preacher, poet, and writer, whose book on physiognomy, which he endeavoured to reduce to a science, is a very remarkable production.
- Lavoisier, Antoine Laurant** (1743-1794), often called the "father of modern chemistry," was born in Paris, and was the first to establish the fact that combustion is a form of chemical action. He was a victim of the "Terror."
- Law, Rt. Hon. A. Bonar**, M.P., P.C. (b. 1858), a retired Scotch iron merchant who has been in Parliament since 1900, with short intermissions, and in 1902-5 was Parliamentary Secretary to the Board of Trade. A vigorous speaker and ardent Tariff Reformer. In Nov. 1911 succeeded Mr. Balfour as leader of the Unionist Party.
- Law, John** (1671-1729), a Scottish financier who having vainly proposed a paper currency to his own countrymen, crossed to France and succeeded in getting the French Government to take it up. Later on he projected a "Mississippi Scheme" that was taken up with avidity by French investors, but turned out a complete failure.
- Law, William** (1686-1761), author of *The Serious Call to a Devout and Holy Life*, a book which has exercised a great influence upon minds predisposed to religious work, was a native of Kingscliffe, Northampton, and a man of noted piety.
- Lawrence, Rt. Hon. Sir John Compton** (1832-1913), Judge of the High Court 1890-1912, was called to Lincoln's Inn in 1860, and represented South Lincolnshire in the Conservative interest 1880-1885, and the Stamford Division 1885-1890. He was recorder of Derby 1880-1890, and became a Justice of the King's Bench Division in the latter year.
- Lawrence, Sir Alfred Tristram** (b. 1843), Judge of the High Court, was educated at Trinity Hall, Cambridge, called to the Bar at the Middle Temple in 1869, subsequently appointed Recorder of Windsor, and in 1872 became Junior Counsel to the Admiralty. He was elevated to the Bench 1904, and received a knighthood.
- Lawrence, Lord** (1811-1879), was a younger brother of Sir Henry Lawrence (next named), the organiser of the defence of Lucknow in the Indian Mutiny. He also was highly distinguished in the Mutiny, which he did much to put down, earning for himself, by his great administrative capacity, the title of "Saviour of India." He served as Governor-General from 1863-1869 and was raised to the peerage. Was first Chairman of the London School Board. He was buried in Westminster Abbey.
- Lawrence, Sir Henry** (1805-1879), a distinguished Indian General, who after much brilliant service in the Cabul and Sutlej campaigns, and later as Chief Commissioner of the Punjab, was in prominent command at the outbreak of the Mutiny, taking charge of Lucknow, where he was one of the first to fall during the memorable siege, being fatally injured by the bursting of a shell.
- Lawrence, Sir Thomas** (1759-1830), one of the fashionable portrait painters of his day, and among the most successful in his own line of all time. Was President of the Royal Academy from 1826 to 1831, death. Knighted in 1828. Lawrence enjoyed the friendship of George IV., as Prince of Wales, and after his accession, and painted most of the

- sovereigns of Europe and many other notable personages with great charm and distinction.
- Lawson, Sir Wilfrid** (1829-1905), a popular baronet who achieved much prominence as a Liberal politician and champion of the Temperance cause. Was a witty and eloquent speaker, and a man of much personal attractiveness. He stood high amongst the leaders of the Local Option movement and was at the head of the United Kingdom Alliance for the Suppression of the Liquor Traffic.
- Layard, Sir Austin** (1817-1894), was an earnest archaeologist, who gained considerable fame by his explorations and writings upon the ruins of Nineveh and Babylon. He filled several diplomatic appointments at one time and another, and was Ambassador to Turkey when the Cession of Cyprus was concluded in 1877.
- Leader, Benjamin Williams, R.A.** (b. 1831), one of the leading British landscape painters, whose pictures are remarkable for their fidelity to Nature, beauty of treatment, and brilliant colouring.
- Lecky, Rt. Hon. W. E. Hartpole** (1838-1903), the eminent historian and member of the Order of Merit. He was in Parliament for some years, and was an opponent of Home Rule. Was made P.C. in 1897. His best-known works are *The History of Rationalism* and *The History of European Morals*.
- Lee, Nathaniel** (circa 1650-1692), an English dramatist, whose tragedies, "The Rival Queens," "Theodosius," and "Nero," were all plays of mark. He was a friend of, and on one occasion collaborated with, Dryden.
- Lee, Robert Edward** (1810-1870), was one of the ablest of the Confederate generals in the American Civil War, and Commander-in-Chief when the final surrender was made at Appomattox in 1865.
- Lee, Sir Sidney** (b. 1859), the greatest living authority on Shakespeare, and was joint editor with Sir Leslie Stephen of the *Dictionary of National Biography*, exercising undivided control over the completion of that monumental work during the last ten years of its publication. His article on King Edward VII., in a supplementary volume published in 1912 caused some sensation by a freedom of comment unusual in dealing with illustrious personages recently dead.
- Leach, John** (1817-1864), perhaps the most popular of all the *Punch* artists, whose sketches and cartoons were the life and soul of the paper for many years.
- Leibnitz, Gottfried W. von** (1646-1716), the German writer and philosopher who propounded a new system of philosophy, in which he maintained that the ultimate elements of the universe are individual centres of force or monads.
- Leicester, Robert Dudley, Earl of** (1532-1588), was the famous favourite of Queen Elizabeth, and was appointed to the command of the Land forces when the Armada threatened. He had an adventurous and chequered career, and at one time it was believed he aspired to wed the Queen. After the death of his first wife, Amy Robsart, this idea was strengthened, and gave rise to much opposition to his advancement on the part of other statesmen. His second marriage with the Countess of Essex greatly annoyed Elizabeth.
- Leichhardt, Friedrich** (b. 1823), was a native of Berlin who gained renown by his Australian explorations, more particularly in Northern Queensland. He was never heard of after April, 1848, and is supposed to have lost his life on the Cape York Peninsula.
- Leighton, Lord** (1830-1896), a successful English painter and sculptor who chiefly adhered to classical subjects and was renowned for his extreme delicacy of finish and splendour of colour. Among his more famous paintings are "Venus Disrobing," "Clytemnestra," and "The Garden of the Hesperides." He was made R.A. in 1850, and from 1878 to his death was P.R.A., being raised to the peerage only a few months before his death.
- Leighton, Robert** (1611-1684), a noted Scottish divine who was greatly revered for his piety and for a time was Bishop of Glasgow. His *Rules for a Holy Life* is a work of remarkable purity of thought.
- Leland, or Leyland, John** (circa 1560-1599), a famous English antiquary who made the tour of the Kingdom while Chaplain to Henry VIII. and thereafter wrote his well-known *Itinerary*.
- Lely, Sir Peter** (1618-1680), the famous painter to whom we owe so many of the portraits of the beauties of the Court of Charles II. now exhibited at Hampton Court. He was a German, whose proper name was Van der Faes. He came with the Prince of Orange to England in 1641, and was employed successively by Charles I., Cromwell, and Charles II.
- Lempriere, John** (1760-1824), was a Fellow of Pembroke College, Oxford, and achieved no small distinction by the compilation of a *Classical Dictionary*. He also wrote a *Universal Biography*.
- Lenham, William** (1593-1602), the Speaker of the "Long Parliament," whose refusal to answer the King's inquiry respecting the presence of the famous "Five Members," marked him as a person of strong character. At the Restoration he was a Royalist.
- Leofric, Earl of Mercia**, was a powerful Saxon noble of the 11th century, and husband of Lady Godiva. He was mainly instrumental in the election of Edward the Confessor as King.
- Leonardo da Vinci** (1452-1519), one of the greatest all-round geniuses the world has known. Famed as the painter of "The Last Supper," "The Head of Medusa," and other great works.
- Leonidas** was king of Sparta at the time of the invasion of Greece by Xerxes, 481 B.C., and led the defence of the Pass of Thermopylae, where he fell.
- Leopold I.**, King of the Belgians from 1835 to 1865, was a son of Francis, Duke of Saxe-Coburg, and uncle both of Queen Victoria and of the Prince Consort. He was a wise and enlightened ruler.
- Leopold II.** (1835-1909), King of the Belgians, son of Leopold I., whom he succeeded in 1865. Was founder and Sovereign of the Congo Free State.
- Le Sage, Alain René** (1668-1747), author of the famous stories *Gil Blas* and *Le Diable Boiteux*, also a dramatist of note. He died at Boulogne.
- Leslie, Charles Robert** (1794-1859), an eminent British painter and Academician; produced many notable pictures, including "The Play-Scene from Hamlet," "Sancha Panza and the Duchess," etc.
- Leslie, David** (d. 1682), a Scottish general who fought under Cromwell at Marston Moor, but later, went over to the Royalists. At the Restoration he was created Lord Newark.
- Lessops, Vicomte Ferdinand de** (1805-1894), an engineer of large ideas who, while Vice-Consul at Alexandria, conceived the plan of the Suez Canal, which work was completed in 1869. He afterwards projected the original Panama Canal, which failed.
- Lessing, Gotthold Ephraim** (1729-1781), a noted German critic and dramatic poet, whose most celebrated work was his "Laocoon."
- Levan, Alexander, 1st Earl of** (1580-1661), a Scottish general who won much distinction in a service of thirty years in the armies of Charles IX. and Gustavus Adolphus of Sweden. Subsequently at the head of the Wirral Covenanters, joined the standard of Charles I., distinguished himself at Marston Moor.
- Lever, Charles** (1806-1872), a novelist of force and humour, who met with great success in his depiction of Irish life and character. His *Harry Lorrequer* and *Charles O'Malley* have gone through many editions.
- Lever, Sir William Hesketh, Bart.** (b. 1851), Chairman and founder of Lever Brothers, Ltd., Port Sunlight, has for many years been prominent as a business pioneer and man of affairs, and one of the most practical exponents of the industrial partnership movement. Represented the Wirral division of Cheshire from 1906 to 1910, since the war broke out has taken an active interest in promoting recruiting and military matters generally in Cheshire and Lancashire; prevented the lease of Stafford House (now Lancaster House) to the nation for the purposes of the London Museum (p. 11). Is Grand Officer of the Belgian Order of Leopold II., and Hon. A.R.I.B.A.
- Leverrier, Urbain** (1811-1877), the French astronomer, co-discoverer with John Couch Adams of the planet Neptune.

Lewis, George Henry (1817-1878), an English writer of power and versatility, whose studies in philosophy, natural history and literature, resulted in several highly valuable works. He wrote a *History of Philosophy*, a *Life of Goethe* and *Problems of Life and Mind*. He was the first editor of the *Fortnightly Review*, and it was due to his association with George Eliot (Miss Mary Ann Evans) that she was led to write her famous novels.

Lewis, Sir George Henry (1833-1911), senior member (up to 1910, when he retired) of the firm of Lewis and Lewis, solicitors, Lily Place, who were concerned in so many celebrated cases, and represented so many famous clients, as to establish a world-wide reputation.

Lewis, Matthew Gregory (1773-1818), a writer, of London birth, who caused a great sensation in 1795 by publishing his novel, *The Monk*, a strange mixture of mystery, horror and indelicacy. It was clever, however, and made him famous. He wrote many gruesome ballads, such as "Alonzo the Brave," and was author of a number of dramas conceived in a similar vein, some of which long enjoyed popularity. He was for some years in Parliament and died at sea from yellow fever, on returning from a visit to Jamaica, where he owned property.

Liddon, Canon Henry Parry (1829-1890), one of the ablest divines of his day, whose preaching at St. Paul's from 1870 to his death was eminently distinguished and attracted large congregations. His Bampton Lectures on "The Divinity of Our Lord," delivered in 1866, gained him a front position among modern religious thinkers and exponents.

Liebig, Justus, Baron von (1803-1873), a German chemist and professor, who attained world-wide celebrity for his many discoveries in connection with applied chemistry. Among other things, he invented a famous extract of meat. He frequently visited England, where he was held in great esteem, and many of his scientific works have been translated into our language.

Lightfoot, Joseph Barber, Bishop (1826-1889), held the See of Durham from 1870 to his death, and was one of the revisers of the Authorized Version of the New Testament. He was a great Biblical scholar and commentator.

Li Hung Chang (1823-1901), an astute and enlightened Chinese statesman, who by shrewd policy rose from a humble position to be Chief Minister, and exercised almost supreme control for a number of years over the affairs of his native Empire.

Liburne, John (1618-1675), was a zealous opponent of Anglican episcopacy, and was pilloried and imprisoned for his outspoken tracts. For some years before his death he was a member of the Society of Friends. His brother, Robert Liburne (1613-1665), was an officer of the Parliamentary Army, and one of the Regicide Judges; he died in prison.

Lilly, William (1760-1841), a noted astrologer and prophetic almanac compiler, of considerable influence during the Civil War period.

Linacre, Thomas (circa 1460-1524), was an eminent doctor, and the founder of the College of Physicians. In later life he became a divine, and also published translations of Galen's works.

Lincoln, Abraham (1800-1865), was a native of Kentucky; in early life became a lawyer, and was returned to Congress in 1846 from Springfield, Illinois, and in 1861 was elected President of the United States, when he delivered his famous anti-slavery pronouncement, which led to the Civil War of 1861-1865. In 1864 he was re-elected, and in the following year was assassinated by John Wilkes Booth.

Lincolnsire, Marquess of—Charles Robert Wynn-Carrington, K.G., P.C., &c. (b. 1843), is an active supporter of Liberal measures, and Joint Hereditary Lord Great Chamberlain. From 1885-1890, Governor of N. S. Wales; 1890-1895, Lord Chamberlain; 1905-1911, President of the Board of Agriculture. Lord Privy Seal, 1911-12.

Lloyd, Jenny (1800-1871), a famous prima donna, who made a great sensation by her wonderful voice for some seasons in London and in America, from

1847 onward. She was a native of Stockholm, and as a girl had sung in the streets. She married Mr. Otto Goldschmidt, the composer, and on her retirement settled down in England.

Kindley, Lord (b. 1888), called to the Bar 1890, and for many years enjoyed a lucrative practice. In 1895 was made Justice of the Court of Common Pleas, in 1881 Lord Justice of Appeal, in 1897 Master of the Rolls, and from 1900 to 1905 was Lord of Appeal in Ordinary.

Lingard, John (1771-1851), an English scholar and priest who, for the greater part of his life, was the head of a Roman Catholic Mission at Hornby. Wrote a highly valuable *History of England* from the Roman point of view, declined a cardinalate, and was granted a Civil List pension of £200 a year.

Linnaeus, Carl von (1707-1778), a tireless Swedish doctor and scientist who became one of the most distinguished of naturalists, and the founder of modern botany. His *Sytema Naturae* was published in 1735, and other monumental works followed. He was the first to expound the true principles for defining genera and species. His published works amounted to more than 180.

Lipton, Sir Thomas J., Bart., K.C.V.O. (b. 1850), after an adventurous early career in America, started shopkeeping in his native Glasgow, and in course of a few years enlarged his operations to such an extent that he became the largest shopkeeper in the world, with establishments in every British town of importance. Is renowned for his charities, and his attempts to win the America Yachting Cup. Was knighted in 1898, and created a baronet in 1903.

Lister, Lord (1827-1912), achieved renown for his discovery of the antiseptic treatment which has accomplished so much on behalf of the science of surgery. From 1865 to 1910 he was President of the Royal Society; made a Baronet in 1881; raised to the peerage in 1897; and in 1902 was appointed one of the original members of the Order of Merit.

Liszt, Franz (1811-1886), a pianist and composer of splendid powers. As a pianist he was unequalled for many years. His best known compositions are his "Hungarian Rhapsodies."

Liverpool, Chas. Jenkinson, 1st Earl of (1770-1828), Prime Minister for nearly 15 years (1812-1817), a period which saw the French war successfully concluded and the tidings of the country over much of the troubles and unrest which followed at home. A statesman of an eminently practical turn.

Livingstone, David (1813-1873), the explorer and missionary, whose discoveries in Africa greatly advanced geographical knowledge. In 1871 considerable apprehension was felt in regard to his fate, and an expedition was sent out under H. M. Stanley, who ultimately discovered him near Lake Tanganyika. Livingstone died in 1873 in Africa, his remains being buried in Westminster Abbey.

Livy (59 B.C. A.D. 17), the distinguished Roman historian. Wrote a *History of Rome* in 142 books, 35 of which only have been preserved.

Llando, Rt. Hon. Harry Matthews, 1st Viscount (1826-1913). Conservative statesman, was at the Bar and in the House of Commons for many years, and served as Home Secretary from 1886 to 1892.

Lloyd George, Rt. Hon. D., M.P. (b. 1863), one of the most active of Liberal politicians who has represented Carnarvon since 1890. Is an effective speaker, strong and keen in debate. At the close of 1905 made President of the Board of Trade. Carried through a successful mediation between railway directors and railway employees in 1907. Chancellor of the Exchequer since 1908, and in 1909 introduced the famous Budget which was thrown out by the Lords, but passed the following year. Introduced the National Insurance Bill in 1911. In 1913 was attacked in connection with certain investments in the American Marconi Company, but the charges were declared unproved. The most arduous duties of his career have fallen to him in financing the war, in which he has shown great capacity and courage.

Locke, John (1632-1704), one of the most profound thinkers of the 17th century, and author of the remarkable *Essay on the Human Understanding*.

Lockhart, J. G. (1794-1864), a well-known writer and son-in-law of Sir Walter Scott, whose life he wrote. He was editor of the *Quarterly Review* from 1825 to 1829.

Lookyay, Sir Norman, K.C.B., F.R.S. (b. 1856), a distinguished scientist and astronomer. Elected F.R.S. in 1889, and is Director of the Solar Physics Observatory, South Kensington, and Professor of Astronomical Physics at the Royal College of Science. President of the British Association 1903-1904. Has been chief of several Government Eclipse Expeditions.

Lodge, Sir Oliver Joseph (b. 1851), Principal of Birmingham University, an inventor and scientist of note, interested in psychical research, and an advocate of compromise between science and religion. Propounded a speculative educational catechism which attracted considerable attention in 1906; published a work on *Faith and Science* in 1907. President, British Association, 1913.

London, Bishop of. (See Ingram.)

Londonberry, Chas. Stewart Vane-Tempest, 6th Marquis of (b. 1829). Conservative statesman, who has been in turn Postmaster-General, President of the Board of Education, and Lord President of the Council. A prominent figure in the Ulster anti-Home-Rule campaign 1912-14.

Long, Rt. Hon. Walter, M.P. (b. 1854). Conservative statesman, has held office successively as Parliamentary Secretary to the Local Government Board, President of the Board of Agriculture, and President of the Local Government Board.

Longfellow, H. W. (1807-1882), an American poet who produced a number of volumes of poetry of great purity of thought and beauty of language, being especially successful in tender domestic pieces. His works were almost as popular in England as in his own country.

Lorburn, Lord (b. 1846). Before being appointed to the office of Lord Chancellor in 1905 he had, as Sir R. T. Reid, filled the positions of Solicitor-General and Attorney-General, and achieved prominence at the Bar and in Parliament, representing first Hereford and then Dumfries, and acting also as Counsel to the University of Oxford. Was on the Venezuelan Boundary Arbitration Commission in 1899. Resigned the Lord Chancellorship in June 1912. In Sept., 1913, wrote a much discussed letter to the *Times* suggesting a conference on Home Rule; in 1914 was a member of the Murray-Macdonald Committee.

Lotze, Rudolph Hermann (1817-1881), a renowned German psychologist, who was Professor of Philosophy at Göttingen from 1844 to 1880, and was appointed to a similar position at Berlin shortly before his demise. He wrote much and ably on logic and metaphysics, his greatest work being his *Microcosmism*.

Loubet, Emile (b. 1838), ex-President of France, was the son of a poor farmer, studied for the law, became a successful advocate and was returned to the National Assembly in 1876. Was made Senator in 1885, filled the office of Premier in 1892, was President of the Senate in 1895, and in 1899, on the sudden death of President Faure, became President of the Republic, an exalted position which he filled with great distinction until 1906.

Louis XI. (1423-1483), has the reputation of being a monarch of extreme craftiness and strangely ruled by superstition. He was a man of great force of character, however, conducted his wars with vigour, and considerably strengthened the kingly power in France.

Louis XIV. (1638-1715) reigned over France from 1643 to his death. He was responsible for corrupting Charles II., for the persecution of the Huguenots, the repeal of the edict of Nantes, and for the war of the Spanish Succession. He was a sensual, luxury-loving king, but encouraged arts and literature.

Louis XV. (1710-1774), called the Well-Beloved. Was the most notorious of his race, and an inveterate hater of England. In the war between England and France for the possession of Canada, England was victorious, however, and Louis tried to console himself for his defeat by greater devotion to his favourites at Versailles. He left France impoverished and discontented.

Louis XVI. (1754-1793) was the apathetic and unfortunate French king who married Marie Antoinette, allowed his country to be swayed by first one statesman and then another, until at last he saw himself divested of every shred of power by the Revolutionists. How he and his Queen were subsequently imprisoned and sent to the guillotine all students of French history know.

Lover, Samuel (1797-1868), an Irish song-writer and novelist who won considerable fame. His *Handy Andy* is one of the most humorous stories of Irish life and character ever written, while many of his songs — "Molly Bawn," "The Low-Back'd Car," "Father Molloy," etc., — have a permanent place in the history of Irish minstrelsy.

Lowell, James Russell (1819-1891), an American writer and poet of singular power and humour who made his first hit with the *Biglow Papers* in 1848, and was editor of the *Atlantic Monthly* from 1857 to 1861. Was Minister to Spain, from 1877 to 1880, in which latter year he was appointed American Ambassador to London, a position which he held until 1885.

Lowther, Rt. Hon. J. W., Speaker of the House of Commons (b. 1855), was Chairman of Ways and Means from 1895 to 1905, when he was elected to his present post, M.P. for Penryn since 1886.

Loyola, Ignatius de (1491-1566), was the founder of the order of Jesuits. He was of noble birth and for a time devoted himself to arms, but after being wounded at the siege of Pampluna gave his life up to religion. After the formation of his Society he was made the First General of the Order, a position which he held for the rest of his life. Pope Gregory XV. canonised him in 1622.

Lucretius, Titus Carus (95 B.C.-52 B.C.), the Roman poet whose "De Rerum Natura" is noted for its exposition of the atomic theory of Leucippus.

Lucy, Sir Henry W. (b. 1845), a well-known journalist and author who, for a number of years, amongst other activities, as "Toby, M.P.," has wittily travestied for *Punch* the proceedings of the Legislature. He has also written numerous books of contemporary Parliamentary history and anecdote, and is the author of a clever novel entitled *Gideon Fleyce*. His *Sixty Years in the Wilderness* was published in 1909, in which year he was knighted.

Lucard, Lieut.-Col. Sir F. D. (b. 1858), has a brilliant record for services in Africa and India. Was in the Afghan War of 1879; Soudan, 1882; Burma, 1886-1887; Uganda, 1890-1892; First High Commissioner Northern Nigeria, 1900-1906; and was Governor of Hong-Kong, 1907-12; appointed Governor and Commander-in-Chief of Nigeria in 1912.

Luther, Martin (1483-1546), the great German Reformer. Was ordained a priest in 1507. Became Professor of Theology at the University of Wittenberg and until 1517 was an orthodox Roman Catholic. His first idea of revolt occurred when he saw indulgences being sold, a practice which he openly condemned. For this he was excommunicated, and summoned before the Diet at Worms, where he made a memorable defence. He then separated himself from the Roman Catholics, and began to preach the Reformed Religion, his doctrine being formulated in the confession of Augsburg. He lived to see the principles of the Reformation widely established.

Lycurgus, the Spartan legislator, who flourished about 824 B.C., and for a brief period occupied the throne, in succession to his brother Polydeutes, whose wife giving birth to a son some months after her husband's death, Lycurgus abdicated in favour of the child, and travelled abroad for many years. On his return, he found the country disorganised, and set about the work of his life, drawing up a series of laws which endured for 700 years.

Lyell, Sir Charles (1797-1875), a distinguished geologist whose researches shed great light upon geological science, and whose *Principles of Geology* placed that science on an empirical basis. Was a supporter of the Darwinian theory. Was twice President of the Geological Society, and in 1864 President of the British Association. Was knighted

in 1848, made a baronet in 1864, and was buried in Westminster Abbey.

Lyne, Hon. Sir William J., K.C.M.G. (1844-1913), native of Tasmania, settled in Queensland in 1864; from 1880 to 1887 sat for Hume (N.S.W.) and was a member of the Dibbs and Jennings Ministry; Premier 1899-1901; Minister of Trade and Customs, 1903-1904 and 1905-1907, and Treasurer, 1907. In the latter year visited the Imperial Conference.

Lyttelton, Rt. Hon. Alfred, M.P. (1857-1913), sat in Parliament for Leamington from 1895-1906, and succeeded Mr. Chamberlain as Colonial Secretary in October, 1909. As a barrister he became a K.C. and was appointed Recorder of Hereford in 1894 and Recorder of Oxford in 1895. Was M.P. for St. George's, Hanover Square, from 1910 to his death.

Lytton, Edward Bulwer, 1st Lord (1803-1873), a prominent and prolific novelist and dramatist, whose romantic stories made him famous, and included *Pelham*, *The Last Days of Pompeii*, *Ernest Maltravers*, *Harold*, and *The Caxtons*. Of his plays, "The Lady of Lyons" and "Money" still keep the stage.

I

Maartens, Maarten (b. 1858) (real name J. M. W. Van der Poorten-Schwarz), a Dutch novelist who writes in English, and is author of many stories which have attained deserved popularity, among them *The Sun of Ghosts*, *Livinghams*.

Macadam, John Loudon (1756-1836), was a Scottish engineer who invented the process of road-repairing which bears his name, and consists of covering the highway with small pieces of hard stone of small and regular size, and forming a bed of them by heavy uniform pressure. His method was widely adopted. He was made surveyor-general of the metropolitan roads, and received a Parliamentary grant, refuting a knighthood, which was, however, conferred on his son, Sir James Nicoll Macadam.

Macara, Sir C. W. Bart. (b. 1845), President of the English Federation of Master Cotton Spinners' Association, and of the Manchester Cotton Association, and a member of the Industrial Council, which he may be said to have originated. Originator of the Lifeboat Saturday movement.

Macaulay, Thomas Babington, Lord (1800-1859), the most brilliant historian of the Victorian era. His fame was assured by his *Essays* and *Lays of Ancient Rome*, and his *History* did more than confirm it. He was a son of Zachary Macaulay (1768-1838), the anti-slavery agitator, and sat in Parliament as member for Calne for some years, also serving for five years as a member of the Supreme Council of Calcutta. On his home-coming, he again entered Parliament as member for Edinburgh, and gained a new celebrity by his speeches. He at different times filled the offices of Paymaster-General and Secretary for War, and was raised to the peerage in 1857. Both Lord Macaulay and his father lie buried in Westminster Abbey.

Macbeth, according to Holinshed's *Chronicle*, was the usurping Scottish king who succeeded Duncan, whom he murdered. Macbeth was slain by Duncan's son Malcolm in 1056 after a reign of seventeen years. His history forms the subject of Shakespeare's celebrated tragedy.

MacCallum, Col. Sir H. E., G.C.M.G. (b. 1827), has filled several important diplomatic posts, including the Governorships of Newfoundland and Natal, and was appointed Governor of Ceylon 1907-14.

McCarthy, Justin (1830-1912), politician, novelist, and historian, was born in Cork, and on leaving school became connected with journalism, first in Liverpool and then in London, and from 1870 to 1896 was a prominent member of the Irish Party in Parliament, succeeding Mr. Parnell in 1890 in the leadership of the party. He is best known as a writer, however, and his *History of the United Irishmen* is at very popular work. He wrote numerous novels. Was awarded a Civil List Pension of £250 in 1903.

Macdonald, J. Ramsay, M.P. (b. 1866), sits for Leicester as Labour member; Chairman of the Independent Labour Party, 1906-9; Secretary to the Labour Party, 1909-11; Leader of the Labour Party, 1911. Editor of the *Socialist Library*.

MacKay, Charles (1814-1880), a writer of popular songs which had a great vogue as set to music and sung by Henry Russell in his entertainment descriptive of life in America, including "Cheer, boys, cheer," "To the West," "Far, far upon the Sea," and countless others. Mr. MacKay was war correspondent to *The Times* during the Civil War in the United States.

MacKay, John William (1831-1902), a Dublin Irishman who emigrated to America, went West, and in the "silver fever" of the "sixties," made tracks for Nevada, where he had the good fortune to "strike" one of the richest veins, and soon became a millionaire.

McClintock, Admiral Sir Francis (1819-1907), a well-known Arctic explorer, noted for the expeditions he took part in in search of Sir John Franklin (discovering numerous relics of his great foregoer). Later, Sir Francis filled the position of Superintendent of Portsmouth Dockyard, and was subsequently made Commander-in-Chief on the West Indian Station, being placed on the retired list in 1882.

McClure, Sir Robert (1807-1873), born at Wexford, was an Arctic explorer of note who was associated with the search for Sir John Franklin organised in 1848, and later made important discoveries along the North coast of Canada.

Macdonald, Sir Claude M. (b. 1855), British Ambassador to Japan, 1900-12; formerly Minister at Peking and commanded the Legations at the time of the siege of 1900. He was in the army before entering the Diplomatic Service, and has achieved much personal popularity in the Orient.

Macdonald, Flora (1720-1790), attracted much romantic interest by her bravery in conducting Prince "Charlie" to the Isle of Skye, when he was pursued. She afterwards married and settled in America, butting her days in Skye.

Macdonald, George (1824-1905), a novelist and poet whose stories of Scottish peasant life paved the way for a later school of workers in the same field. The best of his stories are *David Ligonrod* and *Robert Falconer*.

Macdonnell, Lord (b. 1842), spent a great part of his life in the Indian Civil Service, where he held the Chief Commissionership of the Central Provinces, afterwards serving in Bunnah; later on was Acting-Lieutenant-Governor of Bengal, and a member of the Indian Council. His last Indian post was that of Lieutenant-Governor of the North-West Province, and Chief Commissioner of Oudh; and in 1903 he was made Irish Under-Secretary, in which position he created considerable political stir by his vigorous interpretation of his duties. He retired from this post in 1905.

Macfarren, Sir George (1813-1889), was a distinguished English composer of both sacred and secular music. Among his operas may be mentioned "Don Quixote" and "The Devil's Opera." He also composed several oratorios and cantatas.

Macfarren, Prof. Walter (1820-1905), lecturer and prominent official of the Royal Academy of Music for a long period, and a composer of many sonatas, pieces, and songs of much merit.

Macchiavelli, Niccolò (1469-1527), a Florentine diplomatist and historian, whose book, *The Prince*, has maintained its celebrity through the centuries as a masterly exposition of the method of governing by artifice. He also wrote a history of Florence.

McKenna, Rt. Hon. Reginald (b. 1863), has represented North Monmouthshire since 1895. Was appointed Financial Secretary to the Treasury in 1905, and President of the Board of Education 1907 in Sir H. Campbell-Bannerman's Government and introduced the Education Bill of 1908. In 1902 became First Lord of the Admiralty, and in 1904 Home Secretary. Rowed in the Cambridge winning boat, 1887.

Mackenzie, Sir A. C., Mus. Doc. (b. 1847), 2

British composer who has been Principal of the Royal Academy of Music since 1888, and has gained fame by numerous musical compositions of a high order, including the opera of "Colomba," "The Troubadour," and "His Majesty." Among his numerous cantatas, "The Bride," "The Rose of Sharon," and "The Dream of Jubal" take high rank. Conductor Philharmonic Society.

MacKenzie, Sir Alexander (1775-1820). Born at Inverness, in early life entered the service of the Hudson Bay Company, and, succeeding in making his way from Fort Chipewyan, on Lake Athabasca, to the Northern Ocean, traced the course of the river called after him, and made very important geographical discoveries. Later on he crossed the Rocky Mountains to the Pacific near Cape Menzies, being the first white man to make the journey.

MacKenzie, Henry (1745-1831), a Scottish novelist who gained celebrity by his stories *The Man of Feeling* and *The Man of the World*.

MacKenzie, Sir Mervell (1827-1899), an eminent Scottish physician and throat specialist, and one of the founders of the Hospital for Diseases of the Throat in London. Operated on the Emperor Frederick III. of Germany when that monarch was (shortly before his accession) attacked with the cancerous ailment which proved fatal.

McKinley, William (1843-1901), the American statesman who was mainly responsible for the strong protectionist character of the American tariff laws. Became President of the United States in 1897, was re-elected in 1901, and was assassinated by an anarchist in the same year, being shot whilst attending the Buffalo Exhibition.

MacKintosh, Sir James (1765-1823), a well-known writer and politician, who from 1804 to 1812 was Recorder of Bombay, and, returning to England, entered Parliament, and at the same time occupied himself successfully in literature. His *History of England* is of considerable value.

MacKintosh, D. (1823), The son of a crofter, was apprenticed to a shoemaker, afterwards working at that trade for fourteen years. Later he served five years in the Aberdeen police force, after which he set up as a stationer and bookseller, and turned his thoughts towards the writing of history. In the course of nineteen years he wrote his *History of Civilisation in Scotland*, in four vols., a work which is highly valued. Was made honorary Doctor of Laws by the University of Aberdeen in 1888, and a Civil List pension of £50 was granted to him in 1900.

Maclean, Rt. Hon. and Most Rev. Wm. Dalrymple, D.D. (1820-1909), Archbishop of York from 1891 to 1909; educated at Cambridge; Priest, 1857; Rector of Newington, 1869-1875; Vicar of Kensington, 1875-1878; Bishop of Lichfield, 1878.

Maclean, Reid, General Sir H. Aubrey de, Military Instructor to the Sultan of Morocco for some thirty years. Represented Morocco at the Coronation of Edward VII. Captured by Raskuli in July, 1907, and not released until February, 1908, when he was ransomed. Married to Miss Prendergast, 1913.

MacLeod, Dr. Norman (1812-1879), was Chaplain to Queen Victoria from 1854. Editor of *Good Words* from 1860 to 1872, and the author of numerous books of essays, travels, and stories.

Maclean, Daniel (1805-1870), a distinguished painter and R. who produced several pictures of Shakespearean scenes of great distinction, and painted a number of frescoes in the House of Lords.

MacMahon, Marshal (1808-1893), was a French soldier (of Irish descent) who won great distinction in the Crimea, Italy, and as commander of the First Army Corps in the Franco-German War until overwhelmed at Sedan. After the fall of the Empire he recognised the French Republic, and from 1873 to 1879 was President of the Republic.

Macnamara, Rt. Hon. Dr. T. J., P.C., M.P. (b. 1831), a prominent Liberal politician, well to the fore in the House whenever education comes under discussion, as might be expected from an old teacher and the editor of *The Schoolmaster*. A capital platform speaker and zealous propagandist. Secretary to the

Local Government Board 1907-1908, and Secretary to the Admiralty since 1908.

Macpherson, James (1738-1796), a Scottish poet who gave "Ossian" to the world and thereby made himself a lasting name, though whether he was merely a translator or was the inventor of that fine series of poems is not even yet completely settled. He was buried in Westminster Abbey.

Macready, W. C. (1793-1873), a famous tragedian who was manager in turn of Covent Garden and Drury Lane Theatres in London, and was highly successful in Shakespearean and other important parts.

Maeterlinck, Maurice (b. 1860), the distinguished Belgian poet and critical writer, who during the last two decades has published numerous stories, essays, and plays remarkable for their strong spirituality and beauty of style. His principal works are *La Princesse Maleine*, *Pelidas et Melitane*, *La Sagette et la Destinée*, and *The Double Garden*.

Magee, William Connor (1821-1891), Bishop of Peterborough for twenty-three years, and Archbishop of York for a brief few weeks before his death, was a great prelate in many ways—as orator, administrator, and zealous worker.

Magellan, Ferdinand (1470-1521), a famous Portuguese navigator, and commander of the first expedition (1519) to sail round the world.

Mahan, Capt. A. T. (b. 1840), an American, and the greatest authority on naval history. His book on *The Influence of Sea Power* is a "live" discussion.

Maine, Sir Henry (1820-1888), the distinguished jurist. Was appointed Regius Professor of Civil Law at Cambridge University in 1847, and from 1852 to 1860 was Law Member of the Supreme Council of India. His works, *Early History of Institutions*, *Ancient Law*, *Popular Government*, and *International Law*, are of the highest importance.

Maitland, Mde. de (1635-1719), after being the wife of the poet Scarron, drifted into Court circles, and so to fascinated Louis XIV. that he ultimately married her. At his death she retired to a convent.

Maitland, William (1827-1873), was one of the Scottish Protestant leaders, whose aim was to bring about the union of England and Scotland. His adherence to the cause of Mary Queen of Scots, whose secretary he became, got him into trouble with the Regent Moray. He was captured at the surrender of Edinburgh Castle to the English, and died in prison.

Mailbrad, Maria (1808-1856), was one of the most famous operatic singers of her time, enjoying a world-wide reputation.

Mallock, William H. (b. 1849), was educated at Oxford, and after an extensive course of travel made his mark by a series of clever books in which the leading social and philosophical questions of the time were brilliantly discussed. *The New Republic*, *Is Life Worth Living?* and *The New Paul and Virginia* were much talked about. He is also the author of several novels, including *A Human Document*, *A Romance of the Nineteenth Century*, and *An Immortal Soul*.

Malory, Sir Thomas (circa 1450-1470), compiled the *Morte d'Arthur*, which was printed by Caxton in 1485, and relates the story of King Arthur and the Knights of the Round Table.

Malthus, Thomas R. (1766-1824), was an English clergyman and political economist, who in his essay on *The Principle of Population* proposed to limit the increase of population by discouraging marriage and otherwise. This doctrine, to which the name of Malthusianism is now always applied, raised a great storm of dissent, and was largely misconstrued or misunderstood. Malthus was Professor of History and Political Economy at Haileybury College for the last thirty years of his life.

Manderham, Bishop of. (See Knox.)

Manderley, Sir John (circa 1800-1870), *The Voyages and Travels of Sir John Manderley*, the first book of travels published in England, and probably fuller of romance than reality, was the work of this worthy, who described himself as of St. Athens.

Manning, Henry Edward, Cardinal (1808-

1808), Cardinal Archbishop of Westminster, was a prominent Anglican Churchman up to 1851, when he joined the Church of Rome and in 1865 succeeded Cardinal Wiseman at Westminster. He was a man of devout and noble life, an advocate of temperance, and of all measures calculated to benefit the poor.

Manna, Sir August (1825-1907), was born in Germany and attained eminence as a musician and conductor in Berlin and elsewhere, and in 1855 came to England and became Musical Director of the Crystal Palace, a position which he held with distinction for forty-five years. He was knighted in 1903.

Manuel, Henry Longueville (1820-1891), was a noted scholar and Anglican divine, occupying the positions of Professor of Moral Philosophy and Regius Professor of Ecclesiastical History at Oxford. He was also Dean of St. Paul's and the author of several works on logic and religion.

Marat, Jean Paul (1744-1793), one of the leading actors in the French Reign of Terror. Lived in England some years before the Revolution, and practised as a doctor, but, returning to France, joined the Revolutionists and became one of their most ferocious champions. Killed by Charlotte Corday.

Marchamley, George Whitely, Baron (b. 1853), was P. P. for Liverpool 1893-1900, and for the Finsbury D.P., for 1900-8. Parliamentary Secretary to the Treasury and Chief Liberal Whip 1905-8. Made a Privy Councillor 1907, and raised to the peerage as Lord Marchamley, 1908.

Marco Polo (1254-1324), the famous Venetian traveller and explorer, who made journeys through China, India, and other eastern countries, and published the record of his various wanderings, recounting the many wonders and marvels he had seen—a record which seemed for the most part beyond credence to his contemporaries, but now largely confirmed.

Marconi, G. (b. 1874), an ingenious Italian electrician who was educated at Leghorn and Bologna. Coming to England, he studied with Professor Preece, and in 1895 brought forward an apparatus by which he succeeded in sending wireless messages. In 1902 succeeded in transmitting trans-oceanic messages, and to-day his system is being adopted in all parts of the world. Established a public wireless telegraph service across the Atlantic in 1907. Awarded Nobel Prize for Physics, 1909. Entered into an important contract with the British Government in 1912 for establishing wireless stations at different points throughout the Empire—a contract which was revised considerably in the following year after the sittings of the Marconi Committee of Inquiry. Lost the sight of an eye in a motor accident in 1912.

Margaret, "The Maid of Norway," as she was called, was the daughter of Erik II., King of Norway, and became direct heir to the Scottish throne on the death of her grandfather, Alexander III. of Scotland, but died on her way to Scotland.

Margaret of Anjou (1420-1482), the wife of Henry VI., was the daughter of the King of Sicily, and in the Wars of the Roses was in long conflict with the Duke of York and his adherents. She was captured by the Yorkists after the Battle of Tewkesbury, but ransomed by Louis XI., and allowed to retire to the Continent.

Margaret, St. (1047-1093), wife of Malcolm Canmore, and Queen of Scotland. She was a devout Christian, and zealous in her efforts to convert her husband's people, her good deeds being held in such profound remembrance that she was canonised in 1225.

Maria Louisa (1797-1847), daughter of Francis I. of Austria, became wife of Napoleon in 1810, and bore him a son. (See **Napoleon II.**) On her husband's expatriation she returned to Vienna, and ended up a not very discreet career by marrying Count Niepperg.

Maria Theresa (1717-1780) was a woman of remarkable strength of character and ability, and succeeded her father, Charles VI., as Empress of Germany. Her right to the throne was contested, and gave rise to the famous war of the Austrian Succession, in which she was aided by England, and which lasted seven years, being ended by the Treaty of Aix-la-Chapelle on October 7th, 1748. She displayed great vigour as a ruler.

Maria Antoinette (1755-1793) was daughter of the Emperor Francis I. of Austria, and became wife of Louis XVI. of France. She entered with spirit into the gaiety of French Court life, and drew down upon herself much popular hatred in consequence. In the terrible events which followed the outbreak of the Revolution she was one of the chief sufferers, but bore her fate with dignity and resignation, and met her death on the scaffold with unflinching courage.

Marius Celsus (B.C. 155-86) was one of the most distinguished Roman generals, a tribune of the people, praetor, and six times Consul. He was Pro-prietor of Spain in 114 B.C.

Mark Antony. (See **Antony**.)

Markham, Sir Clements (b. 1830), President of the Royal Geographical Society, and one of the most eminent of modern explorers. He served in the Arctic Expedition of 1850-1857, and was geographer to the Abyssinian Expedition in 1867. He was the introducer of the quinine yielding Cinchona Tree from Peru to British India.

Marlborough, Duke of (1650-1722), the celebrated English general of the Queen Anne and William III. period. Under Charles II. he had won much commendation and a peerage for his military services, and William III. rewarded him with an earldom, but it was not until the War of the Spanish Succession that he attained his full opportunity. In that war he scored a series of splendid victories at Blenheim, Ramillies, Malplaquet, etc., and was the most renowned general in Europe. He was made Duke of Marlborough, had the estate of Woodstock and a perpetual pension of £5,000 a year conferred upon him, and the Queen built him Blenheim Palace. In his later years he lost much of his popularity. George I. however, restored him to the office of Commander-in-Chief, and on his death he was buried in Westminster Abbey. His wife, Sarah Jennings, Duchess of Marlborough (1666-1744), was the imperious and avaricious lady who dominated Queen Anne until supplanted by the pliant sovereign's later favourite, Mrs. Masham.

Marlowe, Christopher (1563-1593), one of the greatest of the Elizabethan dramatists. His principal plays are "Dr. Faustus," "Tamburlaine the Great," "Edward II.," and "The Jew of Malta." He was killed in a tavern brawl at Deptford.

Marmont, Marshal (1774-1859) was one of Napoleon's most famous generals, being made Duke of Ragusa for his distinguished services. After Napoleon's fall, he joined the Bourbons.

Maronetti, Baron Carlo (1805-1868), an Italian sculptor who lived in England for many years and produced numerous statues, including one of Queen Victoria for Glasgow, one of Lord Clyde for London, and the colossal statue of Richard I. now standing in front of the House of Lords.

Maryat, Captain Frederick (1792-1848), an exceedingly popular writer of sea stories. His *Peter Simple*, *The King's Own*, *Jacks Fairhead*, and *Midshipman Easy* are among the breeziest and most humorous sea tales in the language.

Marryat, Florence (1837-1899), a writer of many novels of considerable popularity, among them *Open Sesame* and *Written in Fire*. She edited *London Society* for four years, and was the author of a life of her father, Capt. Frederick Marryat.

Martial (43-104) was born at Bilbilis in Spain, but spent the greater part of his life in Rome, where he acquired much fame as a poet and epigrammatist.

Martin, St. (316-400), a French monk who founded the convent of Poitiers, and later was made Bishop of Tours.

Martin, Sir Theodore (1816-1900). Although he was for many years a practising solicitor and Parliamentary agent, the best part of his life was identified conspicuously with literature. His "Bon Gaultier Ballads" and numerous translations from Goethe, Dante, Heine, Schiller and others testify to his graceful poetic faculty. He also wrote lives of the Prince Consort, Princess Alice, Princess Ayrton, and Lord Lyndhurst. Several plays stand besides to his credit. His wife was Helen Faucit, a celebrated actress.

Martineau, Dr. James (1783-1850), the most prominent Unitarian minister of his time, and a writer of great power. From 1788 to 1810 he was Principal of Manchester New College, and during that period wrote the greater part of his remarkable essays, all of which were of a profoundly spiritual character, and possessed much literary charm. He was a brother of Harriet Martineau.

Martineau, Harriet (1780-1856), was a writer of great power and noble purpose. Some of her novels are still read, and her *Tales of the Poor* excited much sympathy at the time of their appearance. She was also the author of *Illustrations of Political Economy*. For many years she resided at Ambleside, in the Lake District.

Martyn, Henry (1761-1818), a missionary who devoted himself so actively to his work in India and Persia that he died worn out at the early age of 57. He translated parts of the Scripture and Prayer Book into the Persian and Hindustani languages.

Marvell, Andrew (1620-1678), poet and diplomatist, friend of Milton, assistant Latin secretary to Cromwell, and for a time represented Hull, his native town, in Parliament. His poems are characterised by much quaintness of thought, vigour, and satirical point. He was styled "the incorruptible patriot," because of his sturdy refusal of a large monetary offer made to him on behalf of King Charles II. when he was in indigent circumstances.

Mart, Karl (1818-1883), an active Socialist, who was expelled from France, and from 1845 lived mainly in England, where he identified himself with the cause of the labouring classes and was a most earnest worker. His work *Das Kapital*, is a powerful fragment, only one volume being published.

Mary of Modena (1658-1718), was the second wife of James II., and mother of the "Old Pretender," James Francis Edward Stuart.

Mary I. (1516-1558), daughter of Henry VIII. Was Queen of England from 1553 to her death. She was a strenuous Roman Catholic, and entirely reversed the religious order of things during her brief reign, persecuting, imprisoning, and burning at the stake many of the Protestant reformers, nearly three hundred persons being put to death during her short reign as heretic. She was married to Philip of Spain in 1554.

Mary II. (1662-1694), daughter of James II. Came to the English throne in 1689, having been married to her cousin, William of Orange, fifteen months previously. They reigned jointly, after assenting to the "Declaration of Rights," until her demise.

Mary, Queen of Scots (1542-1587), was a daughter of James V. of Scotland, and was married to the Dauphin of France at sixteen years of age, and lived at the French Court. On the death of her husband in 1560 she returned to Scotland, and for a time was the acknowledged Queen of the Scots. In 1565 she married Lord Darnley, and thenceforward from one cause and another her entanglements increased.

Jalous of Rizzio, the Queen's Italian secretary, Darnley had his throat cut in Holyrood Palace, in the presence of the Queen, and twelve months later Darnley himself was murdered by Bothwell, who married Mary three months afterwards. The Scottish nobles, angered by these various acts, rebelled against Mary, and she was made prisoner and confined in Loch Leven Castle, compelled to abandon Bothwell and to sign an Act of Abdication in favour of her son. Escaping to England, she sought the protection of Elizabeth, but that monarch refused to give her her freedom, and imprisoned her for the next nineteen years in various castles, and ultimately had her beheaded on a charge of conspiracy. She was buried in Peterborough Cathedral, but after her son James I. of England ascended the throne her remains were removed to Westminster Abbey.

Mascagni, Pietro (b. 1858), the Italian composer, attained sudden celebrity by his "Cavalleria Rusticana" in 1890, and has since produced a number of operas of a more ambitious character, but perhaps not up to the level of his first effort.

Masena, Duc de Rivoli (1758-1817), was of humble birth, but entered the army of the French

Republic, and made such headway that he was quickly promoted to the position of General of Division. His successes in battle made him a favourite with Napoleon. Later he joined the Bourbons.

Massingham, H. W. (b. 1850), editor of *The Nation* since its start in 1907, and a Liberal journalist of mark and influence. Has edited the *Siar* and the *Daily Chronicle*, and was for some years special Parliamentary representative of the *Daily News*, in which capacity he rendered valuable party service. Mr. Massingham is also a dramatic critic of power and insight.

Massinger, Philip (1583-1640), a dramatist of exceptional power, whose plays were highly popular in his day and later, and some of which are still occasionally performed. His cleverest play was "A New Way to Pay Old Debts," the Sir Charles Overreach of that piece being a fine bit of characterisation, in which nearly all our great actors have appeared.

Masterman, Rt. Hon. C. (b. 1853), M.P. for S.W. Bethnal Green 1911-14. Financial Secretary to the Treasury 1914-15, and Chancellor of the Duchy of Lancaster, 1914. Was defeated at Bethnal Green on seeking re-election, and also later at Ipswich. Was Parliamentary Secretary of the Local Government Board 1908-1909, and Under Secretary for the Home Department, 1909-12.

Mathew, Theobald (1790-1856), popularly known as "Father Mathew," was a native of Tipperary, and, leaving the priesthood, devoted himself to temperance mission work. The Government gave him a pension of £300 a year.

Mathews, Charles (1776-1835), was a talented comedian and entertainer who was in high favour with the public for many years, appearing at the leading London theatres and giving an entertainment, "Mathews at Home," with unbounded success.

Mathews, Charles J. (1803-1878), the son of the last named, and also a clever actor and dramatist of some ability. He married, first Madame Vestris the famous operatic artiste who was his manager, and after her death Miss Davenport, an American actress.

Matys, Quintin (1460-1530), a distinguished Flemish painter who was originally a musician. He excelled in Scriptural subjects. His "St. John the Baptist" and "St. John the Evangelist" are in Antwerp Cathedral. Windsor Castle has his "Two Misers."

Maurice, Frederick Denison (1805-1873), a leader of religious thought and social reform, his *Theological Essays* being characterised by ideas then regarded as very advanced. Held the Chair of Moral Philosophy at Cambridge in 1866.

Mawson, Douglas (b. 1882), commander of the Australian Antarctic expedition of 1911; previously of the Shackleton expedition. His party endured terrible sufferings in 1912; all died except himself. In 1913 he succeeded in establishing a scientific station on the Macquarie Islands with wireless telegraph installation, in connection with the Antarctic continent.

Maxim, Sir Hiram (b. 1840, in Maine, U.S.A.), is the inventor of the famous automatic quick-firing gun, which bears his name. He is a mathematician and scientist of great ability, and has invented apparatus in connection with aerial flight.

Maxwell, James Clerk (1831-1879), the eminent scientist and mathematician, was born at Edinburgh and educated at Edinburgh University and at Cambridge. As a writer on heat, light, electricity, and kindred subjects he displayed rare gifts.

May, Phil (1864-1923), one of the ablest of modern cartoon artists in black and white, a native of Leeds, and in his later years on the staff of *Punch*. His pictures of every-day life—especially of London—were full of character and humour.

Mazarin, Jules (1602-1661), an Italian Cardinal who became chief Minister of State under Louis XIV., and was for a number of years the practical ruler of France. He succeeded Richelieu.

Mayappa (1844-1909), the name of Byron's poem, was a real personage, and a Pole, and was tied naked on the back of a wild horse, and so sent out across the Russian desert, for an intrigue with a noble's wife. He was liberated by Cossacks and afterwards attained an honourable position.

Mazzini, Giuseppe (1805-1872), an Italian patriot, who, in his endeavours to secure the independence of Italy, incurred the disfavour of the authorities, and was compelled to leave the country. He started a newspaper called *Young Italy*, at Marseille, and in 1831 came to London, and kept up his attacks upon existing governments. In 1848 he was back in Rome, and was elected dictator of the Roman Republic. He was not allowed to hold this position long, however, for the French occupied Rome and Mazzini was driven to England again. The unification of Italy was accomplished in other ways than those advocated by Mazzini, but he lived to see Victor Emmanuel King of United Italy.

Mellon, J. L. (1813-1891), one of the most eminent of French modern painters, whose "Visit to the Burgomaster" (in the Wallace Collection), "Le Rire" (presented by Napoleon III. to the English Court, and now hanging in Buckingham Palace), and his "1814" (Napoleon's return from Moscow), are among his best known pictures.

Melancthon, Philip (1495-1560), Mend and co-worker with Luther. A man of great scholarship who drew up the famous Augsburg Confession. More moderate in his views than Luther, he survived his friend fourteen years and was of material help in solidifying the Reformation.

Melba, Madame (b. 1866), the celebrated *prima donna*, was born in Melbourne—her father being a Scotsman named Mitchell, and her mother of Spanish descent—and made her debut in 1887 at Brussels in Verdi's "Rigoletto"; since which time her career has been one of unbroken success.

Melbourne, Viscount (1779-1848), Queen Victoria's first Premier, holding office over six years, and identified with many important liberal measures.

Mendelssohn-Bartholdy, Felix (1805-1847), the celebrated German composer, whose works are of delicate spiritual, full of melodic beauty, and in the highest sense artistic. He was the grandson of Moses Mendelssohn, the philosopher, whose writings gained for him the title of "the Socrates of the Jews," and who died in Berlin in 1786. The younger Mendelssohn was Director of Concerts in Leipzig for a time, lived in Italy several years, and was a frequent visitor to England. His two quartets, "St. Paul" and "Elijah," are magnificent compositions, and he conducted the latter upon its production at Exeter Hall in London a few months before his death.

Menelek II. (b. 1869), Emperor of Abyssinia, succeeded to the throne in 1889, and proved a vigorous ruler. Is a G.C.B. and G.M.G.

Mercator, Gerhard (1512-1594), was the famous Flemish geographer who invented a celestial and a terrestrial globe, by which he introduced his famous projection, in which meridians and parallels of latitude cross each other at right angles, both being indicated by straight lines. This projection had the effect of greatly simplifying steering by compass.

Meredith, George (1828-1891), the most artistic of modern English novelists, and a poet of much originality. In 1859 he published his *Credal of Richard Feverel*, which was a brilliant and successful effort. Among his other great novels are *Evans Harrington*, *Rhoda Fleming*, *Bauchamp's Career*, *The Egoist*, *Diana of the Crossways*, and *The Amazing Marriage*. The literary and philosophical qualities are strong in all that Mr. Meredith has written. He was a member of the Order of merit.

Merry Del Val, Cardinal (b. London, 1865), Pontifical Secretary of State, was educated in England during the time that his father was secretary to the Spanish Embassy in London. Has strong ultramontane leanings and exercises great influence upon the papal policy.

Mesmer, Friedrich Anton (1734-1815), was a German doctor who founded the system of mesmerism or animal magnetism, for which he claimed such curative power that he ultimately became to be regarded as a charlatan. He lived in England for a time, but finally retired to Germany, and died there in obscurity. Mesmerism, however, was undoubtedly the father of hypnotism.

Metternich, Prince von (1773-1859), a celebrated Austrian statesman and diplomatist, who for many years managed to have guided the policy of his country. He was a powerful factor in the later career of Napoleon, its one true swarder, the arrangement for his marriage with Maria Louisa at another bringing all his influence to bear upon the combination which finally crushed the Emperor. During the commotion of 1848 he resided in England.

Meyerbeer, Giacomo (1794-1864), was born in Germany, but spent most of his life in Paris, where he produced all his great operas, which include "Robert le Diable," "Les Huguenots," "Le Prophète," and several others.

Michael Angelo Buonarroti (1474-1564), the renowned Italian painter, sculptor and architect, whose genius was such a power in beautifying the churches of Rome and Florence. Was the last and in some respects the greatest of the Italian sculptors; while his large paintings, particularly "The Last Judgment," executed for the Sistine Chapel, are no less famous.

Michel, Louise (1830-1905), a French teacher who took a very active part in the Communal rising in Paris in 1870, and was transported for life, but, being released in 1880, recommenced anarchical agitation, and was more than once thrown into prison. Refusing to accept a pardon in 1885, she took up her residence in London and continued from thence to disseminate inflammatory literature.

Michalet, Jules (1798-1874), a noted French historian and author, who, in addition to writing numerous popular general histories and one monumental sixteen-volume work on the annals of his native land, produced some remarkably clever studies of natural history and natural phenomena.

Mildon, Viscount (b. 1820), better known as the Rt. Hon. St. John Brodrick, entered Parliament in 1880, and became a prominent member of the Conservative party, being made Financial Secretary to the War Office in 1886, Under-Secretary for War in 1895, Secretary for War in 1900, and Secretary for India in 1903. He was M.P. for the Guildford Division from 1880 to 1905, when in the Liberal reaction he lost his seat. Succeeded his father as the 9th Viscount in April, 1907.

Mill, James (1773-1836), was the author of a *History of British India* and a frequent contributor to the principal reviews, his studies being chiefly concerned with political economy.

Mill, John Stuart (1806-1873), son of the last-named, achieved high reputation by his numerous works on philosophical questions, and wrote, amongst other books, *Principles of Political Economy*, *Essay on Liberty*, *Utilitarianism*, and *England and Ireland*.

Millais, Sir John Everett (1829-1896), was at one time the most prominent of the English pre-Raphaelite School of Painters, but soon cast himself free from its mannerisms, and began the production of a long series of famous pictures, becoming the most popular artist of his day. His paintings were amongst the most sought after in the Royal Academy Exhibition through a long period, and he did some very excellent black and white work in illustration of Trollope's novels, Tennyson's poems, and in many other directions. Was made R.A. in 1869. Among his numerous works we have only room to mention "The Eve of St. Agnes," "Autumn Leaves," "The Order of Release," "Effie Deane," "Chill-October" and "Bubbles," the last picture being purchased by Messrs. A. and F. Peart, who accorded it the honour of the highest artistic reproduction that the skill of the poster-printer was capable of, and spread it over the world, with the approbation of the painter. Created a baronet in 1885, and made President of the Royal Academy a few months before his death.

Miller, Hugh (1808-1896), the famous geologist who in his youth was a quarry-worker, but became editor of *The Witness*, a Church organ, in 1840. After that he published his *Old Red Sandstone*, *Footprints of the Creator*, and *The Testimony of the Rocks*. His brain gave way through overwork in 1896, and he committed suicide near Edinburgh.

Bubbles
by Sir John E. Millais Bart. P.R.A.

Millet, Jean François (1814-1875), one of the greatest of French painters of pastoral subjects; his celebrated work "The Angelus" is universally known by his numerous reproductions.

Milman, Henry Hart (1795-1860), Dean of St. Paul's from 1842 to his death, was the author of several volumes of poems, of a *History of the Jews* and a *History of Latin Christianity*, all of which are highly esteemed.

Milner, Viscount, (b. 1854), was educated at Oxford and drifted into journalism, being for some time on the staff of the *Pall Mall Gazette*. Was private secretary to Mr. Goschen (afterwards Lord Goschen) from 1887 to 1889. Under-Secretary for Finance in Egypt, 1889-1897, and Chairman of the Board of Inland Revenue 1897-1899; after which he was appointed Governor of Cape Colony, and created High Commissioner for South Africa in 1897. Was raised to the peerage in 1901, and advanced to a viscount the year following; published *The Nation and the Empire*, 1913. A Life of Lord Milner issued 1913.

Miltiades (d. 489 B.C.), one of the leaders of the Athenian army against the Persians at Marathon.

Milton, John (1608-1674), England's chief epic poet, whose "Paradise Lost" is the greatest poem of the kind in the later ages. Was Latin Secretary to the Commonwealth by Cromwell after the execution of Charles; and wrote numerous historical, political, and devotional works in addition to his poems. In 1652 he became totally blind, and at his death was buried in St. Giles's Church, Cripple-gate, London, a monument being erected to his memory in Westminster Abbey.

Minio, Gilbert, 4th Earl of (1847-1914) K.G., Viceroy of India from the retirement of Lord Curzon of Kedleston in 1905 to 1910; had previously served with success for six years as Governor-General of Canada. He was an ensign in the Scots Guards at twenty years old, and saw some soldiering thereafter in Turkey, Afghanistan, South Africa and Egypt, while he was also Chief of Staff in the N.W. Canadian Rebellion of 1885.

Mirabeau, Gabriel, Comte de (1749-1791), one of the prominent figures of the French Revolution, and a famous orator. Had he lived a few years longer he might have been strong enough to prevent some of the later excesses of the Revolution.

Mitford, Mary Russell (1787-1855), made a name for herself by her sketches of rural life entitled *Our Village*, a book which achieved immense popularity. She was also the author of several novels and some tragedies, which were acted, but did not prove any great success.

Mithridates (circa 132-63 B.C.), was King of Pontus from 120-63 B.C., and showed great capacity as a commander, conquering a great part of Asia Minor and Greece, and throwing himself into conflict with Rome itself. He was ultimately defeated by Pompey, and three years later committed suicide.

Modjeska, Madame Helena (1844-1908), a Polish actress of the highest ability, whose first appearance in English tragedy took place at San Francisco in 1867. She afterwards appeared in Shakespearean and other exacting parts in London and many other places, both in Europe and America. Educated in a convent at Cracow, her maiden name was Opiko, and she married her guardian, G. V. Modjeska, when but seventeen years old. In 1864 she was married a second time, becoming the wife of Count Chlapowski, and resided mainly in California.

Moffat, Robert (1795-1883), one of the most famous missionaries of the 19th century, whose work was chiefly confined to South Africa, where he laboured for many years with untiring zeal. He was the author of several books, and father-in-law of Dr. Livingstone.

Mohammed (570-632), the founder of the Mohammedan religion, fled from Mecca to Medina in 622, from which date the Mohammedan era opens. By his constant preaching and proclaiming of the one god he gathered around him a vast number of followers and was able to return to Mecca eight years later, an acknowledged conqueror. His world-famous "Koran"—though presented by him

as an original revelation from the Angel Gabriel—may be traced to Biblical and rabbinical sources in the main.

Mohammed V. (b. 1844), Sultan of Turkey, 3rd son of Sultan Abd-ul-Medjid, succeeded his elder brother, Abd-ul-Hamid II, in 1909.

Molière, Jean B. (1622-1673), the greatest of French comic dramatists, who, from being a poor strolling player, became the leading dramatist of his time. His greatest comedies are "Le Tartuffe," "Le Misanthrope," "Le Malade Imaginaire," and "Le Médecin malgré lui."

Moltke, Field-Marshal Count Helmuth von (1800-1891), was the reorganiser of the Prussian Army before the Franco-German war, and Chief of the Staff in that war and its great guiding genius.

Monnman, Theodor (1817-1902), was a native of Schleswig, and while living in exile at Zürich—his advanced opinions having made him objectionable to his own Government—he wrote his famous *History of Rome*, a truly monumental work, exhaustive, accurate, and powerful.

Mond, Sir Alfred, Bart. (b. 1868), managing director of Brunner, Mond and Co., and prominently associated with other industrial enterprises. M.P. for Chester, 1904-10, and since 1910 for Swansea. Is proprietor of *The English Review* and one of the proprietors of the *Westminster Gazette*. An active Liberal and Free Trader.

Monk, General George, Duke of Albemarle (1668-1750), was one of the most prominent men of the Cromwellian and Restoration periods of English history. Attached to the Royalists at the outset, he afterwards went over to the Parliamentary Party, and was entrusted with the command of the army in Scotland. At Cromwell's death he again became a Royalist and took an active part in bringing about the Restoration of Charles II., convoking a Parliament and accepting the post of General of the Forces. Charles gave him a dukedom.

Monmouth, James Duke of (1649-1685), a natural son of Charles II. Headed a rebellion against James II., but being unsuccessful at Sedgemoor was captured and subsequently executed.

Montagu, Lady Mary Wortley (1689-1762), was a strong-minded woman of literary tastes, who as the wife of Edward Wortley Montagu, Ambassador at Constantinople, had opportunities of studying Turkish life and customs, which she afterwards turned to good account in her well-known series of *Turkish Letters*, which gained her the friendship of Addison and Pope, and made her a celebrity.

Montaigne, M. de (1533-1592), a French essayist of world-wide celebrity, whose essays have been translated into every language; they are perfect in their beauty of style and felicity of expression.

Montalembert, Comte de (1820-1870), a French writer and politician who attracted much attention in 1845 by his violent opposition to Louis Napoleon. He was the author of the *Life of Elizabeth of Hungary* and several other important books.

Montcalm, General (1712-1759), commander of the French Army in Canada in the final struggle for the possession of Canada between the French and English in 1756-1759, managing his forces with great skill and gallantry at Oswego, Ticonderoga, and Quebec, suffering final overthrow and death on the plains of Abraham when Wolfe, who was himself killed, won the victory which gave Canada to England.

Montefiore, Sir Moses (1784-1885), a Jewish financier and philanthropist who devoted most of his long life to movements for the amelioration of the condition of his poorer Jewish brethren, and gave large sums. He was made a baronet in 1846.

Montespan, Marchioness de (1641-1707), was one of the favourites of Louis XIV., and from 1674 to 1679 held the chief place in the rather unstable affections of that monarch.

Montesquieu, Baron de (1689-1755), a famous French philosopher and author, whose book on the *Spirit of Laws* made a great impression, and whose *Persian Letters* was a brilliant if somewhat indelicate satire on the customs of the people of his day.

Montezuma (1466-1500) was Emperor of Mexico when Cortes invaded that country. He had lived in great state and magnificence and was accounted a wise ruler, but the conquering Spaniards made a prisoner of him, and he died from a wound received while being rescued from captivity.

Montfort, Simon de, Earl of Leicester (1216-1257), was a powerful baron, with liberal views, and a hatred of kingly tyranny. It was his bold action that forced Henry III., his brother-in-law, to grant the first English Parliament. He met his death at the Battle of Evesham.

Montgolfier, Joseph Michael and Jacques Etienne, two French brothers who, during the last twenty years of the 18th century, demonstrated the practicability of a balloon inflated by heated air, making many ascents, and may be said to be the fathers of modern aeronautics.

Montgomery, James (1771-1854), an English poet whose works were of a highly devotional spirit. His best-known poems are "The Wanderer of Switzerland" and "The West Indian."

Montrose, James Graham, Marquis of (1612-1650), devoted himself to the cause of Charles I. and gained some notable victories, but after the King's surrender lived abroad for a time. In 1650 he invaded Scotland on behalf of the Stuarts, but was defeated, captured, and put to death at Edinburgh.

Moody, Dwight L. (1837-1890), the American revivalist preacher, associated for many years in mission work on both sides of the Atlantic with Ira D. Sankey, the "American Singing Pilgrim."

Moore, Sir John (1761-1809), a British general who served in Holland, Egypt, and in the Peninsula, where he found himself hedged in between two great French armies, led by Napoleon and Soult, and effected one of the finest retreats recorded in history, reaching Corunna successfully. Soult came up just as the British forces were about to embark and a desperate battle ensued. Soult being forced back while the British troops safely took ship. It was a victory, however, that was dearly paid for, Sir John Moore himself being slain.

Moore, Thomas (1779-1852), Ireland's greatest poet, the author of "Irish Melodies," "Lalla Rookh," "The Epicurean," and many other works. He enjoyed immense popularity both in England and Ireland. Was the friend and biographer of Lord Byron.

More, Hannah (1745-1823), was the authoress of many stories and essays, mostly of a religious character, but highly successful. She is said to have earned £30,000 by her writings.

More, Sir Thomas (1480-1535), succeeded Wolsey as Lord Chancellor under Henry VIII., but fell into disgrace by refusing to take the oath of Supremacy, and was ultimately executed. His *Utopia* is one of the world's noted books, describing an imaginary country, ruled on ideal principles.

Morgan, J. Pierpont (1837-1917), one of the great financiers of the world, with banking concerns in New York and London. Among the gigantic undertakings which he controlled were the Steel Trust, the Atlantic Steamship Combine, and others of nearly equal magnitude. He bought many famous pictures (including Gainsborough's "Duchess of Devonshire"), and was a devoted Churchman and a man of noble charity. The catalogue of his works of art, privately issued in 1906, is one of the costliest and most beautiful books ever printed.

Morland, George (1763-1804), a painter whose pictures of English rural life were remarkable for their fidelity and breadth of treatment, and are much valued. He was a wayward genius who entered fully into the spirit of the rollicking scenes of the country alehouse and village pastimes, and, in spite of much fine achievement, wasted what might have been a great artistic career.

Morley, Viscount, of Blackbury, Lord President of the Council since 1910; Secretary for India from 1905 to 1910, when he resigned (b. 1859), author and statesman. He edited the *Morning Star* from 1879 to 1883, edited the *Fortnightly Review*, was editor of the *Pall Mall Gazette* 1880-1883,

and in the last-named year entered Parliament, and was at once appointed Chief Secretary for Ireland with a seat in the Cabinet. His chief, Mr. Gladstone, was defeated in 1886, but returned to power in 1892, when Lord Morley again accepted the Irish Secretaryship. After 1892 he and his party remained out of office, but the political loss was the public's gain. He was appointed a member of the Order of Merit in 1902, and in 1903 his *Life of Gladstone* was the chief book of the year. His other works include monographs on Voltaire (1873), Rousseau (1873), Diderot and the Encyclopædists (1878), Burke (1879), Walpole (1888), Cromwell (1900), and *The Life of Cobden* (1881). Mr. Carnegie presented the late Lord Acton's Library to Lord Morley, who gave it to Cambridge University. Lord Morley visited the United States in 1904, and on the Liberals coming into power under Sir H. Campbell-Bannerman at the close of the year following, he became Secretary for India. He died the Lords Veto Bill through the Upper House in 1911.

Morris, Sir Lewis (1833-1907), a distinguished Welsh poet. His best-known works are "The Epic of Hades," which John Bright highly praised, and "Songs of Two Worlds."

Morris, William (1834-1896), the poet of the "Earthly Paradise." Was also a Socialist and an art designer who did much for the improvement of domestic decoration.

Morse, Samuel Finley B. (1791-1872), an American artist and designer, who became the inventor of the Morse system of electric telegraphs, and of the Morse Code of Signals. He was the son of Jedediah Morse (1761-1826), a Congregationalist divine, geographer, and compiler of useful gazetteers.

Mosheim, Johann von (1694-1755), was a noted German theologian and historian, whose works were translated into most European languages.

Motley, J. Lothrop (1814-1877), historian and diplomatist. His chief work, *History of the Dutch Republic*, the result of ten years of persistent labour. He was United States Minister to Vienna in 1861, and in 1870 Ambassador to England.

Moulton, Fletcher, 1st Baron, P.C., F.R.S. (b. 1844). Educated at Cambridge; Senior Wrangler; Fellow of Christ's College; Q.C., 1885; sat in House of Commons for Clapham Division, 1885-1886, 1890-1891, 1894-1895; Appointed Justice of Appeal, 1905; Lord of Appeal in Ordinary since Aug. 1912.

Mount Stephen, Lord (1820), formerly President of the Canadian Pacific Railway; gave a large sum to various London hospitals in 1902, and helped the King's Hospital Fund three years later with an endowment of something like £15,000 per annum.

Mozart, Wolfgang Amadeus (1756-1791), the celebrated Austrian composer. Showed musical talent while very young, and performed in various capitals of Europe when only eight years of age. At twenty-five he accepted the position of musical composer to the Imperial Court of Vienna, and then began to write operas, producing in 1781 the "Nozze di Figaro," "Don Giovanni," and "Die Zauberflöte." He also wrote some beautiful Masses and a Requiem of unsurpassed beauty.

Mudie, Charles Edward (1818-1890), the founder, in 1842, of Mudie's Library, which revolutionised the reading opportunities of the middle classes, giving the command of the best new books of all kinds at a moderate yearly subscription, entailing orders to publishers for thousands of copies of leading works on publication.

Müller, George (1805-1868), was born in Prussia and removed to London in 1829, associating himself with Mission work; ultimately settling in Bristol, where he founded an Orphanage which cost £115,000, and is supported by voluntary contributions.

Müller, Friedrich Maximilian (1823-1900), usually known as Max Müller, came to England from Germany in 1846, and became Professor of Modern Languages at Oxford. He was a chief authority on Oriental manuscripts, and his books on philological subjects are standard works.

Mulready, William (1786-1864), an English painter and R.A. who was eminent in his day as a

painter of homely subjects. His "Choosing the Wedding Gown" is familiar to most people, from having been frequently engraved.

Munkacsy, Michael von (1844-1900), a celebrated Hungarian painter who, working on a large scale and revealing powers of striking dramatic treatment, achieved marked success in historical subjects.

Murat, Joachim (1771-1815), one of Napoleon's most famous marshals, who married the Emperor's sister Caroline, and was made King of the Two Sicilies. He afterwards commanded under Napoleon, but was defeated and lost his throne. Later he was captured, tried by court-martial and shot.

Murchison, Sir Roderick (1792-1871), an eminent geologist, whose researches and writings did much to popularise the science. He was President of the British Association in 1846, and of the Royal Geographical Society from 1867 to 1870.

Murdoch, William (1754-1839), was a distinguished engineer and inventor, who for a considerable time was associated with Boulton and Watt at Birmingham, and was of great assistance to Watt in working out the steam-engine on a practical basis. He was also one of the first to introduce gas lighting.

Murillo, Bartolomé Estéban (1617-1682), one of the greatest Spanish painters. His chief works are altar-pieces and religious subjects. He also painted a number of marvellous studies of peasant life. Some 200 of his pictures are in England.

Murray, Lord, of Elibank (b. 1870), eldest son of Viscount Elibank. As Master of Elibank sat in the House of Commons for Peebles and Selkirk from 1905 to 1910, and from 1910 to Aug. 1912 for Midlothian W. Comptroller of H.M.'s Household and Scottish Liberal Whip, 1906; Under-Secretary of State for India, 1909-10; and Parliamentary Secretary to the Treasury and Chief Liberal Whip, 1910-12. His acceptance of a position in the firm of S. Pearson & Son, Ltd., of which Lord Cowdray is the head, led to the resignation of his Parliamentary seat and his elevation to the peerage. Committee sat, 1914, to inquire into his Marconi speculations, and found nothing to his dishonour.

Murray, Dr. Sir James Augustus (b. 1837), the distinguished philologist, and editor of the New English Dictionary, the most exhaustive work of the kind hitherto published. Was for some years an assistant master at Mill Hill School.

Murray, Lindley (1745-1826) was an American educationist of Quaker stock, who migrated from his native country to England after the Declaration of Independence. He lived for some years in a cottage a little way outside of York city, and wrote numerous educational works, including the famous volume which for a long period was the standard grammar of the English language.

Musset, Louis Alfred de (1810-1857), was the French writer of distinction whose essays and romances did much to develop the imaginative side of the literature of his native land. His brother Paul (1804-1880) was also a novelist of note.

N

Nadir Shah (1688-1747) became King of Persia in 1736, and distinguished himself by some remarkable conquests, including a victory over the Great Mogul and the capture of Delhi. He was assassinated by his nephew after a short but brilliant reign.

Nairne, Lady Caroline (1770-1835), a Scottish poetess who wrote several highly popular songs, including "Caller Hurrin," "The Land of the Leal," and "The Laird o' Cockpen."

Nana Sahib (1821-1859), the Indian prince who led the rebels at Cawnpore on the outbreak of the Indian Mutiny, and was responsible for the terrible massacre there. He managed to escape, and his subsequent career is unknown.

Nansen, Fridtjof (born 1861), the Norwegian explorer who, after two or three expeditions across Greenland, in 1893 started out on his famous North Polar expedition, on which he was away three years, reaching the highest altitude thereto attained—

86 deg. 24 min. N.—a feat since eclipsed by the Duke of the Abruzzi and by Peary. He published a fascinating narrative of his exploration under the title of *Farthest North*.

Napier, Sir Charles James (1726-1823), a British general who distinguished himself in the Peninsular War, and afterwards in India, succeeding Lord Gough as Commander-in-Chief there in 1819.

Napier, Sir William (1785-1860), the historian of *The Peninsular War* and of *The Conquest of Sicily*, and an officer of distinction in the wars of which he wrote, was brother to Sir Charles James Napier, and held seven decorations for gallantry in battle.

Napier of Magdala, Field-Marshal Lord (1810-1890), an eminent engineer officer, who did splendid service in the Indian Mutiny at the Relief of Lucknow. In 1868 he commanded the Abyssinian Expedition, and conducted the successful storming of Magdala. Was Commander-in-Chief in India in 1870, and afterwards Governor of Gibraltar.

Napoleon I. (1769-1821) was born at Ajaccio in Corsica. Sent to France to receive a military education and was a captain at the age of twenty. In 1794 served in Italy with such distinction that he won a generalship, and next year was appointed Commander-in-Chief. A series of most brilliant successes followed. He defeated the Austrian forces in 1797, conducted an expedition to Syria and Egypt in 1798, returned in 1799 to find himself the most popular man in France, and in November of that year he proclaimed himself First Consul. In 1800 he was again in Italy and once more victorious. In 1804 he was made Emperor, and the following year was in the field against England, Russia and Austria, achieving a splendid series of victories at Austerlitz and elsewhere, and practically became Dictator of Europe, distributing kingdoms amongst his brothers in the most profuse manner, Joseph becoming King of Naples, Louis King of Holland, and Jerome King of Westphalia. In 1809, after divorcing his first wife, Josephine, he married Maria Louisa of Austria. Subsequently he made serious blunders. His invasion of Russia was disastrous, the Peninsular War went against him, and in 1814 the Allies entered Paris and forced him to abdicate. He was sent to Elba, but made his escape in the following year, gathered his old army about him and went forth to meet the English and Prussian armies. He was finally completely defeated at Waterloo on the 18th June, 1815, and exiled to St. Helena, where he died six years later. His remains were removed to Paris in 1840, and rest in a magnificent tomb.

Napoleon II. (1811-1832) was the son of Napoleon I. and Maria Louisa. Was born in Paris and proclaimed King of Rome, but died of consumption when only twenty-one, being known at the time of his demise as the Duke of Reichstadt.

Napoleon III. (1808-1871) was the son of Louis Bonaparte, King of Holland, and of Hortense, daughter of the Empress Josephine. According to the Napoleonic idea he became heir to the throne of France on the death of the Duke of Reichstadt. Made an attempt to create a popular movement in his favour in 1836 at Strasburg, but was taken prisoner and deported to the United States. In 1840 he made a second attempt at Boulogne. Was again captured and sentenced to imprisonment for life in the Castle of Ham. Six years later he escaped, disguised as a workman, and lived in London until the Revolution of 1848, when he was elected to the National Assembly and a few months later became President of the Republic. In 1851 by his famous *coup d'état* he obtained complete control of the Government and restored the Empire in 1852, becoming Napoleon III. Married Eugénie de Montijo in 1853. In 1854 there was the Crimean War, when France and England were allies. In 1859 followed the war with Austria. In 1863 the occupation of Mexico came, and in 1870 the Franco-Prussian War, which carried the Second Empire down, and compelled Louis Napoleon to take refuge once more in England. He died at Chislehurst in Kent.

Napoleon, Victor, Prince (b. 1862) is son of the late Prince Napoleon and Princess Clotilde. Since 1891 he

- has posed as the head of the House of Bonaparte. He is exiled from France and lives mostly at Brussels.
- Nares, Sir George** (b. 1831), a retired British admiral, who took a conspicuous part in Arctic exploration between 1830 and 1875, and commanded the *Challenger* expedition of 1875.
- Nash, John** (1752-1835), was a successful London architect of the Regency days, the designer of Regent Street, Buckingham Palace, and of Regent's Park and the commanding terraces that border it.
- Nash, Richard** (1674-1762), was a man of fashion who as "Beau Nash" held great sway at Bath for many years, being "master of the ceremonies" there and social dictator.
- Nasmyth, James** (1808-1890), the inventor of the steam-hammer, was a native of Edinburgh, but in early manhood settled in Manchester, and there brought out his famous new tool, which became indispensable in all large iron and engineering works, and realised a fortune for the inventor.
- Nathan, Lt.-Col. Sir Matthew, K.C.M.G.** (b. 1802), served with distinction in the Nile, Lushai and other expeditions as an officer of the Royal Engineers, and promoted major in 1868, Governor of the Gold Coast, 1900-1905, Governor of Hong-Kong, 1905-1907, Natal, 1907-1909, Secretary-General Post Office, 1909-11, and Chairman of the Board of Inland Revenue since 1911.
- Neander, Johann, A. W.** (1780-1850), the German theologian and historian who wrote *A Universal History of a Christian Religion*, in 5 vols., besides several other works.
- Necker, Jacques** (1732-1804), the father of Madame de Staël. Was Director-General of Finance to Louis XVI. from 1777 to 1787, and made strenuous efforts to effect economies in the royal expenditure, which brought him into disfavour and he retired to Switzerland. In 1788, however, he was recalled and appointed Comptroller-General, but failing to obtain assent to his proposals, he relinquished the position.
- Nelson, Horatio, Viscount** (1758-1805), the great English naval commander; son of a Norfolk clergyman. Went to sea at twelve years of age, and was post-captain at twenty-one. In 1793 he was captain of the *Agamemnon*, and proved his capacity and daring against the French. He lost his right eye at the siege of Calvi in 1794, and his right arm at the siege of Santa Cruz in 1797. In 1798 he achieved a great victory over the French in Aboukir Bay, in recognition of which he was created a Baron and granted a pension of £2,000 a year. He was victorious at Copenhagen in 1801, after which he was promoted to the rank of Viscount. In 1805 occurred the famous Battle of Trafalgar, in which the French fleet was destroyed and Nelson was killed. He was buried in St. Paul's Cathedral, and having no son to succeed him the peerage was transferred to his brother, who became Earl Nelson, with a perpetual pension of £3,500 a year and a gift of £100,000 for the purchase of an estate. *A Life of Nelson*, by Lord Charles Beresford, formed the issue of *Pears' Annual* for 1905.
- Nero, Claudius Cæsar** (A.D. 37-68), the notorious Roman Emperor, whose reign of fourteen years was rendered infamous by his cruelty and licentiousness. Finally, he was driven from his palace and put an end to his life.
- Nerva**, who became Emperor of Rome when old, reigned from 96 to 98 A.D., and in that short period introduced valuable reforms, aided by his adopted son, Trajan, who succeeded him.
- Nestorius**, founder of the Nestorian sect, was Patriarch of Constantinople in the 5th century, but was deposed for heresy on refusing to accept the divinity of the Virgin.
- Neville, Sir Ralph** (b. 1848), one of the Judges of the Chancery Division, was in Parliament from 1887 to 1895, and is chairman of the Garden City Association.
- Newcomen, Thomas** (1663-1719), was one of the first to put a steam-engine into practical operation, and in 1705 patented his invention, which was the pumping-engine used in Cornish mines down to the adoption of Watt's engine. He was originally a locksmith in Dartmouth, his native place.
- Newman, Cardinal** (1801-1890). Educated at Oxford, he was incumbent of St. Mary's there from 1828 to 1843, taking an active part in the religious discussions of the time, gradually showing a tendency to adopt Roman Catholic views, and ultimately allying himself with the Romanists, resigning his living and settling at Edgbaston, Birmingham, as the head of a community of the Order of St. Philip Neri. Here he remained for the rest of his career, devoting himself to an almost monastic life, but from time to time employing his pen in the production of religious works, displaying great controversial power, beauty of thought, and charm of style. In his *Apologia pro Vita Sua* he described the development of his religious thought, and in other writings attained considerable distinction. He was the author of the beautiful hymn "Lead, kindly Light," and of the "Dream of Gerontius." In 1879 he was made a Cardinal.
- Newnes, Sir George, Bart.** (1851-1910), a well-known publisher and periodical proprietor, founder of *Tu-Bus*, the *Strand Magazine*, and many other monthlies; also of the *Westminster Gazette*. Was in Parliament from 1885 to 1895 and from 1900 to 1910.
- Newton, Sir Isaac** (1642-1727), great mathematician and philosopher. Was educated at Cambridge, greatly distinguished himself, and became M.P. for the University in 1688. In 1696 was appointed Warden of the Mint, and in 1699 became Master of that institution. Was President of the Royal Society 1703. Was knighted in 1705. His scientific discoveries were of the utmost importance, including the law of gravitation and the method of fluxions, while he also effected considerable improvements in the telescope. His numerous philosophical works are wonderfully lucid expositions.
- Ney, Marshal Michel** (1769-1815), was one of Napoleon's most noteworthy generals. After the Emperor's abdication Ney submitted to the Bourbons, but took up arms again for his old chief, and fought for him at Waterloo; attempting to escape to Switzerland, he was captured, tried, condemned, and shot in the Garden of the Luxembourg.
- Nicholas I., Czar of Russia** (1796-1855). The son of the Emperor Paul, he succeeded to the throne in 1825, and was a vigorous ruler and man of great ability. He was generally friendly towards England, until the Crimean War made him a bitter enemy.
- Nicholas II., Czar of Russia** (b. 1868), son of the Emperor Alexander III., and of the sister of Queen Alexandra. Came to the throne in 1894, and has had a reign full of trouble abroad and at home. He has been quite unable, however well intentioned, to curb either the grand ducal party, the bureaucrats, or the anarchists.
- Nicholas, St.**, Bishop of Myra and patron saint of Russia, flourished in the 4th century, and is popularly associated with Christmas under the corrupted name of Santa Claus.
- Nickson, Rt. Rev. G. D.D.**, Bishop of Bristol since Feb., 1914 (b. 1804). Educ. Trin. Coll., Dublin; Corpus Christi Coll., Camb. Bp. of Jarrow, 1906-14; Examining Chaplain to Bp. of Durham, 1901-8.
- Nicholl, Sir W. Robertson**, b. 1851 in Aberdeenshire and in 1874 was ordained to the Free Church ministry. Ten years later he became editor of the *Express*, and in 1880 was appointed editor of the *British Weekly*. Dr. Nicholl is a prolific author, and has written much and ably on religious and literary subjects. He also edited the *Bookman*, the *Woman at Home*, and the *British Monthly*.
- Nicolson, Rt. Hon. Sir Arthur, P.C.** (b. 1849). Educated at Rugby and Oxford. Entered the diplomatic service in 1874, and held positions at various embassies—Berlin, Peking, Constantinople, Athens, Teheran, etc., and was ambassador at St. Petersburg from 1906 to 1910. Made G.C.M.G. in 1907. In 1910 he succeeded Sir Charles Hardinge as Permanent Under-Secretary for Foreign Affairs. Has written a *History of the German Constitution*.
- Niebuhr, B. G.** (1776-1831), was Professor of Roman History in the University of Berlin, and afterwards at Bonn. He obtained a world-wide reputation for his *History of Rome*.

Nightingale, Florence (1820-1910) was a noted figure in the Crimean War, where she organised a band of nurses which did great service in relieving the sufferings of the soldiers. Her system was adopted and developed in all parts of the world, and she was honoured with a testimonial of £50,000, which she applied to the founding of the Nightingale Home for Nurses. The German Emperor conferred an order upon her in 1907, and in 1908 she received the freedom of the City of London. Order of Merit, 1907.

Nilsson, Christine (b. 1843), the once famous prima donna, was born of humble Swedish parents, and her first efforts at singing in public were made at fairs in her own country while yet she was but a child. A wealthy gentleman, attracted by her fine voice, paid the cost of her musical education in Paris, and in 1864 she made her *début* in that city, and at once was acclaimed a great singer. She became Countess de Miranda in 1887.

Nithsdale, Earl of (1676-1744), a Jacobite Scottish nobleman who took part in the rising of 1715, and was taken prisoner at the Battle of Preston. Condemned to death, he escaped from the Tower in woman's clothes and escaped to the Continent, dying at Rome nearly thirty years later.

Nobel, Dr. Alfred B. (1833-1896), the inventor of dynamite, was a Swedish engineer and chemist who amassed a large fortune, a great portion of which at his death in 1896 he set apart as a fund for annual prizes to such persons as during each year shall have contributed most materially to the benefit of mankind. There are five of these prizes, each worth about £8,000, and they are given in the following departments: physics, chemistry, physiology or medicine, literature, and peace promotion.

Nogi, General Count (1849-1912), a Japanese soldier who achieved great distinction by his able and successful conduct of the siege of Port Arthur. He was a man of great simplicity of character, a poet, and a statesman, and startled the world when on the day of the funeral of the late Emperor of Japan he committed suicide, his wife sacrificing her life at the same time—an old-time Japanese patriotic custom now seldom followed.

Nollekens, J. (1737-1823), a Royal Academician who produced numerous sculptures during a long and successful career, and was said to have realised £200,000 by the exercise of his art.

Nordau, Max (b. 1849), an author and physician, who is a native of Budapest, and settled in Paris in 1880, where he has since resided and been an active literary force. His best-known works are *Degeneration* and *The Drives Must Die*.

Nordenfeldt, (b. 1844) was born in Sweden and as the inventor of the Nordenfeldt machine gun, the submarine boat, and certain improved torpedoes has achieved a wide reputation.

Nordica, Madame (1859-1914), an eminent vocalist and operatic artist. She is a native of America. Her first operatic appearance in London was made in 1889. Her greatest rôle was that of Margaret.

Norfolk, Duke of (b. 1817), is Premier Duke and Hereditary Earl Marshal of England. He has filled many public positions both in and out of Parliament, and served in the South African campaign as captain in the Imperial Yeomanry. From 1895 to 1900 he was Postmaster-General.

Norman, Sir Henry (b. 1858), educated at Harvard, Leipzig, and in France. Was an active journalist for many years, being connected at different times with the *East Mail Gazette*, the *Daily Chronicle* and other papers, and in 1902 founded the *World's Work*. He represented Wolverhampton South in Parliament from 1900 to 1910 and has sat for Blackburn since 1910. Knighted in 1906.

Norman Neruda, Madame (Lady Hallé), Violinist to Queen Alexandra. (See *Halle, Sir C.*)

North, Lord (1733-1792), was Premier from 1770 to 1782, and responsible in great part for the American War of Independence.

Northcliffe, Alfred C. Harmsworth, 1st Baron (b. 1865), one of the most prominent men in

modern journalism, and owner of a controlling interest in the *Times*. Started *Answers* in 1888 with his brother, Cecil Harmsworth, now M.P. for the Dromwich Division. In 1894 the Harmsworths purchased the *Evening News*, of which they soon made a valuable property. In 1896 the *Daily Mail* was started, and became very successful. Lord Northcliffe, as the head of the publishing company which runs the various Harmsworth publications and papers, has shown immense business aptitude. Was rewarded with a baronetcy in 1912 and elevated to the peerage in 1905. Has made his papers prominent during the war by a strong war policy.

Northcote, Lord (1846-1912), son of the first Earl of Idlesleigh (q.v.) and Governor-General of the Commonwealth of Australia, 1903-1908.

Norton, The Hon. Mrs. (1808-1898), was a granddaughter of Sheridan, a poetess, and a novelist whose beauty and literary gifts won her renown.

Nostradamus, Michel de (1503-1566), a notorious astrologer and physician, who attracted French Society by his many predictions, and enriched himself by trading upon popular credulity.

Novalis (1777-1801), a Saxon poet, who enriched his country's literature by a number of poetic romances of great beauty. He has been styled the "German Goethe," his real name was von Hardenberg.

Numa Pompilius was, according to tradition, the second King of Rome and the founder of Roman Ceremonial Law. He is said to have reigned thirty-nine years in absolute peace in the 7th century before the Christian era.

O

Oates, Titus (1700-1705), a notorious informer against Roman Catholics in the reign of Charles II. who was given a substantial pension for having, it was believed, exposed a plot against the King, but in the following year, on being discovered to have committed perjury and forgery, which involved the prosecution, condemnation, and execution of a number of persons who were not guilty, he himself was imprisoned and sentenced to imprisonment for life. When William III. came to the throne, however, he was pardoned and again granted a life annuity.

Oberlin, J. F. (1740-1820), an Alsatian clergyman famed for his philanthropy and remarkable services to the people of Waldkirch, whom he instructed in agriculture, industries, and other pursuits, and was decorated with the Legion of Honour by Louis XVI.

O'Brien, William (b. 1852). For years a prominent Nationalist leader, editor of *United Irishman*, founder of the All for Ireland League, imprisoned for over two years. Published his *Recollections* in 1902. Retired from Parliament in 1907; re-elected 1910, estranged from the Redmondites. Resigned again in 1914, but re-elected unopposed.

O'Brien, William Smith (1803-1861), was a noted Irish public agitator, who sat in Parliament for a time. In 1848 he led an unsuccessful insurrectionary movement of the "Young Ireland" party which was quickly suppressed, he himself being arrested, tried for high treason, and sentenced to death. He was not executed, however, but subjected to transportation and received his freedom in 1856.

Ockham, William of (c. 1270-1340), was an English scholar and philosopher who espoused the cause of Nominalism with sufficient success to create a philosophical school. He was styled "The Invincible Doctor," belonged to the Order of Franciscans, and for some time held a lectureship in the University of Paris.

O'Connell, Daniel (1775-1847), the Irish "Liberator," as he was called, was a famous orator and politician and a highly successful barrister. In Parliament he advocated the cause of Ireland with courage and audacity. His agitation for Repeal was immensely popular with his countrymen, but famine and division did much to break his party up, and he died an old man at Genoa, leaving his grave on the "Forward" monument in the land of his birth.

O'Connor, Feargus (1790-1855), an Irish lawyer

who became prominent in the Chartist agitation, and sat in Parliament for a number of years. His eccentricities, however, were a hindrance rather than help in the cause, and led to disorderly scenes in the House of Commons, and ultimately he was found to have become a hopelessly unsound mind.

O'Connor, (T. P.) (b. 1848), one of the most successful journalists and editors of recent years. Entered upon newspaper life in 1867, and after some strenuous struggling found employment in London in 1870 on the *Daily Telegraph*. Entered Parliament as an Irish Nationalist in 1880, and is there still. Sits for the Scotland Div. of Liverpool. Founded and edited successively the *Star*, *Sun*, *Weekly Sun*, *M.A.P.*, and other papers. Is an eloquent speaker and a brilliant writer, with broad sympathies and a knowledge of the world which he turns to good account.

Oversted, Hans C. (1777-1851), the Danish philosopher and scientist, whose discoveries in electrical research did much to help forward the invention of the electric telegraph. He was Professor of Natural Philosophy to the University of Copenhagen.

Offa was King of Mercia from circa 757 to 796, and had a warlike career. After considerable conquests in Wales he built an embankment from the Dee to the Wye, 100 miles long, which was called Offa's dyke, fragments of which still remain. He imposed "Peter's Pence" as a gift to the Pope for absolution.

Offenbach, Jacques (1819-1880), was a native of Cologne, but settled in Paris in 1833, and lived there for the rest of his life. He was an accomplished conductor and composer, and for a time was exceedingly popular. His burlesque operas were the cleverest things of the kind that had been written, and were played in every part of the world with great success. His chief compositions were "La Grande Duchesse," "La Belle Héloïse," "Opéra aux Tuileries," "Madame Favart," and "Genevieve de Brabant."

Oglethorpe, General (1769-1785), was the founder of Georgia, George II. having granted him a large tract of Colonial land to be used as a settlement for exiled German Protestants and English debtors.

Ohm, George Simon (1787-1854), was the discoverer of the unit of electrical resistance, which is known as "ohm." He was a native of Bavaria, and gained much fame as a physicist and mathematician.

Oku, Count (b. 1846), is the noted Japanese general who, for his services against China, in 1894, was created Baron. At the outbreak of the war with Russia in 1904 he was appointed to the command of the second army. He captured Kinchen in May, 1904, and from that time forward distinguished himself by successive victories, taking conspicuous part in the Battle of Liao-yang.

Olaf, St. (995-1066), the first Christian King and patron saint of Norway. Was on the Norwegian throne when Ethelred was King of Britain. A soldier of great prowess, defeated by Canute in 1026, and subsequently slain in battle.

Oldcastle, Sir John (1376-1417), being known as "the good Lord Cobham," having married the heiress of the peer of that name. Distinguished himself in arms under Henry IV. and V., but fell into disfavour because of the warmth with which he advocated the doctrines of Wyclif, for which he was burned to death as a heretic.

Oliphant, Laurence (1829-1888), was educated for the Bar, but drifted into authorship and journalism, and wrote several notable books. Sat in Parliament from 1865 to 1868. In 1870 published *Piccadilly*, a brilliant satirical novel. Was correspondent to *The Times* during the Franco-German War, and afterwards, and coming under the influence of Thomas Lake Harris, the American spiritualist, he became lost to the world of letters and subsequently took up the scheme for the colonisation of Palestine for the Jews, dying—after a residence for some time near Mount Carmel—at Twickenham.

Oliphant, Mrs. Margaret (1838-1897), a remarkably prolific novelist and writer, some of whose stories achieved deserved popularity, notably *The Chronicles of Carlingford*, *Salem Chapel*, and

The Marriage of Elinor. She also wrote numerous historical and critical works and biographies, besides some popular books for children.

Oliveros, Count (1587-1645), was a famous Spanish statesman, who from 1602-1643 controlled the affairs of his country, but his tyranny caused the rebellion which led to his banishment.

Omar I. (581-644) was second Caliph of the Mohammedans, and the first to be designated the Commander of the Faithful. He conquered Syria, Mesopotamia, Persia, Egypt, and Palestine, reigned from 634-644, and died at the hands of a slave.

Omar Khayyam flourished in the 11th and 12th centuries. He was the great Persian poet whose "Rubayyat" was made known to English readers by Edward FitzGerald in 1859. The mixture of mysticism and philosophy contained in this work has a peculiar charm and fascination, and numerous Omar Khayyam societies have been formed in England and America.

Omer Pasha (1806-1871), a Turkish general who distinguished himself in the Crimean War, defeated the Russians at Eupatoria in 1855, and fought against the insurgents in Circassia in 1857. He was an Austrian.

Onslow, Earl of (1853-1911), fulfilled several diplomatic and ministerial appointments, having been twice Under Secretary for the Colonies, Under-Secretary for India, and President of the Board of Agriculture. Was from 1888 to 1892 Governor of New Zealand, and in 1905 received the appointment of Chairman of Committees in the House of Lords.

Opie, Amelia (1790-1853), an English novelist and writer of sentimental stories which had considerable vogue for a period. She became a Quakeress in 1825, and was the wife of John Opie, the artist, whose *Lectures on Painting* she published after his death.

Opie, John (1761-1827), a celebrated English painter whose historical pictures were highly valued in his day. He was buried in St. Paul's Cathedral. "Peter Panzer" (Dr. Watson's introduction to London as "The Cornish Wonder," his painting of "The Murder of Kizzio" (1787) caused a great sensation.

Orchardson, Sir Wm. Q. (1845-1910), an eminent K.A. (knighted 1897), whose subject pictures and portraits gained him a high reputation. Among his best-known works are "Napoleon I. on board H.M.S. *Bellerophon*" (purchased for the nation, under the Chantry bequest), "Un Mariage de Convenience," and its sequel "Un Mariage de Conscience—After." He was born in Edinburgh. His son Charles (b. 1871) is a subject painter of ability who has also distinguished himself in portraiture.

O'Reil, Max (1848-1903), the pen-name of Paul Blouet, a French writer, journalist, and teacher of French, whose *Jeh Bull and His Island* was one of the most popular books of the time.

Orléans, Duc d' (b. 1869), is the chief of the Bourbon-Orléans family and eldest son of the late Comte de Paris. He was married to the Archduchess Marie Dorothea of Austria in 1896. In 1896 he was exiled from France, and a subsequent year in Paris subjected him to second captivity. He has served as a soldier in India, and has a house at Wood Norton.

Orsini, Felice (1819-1858), an Italian patriot and revolutionist who, being convicted of an attempt with explosive bombs in 1858 upon the life of Napoleon III., was executed along with his fellow conspirator, Pieri, in Paris.

Oser, Sir Wm., Bart. (b. in Canada 1849), Regius Professor of Medicine, Oxford University, since 1905; has had a distinguished career and been honoured by many Universities in Canada (where he was born), the United States, and Great Britain. Is author of numerous medical works, including *A System of Medicine*, in 7 vols.

Osman I. (1259-1326) was the leader of the Tartar forces which overran the Eastern Roman provinces in 1299, eventually settling there and establishing the Ottoman rule. He was a native of Bithynia.

Osman Digna (b. 1830), a Soudanese rebel general who for many years commanded the army of the Mahdi, and showed bravery and tactical skill in opposing the Egyptian and British forces. After the defeat at Omdurman his career was at an end. He has since been a military prisoner at Halfa.

Osman Pasha (1835-1900) was a famous Turkish general who achieved renown in the war with Serbia in 1870, and in 1877 conducted the splendid defence of Plevna against the Russians.

Oswald, Sir, King of Northumbria from 652 to 672, aided by St. Aidan, established Christianity amongst his subjects. He was slain in battle with Penda, King of Mercia.

Ottley, Rear-Admiral Sir Charles L., R.N., M.V.O. (b. 1853), served with distinction in the Navy, in the many seas and numerous engagements; from 1890 to 1903 was Naval Attaché to the Maritime Courts and served in that capacity in Japan, Russia, Italy and the United States. Was Secretary of the Committee of Imperial Defence, and acted as British Naval Representative at the Hague Conference of 1907.

Otway, Thomas (1651-1688), an eminent English dramatist whose tragedy "Venice Preserved" is still occasionally performed. He died in destitution.

"Ouida" (Mlle. Louise de la Ramé), an English novelist (1840-1908), born at Bury St. Edmunds of French extraction, whose works have been highly popular. Many of her stories glow with passion and poetry, and there is always a romantic setting to them. Her best-known novels are *Under Two Flags*, *Nalka*, *Harmonie*, and *Scorcia*. In 1907, she was found to be living in straitened circumstances in an obscure Italian town. A Civil List pension of £150 was granted to her in 1907. She died in 1908.

Ouseley, Rev. Sir Frederick Gore (1825-1880) was a well-known organist and composer of music, mostly for the Church. He was also the author of several technical books on his art. His father was Sir Gore Ouseley (1770-1844), who was our Ambassador in Persia in 1810; and the brother of the latter, Sir William Ouseley (1767-1844) was a distinguished diplomatist. Another diplomatic celebrity of the family was Sir William Gore Ouseley (1797-1866), son of Sir William and cousin of Sir Frederick.

Outram, Sir James (1823-1893), a famous British General, who served with splendid distinction in India for the greater part of his life. He went through the Mutiny with conspicuous heroism and also achieved renown in the Afghan and other campaigns. His brightest hour was when in the relief, defence and capture of Lucknow, and when he died he was given a public funeral in Westminster Abbey, a striking monument being erected to his memory. On the slab covering his grave in the Nave he is described as "the Bayard of India."

Overbeck, Frederick Johann (1789-1869), a native of Lübeck, and leader of the artistic school which aimed at the revival of the pre-Renaissance style of painting scriptural subjects. Although he had a hard struggle he ultimately won success, and his frescoes and paintings are now highly valued.

Overbury, Sir Thomas (1581-1633), a man of note and influence in the time of James I. Incurring the hatred of the Court, as of Essex, and his wife, Carr, the King's favourite, by endeavouring to prevent the Countess procuring a divorce and marrying Carr, the pair obtained Overbury's confinement to the Tower, where he was afterwards found poisoned. They were found guilty of the crime, but their only punishment was banishment from Court.

Ovid (43 B.C.-A.D. 18), the famous Latin poet (Publius Ovidius Naso), whose "Metamorphoses" and "Art of Love" are among the best known examples of Roman literature of the lighter kind. He died in banishment.

Owen, Sir Richard (1804-1882), was superintendent of the Natural History department of the British Museum, and a biologist who did great service to science by his numerous works. He declined the theory of organic evolution, but where his research did not conflict with the opinions of the more modern school of scientists he was a successful and esteemed worker, and was reckoned by many the greatest paleontologist since Cuvier.

Owen, Robert (1797-1858) Socialist and philanthropist, devoted his life and fortune to the carrying out of his theories, and established socialistic colonies in Lanarkshire, Hampshire, and America, which, although at times very promising of success, had

ultimately to be abandoned. His book, *New View of Human Society*, published in 1820, aroused considerable discussion. His son, Robert Dale Owen (1820-1877), was also a social reformer, who became a spiritualist, and was for some time prominent in American politics as a slavery abolitionist.

Oxford, Bishop of. (See *Groce*.)

Oyama, Field-Marshal Prince (b. 1844), was Japanese Minister for War in 1894, and commanded the Second Army in the Japanese war with China. In the Russo-Japanese War he held the chief command, and displayed remarkable military power. He had under him about 200,000 men at the Battle of Liao-yang, where he scored a great victory; while at the Battle of Shiao he had a still greater force and attained a further triumph.

P

Paderewski, Ignace Jan (b. 1860), the celebrated pianist and composer who was born in Russian Poland. Could play the piano at three, at seven was placed under an able teacher, and in a few years made public appearances. It was not until 1890 that he made his first appearance in London.

Paganini, Niccolò (1781-1840), a famous violinist, and one of the most expert performers on that instrument who ever lived. Wherever he played he created a great sensation, and accumulated a fortune of £200,000 at the reward of his genius.

Page, Walter H. (b. 1855), United States Ambassador to Great Britain since 1913, and a member of the publishing firm of Doubleday, Page & Co., New York. Has edited *The Forum*, the *Atlantic Monthly*, and the *World's Work* (New York).

Page, Sir James (1814-1899), a great surgeon who was Assistant-Surgeon to Queen Victoria, and stood at the head of his profession in England. Was created a baronet in 1871, and President of the Royal College of Surgeons in 1875.

Palme, Thomas (1737-1809), a noted writer on political and religious subjects, whose *Notes of Man* caused great commotion when published in 1791, and led to his prosecution for blasphemy. He escaped to France, and was made a member of the National Convention. In 1794 his *Age of Reason* was published, and brought his opinions round strong opposition. From 1802 he lived in the United States.

Palestrina, Giovanni (1524-1604), a distinguished Italian musical composer, chiefly of Church music, all of which was marked by strong spiritual fervour. In 1565 he composed three Masses at the direction of the Council of Trent which set the standard of ecclesiastical music of that description.

Paley, William (1743-1805), a famous divine and writer on religion and philosophy. His *Evidences of Christianity*, and *Elements of Moral and Political Philosophy*, secured him a great reputation.

Palgrave, Sir Francis (1798-1884), a much esteemed historian, who wrote *The Rise and Progress of the English Commonwealth*, *A History of Normandy*, and *A History of the Anglo-Saxons*. He was knighted in 1832. His son, Francis Turner Palgrave (1804-1897), was a poet of devotional instincts, who was Professor of Poetry at Oxford, and edited the much-esteemed *Goblin Treasury*. Another son, William Gifford Palgrave (1826-1888), was a traveller, diplomatist, and prose writer of considerable ability.

Palissy, Bernard (1510-1580), was a distinguished French potter who after years of struggle and self-denial discovered the art of producing white enamel, after which he became famous and set up a porcelain factory in Paris, which was patronised by Royalty. Embracing the Reformed religion he narrowly escaped destruction in the massacre of St. Bartholomew. He was thrown into the Bastille in 1588, and died in that prison the year following.

Palladio, Andrea (1518-1580), the great Italian architect, who introduced the style of architecture known as Palladian, which was long considered the most perfect exposition of the art. His masterpiece is the Church of the Redemptor at Venice.

Pallas, Peter Simon (1741-1811), a German

traveller and naturalist, who was employed in the service of Catherine of Russia in various expeditions, which resulted in many important discoveries in Siberia and the Caucasus.

Palliser, Sir William (1830-1882), was for many years an active worker in the field of gun and projectile manufacture. The Palliser gun was famous in its day, and was introduced about 1870. It was of cast-iron external construction, lined with a tube of wrought iron, and served to convert the old smooth bore guns into rifled arms. Sir William also invented Palliser shot.

Palmer, Sir C. M., M.P. (1822-1907), was the founder of the great shipbuilding works at Jarrow which bear his name. He became connected with the coal industry while young, and was prompted to begin shipbuilding in order to solve the problem of conveying coals to London with greater celerity than had theretofore prevailed. He built an iron screw steamer capable of conveying 500 tons of coal to the capital, and not long afterwards had a considerable fleet of steam colliers afloat. Sir Charles may be said to have built Jarrow, and was its first mayor. The firm's works cover over 100 acres, and they now construct the heaviest class of battleships.

Palmer, Edward Henry (1840-1882), a noted linguist, who did valuable work for the Palestine Exploration Fund in 1868-1872, and later entered the service of the British Government and was employed in various negotiations with Oriental races. He was killed by natives of the Sinai Peninsula in 1882.

Palmer, John (1742-1818), originator of the mail-coach postal service in 1782. Being promoted to the Post Office secretaryship, he was the means of introducing many important reforms, and was rewarded with a grant of £50,000 and a pension of £3,000 a year. He was originally a theatrical manager at Bath.

Palmerston, Viscount (1784-1865), was a distinguished English statesman, who entered Parliament in 1807 and sat almost continuously, for one constituency or another, until his death. Before the passing of the Reform Bill he was a Conservative, but afterwards joined the Liberals, and was for the best part of his career in office. In 1807 he was a Junior Lord of the Admiralty; from 1809 to 1823 was Secretary for War. After that served many years as Foreign Secretary, became Home Secretary in 1852, and First Lord of the Treasury in 1855. In 1859, after being defeated the previous year, he was again Prime Minister and remained in that office until his death. He was buried in Westminster Abbey.

Pancras, St., the patron saint of children, was the son of a Roman noble, and came to Britain in the reign of Diocletian, where he was put to death at the age of fourteen for refusing to renounce Christianity.

Panizzi, Sir Antony (1797-1879), an Italian political exile, who in 1831 was appointed to the Assistant Librarianship and Keepership of the Printed Books of the British Museum. In 1856 he became Principal Librarian, retiring in 1866, after which he was made K.C.B. The great Reading Room was constructed from his designs.

Paoletti, Pasquale (1795-1807), a noted Corsican patriot who fought gallantly for his country's freedom, but was compelled to take refuge in England. He was buried in Old St. Pancras Churchyard, in London, but his remains were afterwards removed to Corsica.

Papin, Denis (1647-1712), a French mathematician and scientist who settled in England and made a considerable reputation in scientific circles. He invented the condensing pump, and was the first to use a safety valve. His discoveries in connection with steam power entitle him to be reckoned amongst the first to put that power to any practical test. He was, for a time, Curator of the Royal Society.

Paracelsus, Philippus A. (1493-1541), was a famous Swiss mystic and alchemist, and for a time was Professor of Physic and Surgery in the University of Basle. His skill in medicine was undoubtedly great, but he forsook the beaten track, and devoted the greater part of his life to experi-

ments in alchemy, in the course of which he made numerous important discoveries, being the first to employ laudanum and antimony in pharmacy.

Parle, Matthew of (1705-1760), a Benedictine monk of St. Albans who wrote a *History of England* from 1066 to 1259, a book which is of considerable value. He owed the name by which he became known to his early studies in the University of Paris.

Park, Mungo (1771-1806), a famous British traveller who in 1799 published an account of his *Travels in the Interior of Africa*, a work which caused a considerable sensation and was highly popular, recounting as it did many wonderful stories of adventure in a then unknown part of the world. He explored the Gambila and the Niger and was drowned in the latter river during an attack upon his canoe by hostile natives.

Parker, Sir Gilbert (b. 1826), a Canadian-born novelist who, after a journalistic career in Australia and elsewhere, went to London and soon acquired a considerable reputation as a writer of skilful stories. His earlier novels deal with French-Canadian life in a telling and picturesque manner. In later years he has changed the scene of his stories to Scotland. He was knighted in 1906, and was a member of the House of Commons for Gravesend in the Conservative interest.

Parker, Joseph (1830-1902), a popular Nonconformist preacher and author, who settled in London in 1869 at the Poultry Chapel, and became an active force in the religious work of London. He built the City Temple, and ministered there up to the time of his death. His vigorous preaching always attracted large congregations. Dr. Parker was the Chairman of the Congregational Union.

Parker, Matthew (1501-175), was Archbishop of Canterbury from 1550 until his death. He superintended the translation and production of what is called the Bishops' Bible, and also had a great part in the preparation of the Book of Common Prayer.

Parker, Theodore (1810-1860), a distinguished American Unitarian Minister and writer, who figured prominently in the anti-slavery agitation, and published a number of works on religious subjects, remarkable for their advanced opinions.

Parkes, Sir Henry (1815-1882), was born in Warwickshire, and emigrated to New South Wales in 1830. He had a struggling life for a time, but, showing much ability for the discussion of public questions, he was returned to the Legislative Council in 1854. Made a member of the Ministry in 1866, he subsequently filled the post of Premier of New South Wales five times.

Parkman, Francis (1823-1893), an American historian, born at Boston, Massachusetts, whose works mainly deal with the history of Canada. His *Pioneers of France in the New World* and *The Old Regime in Canada* are standard works.

Parnell, Charles Stewart (1846-1891), a distinguished Irish Nationalist politician, who for ten years, from 1880, was leader of his Party, and made it more powerful than it had ever been before. He succeeded in winning Mr. Gladstone's confidence, and so was largely responsible for the Home Rule policy which that statesman adopted towards the end of his Parliamentary career. Parnell suffered imprisonment more than once, and his supposed complicity in Irish political crimes led to the famous charge made against him by *The Times*, which became the subject of a memorable trial in which Parnell was acquitted, afterwards obtaining damages to the extent of £25,000. This was in 1890, and was quickly followed by a divorce trial which resulted in his being deposed from the leadership of his Party. He never recovered his lost ground, and died in 1891 a broken and disheartened man.

Parnell, Thomas (1699-1718), an Irish ecclesiastic and poet, who was held in high esteem, and wrote numerous pieces of the ballad order with no small success. His chief poem was "The Hermit."

Parr, Samuel (1747-1825), was a famous if dogmatic scholar and cleric who wrote largely on educational questions. He held the living of Hatton in Warwickshire for forty years.

Parr, Thomas (1483-1635), the most famous of English reputed centenarians, known as "Old Parr," said to have been born and to have died in the years given, but on later evidence adjudged untrustworthy, though he was certainly a celebrity for a long period prior to his death. He was buried in the South Transept of Westminster Abbey, his gravestone recording that he lived in no less than ten reigns.

Parrhasius was a famous painter of ancient Greece, of whom the story is related that he starved and tortured a man to death in order to portray with the fullest possible realistic effect the final phases of mortal agony. He lived about 450 B.C.

Parria, Samuel (1653-1720), an American Congregational minister who was concerned in the prosecution and execution of twenty persons for alleged witchcraft at Salem in Massachusetts in and about the year 1692, and was afterwards dismissed from his church for his share in these atrocious so-called judicial murders.

Parr, Sir Hubert Hastings, Bart. (b. 1849). Professor of Music at Oxford and Director of the Royal College of Music. A prolific composer of numerous odes, cantatas, and other musical works, and a notable writer on musical subjects, his *Studies of Great Composers* and *Art of Music* being amongst the chief works of their class in modern literature.

Parry, Rear-Admiral Sir William Edward (1799-1855), an Arctic explorer and naval commander of great distinction, who undertook several expeditions to the Polar regions and made numerous important discoveries. He was knighted and appointed Governor of Greenwich Hospital.

Parsons, Hon. Sir C. A. (b. 1854), is head of the electrical and engineering works of C. A. Parsons and Co., and of the Parsons Marine Steam Turbine Co., Ltd., Newcastle-on-Tyne, and inventor of the steam turbine which has effected a remarkable improvement in the propulsion of war and mercantile vessels. Is a C.B. and F.R.S.

Partridge, Bernard (b. 1864), was educated at Stonyhurst and began life as a stained glass designer, afterwards working at book illustrations, then for a time was on the stage; but since 1891 has been one of the chief artists on the staff of *Punch*.

Passoul, Blaise (1693-1662), a noted French philosopher.

Lectures exhibit remarkable genius, and have been translated into all European languages. He was a distinguished mathematician, and invented an ingenious arithmetical machine, besides making many brilliant experiments in hydrostatics and pneumatics.

Pasteur, Louis (1822-1895), an eminent French chemist and scientist, whose researches in connection with hydropathia, bacteriology, and the specific germs of cholera and other diseases, have been of immense benefit to human kind. He was elected a member of the Academy of France in 1882, and in his later years the Pasteur Institute founded by him in Paris attained universal celebrity.

Paterculus, Calvus V., was an eminent Roman historian under Augustus and Tiberius. Such fragments of his work as have been preserved are held in high esteem, though his narrative does not extend later than A.D. 30.

Paterson, William (1604-1710), a Scottish financier who founded the Bank of England, and originated the famous Darien colonisation scheme, which resulted disastrously.

Paterson, William R. M.A. (b. 1871), a novelist of considerable gifts, who writes as "Benjamin Swift." His *Newsies of A. Street* (1907), *The Death Man* (1908), and *Lady of the V.* (1913), are excellent examples.

Pattmore, Coventry (1823-1896), was a much appreciated poet of the Victorian era, whose "Angel in the Home" rank's deservedly high among modern poetic achievements.

Paton, Sir Neal (1821-1911), sculptor, historical artist, archaeologist, and poet, was a native of Dunfermline. In 1846 he gained the premium in the Westminster Hall competition for his fresco "The Spirit of Religion." He became later Limner for Scotland to Queen Victoria, and devoted himself mainly to fairy and sacred subjects, and won great

success by his well-known pictures "The Pursuit of Pleasure" and "Mors Janua Vitae."

Patrik, St. (circa 373-462), the patron saint of Ireland, concerning whom many miraculous stories are related, such as his reputed extermination of serpents from the island. He carried out a Christian mission, extending probably over about forty years, amongst the Irish with great success, was consecrated bishop in 447, wrote a *Confession* and an *Epistle*, and upon dying at an advanced age was buried at Downpatrick. St. Patrick's day is March 17th.

Patterson, John Coleridge (1827-1891), after a brilliant career at Oxford took holy orders and became greatly interested in mission work, being for some years associated with Bishop Selwyn in religious work in the South Seas. In 1861 he became Bishop of Melanesia, where for ten years he served with signal success, but falling in with a savage band on one of the Santa Cruz islands was murdered.

Patti, Adelina (Pavonesse Cederström), was born in Madrid in 1843. Went to America while very young, and first appeared in 1859 in "Lucia di Lammermoor," in New York. Her marvellous voice and brilliant execution made her immediately famous. She went to England in 1861, and from that time for many years was the most popular prima donna of the time, appearing in London, Paris, Berlin, Rome, Vienna, etc., with triumphant success. Of late years she has practically lived in retirement at her castle-home, Craig y Nos, in Wales, only occasionally reappearing at concerts. Had a tremendous reputation at a "farewell" concert in the Albert Hall, London, in 1906.

Pattison, Dorothy Windlow (1832-1898), a sister of Mark Pattison, who devoted a great part of her life to hospital work in Walsby, where she was known as "Sister Dora," and was revered for her saintly life and devotion to the sick poor.

Pattison, Mark (1813-1884), was connected with Lincoln College, Oxford, from 1839 until his death, and gave much time to literary work, writing, amongst other books, *A Life of Isaac Casaubon*, *A Life of Milton*, and his own *Memoirs*. He married Emilia Francis Strong in 1861, she afterwards becoming Lady Thike. His sermons exhibited a tendency to rationalism, and his contribution to the famous *Essays and Reviews*, in 1860, made him thereafter a man of intellectual mark.

Paul, Herbert (b. 1853). Educated at Oxford. Sat in Parliament from 1882 to 1895 for South Edinburgh, and for Northampton from 1906 to 1910, and has written much on the Liberal side of politics, besides producing a very able *History of Modern England*. His *Life of Froude* was published in 1906.

Paul I. (1754-1801) was Emperor of Russia for the last five years of his life. His overbearing temper and despotic acts caused him to be hated by the nobles, who put him to death by strangling.

Paulus, Heinrich E. G. (1764-1851), the celebrated German theologian and scholar. Was a native of Leonberg, and, besides filling professional positions at the Universities of Jena, Würzburg, and Heidelberg, wrote numerous rationalistic works.

Pausanias was a successful Spartan general who captured Byzantium from the Persians, 479 B.C. He was subsequently accused of treason, and, taking refuge in a temple, was allowed to starve to death.

Paxton, Sir Joseph (1803-1865), was head gardener to the Duke of Devonshire at Chatsworth, and, having acquired a great reputation for his effective building of glass structures, was employed to design the fabric of the first great exhibition in London in 1851, subsequently set up at Sydenham as the Crystal Palace. Was knighted in 1857, and sat in Parliament for Coventry from 1854 to 1864.

Payn, James (1830-1898), a prolific and popular novelist, who edited *Chambers's Journal* for sixteen years, and the *Cornhill Magazine* from 1860 to 1866. He was a racy story-teller and possessed a fund of quick humour. His most popular stories were *Lost Sir Marmaduke* and *Martha's Revenge*.

Peabody, George (1795-1860), an American merchant who lived for the greater part of his life in London, and, acquiring a large fortune, bequeathed

immense sums for philanthropic purposes in England and the United States. His gifts to London alone amounted to half a million sterling, and were the means of establishing important colonies of improved dwellings for the working classes.

Pearson, Cyr. I. Arthur (b. 1866), managing director of C. Arthur Pearson, Ltd., and *Pearson's Weekly*, *Pearson's Magazine*, and other well-known papers and publications.

Pearson, John (1613-1686), was a Royalist divine of note in the early days of the Civil War, but lived in obscurity during the Commonwealth. At the Restoration he came into favour again, and was appointed Chaplain to the King. Later he was made Bishop of Chester. He was the author of numerous works, including *An Exposition of the Creed*.

Pearson, John Loughborough (d. 1907), an able architect, pupil of Sir Gilbert Scott, and his successor in the surveyorship of Westminster Abbey, where both are buried. Pearson's most conspicuous work was Truro Cathedral.

Pearson, Sir Westman D. (See Cowdray, Lord.)

Peary, Rear-Admiral Robert Edward (b. 1856), an American Arctic explorer who went to Greenland in 1894, and in 1895-1896 conducted a sledging expedition towards the Pole. In 1893, 1895, and 1898 Peary was again in the Arctic region; and in 1900-1902, in the course of a further protracted attempt, he reached the highest latitude thereto attained on the Western Hemisphere. Again, in 1905, he left New York on board the specially equipped expedition ship *Roosevelt*, and the following spring succeeded in touching 87 degs. 6 min. N. latitude. On April 6th, 1909, however, he succeeded in actually reaching the Pole, and visited England in May, 1910. His book describing his later experiences in the Arctic regions is the most interesting of all the books hitherto written on the subject, and is valuable for its splendid series of illustrations from photographs of the actual scenes described. It may be added that the claim of Dr. Cook to have preceded Commander Peary in the discovery of the Pole has been abandoned, although at first so boldly asserted and maintained.

Peel, Sir Robert (1788-1850), a prominent British statesman who entered Parliament at twenty-one years of age, and immediately exhibited great capacity, being appointed Under-Secretary for the Colonies in the following year. From 1812 to 1818 he was Secretary for Ireland; and in 1822 he became Home Secretary, introducing, whilst fulfilling that office, the new police service associated with his name. In 1834 Peel was for four months Prime Minister, and in 1841 again occupied the same exalted position. It was then that the Anti-Corn Law agitation became formidable, and Peel abandoned his former Protectionist attitude, and carried his Repeal measure eventually in 1846. He was thrown from his horse in Hyde Park on June 25th, 1850, and succumbed to his injuries three days later.

Peel, Arthur Wellesley, 1st Viscount (1783-1812), the youngest son of Sir Robert Peel, the famous Prime Minister just mentioned. Sat in Parliament for Warwick from 1805 and held various minor Government offices until 1824, when he was elected Speaker of the House of Commons, a position which he occupied with dignity and distinction until 1805.

Peale, George (1791-1867), was one of the distinguished company of Elizabethan dramatists, and is best remembered by his "Old Wives' Tale," "Edward I.," and "David and Bethsabe."

Pelagius, a monk of the 5th century, believed to be a native of Britain, who introduced a doctrine that the human will could turn to God without being impelled by Divine Grace, which came to be known as Pelagianism, and was denounced by St. Augustine.

Pellissier, Marshal (1794-1864), was an able and energetic French general, who commanded the First Corps of the Imperial Army in the Crimean War, and after the close of the campaign was created Duc de Malakoff. He was Governor of Algeria at the time of his death.

Pellico, Silvio (1788-1854), an Italian poet and

revolutionist who was imprisoned by the Austrian Government for conspiracy from 1820 to 1830. The story of his prison life, which he afterwards wrote, became a very popular book.

Pemberton, Max (b. 1859), a clever novelist of Birmingham birth, who, after concluding his education at Cambridge entered journalism, and wrote for the magazines. Was made editor of *Cassell's* in 1892, and of *Cassell's Magazine* in 1896. He has written many capital stories, including *The Iron Pirate*, *The Gold Wolf*, and *Beatrice of Venice*; and has won success as a writer of reviews for the music-halls.

Penda, pagan King of Mercia (A.D. 630-655), a fierce, warlike ruler, who gave battle to the Christian forces of Northumbria and East Anglia, defeating and slaying Edwin and Oswald of Northumbria, and Anna of East Anglia. Oswald of Northumbria overcame and killed him in 655.

Penn, William (1644-1718), was born in London and was the son of a British Admiral. After finishing his education at Oxford he became a Quaker, and wrote some powerful pamphlets supporting his new faith, suffering imprisonment twice because of his opinions. Inheriting a considerable estate from his father, he devoted himself more keenly than ever to good works, and in 1682, having obtained a special grant from King Charles II. went to America, and founded Pennsylvania, which under his enlightened rule became a prosperous colony. He returned to England two years later, and had difficulties with the Government, but ultimately settled them and spent the last six years of his life, prostrated by paralysis, at his country seat in Berkshire. He is buried in the Friends' burial ground near Beaconsfield, Bucks.

Pepin (714-768), surnamed "le Bref," i.e. "the Short," was the first Carolingian king of France, and father of Charlemagne.

Pepys, Samuel (1633-1703) was Secretary to the Admiralty during the reigns of Charles II. and James II, but his chief claim to remembrance is his famous *Diary*, which affords a series of interesting pictures of the life of his period.

Perceval, Spencer (1762-1812), was Prime Minister from 1809 to 1812 after having filled other prominent posts in previous Tory Ministries. He was assassinated in the Lobby of the House of Commons by a man named Bellingham. Perceval was an opponent of Catholic Emancipation; his monument in Westminster Abbey is sculptured with a realistic representation by Westmacott of his murder.

Perceval, John, D.D., Bishop of Hereford since 1805 (b. 1834), educated at Oxford, ordained 1860, Head Master of Clifton College from 1862-1878, Canon of Bristol 1882-1887, Head Master of Rugby 1887-1895.

Percy, Bishop Thomas (1729-1811) was an English divine and antiquary, who enriched our literature by an accidental discovery of a large folio of MSS. of ballads, which, with considerable additions, were afterwards published as "Reliques of Ancient English Poetry." He was himself the author of several ballads which became popular, including "The Hermit of Warwick."

Perdiccas was one of Alexander the Great's ablest generals. He attained great distinction under that monarch, but after Alexander's death he began to scheme against the new king, Arrhidæus, and, being sent to Egypt against Ptolemy, was defeated and put to death by his own soldiers, B.C. 321.

Pericles was Tyrant of Corinth from 625-625 B.C., and one of the Seven Sages of Greece.

Pericles (495-429 B.C.), the distinguished Athenian statesman, general, and orator, who raised Athens to the point of its fullest prosperity, not only doing much to beautify the city but making it the centre of civilisation. He fell a victim to the plague.

Perkin, Sir W. H. (1837-1907), discoverer of the mauve dye-stuff, and founder of the industry in coal-tar colours, the jubilee of which was celebrated in 1905, when it was demonstrated that there are now some 700 separate colouring matters obtained from tar products.

Perks, Sir Robert William (b. 1849), represented the Louth Division 1892-1920. Is one of the

- most prominent Wesleyan laymen of the time, and a leading promoter of recent Methodist movements, such as the Methodist Twentieth Century Million Fund, and the acquisition of the Westminster Aquarium site for a large central Methodist building. A great contractor, connected with many large undertakings, yet withal an active politician.
- Perpetua, St.**, an African Christian martyr who suffered death at Carthage, refusing to renounce her faith although entreated to do so by her father, who appealed to her at her trial holding in his arms her own child.
- Persigny, Duc de** (1808-1872), was one of Napoleon the Third's most trusted Ministers, and was largely responsible for the *coup d'état* of 1871. He was for some years French Ambassador in England, and it was in England that he took refuge after Sedan.
- Persius Flaccus** (A.D. 34-62), a famous Stoic philosopher, whose six satires are among the most treasured products of Roman literature.
- Pertinax, Helvius** (A.D. 126-133), was Roman Consul in A.D. 179, and later commanded the Roman legions in Britain. On the death of Commodus he was induced to accept the purple, but was only Emperor for about five months, the Praetorian guards attacking and killing him.
- Perugino, Pietro** (1446-1521), a great Italian artist, excelling in religious subjects, and the painter of numerous fine frescoes, including some in the Sistine Chapel at Rome. Raphael was his pupil.
- Pestalozzi, Johann H.** (1746-1827), was a rich and writer, who devoted his fortune to benevolent works, especially in connection with the education of poor children.
- Peter the Great** (1672-1725), became sole Czar of Russia in 1689, and showed great ability and energy of character, devoting himself largely to the re-organization of his army and navy. He spent some months at Deptford studying shipbuilding. He founded St. Petersburg in 1703, and conquered Livonia, Finland, Pomerania, etc. Among the prisoners taken by him at the Battle of Poltava was Catherine, the wife of a Swedish soldier who had been killed. Peter took her to St. Petersburg, and ultimately made her his wife, and by her cleverness she did much to strengthen his power.
- Peter, the Hermit** (1097-1191) was the main instrument of the agitation which brought about the first Crusade. He was a French monk, of great eloquence and earnestness, and lived to see Jerusalem in the hands of the Christians. He died at the Monastery of Huy, in Belgium.
- Petrarch, Francesco** (1304-1374), the famous Italian poet, whose odes and sonnets "To Laura" are of marvellous beauty and fervour, and have been translated into all languages. He filled several important positions in the Church.
- Phalaris** was a tyrant of Agrigento in Sicily, in the 6th century B.C. and after a cruel reign of sixteen years, the nobles rose against him and he and his mother were burned in the famous brazen bull in which he had made many human sacrifices.
- Phelps, Samuel** (1804-1878), a Shakespearean actor and manager of celebrity, who from 1844 to 1851 managed the Old Theatre, where he revived most of the poet's tragedies, plays and comedies, securing both competent acting and effective pictorial settings.
- Phidias**, the famous Greek sculptor, flourished from about 470 to 430 B.C. His productions of his chisel were pronounced to be the finest ever achieved, but nothing now remains to attest his genius except the sculptures in the British Museum that were obtained from the ruins of the Parthenon, widely known as the "Elgin Marbles."
- Philip II. of France** (1180-1223), was a prominent figure in the third Crusade in which, for a time, he associated himself with our Richard I. Later he returned and intrigued with John against Richard, and after John succeeded to the English throne, Philip made war against England and wrested from her nearly all her French possessions, the Channel Islands and Guienne alone being saved.
- Philip II. of Macedonia**, trained in military arts

- in Greece, when he came to the throne instilled martial ideas into his subjects, and entered upon a career of conquest that did not end until he had become master of Greece. It was against his designs that Demosthenes directed his celebrated "Philippics." He was assassinated when about to set out upon a Persian campaign, which was afterwards so victoriously carried out by his son and successor, Alexander (q.v.).
- Philip II. of Spain** (1527-1598), succeeded his father the Emperor Charles V., and was engaged in numerous wars, including his famous attempt to invade England with the Spanish Armada. He was four times married, his second wife being Queen Mary of England. After her death, he was the consistent enemy of this country.
- Philip V. of Spain** (1683-1746), founded the Bourbon dynasty in Spain, and was the son of the Dauphin of Louis XIV. and Maria Theresa of Spain. His uncle, Charles II. of Spain bequeathed the kingdom to him, and this led to the war of the Spanish Succession, which ultimately confirmed him in his kingship.
- Phillips, Ambrose** (1675-1749), was accounted a considerable poet in his day, and is remembered by Steele and Addison. Best known by his "Pastorals."
- Phillips, John** (1696-1768), was Archdeacon of Salop, and made a literary reputation by "The Splendid Shilling," which *The Tatler* declared to be "the best burlesque poem in the British language."
- Phillips, Stephen**, dramatist and poet, of power and distinction. His "Paolo and Francis," "Herod" and "Ulysses," all were welcomed as containing work of a high order, and his "Nero" confirmed the verdict.
- Philo Judaeus**, a Hellenistic Jewish philosopher who attracted much note by his teaching, and his intercession for the Jews before the Emperor Caligula at Rome in A.D. 40. He was a native of Alexandria, and by his writings sought to make the philosophy of Plato harmonise with the Bible.
- Philostratus, Flavius**, the Greek rhetorician spent the greater part of his life in Rome, and wrote numerous biographical and historical works of much value. He flourished in the first part of the 3rd century of the Christian era.
- Piazzi, Giuseppe** (1746-1826), an Italian astronomer, who in 1789 established an observatory at Palermo, and employed himself in making a list of the stars. He was the discoverer of the planet Ceres, the first known of the asteroids.
- Piccolomini, Ottavio** (1509-1566), was of Italian birth, and entered the service of Ferdinand II. of Austria, attaining high command under Wallenstein, at whose death Piccolomini was awarded a great portion of the dead general's estates. He afterwards highly distinguished himself in several campaigns.
- Pinch, Sir Thomas** (1758-1815), one of the ablest generals of his day, was a native of Fenwickshire, and greatly distinguished himself in the Peninsular War under Wellington, and was killed while resisting a desperate charge of French cavalry.
- Pinchbeck, Christopher** (1690-1732), a London watchmaker who, by inventing an alloy of copper and zinc, produced a cheap metallic substance which has something of the appearance of gold, and is much used in the manufacture of cheap jewellery. Hence the term "pinchbeck" as a sign of imitation or inferiority.
- Pindar** (c. 522-442 B.C.), the eminent lyric poet of ancient Greece, most of whose famous odes were written to celebrate the personages and events of his time.
- Pinero, Sir Arthur Wing** (b. 1855), an able English dramatist and former actor, of Portuguese descent. After some years of experience as an actor he took to play writing. "The Squire," produced in 1876, was his first real success. This was followed by "The Schoolmistress," "Daddy Dick," "Sweet Lavender," and others, which achieved remarkable popularity. Then Mr. Pinero came under the influence of Ibsen, and wrote "The Second Mrs. Tanqueray." Among his later plays may be mentioned "Mrs. and "His House in Order."

Pitman, Sir Isaac (1813-1897), founded the Pitman system of phonographic shorthand, which became widely adopted, and has practically superseded other systems in commercial and general use. He was knighted in 1864.

Pitt, William (1759-1806), was the second son of the Earl of Chatham. Entered Parliament at twenty-one, and by his brilliant oratory captivated the House of Commons. In 1782, when only twenty-three, he became Chancellor of the Exchequer, and in the following year was made Premier, and held that office for seventeen years, through the trying period of the French Revolution, when war with France was almost continuous. He was undoubtedly one of the most brilliant statesmen that England has produced, and his death at the early age of forty-six was a great loss to the country. He was buried in Westminster Abbey. (See also **Chatham**.)

Plus IX. (1792-1830) held his holy office during the troubled period of Italian Revolution and the War for Independence, when he had to contend against Austria, France, and Sardinia. After failing to bring about the Papal supremacy of the Italian States he was deprived of his temporal power in 1829, and saw Victor Emmanuel crowned King of Italy. In the same year the Vatican Council pronounced for Papal Infallibility.

Plus X. Giuseppe Sarto, Pope (b. 1835), was a poor Italian priest until about forty years of age. Afterwards became known as an eloquent preacher, and was made Vicar-General of Treviso College. Later was made Bishop of Mantua, created Cardinal in 1893, and elected Pope in 1903.

Pizarro, Francisco (1471-1541), was an adventurous Spaniard who, after Columbus's discoveries in the New World, equipped an expedition and set out for South America, conquering Peru for the Emperor Charles V. Pizarro's career in Peru was characterised by excessive cruelty, and in the end he was killed by his own soldiers.

Plaudes Maximus lived in the 14th century, and was a Greek monk of Constantinople. He was a somewhat voluminous writer, but his fame rests chiefly on the *Greek Anthology* which he compiled.

Plato (429-347 B.C.), the renowned Greek philosopher who taught at Athens, and greatly distinguished himself by his lectures and writings. His *Dialogues* and his *Republic* are among the greatest works of the ancients and embody a philosophical system which has served for admiration and discussion in all time was Aristotle.

He was Socrates's disciple and Aristotle's teacher.

Plautus, Titus M. (254-184 B.C.), the Roman comic poet and comedy-writer. Was a prolific author, and such portions of his work as survive are of considerable interest.

Playfair, John (1748-1819), was a native of Forfarshire, and entered the ministry, but it was as a mathematician and geologist that he attained distinction, his book on the Plutonism theory of the earth, his *Elements of Geometry* and *Outlines of Natural Philosophy* being important contributions to the sciences of which they treat. His brother, William Playfair (1759-1823), was an ingenious draughtsman and inventor, employed by Boulton and Watt at Birmingham, and a fertile writer on political and historical subjects, and the projector of a clever commercial atlas.

Playfair, Lyon, 1st Lord (1819-1898), a distinguished chemist and liberal politician, who was professor at Edinburgh University in 1848 and entered Parliament in 1868. He was appointed Postmaster-General in 1874, and for some time served as Deputy Speaker of the House of Commons, being raised to the peerage in 1892.

Pleyel, Ignaz (1757-1837), was an Austrian who became eminent as a composer and spent the last years of his life in Paris, where he established a pianoforte manufactory, which became highly successful.

Plimsoll, Samuel (1824-1898), was a native of Bristol, and while M.P. for Derby got up an agitation on behalf of merchant sailors, procuring the passing of the Merchant Shipping Act of 1876,

which by defining a line above which no ship must sink in the water when loaded has ever since made the overloading of ships illegal. The line is known as the Plimsoll Mark.

Pliny was the name of two Romans of distinction, known as Pliny the elder, and Pliny the younger. The first was a naturalist of high reputation who perished in the eruption of Vesuvius A.D. 79, when Pompeii was buried; the second, his nephew, achieved renown by a series of historical *Letters*, and died A.D. 113.

Plunket, Baron (1764-1854), was a distinguished Irish lawyer and Member of Parliament who was Lord Chancellor of Ireland from 1830 to 1841. He was, whilst at the Bar, one of Emmet's prosecutors, and opposed Pitt's scheme for the Union, but his work in the cause of Catholic Emancipation was both splendid and successful.

Plunkett, Rt. Hon. Sir Horace (b. 1854), ex-Vice-President of the Department of Agriculture and Technical Instruction for Ireland. Has done good work for the reform of farming conditions in Ireland. He is the youngest son of Baron Dunany and was in Parliament from 1892 to 1900.

Plutarch (circa 50-120) was the famous writer of biography who lived for a great portion of his life in Rome, though born in Greece. His *Lives* form one of the world's most famous literary productions, and have provided material for hundreds of plays and dramas, including some of the best of Shakespeare's.

Pobledonostzeff, Constantine (b. 1827), Procurator of the Holy Synod in Russia, and a statesman whose strenuous efforts to strengthen autocracy made him one of the most notable personages for many years in the Czar's dominion.

Pocahontas, the daughter of an Indian Chief. When Captain John Smith and his party landed in Virginia in 1607, they would have been murdered but for the intercession of Pocahontas, who subsequently married one of the settlers, and accompanied him to England, where she died in 1617.

Poe, Edgar Allan (1809-1849), was an American poet of unique genius, author of "The Raven," "The Bells," and other poems of haunting melody and dainty fancy. He lost his parents when very young, was adopted by a Richmond merchant named John Allan, who had him educated, but with whom he afterwards quarrelled when he devoted himself to journalism and authorship. His "Tales of Mystery" are thrilling examples of a kind of literature which has been much indulged in in later times, but seldom with equal success. The Poe centenary celebration of 1909 extended to many lands.

Pole, Reginald (1500-1558), was Cardinal Archbishop of Canterbury under Queen Mary, having succeeded Cranmer, and was the Queen's most trusted adviser. He was a legate-president of the Council of Trent, and was accounted largely responsible for the Protestant persecutions in the reign of Queen Mary.

Pollio, Calus Asinius (76 B.C.-A.D. 6), gained fame as one of Caesar's generals, and after Caesar's death was made Governor of Transpadana Gaul. Afterwards he served as Consul. He was the patron and protector of Virgil and Horace.

Pollock, Rt. Hon. Sir Frederick, P.C. (b. 1845). Educated at Cambridge, and called to Bar 1871. In 1882-1883 was Professor of Jurisprudence at University College, London, and from 1881 to 1890 Professor of Common Law in the Inns of Court. Has written largely on legal subjects, some of his books being accepted text-books on their respective subjects. He has also written *A Life of Shizuoka*, an introduction to the *History of the Science of Politics*, and some interesting books on mountaineering.

Pollok, Robert (1798-1827) was a native of Renfrewshire, and in 1817, when he was dying of consumption, he published the long blank verse poem, "The Course of Time," which, though not poetry of the highest order, contains many beautiful passages, and attained great popularity.

Polo, Marco. (See **Marco Polo**.)

Polybius (204-122 B.C.), the Greek historian, who

wrote a history in over forty books; but only the first five and certain fragments of the rest have come down to us.

Polyeaspe (circa 69-155) was Bishop of Smyrna, and said to have been the friend and disciple of the Apostle John. On a visit to Rome he was seized by the Proconsul and put to death in the amphitheatre.

Polyeetus (155-170 B.C.) was a Greek architect and sculptor and the friend and fellow-pupil of Phidias, whom he almost equalled in skill. He was a citizen of Argos. His statue of Doryphorus became known in the world of art as the "Canon of Polyeetus," as the perfect athletic type of the human figure.

Pompador, Madame Jeanne (1721-1764) was for a long time the favourite of Louis XV. of France, over whom she exercised great influence.

Pompey the Great (106-48 B.C.), distinguished himself as a general while young, and ultimately became, with Cæsar and Crassus, triumvir. Was afterwards thrown into the struggle with Cæsar, which only ended with the latter's death. Pompey was assassinated after the Battle of Pharsalia.

Pope, Alexander (1688-1744), the celebrated 18th century poet and translator of "Homer." Was the son of a London draper, and while but a boy showed great poetic gifts. In 1711 he published his famous "Essay on Criticism"; in 1712 "The Rape of the Lock"; and in 1713 " Windsor Forest and other Poems." His finest work was "Essay on Man," and his most sensational his "Dunciad," a literary satire upon the smaller literary men of his time.

Porson, Richard (1759-1808), the famous scholar who became Regius Professor of Greek at the University of Cambridge, and two years before his death was made Librarian to the London Institution.

Porter, Jane (1776-1850), an English novelist whose *Traditions of Warwick* and *The Scottish Chiefs* were powerful romances, and were deservedly popular. By Walter Scott was an especial admirer of them.

Porteus, Captain John, was commander of the Edinburgh guard in 1736, when a riot took place caused by the public sympathy with certain smugglers who were supposed to have been hardly dealt with. At the execution of one of the smugglers, a mob assembled and began to throw stones, when Porteus ordered his soldiers to fire, and they killed several persons and wounded a large number. Porteus was tried and condemned to death for this act, but reprieved. This so enraged the populace that they dragged him out of prison and hanged him on a dyer's signpost in the Gray-market, none of the lynchmen ever having been brought to justice.

Potter, Paulus (1775-1851) a Dutch painter whose wonderfully clever animal pictures won him wide celebrity. His *chef d'œuvre* is his famous "Bull," now in the museum at The Hague.

Pounds, John (1705-1830), a shoemaker of Portsmouth, who, witnessing the deplorable condition of so many of the poorest class of children, started a school in his own neighbourhood where such children were taught, fed, and clothed. From this effort sprang the Ragged School Union, which wrought great good in London and other large cities, and was liberally supported by Lord Shaftesbury and other philanthropists.

Poussin, Gaspar (1613-1675), a French artist, originally called Dughet, who was the brother-in-law of Nicolas Poussin, and achieved great eminence as a landscape painter. He long lived in Rome, and the Campagna found in him a faithful depicter.

Poussin, Nicolas (1594-1665), an eminent French painter who was patronized by Louis XIII., and produced many notable works, some of which are in our National Gallery. Gaspar Dughet (Poussin) studied under Nicolas, and married his sister.

Powers, Hiram (1805-1873), was an American sculptor of high reputation, whose "Greek Slave" was one of the conspicuous art works of the 1851 Exhibition. He died in Florence.

Poynter, Sir John (1816 in Paris), President of the Royal Academy since 1896. Has had a highly successful career as a painter. At first his work was mainly of a decorative character, but gradually he

developed exceptional talent as a painter of classical subjects. His "Perseus and Andromeda," "Atalanta's Race," "Nausicaa and Her Maidens," are all great pictures. Made A.R.A. in 1860, and R.A. in 1876. Was Director of the National Gallery from 1894 to 1905.

Præd, W. M. (1802-1839), was born in London, educated at Cambridge, and made a brilliant reputation as a writer of Society verse in which he has never been excelled.

Praxiteles, a great Greek sculptor who lived in the 4th century B.C. His statues—especially his Aphrodite at Cnidus—were in some respects timed beyond all others, but few remain to testify to his genius.

Preese, Sir William Henry (1824-1913), was connected with the Electric Telegraph Service from 1853, and conspicuously engaged in connection with all the developments in telegraphy which have since taken place. He was associated with Marconi in his wireless telegraphic schemes and introduced the block system into England.

Prescott, William Hickling (1796-1859), one of the best known of American historians, whose *History of Ferdinand and Isabella*, *Conquest of Mexico*, *Conquest of Peru*, and *History of Philip II.*, are among the most picturesquely written and reliable of modern historical works.

Prentiss, Sir Joseph (1826-), made a high reputation as a geologist, and from 1874 to 1888 was Professor of Geology at Oxford. His work on the *Antiquity of Man* is a very important contribution to science.

Priestley, Joseph (1733-1804), was born at Leeds, and studied for the Nonconformist ministry, becoming a Unitarian pastor in Birmingham in 1780. Here he began those scientific studies which proved to be of such signal importance. He was the discoverer of oxygen and other gases, and wrote *A History of Electricity*. He was also a great advocate of freedom and progress, and having expressed approval of the French Revolution, a Birmingham mob set fire to his house, destroying his valuable library and scientific apparatus. Some time afterwards he removed to America, where he died.

Prim, Marshal Juan, Count de Rens (1814-1870), a Spanish statesman and general, who passed through a time of turbulence and execution in his attempt to maintain Isabella on the throne of Spain. He was able and fearless in the field, and brought the same characteristics to bear on his state and diplomatic life. He was an ardent supporter of Isabella's despotic acts, and was instrumental in bringing about the deposition of the Queen and the election of the then Duke of Aosta as King of Spain. Before the new king arrived, however, Prim was assassinated.

Prinsep, Valentine C. (1838-1904), an able artist, Royal Academician, and Professor of Painting. Made R.A. in 1861, and exhibited many fine pictures. Was also the author of novels and a notable book of Indian impressions.

Prior, Matthew (1664-1721), a well-known poet and wit who acquired celebrity by writing "The City Mouse and Country Mouse," and a number of other poems appropriate to the humour of the time. He rose to great favour, being some years in Parliament, and also representing the English Government as Ambassador at The Hague and elsewhere. He was buried in Westminster Abbey.

Probus, Marcus Aurelius, became Roman Emperor in 276, after a successful career in the army. His despotic rule brought him into disfavour, and in 282 a revolt occurred in the army, and he was slain by his own soldiers.

Procter, Bryan Waller (1789-1874), made a considerable name as a poet between 1815 and his death, his verses being mostly of a patriotic character. He was a Commissioner of Lunacy for thirty years. He wrote under the name of "Barry Cornwall." His daughter, Adelaide Anne Procter (1825-1864), produced some pretty verse, including a popular volume entitled *Legends and Lyrics*, published in 1853.

Proctor, Richard Anthony (1837-1888), an assiduous astronomer, and voluminous writer and popular lecturer on the subject. His practical work

In measuring the rotation of Mars and charting the stars of Argelander's catalogue was notable.

Propertius, Sextus, the Roman elegiac poet. Was a native of Umbria, and flourished in the 1st century B.C.

Protagoras, was a celebrated Greek philosopher, who flourished at the beginning of the 4th century B.C. He incurred much enmity by his refusal to accept the story of the "Gods," and he was drowned while attempting to escape from his persecutors.

Proudhon, Pierre Joseph (1809-1865), was a French political economist of extreme views, whose *What is Property? Confessions of a Revolutionist*, and other works were much read in his day.

Prudentius, Aurelius Clemens (348-410), a Spaniard who wrote a considerable number of Latin poems breathing the Christian spirit.

Prudhon, Pierre Paul (1758-1823), a French historical and portrait painter of considerable celebrity, whose picture "Divine Justice and Vengeance pursuing Crime," at the Louvre, is a notable work.

Frynne, William (1600-1669), was a violent pamphleteer of the days of Charles I. and Cromwell, and for his plain speaking several times found himself in prison or condemned to the pillory. At the Restoration he was made Keeper of the Records at the Tower.

Ptolemy, Claudius Ptolemaeus, a famous astronomer of Alexandria, who flourished between 130 and 161. He founded the Ptolemaic system, which taught that the earth was stationary and the heavenly bodies revolved around it.

Puccini, Giacomo (b. 1858), a composer of light opera, some of which have achieved great success, notably *La Bohème*, *Madame Butterfly*, and *Manon Lescaut*. Is a native of Milan. He came to London in 1911 to superintend the production of his *La Fanciulla del West* (The Girl of the Golden West).

Pugin, Augustus (1769-1842), a French architect who settled in London and wrote several able text-books on architecture. Was succeeded by his son, Augustus W. Pugin (1811-1852), who designed a number of fine Gothic edifices in various parts of the country, and wrote several books on architectural subjects. Edward Welby Pugin, son of the latter (b. 1853), also attained architectural celebrity in England and on the Continent alike.

Purcell, Henry (1628-1695), was a celebrated organist and composer, who did much to improve the musical service of the Church. Was organist of Westminster Abbey, and the most famous member of a family of notable musicians.

Pusey, Edward Bouverie (1800-1882), a famous Anglican cleric, who was Regius Professor of Hebrew and Canon of Christ Church, Oxford, from 1828 to his death. From 1833-1840 he published *Tracts for the Times*, which inaugurated the Tractarian movement that developed into what became known as Puseyism. At the most active point of his career, Dr. Pusey was associated with John Keble, John Henry Newman, and other deep theological thinkers.

Pym, John (1684-1643), a prominent statesman in the reign of Charles I. He was one of the five members whom Charles attempted to seize before the outbreak of the Civil War, and would doubtless have been a great figure in that conflict had he not died suddenly before the strife was fully developed. He was one of the managers of Buckingham's impeachment, advocated the Petition of Right, and in the Long Parliament was a vigorous assailant of Strafford and Laud.

Pythagoras (circa 582-500 B.C.), a great Greek philosopher, who taught the doctrine of the transmigration of souls, and also a system of astronomy similar to that of Copernicus.

Q

Quain, Sir Richard (1816-1898), a native of Mallow, a physician of great eminence, and one of the ablest of modern writers on pathological subjects, contributing largely to the *British Pharmacopæia*, and editing the *Dictionary of Medicine*.

Quaritch, Bernard (1819-1899), a famous dealer in

rare books, who was a native of Germany but settled in London, and became naturalised in 1847. His knowledge of scarce and valuable books was unique. His shop in Piccadilly was a storehouse of literary treasures.

Quarles, Francis (1592-1644), author of the celebrated *Divine Emblems*, a book of religious poetry that is an English classic.

Quiller-Couch, Sir A. T. (b. 1863), a well-known novelist and essayist, who as "Q" has published many delightful stories, including "Dead Man's Rock," "Troy Town," and "The Splendid Spur." Appointed Professor of Poetry at Oxford in 1912.

Quin James (1693-1768), the immediate predecessor of Garrick as the leading English actor. For over twenty years he was without rival, but after Garrick made his appearance in 1711 the popularity of the older actor waned, and he retired in 1751.

R

Rabelais, François (1483-1552), the great French satirist, first adopted the career of a monk, then studied medicine, and settled at Lyons as a doctor, and it was there that he published his *Gargantua and Pantagruel*, one of the wittiest and withal the coarsest books in any language.

Rachel, Madame (1821-1858), the most famous French actress of her time. Was born of poor parents of Jewish race, and sang in the streets of Lyons and Paris before her genius was discovered, and she was able to adapt the stage as a profession. In tragedy—and particularly in the part of Adeline Lecouvreur—she was probably unsurpassed. She died of consumption, and left behind her a large fortune.

Racine, Jean (1639-1699), a distinguished French tragic dramatist, best known by his "Andromache," "Phèdre," and "Athalie."

Radcliffe, Mrs. Ann (1764-1823), was a celebrated author in her day, and wrote some highly sensational novels in which the mysterious and supernatural were leading elements. Her best-known work is *The Mysteries of Udolpho*.

Radcliffe, John (1650-1714), a famous physician who attended three English monarchs—William III., Queen Mary, and Queen Anne—and was highly esteemed in his profession. He amassed a considerable fortune, £40,000 of which he devoted to the founding of the Radcliffe Library in Oxford.

Radetzky, Count (1766-1859), a famous Austrian Field-Marshal, who fought in most of the campaigns of his country and period against the Turks and the French, and in 1848, when eighty-two, led the Austrian troops to a series of victories in Italy.

Raeburn, Sir Henry (1750-1823), was a famous Scottish portrait painter, and friend and pupil of Sir Joshua Reynolds. Was made R.A. in 1815 and knighted in 1822.

Rae, John (1813-1893), an arctic explorer, who was a member of the Franklin Search Expedition of 1848, and in 1854 made the discovery that King William's Land was an island. In later years he directed an expedition for surveying proposed submarine telegraph lines between England and America by way of Iceland and Greenland.

Raffles, Sir Thomas Stamford (1781-1841), an eminent naturalist, who, while filling Government appointments at Java and Sumatra, between 1805 and 1824, penned many valuable papers on botanical and zoological subjects as the result of his observations. He was the founder and first President of the Zoological Society of London. Knighted in 1818.

Raglan, Field-Marshal Lord (1788-1855), was a great soldier and the son of the 6th Duke of Beaufort, and served in the Peninsular War, losing his right arm at Waterloo. Made a peer in 1829, and in 1854 was Commander-in-Chief of the British forces in the Crimea. He died before Sebastopol.

Ralke, Robert (1735-1811), was a Gloucester printer and newspaper proprietor, of high moral qualities, whose name is mainly remembered as a practical propounder of the Sunday School system.

Raimondi, Marco Antonio (circa 1480-1530), was a renowned engraver, who engraved many of Raphael's works. He was a native of Bologna and resided there for the greater part of his life.

Rainy, Rev. Dr. Robert (1806-1904), Principal of New College, Edinburgh, was long the leading ecclesiastical personality of Scotland, and was the author of numerous theological works, including *The Bible and Criticism* and a history of *The Ancient Catholic Church*.

Raisuli, a notable Moorish brigand, who exercises great power over the people, and in their behalf sometimes exacts concessions from the Sultan. In 1907 he captured Kairi Maclean, and held him to ransom until Feb. 1908, when a large sum was paid for his liberation.

Raleigh, Sir Walter (1552-1603), a scholar, courier, soldier, sailor, and statesman, who filled a prominent part in the history of his time. In 1584 Queen Elizabeth granted him a patent for the discovery and settlement of unknown countries in the far West. The colonisation of Virginia followed. He is said to have introduced into this country both the potato plant and tobacco. At one time he was in great favour at Court, but quarrelled with the Queen, and suffered in fortune as a consequence. When James I. came to the throne, Raleigh was supposed to be implicated in a conspiracy against that monarch, and was sentenced to death. After that he was a prisoner in the Tower of London for twelve years, and there he wrote his *History of the World*, and other works. In 1616 James set him at liberty in order to head an expedition to Guiana in the hope of finding gold, but being unsuccessful he was again imprisoned on his return, and finally beheaded in Old Palace Yard.

Raleigh, Sir Walter, M.A., Professor of English Literature at Oxford, and author of many volumes on eminent men of letters, including books on Milton, Wordsworth, and others. His work on Shakespeare, 1907, is his highest achievement.

Ramsay, Allan (1686-1758), the Scottish pastoral poet, who wrote *The Gentle Shepherd*, which made him famous. For the latter portion of his life he was a bookseller in Edinburgh. He had a son, also called Allan (1713-1734), who was a successful portrait painter, and died in 1734.

Ramsay, Prof. Dr. William M. (b. 1851), has been engaged for nearly thirty years, since his boyhood in fact, in the study of ancient geography in Asia Minor, and has flooded the theme with new light. Received the Victorian Research medal in 1906.

Ramsay, Sir William (b. 1852, at Glasgow), Professor of Chemistry at University College, London, 1897-1912. His scientific discoveries have been of the first importance. In conjunction with Lord Rayleigh he has discovered argon, thereto an unknown constituent of the air, and he has since detected other new atmospheric gases, including helium, krypton, and xenon. Helium, a constituent of certain minerals, was also discovered and explained by him. Sir William is the author of scientific disquisitions respecting these and other subjects, and was awarded the Nobel prize in chemistry in 1904. President of the British Association, 1912.

Ramusio, Giovanni B. (1485-1557), attained considerable fame as a geographer and editor of *Voyages and Travels*. He lived at Venice for many years and for a time held the position of Secretary to the Council of Ten.

Ranjit Singh, or Runjeet Singh (1780-1839), a prominent Sikh chief who for many years was the dominating power in the Punjab, retaining friendly relations with the British. At his death the Sikhs rushed into conflict with the English, with the result that the Punjab was ultimately annexed.

Ranjitsinhji, Kumar Shri (b. 1872), Jam of Nawagar, spent many years in this country before succeeding to the title, and was a popular cricketer, associated with English and Sussex county cricket, and attained exceptional success as a batsman in the "hundreds."

Ranke, Leopold von (1795-1886), a renowned German historian whose chief work is *A History of the Pope*. He also wrote a *History of England in the Sixteenth and Seventeenth Centuries*.

Raphael, Sanzio (1483-1520), the distinguished Italian painter whose works excel all others in their beauty of expression and inspired treatment. He lived a considerable period in Rome, where he painted his famous frescoes for the Vatican and St. Peter's, and also the celebrated cartoons designed for the tapestries of the Papal chapel, which afterwards were brought to England, and are now at the Victoria and Albert Museum. His last painting was "The Transfiguration." Examples of his work are to be found in most of the great European collections, including our own National Gallery.

Rapin de Thoyras, Paul de (1624-1725), was a French Protestant who took refuge in England after the Edict of Nantes in 1685, but subsequently settled in Holland, where he wrote his *History of England*, which, on its appearance in 1724, was highly esteemed.

Rask, Rasmus C. (1787-1832), a Danish philologist of distinction who compiled an Anglo-Saxon grammar, a Friar grammar, and other works.

Rauch, Christian Daniel (1777-1857), a noted German sculptor who executed a number of very celebrated statues which adorn some of the chief cities of his country.

Raumer, Friedrich L. G. von (1781-1873), was the author of one of the most important histories of Europe from the end of the 15th century, and also of *A Handbook to the History of Literature*. At one time he filled the position of German Ambassador to Paris.

Ravenscroft, Edward, an English dramatist of the 17th century, who wrote many able plays, beginning with "The Careless Lovers" (1673) and ending with "The Italian Husband" (1697).

Ravenscroft, Thomas (1592-1640), was one of the earliest English composers of psalm tunes, of which he published a collection in 1611. Many of his hymn tunes are still sung in the churches.

Rawlinson, Rev. Canon George (1812-1902), an Anglican cleric who wrote numerous learned volumes dealing with the ancient history of Egypt and other eastern countries, besides various theological works. He was Camden Professor of Ancient History and Canon of Canterbury.

Rawlinson, Sir Henry (1810-1895), diplomatist, soldier and Orientalist, brother of the last-named. Saw some service in Persia as a representative of the East India Company, and afterwards became political agent at Candahar. He performed a like service in Turkish Arabia later on, and began to take a deep interest in ancient cuneiform inscriptions. For a number of years he superintended successive explorations in Assyria and Babylon, accumulating a valuable collection of antiquities, which he disposed of to the British Museum. He was a member of the Indian Council in 1868. Sat in Parliament for some years, and published a number of admirable works on Persian, Babylonian, and Assyrian history. He was created a baron in 1891.

Rawson, Admiral Sir Harry (1843-1910), entered the Navy in 1857, and saw a good deal of active service during the next quarter of a century. He was commander of the Channel Squadron from 1895 to 1901, and was appointed Governor of New South Wales in 1902. When in command on the Cape Station in 1895, organised punitive expeditions against Mharuk, and in 1896 bombarded the palace of the Sultan of Zanzibar.

Ray, John (1691-1705), an English naturalist, whose services in collecting specimens and classifying them was of great assistance to science. His *History of Birds* and *History of Fishes* are of much value.

Rayleigh, Baron (b. 1842), one of the most eminent of British physicists, who succeeded Professor Tyndall in the Chair of Natural Philosophy at the Royal Institution. Has made important investigations in many branches of science, being the most distinguished authority on sound vibrations, and was the co-discoverer with Sir William Ramsay of argon. He was made a member of the Order of Merit in 1902, and in 1904 was awarded the Nobel prize for physics. Scientific Adviser to Trinity House since 1896.

Reade, Charles (1814-1884), holds high rank

amongst the Victorian novelists. His first story, *Teg Wifington*, was published in 1852. *It is Never Too Late to Mend*, *Griffith Gault*, and *The Cloister and the Hearth*, are his best-known novels. He also wrote a number of plays.

Reading, Lord (Sir Rufus Isaacs), Lord Chief Justice since Oct. 1913 (b. 1860). Was one of the ablest advocates of the day. Made Q.C. in 1888, and was M.P. for Reading from 1904 to his elevation to the Bench. Solicitor-General 1910. Attorney-General 1910-1913.

Reaumur, René A. F. de (1683-1757), an eminent French chemist, who invented the thermometer which bears his name. It was under his supervision, tendency that steel was first manufactured in France.

Reay, Baron (b. 1839), is an able and versatile public man and a clever linguist. He is President of the Royal Asiatic Society and of University College, and has filled the positions of Governor of Bombay, Under-Secretary for India, and Chairman of the London School Board. He was made a Privy Councillor in 1906.

Recamier, Madame (1777-1840), was a noted society woman of the days of Napoleon, her salon being the resort of most of the celebrities of the time, from the Emperor downwards.

Reccorde, Robert (1510-1558), was physician to Edward VI. and Queen Mary, but his chief claim to remembrance lies in his various mathematical works, which were much valued in their day. They dealt with arithmetic, geometry, and algebra.

Redmond, John, M.P. (b. 1831), has been leader of the Irish Nationalist Party since the retirement of Mr. Justin McCarthy in 1906. Is a fine speaker, and an out-and-out Home Ruler. Has been specially prominent during the later phases of the parliamentary fight for Home Rule, showing high qualities of leadership combined with a wise restraint.

Reed, Sir Edward J. (1837-1909), a naval engineer of eminence in his time, and a politician who was under Mr. Gladstone in 1886 for a short time as Lord of the Treasury, but succeeded to the Unionist Party later, and then retired from Parliamentary life. He was Chief Constructor to the Navy from 1863 to 1870; and a writer of some distinction.

Reeves, Sims (1812-1900), was the most celebrated English tenor of his time, and from 1811 to 1861 was more or less before the public. In the English ballad opera that were in vogue in the early part of his career he won enormous success.

Regnault, Henri Victor (1810-1878), a French scientist who made highly successful experiments in regard to the physical properties of bodies and their relation to heat. He was for a considerable period director of the Imperial Porcelain factory at Sèvres, and was the author of *A Course of Chemistry*, which became a standard text-book. His son, Alexandre G. H. Regnault (1843-1891), an artist of high ability, excelling in historical subject pictures. He was killed in the Franco-German War.

Regnault, Jean Baptiste, Baron (1754-1829), a talented French genre painter, who produced also some noted historical pictures. His "Three Graces," in the Louvre, is one of his best paintings.

Regulus, Marcus Attilius, was a famous Roman who was twice Consul (267 and 266 B.C.), and led the Roman armies against the Carthaginians. Being captured he was held prisoner for five years, and then permitted to go to Rome with an embassy and submit certain proposals, promising to return to Carthage if they were not accepted. Arrived at Rome, he prevailed upon the Senate to decline the proposals, and then returned to Carthage and was put to death.

Rehman, Ada (b. 1860), the well-known American actress, is a native of Limerick, but accompanied her parents to America when very young. At sixteen she made her first appearance on the stage, and rapidly advanced to a leading position. For some years she was Augustin Daly's principal actress, and was equally popular on both sides of the Atlantic.

Reich, Dr. Emil (1859-1901), was lecturer on History at London University, and the author of *The Foundations of Modern Europe*. A Hungarian, he

was for many years settled in this country, and previously travelled extensively. He published his *General History* in 1907.

Reid, Rt. Hon. Sir G. H. (b. 1845, in Renfrewshire), went to New South Wales, and entered himself for the Bar at Sydney. He was elected a Member of the Legislature of that colony in 1880, and three years later was Minister of Education. In 1894 he became Premier and Colonial Treasurer, and in 1904 was made Prime Minister of the Federal Parliament of Australia, and led the Free Trade Party. In 1910 he was appointed High Commissioner in England of the Australian Commonwealth.

Reid, Captain Mayne (1819-1883), was a novelist of exceptional power in writing stories of adventure, the scenes of which were chiefly laid in the Far West. The best known of his stories are *The Scalp Hunters*, *The Rifle Rangers* and *The Headless Horseman*. Reid saw active service in the American Army during the Mexican war.

Reid, Thomas (1710-1766), an eminent Aberdeen professor, who wrote several books on metaphysical subjects, including *Essays on the Intellectual Powers of Man*, and *An Inquiry into the Human Mind on the Principle of Common Sense*.

Reid, Sir T. Wemyss (1842-1905), was connected with journalism for many years. Edited the *Leeds Mercury* from 1870 to 1885, when he became General Manager in the publishing house of Colwell and Company, and was knighted in 1894. Wrote two novels, *Gladly, Fane* and *Maulwurf's Millions*, and the lives of W. E. Forster and Lord Houghton.

Reid, The Hon. Whitelaw (1817-1912). When a very young man became connected with journalism as a correspondent during the Civil War. Joining the *New York Tribune* in 1868, he became editor-in-chief in 1872. Has represented the United States as Ambassador to France, and in 1905 succeeded Mr. Choate as Ambassador in England, where he died in Dec. 1912, his body being conveyed to America in a British ship of war.

Réjane, Madame (b. 1857), a talented French actress. She has frequently appeared with success in London, her great part being Madame Sans-Gêne in Sardou's drama of that title.

Rembrandt, Van Rhyen (1606-1669), one of the greatest of the Dutch school of painters, who produced many remarkably successful portraits, as well as numerous figure subjects, all of them distinguished by their masterly qualities. He was an etcher of high ability also, and a number of his works are in the British national collections.

Renan, Ernest (1823-1892), a noted French author who wrote much upon religious subjects, and won special fame by his *Life of Jesus*, published in 1863. He also wrote the *Lives of St. Paul* and the *Apostles*, and was made a member of the Academy of France.

René of Anjou (1409-1480), was for a time King of Naples, but his claim to the throne being opposed he retired into private life and devoted himself with success to the pursuit of art and literature.

Rennie, John (1761-1821), a Scottish civil engineer who designed and carried out many important public works. He was the constructor of the Waterloo and Southwark and new London bridges over the Thames, the London Docks, the East and West India Docks, the Plymouth breakwater, and many other works at Liverpool, Lenth, Dublin, Hull, and elsewhere. His two sons, Sir John Rennie (1794-1874) and George Rennie (1797-1860), displayed much of their father's constructive talent, and were concerned in many important engineering enterprises.

Retz, Cardinal (1614-1670), was a native of Montmirail, and adopting the church as a profession quickly rose to eminence, and became a violent political partisan, directing his efforts mainly against Mazarin.

Reuter, Baron P. J. de (1821-1899), was the pioneer of telegraphic press services, and from about 1849 until some years later this news agency stood almost alone in its foreign service. He was established in London in 1851, and was created a Baron of the Duchy of Saxe-Coburg and Gotha twenty years later. His eldest son, Augustus Julius

Clemens Herbert de Reuter, second Baron (b. 1852), is now Managing Director of Reuter's Telegram Company, which is his second son, Baron George de Reuter (1863-1908), was a scholarly barrister who displayed considerable interest in geographical study and foreign affairs.

Revelstoke, Baron (b. 1863), is a Director of the Bank of England, and partner in the banking house of Baring Bros. and Co., Ltd. He came into the barony at the death of his father, the first Lord Revelstoke, in 1897, and was called to the Privy Council in 1902.

Revere, Paul (1735-1818), is celebrated in song and story because of his famous midnight "ride" from Boston to Concord to apprise the American troops of the proposed advance next day of the English, thus preparing them for the battles of Concord and Lexington which followed.

Reynolds, Sir Joshua (1723-1792), was the first President of the Royal Academy and the most eminent English painter of his time. He devoted the greater part of his talent to portrait painting, and his easel furnished fine examples of contemporary Royal and noble people. There is a monument to his memory, by Flaxman, in St. Paul's Cathedral, where he lies buried.

Rhodes, Rt. Hon. Cecil John (1853-1902); born at Bishop Stortford. Went to South Africa in 1871, and with his brother Herbert entered upon a diamond-mining enterprise at Kimberley, quickly acquiring a considerable fortune. He was made a member of the Cape Legislature in 1881, and became Premier in 1890. He was at the head of the British South Africa Chartered Company, and, as a result of certain little wars, a vast amount of territory was annexed, the holding of the great incorporation obtaining in due course the name of Rhodesia. Mr. Rhodes, who was made a Privy Councillor in 1895, was elected Cape Premier for the second time a year later; then followed the Jameson Raid, which led to his abandonment of politics. When the war with the Boers broke out, Mr. Rhodes was detained in Kimberley during the siege, and he did not live to see the campaign closed. By his will he left the bulk of his fortune for the founding of scholarships, devised upon an Imperial plan, at Oxford.

Ricardo, David (1772-1823), a celebrated English political economist of Hebrew descent, whose *Principles of Political Economy*, published in 1817, gained him a high place among the exponents of the science. He was in Parliament for the last five years of his life.

Richard I. (1157-1199) was King of England from 1189 to his death. He laid heavy burdens upon the people in order to equip an army for the third Crusade. At first he was victorious, and did such valiant deeds that he received the name of "Cœur de Lion." Being ultimately defeated, he signed a truce with Saladin, and on his way back to England was shipwrecked. Disguised as a pilgrim, he was identified in Austria, and handed over to the Emperor of Germany, who confined him in a remote castle. A large sum was demanded and paid for his ransom, and after over a year of duration he returned to England, and was crowned at Winchester. Later he was engaged in a war with France, and was mortally wounded by a bolt from a crossbow while besieging the castle of Chalus in Normandy.

Richard II. (1367-1400), son of the "Black Prince," succeeded his grandfather, Edward III., in 1377, when but ten years old, a Regency being appointed during his minority. In the Wat Tyler rising of 1381, the King confronted the rioters and promised them redress, an undertaking which he did not fulfil. For a time he was greatly under the influence of his uncle, Thomas, Duke of Gloucester, but on coming of age dismissed him, and ruled with some approach to dignity for the next seven years. After 1396 he developed a highly tyrannical disposition and banished or put to death many of the leading statesmen, practising any treachery himself from Parliamentary control. The opposition against him came to a head in 1399, when Bolingbroke defeated him, and he was made prisoner and died—probably by violence—in Pontefract Castle.

Richard III. (1452-1485) made himself King of England in 1483 by a succession of wicked acts and intrigues, removing obstacles from his path by murder without compunction whenever he deemed such a course desirable. He was not, however, permitted to have peaceful possession of the throne; a strong party in favour of Henry Tudor, Earl of Richmond, springing into the battle between the rival forces at Bosworth Field he was slain.

Richards, Brinley (1810-1885), a Welsh composer and musician of note, who was for many years a professor at the Royal Academy of Music. Among his many songs none has achieved more success than "God Bless the Prince of Wales," the Welsh National Anthem.

Richardson, Sir Benjamin (1828-1896), an eminent physician and writer on health. He was one of the most zealous champions of temperance of the time, and a man of unbounded energy. He invented a protective mask for workers who ran risks from inhaling dust of various kinds, and also introduced the lethal chamber for the painless destruction of dogs.

Richardson, Sir John (1787-1865), was a Scottish physician and Arctic explorer, who accompanied Franklin in his earlier expeditions, and later commanded one of the expeditions sent out in search of his ill-fated former chief. He was knighted in 1846.

Richardson, Samuel (1689-1761), was a successful London printer, who, when over fifty years of age, published his first novel *Pamela*, which achieved such a success that four editions of it were sold in the first year. His *Clarissa Harlowe* appeared in 1749, and was followed by *Sir Charles Grandison* in 1753. All these works, though somewhat prolix and tame as to incident, were conceived in a noble spirit, and gave to their author merited celebrity.

Richelieu, Cardinal Duc de (1585-1642), the eminent French ecclesiastical and statesman, who was Minister of Louis XIII. for cardinal viceroy. He was practically Master of France during the best part of his Cardinalate. Detesting the Protestants, he did his utmost to render them powerless, and was himself practically in command of the French Army at the Siege of La Rochelle. With the Huguenot humiliated, he next set himself to destroy the power of Austria, the supreme in Europe, and this led to the Thirty Years' War. His grand nephew, Duc Louis de Richelieu (1666-1728), was a Marshal of France and a soldier of distinction in his day; while the Marshal's grandson, Duc Armand de Richelieu (1766-1822), was an astute politician who cut a considerable figure in the service of both Russia and his native France.

Richmond, Sir W. D., R.A. (b. 1814), a painter who has produced many important pictures and portraits. The interior decoration of St. Paul's Cathedral owes much to his genius. He was Slade Professor at Oxford from 1876 to 1878.

Richter, Eugen (b. 1838), a German politician of prominence, and a leading journalist, who has thrown much energy and ability into the championship of the cause of the people.

Richter, Dr. Hans (b. 1843), conductor of the famous Richter Concerts for many years, from 1879; holds a high place among modern musical conductors. In 1871 was conductor of the Hungarian National Opera at Budapest. In 1875 became conductor of the Vienna Opera. In 1885 was appointed conductor of the Birmingham Festival, and from 1903 to 1911 conducted the Hans Orchestra with much success.

Richter, Jean Paul (1774-1825), a famous German author, who produced numerous books of romance, essays, and other writings, which Carlyle did much to popularise in this country.

Riddell, Mrs. J. H. (b. 1822), a novelist whose writings achieved considerable popularity. Her first mark was made with *The Ruling Passion* in 1856, and of her other stories *George Geth* (1865) stands out prominently.

Ridge, W. Post, a humorous writer and prolific novelist of the modern school, who goes for his subjects to the poorer quarters of London mostly.

He is a Kent man, and first attracted attention with his *A Clever Wife and Minor Dialogues* in 1805. Among his best-known tales since published are *Three Women* and *Mr. Frank Carverell*, *Mord Em'ly*, *A Son of the State*, and *Telling Stories*.

Ridgway, Rt. Hon. Sir West (b. 1857), has been a soldier and a British political agent abroad; seen arduous special service in India and on the frontier, been Under-Secretary for Ireland, Governor of the Isle of Man, and Governor of Ceylon.

Ridley, Matthew White, 1st Viscount (1824-1904), was a useful Conservative statesman who, having served in minor Ministerial capacities, and made an admirable Whip, was rewarded with Cabinet rank and the Home Secretaryship in 1895; and, having fulfilled that post creditably, went to the Upper House with a Viscounty in 1900.

Ridley, Nicholas (1500-1555), was Bishop of Rochester in 1547 and Bishop of London in 1550. He took an active part in the Reformation, and in the persecution which Mary instituted against the Protestants, was first subjected to imprisonment in the Tower, and then burned at the stake along with Latimer.

Riel, Louis (1844-1885), a French Canadian who instigated and led the Red River rebellion of 1869-1870, and later the rising of French half-breeds in Manitoba, when he was captured, tried, and executed.

Rienzi, Cola di (1312-1354), a Roman patriot of humble birth who inflamed the people against their rulers, and aroused such enthusiasm that they proclaimed him "Tribune." During the seven months that he was permitted to exercise supreme power, he proved himself the true friend of the poor. Ultimately, however, his enemies proved too strong for him, and he was imprisoned for three years at Avignon. Returning to Rome after gaining his freedom, he was murdered in the Capitol.

Rigg, Rev. Dr. James H. (1821-1909), was principal of the Wesleyan Training College, West-thon, deacons, and exercised a commanding influence in the Methodist communion, twice occupying the Presidential position in Conference. Was one of the original members of the London School Board.

Ripon, Marquis of (1827-1909), sat in the House of Commons as Lord Goderich from 1862 to 1869, when he succeeded to the Earldom of Ripon. An ad-^{mi}nistrator in minor Ministerial appointments, until he, in 1863, became Secretary for War, and in 1866 Secretary for India. In Mr. Gladstone's first Government of 1868 he was Lord President of the Council. In 1871 he was Chairman of the Alexandra Claims Commission, and was raised to the marquessate. In 1880 went to India as Viceroy. In 1886 was First Lord of the Admiralty, and from 1892 to 1895 Colonial Secretary. At the close of 1905 Lord Ripon, still an active spokesman of Liberalism, became Lord Privy Seal, holding the position up to 1908, when he retired.

Ritchie, Anne Isabella, Lady (b. 1838), is the eldest daughter of Thackeray, the novelist, and herself a novelist of some note. Her most popular tales are *The Story of Elizabeth* (published in 1863), *The Village on the Cliff*, and *Old Kensington*. She has also written several interesting books of reminiscences. Sir Richmond Ritchie, her husband, was Secretary to the Political Department of the India Office 1902-1910, and permanent Under-Secretary of State, India Office, from 1910 to his death in 1912.

Ritchie, Rt. Hon. C. T., 1st Lord Ritchie of Dundee (1838-1906), entered Parliament in 1874, and subsequently in Conservative Governments held various Ministerial appointments. Was Secretary to the Admiralty in 1885; President of the Local Government Board in 1886; President of the Board of Trade, 1895-1900; Home Secretary, 1900-1902; and Chancellor of the Exchequer, 1902-1903. Resigned on the Free Trade question in 1905, and afterwards was given a peerage.

Ritter, Karl (1779-1859), the celebrated German geographer, was for many years Professor of History at Frankfurt, and later Professor of Geography at

Berlin. He is best known by his *Geography in its Relations to Nature and History*.

Riviere, Britton, R.A. (b. 1840), a famous painter of animal subjects, whose range is as wide as his skill is great, specially excelling in the depiction of the fiercer beasts in incidents of life and action. "A Roman Holiday," "Daniel in the Lions' Den," and "The Miracle of the Swine," are among his best known works.

Rizzio, David (1540-1566), was the Italian secretary of Mary Queen of Scots and an accomplished musician. Suspected of a too great attachment to Mary, he was murdered by Darnley and his friends in the Queen's presence in the Palace of Holyrood.

Robbia, Luca Della (1400-1482), a famous Florentine sculptor, many of whose works are still to be seen in his native city, and include a sculptured tomb of Federighi, Bishop of Fiesole, in the Church of San Francisco. He was the introducer of enamelled terra-cotta work.

Robert of Gloucester, a celebrated rhyming chronicler of the second half of the 13th century, who wrote a history of England based on the older work of Geoffrey of Monmouth. He also wrote a number of Lives of the Saints.

Roberts, David (1796-1864), a celebrated English painter who travelled in the Holy Land and Spain, and afterwards published a clever series of sketches of scenes in those countries. His best work, however, took the form of somewhat large canvases, in which prominent architectural effects were picturesquely dealt with. He was elected R.A. in 1841.

Roberts, Field-Marshal Earl (b. 1832), the most distinguished of living British soldiers. Was born in India, and at an early age was serving with the Bengal Artillery. In the Indian Mutiny he proved his capacity on many occasions. Was at the relief of Lucknow, and assisted in the siege and capture of Delhi. Again saw active service with the Abyssinian Expedition of 1867-1868, and with that to Lushai of 1871-1872. In 1878-1879 was entrusted with the command of the Kuram Field Force, and made his historic march from Kabul to Kandahar in 1880. In 1886 had command of the army in Burma. In 1892 was raised to the peerage as Baron Roberts of Kandahar. In 1893 he returned to England from India, and two years later was appointed to succeed Lord Wolsey in the Irish command. In 1900, after the many disasters which befell the English forces in South Africa, he was despatched as Commander-in-Chief, and in the course of a few months entirely changed the aspect of affairs, relieved the beleaguered places, and won complete victories over the Boers. He then handed over the command to Lord Kitchener, returning to England to succeed Lord Wolsey as Commander-in-Chief of the British army. He received a grant of £100,000. Is deeply interested in a scheme for compulsory National Service, which he strongly advocates.

Robertson, Rt. Rev. Dr. Archibald, Bishop of Exeter (b. 1852, at Edinburgh). Educated at Oxford, and became Principal of Bishop Hatfield's Hall, Durham, in 1873. In 1879 was appointed Principal of King's College, receiving the appointment of the See of Exeter in 1903.

Robertson, F. W. (1816-1885), was a remarkable preacher, and from 1848 to his death had pastoral charge of Trinity Chapel, Brighton. He attracted the friendship of many eminent men, and the sermons of his which were published after his death are full of beautiful thoughts beautifully expressed.

Robertson, T. W. (1829-1871), was a highly successful dramatist who, between 1866 and 1870, produced a remarkable series of Society plays at the Prince of Wales's Theatre, Tottenham Court Road, in those days presided over by Marie Wilton and Mr. Bancroft (afterwards Sir Squire and Lady Bancroft). This series, beginning with "Caste," included "Society," "Guns," "School," "Play," "M.P.," and others, each of which enjoyed a long run. Robertson was also the author of "David Garrick," written for Sothorn in 1864. Madge Robertson (Mrs. Kendal), the actress (b. 1849), is a sister of "Tom."

Robertson, William (1727-1793), was a Scottish

divine and historian. His *History of Scotland during the Reigns of Queen Mary and James VI.*, *History of the Emperor Charles V.*, and *History of America* are works of high merit.

Robespierre, Maximilien (1758-1794), was a country advocate until the outbreak of the French Revolution, when he went to Paris and became an enthusiastic leader of the Jacobin Party, and was made a Member of the Assembly. In the Reign of Terror he was the ruling mind, and as President of the Committee of Public Safety he sent vast numbers to the guillotine. Then came the reaction; a counter-movement was set on foot by Tallien and others. He was denounced in the Assembly, and trying to escape, was shot and subsequently guillotined while in a dying state.

Robinson, Dean Armitage (b. 1859), has had a highly successful career in the Church, was domestic Chaplain to the Bishop of Durham in 1883, became Rector of St. Margaret's, Westminster, in 1899, was Dean of Westminster (1902), and since 1912 has been Dean of Wells.

Robinson, Sir Joseph B. (b. 1845 in South Africa). Started working and farming in early manhood, and in 1867 acquired a large tract of territory, bordering the Vaal River, where he was fortunate enough to discover diamonds. In this and other speculations he has made an immense fortune. Was Mayor of Kimberley in 1880.

Robinson, Sir J. R. (1818-1903), a genial and much esteemed London journalist, who was manager or manager and editor of the *Daily News* for close upon half a century; received his knighthood in 1893 and retired two years before his death.

Rob Roy (1671-1734), a noted Highland outlaw who levied blackmail on the farmers and rich people of the country-side in return for certain protective services, supposed or actual. He belonged to the clan MacGregor, and, as everybody knows, was the hero of Scott's novel bearing his name.

Robson, Lord W. S., K.C., P.C. (b. 1853). Entered Parliament in 1885 as a Liberal, and proved himself an able Party debater. Was appointed Recorder of Newcastle in 1895, and given the Solicitor-Generalship in Sir H. Campbell-Bannerman's Ministry at the close of 1902. Became Attorney-General in succession to Sir J. Lawson Walton in 1908. Made a Lord of Appeal in 1910, and resigned on account of ill-health in 1912.

Robson, Amy, daughter of Sir John Robson, and wife of Robert Dudley, afterward Earl of Leicester. While living in seclusion at Cumnor Place under the charge of Anthony Forster, she met her death either by accident or foul play, by the latter according to common belief, Elizabeth's favourite having reason to wish her out of the way. She was discovered dead at the bottom of an old staircase.

Roche, Earl of (1647-1686). Poet, wit, and profligate. Enjoyed a great reputation for epigrammatic verse and repute at the Court of Charles II., and was a man of undoubted brilliance, and might have achieved much had he been possessed by worthier ambitions.

Rockefeller, John D. (b. 1850), said to be the richest man in the world, was born on a small farm in New York State, and there worked until sixteen. Migrated to Cleveland, and found employment in an office for a few years. About this time the oil trade was in a disorganised condition, owing to the reckless trading and crude methods of refining. Rockefeller saw what was wrong, and resolved upon trying to remedy it. Later he began oil-refining, and entered into the business with such vigour of purpose, and made so many improvements, that he became a millionaire in a very few years. From the exertions of himself and associates, grew the Standard Oil Trust, beginning with a capital of £200,000 in 1870, and increasing and extending at such a rate that in 1892 the capital had reached twenty-two millions sterling.

Rockingham, Marquis of (1730-1782), a Whig statesman who was English Prime Minister in 1765, when, by repealing the Stamp Act, he showed a

disposition to conciliate the American colonists. Pitt, however, came into office the following year; and Rockingham, who had persistently opposed Lord North's policy, accepted office again in 1782, when the American War was the one serious question of the day, and he was anxious to bring it to a just termination, but he died before this could be accomplished.

Rodin, Auguste (b. 1841), the most celebrated French sculptor of the time, possessing a bold and original genius. His numerous statues and his fine historic monument for the city of Calais commemorating the bravery of Eustache de Saint-Pierre have brought Rodin well-deserved fame.

Rodney, George Brydges, Baron (1719-1792), a British admiral who, after serving in various parts of the world with distinction, commanded the British fleet in the battle with that of Spain in 1780 off Cape St. Vincent, winning a gallant victory. In 1782 he defeated the French fleet off St. Lucia, and was given a peerage and a pension of £2,000 a year.

Roebuck, John Arthur (1800-1879), a Radical politician, who was in Parliament from 1832 to the time of his death, except for a very short period. Was bold and able debater, though at no time a reliable party man, because of his independent and sometimes eccentric attitude on public questions. In 1855 his proposal for an Inquiry into the mismanagement of the Crimean War resulted in the downfall of Lord Aberdeen's Ministry. He obtained the sobriquet of "Trar' em."

Roger of Wendover, who died in 1237, was a monk of St. Albans, and later Prior of Bevoise. He wrote a history of the world under the title of *Flowers of History*, which has been of great value for its antiquarian lore.

Rogers, Henry (1806-1877), a thoughtful essayist and scholar, and author of *The Eclipse of Faith*, which attracted great attention in religious circles on its publication.

Rogers, The Rev. J. Guinness, D.D. (1822-1911). For many years an active Nonconformist leader. Was minister of Clapham Congregational Church for thirty-five years, chairman of the Congregational Mission in 1894, and the author of numerous able books on religious subjects. His autobiography, published in 1904, is an important work.

Rogers, James E. Thorold (1821-1900), Professor of Political Economy at Oxford 1862-1868, and for some time in Parliament as an advanced Liberal. His books, *History of Agriculture and Prices in England*, *Six Centuries of Work and Wages*, and *The Economic Interpretation of History*, were all notable productions.

Rogers, John (1509-1555), was a friend of Tyndale's, and worked with him in compiling the English version of the Bible published in 1537. After Mary's accession he was arrested for preaching a sermon against Romanism, and ultimately burned at the stake in Smithfield, being the first of the many martyrs of the reign.

Rogers, Samuel (1763-1855), the banker-poet who wrote "The Pleasures of Memory," "Italy," and other works which contain much graceful thought sympathetically expressed. His writings procured for him the friendship of the leading literary men of his time.

Roland, Madame (1753-1793), was one of the leading figures of the French Revolution. Her husband, Jean Marie Roland de la Platière (1734-1793), who was one of the Ministers during the Girondist period, escaped from Paris on the disruption of his Party, but his wife remained behind, and was sent to the guillotine. During her incarceration she wrote an *Appeal to Posterity*, remarkable for its beauty of sentiment and patriotic enthusiasm. Her husband committed suicide on receiving the news of her execution.

Rollin, Charles (1661-1741), a distinguished French historian who enjoyed great renown in his time, as the author of *Ancient History*, *Roman History*, and other works. He was a Jansenist, and to that fact owed the deprivation of important appointments.

Rollis, Sir Albert (b. 1842), was for many years

engaged as solicitor in Hull, of which borough he was several times mayor. He entered Parliament in 1886 as member for South Islington, and became a prominent debater when commercial and municipal matters were under discussion. He is a member of a firm of shipowners, as well as a lawyer, and was knighted in 1886. He has received several foreign orders of distinction.

Romaine, William (1712-1795), was a popular Church of England clergyman and preacher, and the author of the *Life of Faith*, *The Triumph of Faith*, etc., works which were at one time much read.

Romanes, George John (1828-1894), a Canadian naturalist who lived mostly in England and while at Oxford attracted attention by his studies in natural history, his works on *Mental Evolution in Animals* and *Animal Intelligence* being distinguished for a remarkable closeness of observation.

Romilly, Sir Samuel (1757-1818), a famous English lawyer who was Solicitor-General in 1806 and for many years had a distinguished career both in Parliament and at the Bar. He effected many improvements in the Criminal Law. His death occurred in painful circumstances, he putting an end to his life whilst suffering from brain fever.

Romney, George (1734-1802) was born in North Lancashire, studied portrait painting in a Kendal artist, and for a few years obtained a living by local portrait painting. Going to London in 1762, his talent gained him speedy recognition, and, after studying for a couple of years in Rome, he set up as a portrait-painter in Cavendish Square, and became highly successful. His portraits are among the finest examples of that kind of art that England has produced, and to-day realise large prices.

Ronge, Johannes (1813-1887), an eminent German ecclesiastic, who caused a considerable sensation in 1844, by declaring the Holy Coat of Treves to be an imposture. He lived in London from 1848 to 1861, when he returned to Germany and there died.

Ronsard, Pierre de (1524-1585), a famous French poet whose elegant "Odes," "Amours," and other imitations of ancient authors earned him great popularity in his own day, and a special place in his country's literature.

Röntgen, Professor Conrad William (b. 1845), the eminent German physicist—Director of the Würzburg University Laboratory, and since 1899 Professor at Munich—whose discovery of the Röntgen rays in 1895 created such a world-wide sensation and has proved of such inestimable value in surgical practice and other directions. Besides his X-rays discovery, he has made other important laboratory investigations, resulting in the solution of difficult chemical problems.

Rooke, Admiral Sir George (1650-1709), was one of the most notable seamen of his time, and for his spirited attack on the French fleet before La Hogue in 1692 was knighted. He further distinguished himself at Malaya in 1704, and the same year with Sir Cloudesley Shovel captured Gibraltar.

Roosevelt, Theodore (b. 1858), President of the United States of America from the death of Mr. McKinley in 1901 until 1909. Was educated at Harvard, and spent some years in the Far West hunting and shooting; then he returned to New York, became a Member of the State Legislature in 1881, and soon made a name for himself. Was nominated for Mayor in New York City in 1886, but defeated by the Tammanyites. He then returned to the West again for a year or two. In 1889 was made a Member of the National Civil Service Commission, a position which he held for six years. In 1895 became one of the Police Commissioners in New York, and in 1897 was appointed Assistant Secretary of the Navy, a position which he resigned on the outbreak of the war with Spain, organised a regiment of Rough Riders, and commanded that body in Cuba. After the war was elected Governor of New York State, and in 1900, when McKinley was elected President he was carried as Vice-President. On the assassination of McKinley he succeeded to the Presidency, and in 1904 was re-elected to the position. For his efforts in promoting peace was

awarded the Nobel Prize in 1906. In 1909 went on a big game shooting expedition to South Africa; returning in 1910 he made the tour of the chief capitals of Europe, making vigorous speeches. In 1912 became candidate for the presidency in opposition to Taft and Woodrow Wilson, as an Independent Progressive candidate. A petulant fanatic attempted to assassinate him on October 14 at Milwaukee, and with the bullet in his breast he made a speech of over an hour. Was defeated at the election. In 1914 explored the wilderness of Brazil and discovered a large river.

Root, Hon. Elihu (b. 1845), prominent American statesman. Secretary of War 1890-1904, Secretary of State 1905, in succession to Col. Hay. Visited South America and Mexico in 1907.

Rosa, Salvador. (See **Salvador Rosa**.)

Rosas, Don Juan Manuel (1793-1877), was the first President of the Argentine Republic, attaining that position after much desperate fighting as Commander-in-Chief of the Army. He remained President from 1853 to 1859, when a sudden Revolution caused him to quit the country, and he retired to a small farm near Southampton and there died.

Roscoe, Rt. Hon. Sir Henry Enfield, P.C. (b. 1833), grandson of William Roscoe the historian, and a great modern chemist. He has written largely on chemical subjects, was Vice-Chancellor of London University from 1896 to 1902, and President of the British Association in 1887. An ardent Liberal politician, he sat in Parliament for some years for Manchester, and has been a member of several important Royal Commissions.

Roscoe, William (1753-1831), the well-known historian whose *Life of Lorenzo de Medici* became one of our standard histories. He was also a poet of considerable ability.

Rosebery, Earl of (b. 1847), has been an active Liberal politician and statesman. He succeeded to the title in 1868, and in 1869 was Mr. Gladstone's Under-Secretary in the Home Department. This post he resigned in 1883, and afterwards made a trip round the world with his wife, who was a daughter of Baron Meyer de Rothschild. In 1884 he was made First Commissioner of Works, with a seat in the Cabinet. In 1886 he became Foreign Secretary. In 1892 he accepted the Chairmanship of the London County Council, and was again in charge at the Foreign Office in Mr. Gladstone's later Ministry. When Mr. Gladstone resigned in 1894 he became Premier, but resigned in the following year, and in 1896 gave up the Liberal leadership. Since then he has held somewhat aloof from his Party, although from time to time giving speeches of remarkable power on the topics of the day. Is a free Trader.

Rosmead, Lord (1824-1897), was best known as Sir Hercules Robinson. He held at one time and another numerous Colonial Governorships, including those of Ceylon and New South Wales, and succeeded Sir Bartle Frere in 1880 as High Commissioner of South Africa. In the difficulties with President Kruger he showed conspicuous tact, and in 1895 went to South Africa a second time, when the unfortunate Jameson Raid occurred, and matters became so unpleasant that he returned to England, being raised to the peerage as Baron Rosmead.

Ross, Sir James (1800-1862), achieved distinction as an Arctic explorer, accompanying his uncle, Sir John Ross, and Captain Parry on their expeditions. He was commander of the expedition of 1839-1843, and to him belongs the credit of the discovery of the North Magnetic Pole in 1831.

Ross, Sir John (1777-1856), the eminent explorer (uncle of the foregoing). He made several voyages to the Polar regions, and wrote some interesting and valuable works describing his adventures and discoveries. He was British Consul at Stockholm for some years, and on receiving his knighthood Parliament granted him a sum of £5,000.

Rosse, William Parsons, Lord Earl of (1800-1867), was an astronomer of considerable note who contributed greatly to the advancement of science by erecting in his Irish park at Birr Castle, King's County, the largest telescope that had up to that

time been constructed. It cost £30,000, and afforded the means of discovering and defining the spiral nebulae. From 1848 to 1854 he was President of the Royal Society.

Rossetti, Dante G. (1828-1882), was the son of Gabriele Rossetti (1793-1854), an exiled Italian author who settled in London in 1824. Dante showed great talent as a painter from boyhood, and became one of the Pre-Raphaelite Brotherhood, formed in 1848. From about 1850 he produced a great number of pictures remarkable for their extreme beauty of drawing, splendour of colouring, and poetic force. Among his best-known paintings are his "Ecce Ancilla Domini," "Song of Solomon," "Beatrice," "Lilith," and "Dante's Dream." He also distinguished himself as a poet; his two volumes, published in 1870 and 1881, respectively, reflect many of the characteristics of his paintings.

Rossetti, W. M. (b. 1829), brother of Dante G. Rossetti, and a cultured critic; has edited numerous editions of the poets and written much on art. He held an appointment at the Board of Inland Revenue for a quarter of a century.

Rossini, Gioacchino Antonio (1792-1868), one of the most brilliant of modern Italian composers, who devoted his genius principally to opera. His first opera, "Tancredi," was produced at Venice when he was twenty-one. It was followed, after a short interval by "Il Barbiere di Siviglia," "La Cenerentola," "Otello," "Mosè in Egitto"—this latter an oratorio—"La Donna del Lago," "Semiramide," and "Guillaume Tell." All these appeared between 1816 and 1829. Though mostly staid in style, and calling for exceptionally brilliant execution, Rossini's operas were amongst the most popular works of the 19th century, and earned the composer fame and fortune. He also wrote a "Statut Mater" in 1824, and a "Messe Solennelle" in 1826.

Rostand, Edmond (b. 1868), dramatist and member of the French Academy. Jumped into fame by his *Cereno de Bergerac*, 1898. The chief dramatic sensation of 1913 was his *Chantrelle*. His works are marked by great originality of conception and boldness of treatment. Made a Commander of the Legion of Honour in 1911.

Rothschild, Lord, P.C. (b. 1840), was in Parliament as Baron (of the Austrian Empire) Rothschild, from 1865 to 1885, representing Aylesbury. In the last-named year he was raised to the British peerage. He is the head of the famous Rothschild banking house in England, and was appointed chairman of the Old Age Pension Committee by Parliament.

Rothschild, Alfred Charles de (b. 1842), a member of the Rothschild firm; has been a Director of the Bank of England, is a Trustee of the National Gallery and of the Wallace Collection. He is a well-known art connoisseur and sportsman.

Rothschild, Anselm Meyer (1743-1812), was born at Frankfort-on-the-Maine, and after some experience in a law office, set up for himself first as a money lender, then as a banker. By his splendid genius for finance he acquired a large fortune. His son, Nathan Meyer Rothschild (1777-1836), took charge of the London house, and conducted its affairs with great success, and was made an Austrian Baron in 1822. He was succeeded by his eldest son, Baron Lionel de Rothschild (1808-1879), who was the first Jewish member of the House of Commons. Of this latter, Lord Rothschild and Mr. Alfred Rothschild are sons.

Roubillac, L. F. (1665-1753), was a French sculptor who lived in London from 1720 to the time of his death, and during that period contributed many monuments to Westminster Abbey. His statue of Sir Isaac Newton at Trinity College, Cambridge, is one of his finest productions.

Rousseau, Jean Jacques (1712-1778), was born at Geneva, and after a hard and wandering life, made the acquaintance of Madame D. Warens, with whom he resided for ten years as secretary and companion. In 1748 he proceeded to Paris, where, after a time, he made the acquaintance of Diderot, and wrote under his encouragement. Meanwhile Rousseau had been studying social questions with

great ardour, and in 1759 published his romance, *Julie, ou la Nouvelle Héloïse*, which was followed in 1762 by *Émile*. These two works contained so much that was at variance with convention, and so opposed to all ideas of moral restraint, that they called forth the condemnation of the orthodox, and Rousseau was obliged to leave France for a time. It was while in England that he wrote his remarkable *Confessions*, and his celebrated *La Contrat Social*. He gave to France a new field of thought, and laid down principles of government and conduct which bore fruit in the French Revolution.

Rowe, Nicholas (1673-1718), was a prominent dramatist who became Poet Laureate, and whose plays, "Jane Shore" and "The Fair Penitent," were highly popular. Was buried in Westminster Abbey.

Rizzò, Madame Marie, an eminent prima donna, who has now retired from the stage and established an academy for the teaching of singing in Paris and London, her Paris season being in the winter and her London season in the spring and summer. The successful career of this accomplished artiste is well known. She studied under Auber and Moser at the Paris Conservatoire, gaining the first prize for singing and the gold medal. Her first operatic engagement was at the Opéra Comique in 1870, and in the same year she received decorations and diplomas for her nursing services among the wounded, and for the money she raised for the Soldiers' Fund by singing. She first appeared in England in 1872, achieving a pronounced success at the opera houses. Her first visit to America was in 1877. She has had many honours conferred upon her, and is a teacher of the very first rank. Her Paris studio is at 37, Rue Joubert, the London address is c/o Messrs. Novello, Music Publishers, Wardour Street, W.

Rubens, Sir Peter Paul (1577-1640), one of the most notable of Flemish painters, who, after studying in Italy, established himself at Antwerp, where he produced a number of historical and religious works which made him a great reputation. From 1620 to 1623 he was employed by Marie de Medici on a series of pictures for the Luxembourg Palace, and was in England in 1629 painting for Charles I., who knighted him. He died at Antwerp.

Rubinstein, Anton E. (1830-1894), a famous Russian pianist and composer. Was the most expert performer on the piano of his time.

Ruddiman, Thomas (1674-1757), an eminent Scottish classical scholar, whose *Rudiments of the Latin Tongue* was a standard school book for a long period. Ruddiman was librarian to the Faculty of Advocates in Edinburgh for nearly half a century.

Rumford, Sir Benjamin Thompson, Count von (1753-1814), was an American natural philosopher and statesman, who sided with the Royal party on the outbreak of the War of Independence, and later on settled in Bavaria, accepted service under the King, and was made Count. He was in London in 1795, and afterwards resided in Paris. He was associated with the founding of the Royal Institution of Great Britain.

Runciman, Rt. Hon. Walter, M.P. (b. 1870), a son of Sir Walter Runciman, of Newcastle. An active Liberal, who represented Oldham in Parliament in 1899-1900, and has sat for Dewsbury since 1902. Was Parliamentary Secretary to the Local Government Board 1905; Financial Secretary to the Treasury 1907; President of the Board of Education, 1908-1911; and President of Board of Agriculture since 1911.

Rupert, Prince (1619-1682), was a nephew of Charles I. and son of Frederick V., Elector of Bavaria. During the Civil War he fought gallantly on the Royalist side and at the Restoration rose into favour at Court, and was made Governor of Windsor.

Ruskin, John (1819-1900), art critic and philosopher, was the son of a wealthy London wine merchant. His *Modern Painters* exhibited a masterly perception of the principles of art and a boundless gift of literary expression. Other volumes appeared at intervals until 1860. Meanwhile he had published

The Seven Lamps of Architecture and *The Stones of Venice*, two memorable works which considerably enhanced the author's fame. Always taking a deep interest in economic questions, Ruskin delivered and published numerous lectures on a wide range of subjects—art, pleasure, religion, war, work, and so forth; and he was acknowledged to be one of the greatest thinkers of the time. Often his views were impracticable and even eccentric, but behind them there was always evident a sincere desire to promote the well-being of the people.

Russell, Sir E. R. (b. 1834), became connected with the *Liverpool Daily Post* in 1860; was in Parliament from 1885 to 1887, and has shown great ability as a dramatic critic and political writer. He was knighted in 1893.

Russell, George Wm. Erskine, L.L.D. (b. 1853), held various appointments in the Gladstone Governments between 1885 and 1895, and is the author of several bright books of gossip and reminiscences. His *Collections and Recollections*, *Milestones on the Road of Life*, and *Seeing and Hearing* have been widely read.

Russell, John, 1st Earl (1792-1878), was the third son of the 6th Duke of Bedford. Entered Parliament as Lord John Russell on attaining his majority, and, ranging himself on the Liberal side, showed great capacity for affairs. He it was who introduced the first great measure of Reform, which was passed in 1832. He was leader of the House of Commons and Home Secretary under Lord Melbourne from 1835 until 1839; in which latter year he was appointed Secretary for the Colonies. Then from 1841 to 1846 he was in Opposition; but, on the defeat of Peel on the Corn Law question, was made Prime Minister, remaining in power until 1852. In Lord Aberdeen's Ministry he was Foreign Secretary, and afterwards Lord President of the Council. When Palmerston took up the reins of Government in 1855, Lord John Russell became Colonial Secretary, and later on Foreign Secretary. In 1861 he was raised to the peerage, and from 1865 to 1866 was once more Prime Minister. He also wrote lives of Thomas Moore and Charles James Fox.

Russell, Rt. Hon. Thomas W., M.P. (b. 1841), represented Tyrone from 1880 to 1910, and from 1905 to 1906 was Secretary to the Local Government Board. Is an ardent temperance man, and was a warm supporter of the Irish Land Purchase Scheme brought forward in 1906. In 1907 was appointed Vice-President of the Irish Department of Agriculture and Technical Instruction, and made a Privy Councillor in 1908.

Russell, William, Lord (1639-1683), remembered in history as having suffered execution for a trumped up charge of being connected with the "Rye House Plot."

Russell, William Clark (1844-1911), was son of Henry Russell, the once popular concert singer and song composer (1813-34). From 1875 Mr. Clark Russell was known as one of the most popular writers of sea stories, and also wrote lives of Nelson and Collingwood.

Russell, Sir William Howard (1821-1907), became a journalist in Ireland while a young man; went to London in 1842; obtained an engagement on the *Times*, and represented that paper as special correspondent in the Crimean War, greatly distinguishing himself by the boldness and correctness of his letters. He also served the *Times* in India, during the Mutiny, in the American Civil War, as well as during the Franco-Prussian War of 1870. He was knighted in 1895, and edited and owned the *Army and Navy Gazette* for a long period.

Russell of Killowen, Charles Russell, 1st Baron (1832-1900). Was born at Newry and trained for the law, beginning to practise as a solicitor in Belfast in 1854. Two years later he entered for the Bar, was called in 1859, and joined the Northern Circuit. He soon distinguished himself by his ability as an advocate, and in the course of a few years achieved a leading position. He was made Q.C. in 1872, and in 1880 entered Parliament. Was Attorney-General under Mr. Gladstone in the

administrations of 1886 and 1892. In the Parnell Commission was leading counsel for Mr. Parnell, and his conduct of that case was masterly. In 1894 he was made a Lord of Appeal, and in the same year succeeded Lord Coleridge as Lord Chief Justice.

Russell, Earl of. (See Nicholas II.)
Rutland, John Manners, 7th Duke of (1818-1906), a great figure in Conservative politics in his day, and long known in the House of Commons as Lord John Manners until he succeeded in 1888 to the dukedom. Was a Cabinet Minister in 1895 as First Commissioner of Works, and later served two further terms in the same office, and was also Postmaster-General and Chancellor of the Duchy of Lancaster.

Ruydaal, Jacob, a famed Dutch landscape painter of the 17th century, who confined himself mostly to the scenes of his native land, preferring unbraced shades and wide, tree-covered expanses, which he depicted with rare fidelity. A soft melancholy gloom is his pervading note.

Ruyter, Admiral, the Dutch admiral who in 1677 invaded England with a fleet of Dutch war vessels, advancing up the Thames and Medway and setting fire to considerable shipping. He soon saw fit to retreat, and more serious trouble was averted.

Rymer, Thomas (circa 1639-1713), a famous antiquary who for some years filled the position of Historiographer-Royal. His *Treaties* fill twenty volumes, and are highly prized. The British Museum possesses over fifty of Rymer's MS volumes.

S

Sacchi, Andrea (1598-1661), a renowned Italian painter who left behind him a number of pictures of religious subjects which are much valued, his chief work being the "St. Rocco surrounded by his Companions," now at the Vatican.

Sacheverell, Henry (1672-1724), an English clergyman who attacked the Dissenters and their Whig supporters so fiercely in a sermon delivered in 1709 that he was impeached before the House of Lords, and suspended from preaching for three years; while the sermon, which was entitled "Perils from False Brethren," and had an enormous sale, was burned by the common hangman. Later, Queen Anne presented him to the Rectory of St. Andrew's, Holborn.

Sachs, Hans (1464-1576), the German shoemaker of Reformation times, was an earnest worker in the Protestant cause, and wrote over 5,000 different pieces, poetry and prose, all marked by strong individuality and religious fervour. He was born and died at Nuremberg, where his grave is to be seen.

Sackville, Charles, 6th Earl of Dorset (1637-1705), was a poet and wit who held a place of favour under the last two Stuart kings and William III. Among the numerous neat sets of verses which he wrote, the best remembered is the pretty riddle, "To All You Ladies Now on Land."

Sackville, Thomas, 1st Earl (1536-1608), was a poet and courtier high in the good graces of Queen Elizabeth. He was a prominent contributor to *The Mirror for Magistrates*, and had a hand in the writing of "Glorious," the first known English tragedy in blank verse.

Sadi, or Saadi, the Persian poet who flourished in the 13th century, and won national fame by his poems "The Garden of Roses" and "The Orchard."

St. Aldwyn, Viscount (b. 1837), better known as Sir Michael Hicks-Beach, under which name he was for a lengthened period one of the most prominent Conservative statesmen in the House of Commons, serving successively (after holding minor office) as Secretary for Ireland (twice), Colonial Secretary, Chancellor of the Exchequer (twice), and President of the Board of Trade. Opposed Mr. Chamberlain's Fiscal proposals, and founded the United Free Food League. Retired from official life in 1902, and was appointed Chairman of the Royal Commission of Ecclesiastical Discipline which reported in 1906. Was "Father" of the House of Commons upon his elevation to the peerage.

St. Arnaud, Marshal (1796-1854), was one of the generals who helped Louis Napoleon to carry out the *coup d'état*. He had previously distinguished himself in Algeria. On the outbreak of the Crimean War he commanded the French forces. After the battle of the Alma he was incapacitated by illness, and died on the way to France.

St. Audries, Baron (formerly Rt. Hon. Sir A. Acland-Hood, Bt.), late chief Conservative Whip (b. 1823). Was in the army from 1845 to 1852, and served in the Egyptian campaign, 1882, as adjutant in the Grenadier Guards. Governor of Victoria, 1889-91. M.P. for West Somerset, 1892-97.

Saint-Just, Antoine (1767-1794), one of the later leaders of the French Revolution closely associated with Robespierre in the days of the Terror, and responsible for much of its cruelty. He and Robespierre met their death on the same scaffold.

St. Pierre, Bernardin de (1737-1814), a French author; the romanticist who attained fame by his powerful story, *Paul and Virginia*.

Saint-Saens, Charles Camille (b. 1835), a distinguished French composer whose works include the operas of "Samson et Delilah" and "Henri VIII.," both of which have been performed in London. He has the gift of melody, added to a graceful classicality.

Saint-Simon, Claude, Comte de (1760-1825), was a French scientist and Socialist who had great influence upon the thought of his time. Saint-Simonism was embraced by many eminent men.

Saint-Beuve, Charles Augustin (1804-1869), was a French critic of considerable power and influence, whose "Causeries du Lundi" in the *Constitutionnel* for several years formed a clever review of the men, women, manners, and literature of the time. Among his books, *A History of French Poetry to the Sixteenth Century*, *A History of Port Royal*, and *English Portraits* are much admired.

Salisbury, George, Edward, Earl of (b. 1845), Professor of Rhetoric and English Literature, Edinburgh University, since 1895. Author of numerous critical works on literary subjects on which he is a leading authority. His volumes include *A Short History of English Literature*, *A History of Criticism*, and *A History of English Prose*.

Sala, George Augustus (1804-1895), was one of Charles Dickens's "young men," and wrote largely and entertainingly for *Household Words* and *All the Year Round*. Was the first editor of *Temple Bar*, and for a lengthy period was a leader writer and special correspondent in many lands for the *Daily Telegraph*. Also for a number of years wrote "Echoes of the Week" for the *Illustrated London News*. His best book of sketches was *Twice Round the Clock*; his best novel, *Capitaine Dangerous*.

Saladin (circa 1137-1193) was Sultan of Egypt, a conquering general, and a deadly foe of Christianity. He swept over Syria and Macedonia, and captured Jerusalem after a great victory at Tibrias. It was against Saladin that the Third Crusade was undertaken, and after his defeat by Richard I. in 1191 his power was shattered.

Sale, George (1680-1736), an English Orientalist, who is best known by his translation of the Koran.

Salisbury, Robert Arthur Talbot Gascoyne Cecil, 3rd Marquis of (1830-1905), son of the 2nd Marquis. After completing his education at Oxford, and travelling for a time at the Antipodes, he entered Parliament in 1855, being then Lord Robert Cecil. He became Lord Cranborne by the death of his elder brother in 1865, and in the following year joined Lord Derby's Ministry as Secretary for India. He succeeded to the Marquisate in 1868, and in 1874 was once more Secretary for India. In 1878 he became Foreign Secretary, and attended the Berlin Congress with Lord Beaconsfield. From 1881 he led his Party in the House of Lords, and vigorously opposed the majority of Mr. Gladstone's measures. When in 1885 the Liberals were defeated he became Prime Minister. Mr. Gladstone again held sway in the following year, but upon his being defeated on the Home Rule question, Lord Salisbury was for the

second time made Premier. In 1892 the Liberals were in power again, but in 1895 Lord Salisbury was once more Prime Minister. He continued in office until 1902, finally retiring from political life after peace was proclaimed in South Africa. His solid qualities made him a reliable and effective party leader. He was a thoroughly representative Englishman of the fine old type, his death being a great loss to his Party and the nation.

Salisbury, James Edward H. Gascoyne Cecil, 4th Marquis of (b. 1861), the eldest son of the Conservative Premier, whom he succeeded in 1903, and was known in the House of Commons as Viscount Cranborne, serving the office of Under-Secretary of Foreign Affairs. On becoming a peer he was in turn Lord Privy Seal and President of the Board of Trade, and went out to the Boer War and fought with distinction. An active churchman.

Salustius (86-34 B.C.), the Roman historian, was in turn questor and tribune. He stood high in favour with Julius Caesar, accompanied him to Africa, and was made governor of Numidia. When he subsequently returned to Rome he built himself a palace and passed the remainder of his days in luxurious retirement. It was during this period that his histories were written—*Catiline*, *Jugurtha*, and *Historiarum Libri Quinque*.

Salt, Sir Titus (1803-1876), was a Bradford wool-stapler, who, in 1835, discovered some discarded pieces of alpacas which were extremely soft and long and unsaleable. He bought these bags for a trifle, and experimenting with the fibre, produced the famous alpaca goods, and founded an enormous industry. He was made a baronet in 1866.

Salvator Rosa (1615-1731), a great Italian painter who first attracted notice by selling pictures in the streets of Naples. Being encouraged by Lanfranco, he went from Naples to Rome, and quickly became one of the most noted artists of his time. His pictures were chiefly landscape and battle-pieces.

Sambourne, Linley (1815-1891), was trained for the engineering profession, but took to drawing, and obtained a position on *Punch*. For a long time he was the second cartoonist, and on the retirement of Sir John Tenniel became principal cartoonist.

Samuel, Rt. Hon. Herbert L., P.C., M.P. (b. 1870), Postmaster-General 1910-14; President of the Local Govt. Board since 1914. Has represented the Cleveland Division (N. Riding, Yorks) since 1912. Was Under-Sec. to the Home Dept., 1905-9; Chancellor of the Duchy of Lancaster, 1909-11.

Saneroff, William (1616-1693), was a native of Suffolk and became Archbishop of Canterbury. He was one of the seven bishops sent to the Tower by James II. for opposing the "Declaration of Indulgence," and fared no better under William and Mary, being deprived of his primacy for refusing to take the oath of allegiance.

Sand, George (1804-1876), the leading French author, of his true proper name, Anne-Marie Lucile Auriant Dujon Baronesse de Sand, who, both as novelist and dramatist, achieved the highest success. Her first novel, *Rose et Blanche*, was written in collaboration with Jules Sandeau. This was followed by *Indiana*, in which she worked unaided, producing a story full of sentiment, emotion and dramatic action, and handling her theme with wonderful freshness. The story immediately made her famous, and year after year she continued to turn out novel after novel, most of them dealing with unhappy love entanglements of a kind that the English fiction convention did not sanction, but they were all instinct with power and vigour. She produced, among others, *Valentine*, *Jacques*, *Ellé et Lui*, *Manfred*, *Consuelo*, *La Petite Fadette*, and *La Menner d'Angoulême*. She was unfortunately from one point of view, but fortunate from another, in her own personal relations with men of such singular power as Alfred de Musset, Chopin and Sandeau; but she was in her way a greater artist than them all.

Sanderson, Earl Thomson (b. 1841), was Permanent Under-Secretary of State at the Foreign Office from 1894 to 1905. He was made a K.C.B. in 1893, raised to the peerage 1905. Hon. D.C.L. Oxford, 1907.

Sandys, Edwin (1519-1588), Archbishop of York in 1576. As Vice-Chancellor of Cambridge University he refused to proclaim Queen Mary, and suffered imprisonment in the Tower in consequence, but was advanced in the church under Queen Elizabeth, and was one of the translators of the *Bishop's Bible*.

Sandys, Sir Edwin (1561-1609), English politician and author, who wrote *Europe Speculum*, and assisted the Pilgrim Fathers in chartering the *Mayflower*. Son of the Archbishop, last-named, and brother of the poet, following.

Sandys, George (1578-1644), a religious poet whose works attained much favour in his day. His metrical translations of the Psalms, the Book of Job, and the Song of Solomon are instinct with poetic feeling. He was besides a great traveller, and made valuable contributions to early geography and ethnology.

Sankey, Ira David (1840-1908). The celebrated American evangelist, singer, and composer, associated with Dwight L. Moody, the revivalist (1837-1899), in mission-work in America and Great Britain for many years.

Sankey, Sir John, Kt. (The Hon. Mr. Justice Sankey), judge of the King's Bench Division since April 1914 (b. 1866); educated at Lancing Coll. and at Jesus Coll., Oxford, Chancellor of the Diocese of Liverpool from 1909.

Santley, Sir Charles (b. 1869), was educated for his vocal career in England and Italy, and made his first appearance in London in 1897. For many years he figured as our principal English baritone. The jubilee of his musical life was celebrated at the Albert Hall in 1907, in which year he was knighted.

Santos-Dumont, M. (b. 1873 in Brazil), a successful experimenter in aerial navigation, his most notable flights have been made in Paris, and at Monte Carlo. He visited London in 1909.

Sappho (flourished B.C. 610-570) was the famous lyric poetess of ancient Greece, whose romantic story of *Unrequited Love* is better known than her poetry, of which only a few samples survive.

Sarasate, Pablo (1844-1908), one of the greatest violinists of his time, was born at Pampeluna in Spain, studied in Paris and first appeared in England in 1874, from which time he was a frequent visitor to this country, and appeared in all the leading cities of Europe with great success.

Sardanapalus (properly Ashurbanipal) was the last of the great line of Assyrian monarchs. He reigned 668-606 B.C., and lived a life of luxury and licentiousness until brought face to face with revolt and disaster, when he displayed an amount of courage that he had previously been unsuspected of, and when at last he saw no possibility of standing against the besieging forces he is said to have gathered his household and treasures together in his palace at Nineveh, set fire to the pile and so perished.

Sardou, Victorien (1831-1908) began writing plays in 1854, but was at first unsuccessful. Later he obtained an introduction to Mlle. Déjazet, the famous actress, for whom he wrote some plays that proved splendid successes and placed him at the head of French dramatists. Then followed a long series of successes—"Nos Intimes," "Seraphine," "Rabagas," "Divorçons," "Fédora," and so on, from triumph to triumph. Later he turned his attention to historic subjects, and in "Théodora," "Patrie," "La Tosca," "Madame San Gène," "Robespierre," and "Dante," the last-named written specially for Sir Henry Irving. He was elected to the French Academy in 1877.

Sargent, John S. (b. 1856, at Florence). He is of American parentage and received his art education in Paris. As a portrait painter he has few equals. Was made A.R.A. in 1894 and R.A. in 1897.

Satow, Rt. Hon. Sir Ernest M. (b. 1843), has held high diplomatic posts at Tokio, Peking, and in Morocco, and was one of the British representatives at the Hague Conference of 1907.

Saunderson, Nicholas (1684-1739), a celebrated blind mathematician, who acquired such a mastery of his study that he was elected Lucasian Professor of Mathematics, and published a treatise on *Fluxions and Elements of Algebra* in a vol.

Saurin, Jacques (1677-1730), a noted Huguenot preacher, who was minister of a London church early in the 18th century, and afterwards went to Holland and took charge of a Protestant church at The Hague. He published several volumes of sermons of a deeply devotional character.

Savage, Richard (1656-1743), was said to be the natural son of the Countess of Macclesfield, but was brought up without knowing the secret of his birth, and when at last he discovered it his mother declined to help him. He was, however, possessed of considerable ability, and for a time maintained himself by literary work, producing plays, comedies, and poems. In 1727 he was condemned to death for having killed a man in a coffee-house quarrel, but obtained a pardon and a small pension from Queen Caroline and afterwards was under the protection of Lord Tyrconnel. With that peer, however, he subsequently quarrelled, and after enduring much privation died at last in a debtors' prison at Bristol.

Savonarola, Girolamo (1452-1498), the great Florentine preacher and Reformer, who was a monk of the Dominican order. He denounced the follies and luxuries of his time, especially attacking Pope Alexander VI. He was held in great regard by Lorenzo de Medici, and after that noble's death attempted to reorganise a Florentine Republic, but the Pope dealt out swift vengeance upon him. He was excommunicated, imprisoned, and put to a dreadful death. Savonarola was one of the most learned men of his time, and his works have been translated into nearly all languages. George Eliot's *Romola* contains a fine estimate of his character, and his life by Villari is a great biography.

Saxe, Count Hermann, Marshal of France (1666-1750), was one of the most prominent generals of the allied armies commanded by the Duke of Marlborough and Prince Eugene, but went to the French side after the Peace of Utrecht. Rose into high favour with Louis XV, who made him Marshal, and later on he commanded the French army in Flanders, achieving many notable victories.

Sayce, Rev. Archibald, D.D. (b. 1846). Educated at Oxford, receiving the appointment of Deputy Professor of Comparative Philology in 1898. His work on the *Principle of Comparative Philology* is a hard book. He was a member of the Old Testament Revision Committee, and received the appointment of Professor of Assyriology at Oxford in 1897. Professor Sayce's writings are marvels of profundity, and his books almost innumerable. Published *The Archaeology of Cuneiform Inscriptions* in 1907.

Scaliger, Julius Cæsar (1474-1558), was a celebrated Italian physician and scholar who settled in France, and was appointed physician to the Bishop of Agen. He wrote commentaries on the classical authors, which were remarkable for their perspicuity and scholarship. His son, Joseph, Joseph Scaliger (1540-1609), was also a very learned Protestant scholar, and the founder of modern chronology.

Scarlatti, Alessandro (1659-1757), a distinguished Italian composer, who was for some years Musical Director to the Court of Naples, then went to Rome, but later on returned to Naples, remaining there until his death. He composed an immense number of operas, masses, cantatas, and oratorios, etc., and much of his music is still performed. His son, Domenico Scarlatti (1685-1757), was a fine organist and performer on the harpsichord, and composed numerous sonatas and fugues, including the famous "Cat's Fugue."

Scarron, Paul (1610-1660), was a clever, reckless and popular French writer, whose burlesques and comic romances were highly esteemed. He was the husband of Madame de Maintenon, before she came under the influence of Louis XIV.

Scheffer, Ary (1795-1858), a celebrated painter, who was born in Holland, but lived for the main part of his life in Paris, and attained a great reputation for his religious pictures. His "Paolo and Francesco" is reckoned his masterpiece.

Schelling, Friedrich von (1775-1854), was Pro-

fessor of Philosophy, first at Munich and then at Berlin, and attracted much attention by the system of Idealistic Philosophy which he founded.

Schiller, J. C. Friedrich von (1759-1805), the famous German dramatist and poet. Was born at Marbach in Württemberg. Educated at the Military Academy at Stuttgart, and intended for a soldier, he evinced an irresistible desire for literary fame, and in 1782 had his first play, "The Robbers," successfully produced at the Mannheim Theatre, to which he was subsequently appointed dramatic composer. He left Mannheim for Leipzig in 1785. Later he proceeded to Dresden, where he completed his "Don Carlos"; and in 1789 he was at the University of Jena as Professor of History. While engaged in this capacity he wrote his *History of the Thirty Years' War*, and made the acquaintance of Goethe, at whose suggestion he removed to Weimar, and during the next ten years produced his greatest works—"Wallenstein," "Mary Stuart," "The Maid of Orleans," and "William Tell." He died at the early age of forty-six.

Schlegel, August Wilhelm von (1767-1845), was a famous German critic who for a number of years held the post of Professor of History in the University of Bonn. He is best known in this country by translations of his *Lectures on Dramatic Art and Literature*, which are remarkable for their appreciation of Shakespeare and their scholarly handling of the drama in all its leading phases. He spent many years with Madame de Staël.

Schlegel, Karl W. F. von (1772-1829), was the younger brother of August W. von Schlegel, and a famous critic and writer. His *Lectures on the Philosophy of Life* and on the *Philosophy of History* display great learning and critical power.

Schliemann, Heinrich (1822-1906), was a celebrated German traveller and archaeologist, whose excavations at Athens and Mycenæ resulted in the discovery of a number of royal tombs.

Schomberg, Friedrich von (1649-1700), a Protestant marshal of France, who, after the revocation of the Edict of Nantes, quitted France, entered the service of William III. and commanded at the battle of the Boyne, where he was killed.

Schopenhauer, Arthur (1788-1860), was a German philosopher of a pessimistic cast of mind, whose speculations have been much written about in recent years and may be almost said to have given rise to a special school of philosophy. His mysticism partakes somewhat of the higher Buddhism, and to a certain class of minds is undoubtedly fascinating. His chief works are *The World, Considered as Will and Idea*, and *The Two Fundamental Problems of Ethics*.

Schubert, Franz P. (1797-1828), one of the most eminent of German musical composers, whose songs and symphonies are among the most inspired of musical compositions, full of melodic beauty, and instinct with emotional power. He also wrote operas, *Misérables*, and cantatas, all of which reached a high level of merit.

Schumann, Robert (1810-1856), a famous German composer and musical critic, who did much to help forward the advanced school of German music. He was the author of numerous fantasias, songs, and orchestral compositions, and attained a prominent position among modern composers. His wife, Clara Schumann (1819-1896), was a noted pianist and interpreter of Chopin, and also a composer of meritorious music.

Schuster, Sir Felix, Bt. (b. 1853), member of the Council of India since 1900, and an influential City banker. An authority on finance, alone climbing, and music, to each of which he is devoted.

Scipio, Emilianus (circa 185-129 B.C.), known as Scipio Africanus Minor. Was Roman Consul in 147 B.C., and conducted the Siege of Carthage, ultimately capturing the city, and thereby closing the Punic Wars. He was afterwards one of the political leaders of the aristocratic section, but quarrelled with his party and was assassinated.

Scipio, Lucius Cornelius (circa 234-183 B.C.), known as Scipio Asiaticus, was brother of the next

named, and distinguished himself by his victories in Asia, afterwards falling into disgrace for having accepted bribes from Antiochus.

Scipio, Publius Cornelius (circa 232-183 B.C.), the greatest of the Scipios, known as Scipio Africanus the elder. He commanded the army in Spain at twenty-four, defeated the Carthaginians, both in Spain and in Africa, gaining a complete victory over Hannibal at Zama.

Scott, Sir G. Gilbert (1811-1878), was one of the most eminent architects of his day, and gained special fame for his restorations of Gothic churches. He was the designer of the Albert Memorial and the Martyrs' Memorial at Oxford; also architect, in association with Mr. Digby Wyatt, of the Foreign Offices at Westminster. He was elected A.R.A. in 1858 and R.A. in 1860, and knighted after the completion of the Albert Memorial.

Scott, Rear-Admiral Sir Percy (b. 1853), the gallant fighter and resourceful genius who invented the carriage which got the 47 inch guns about so readily in South Africa, and who has effected many improvements in naval gun-fire, devising the night-signalling system now in use. He has smelt a lot of powder, borne himself smartly always, and had command of the famous *Terrible*. Retired 1913.

Scott, Captain Robert F. (1808-1913), commanded the National Antarctic Expedition, 1900-1904, and took charge of a similar expedition in 1910. His ship, the *Terra Nova*, left England on June 1, 1910. In Jan., 1911, winter quarters were established at Cape Evans, and in the following November Scott and a select party left Hut Point for the South Pole, which they reached on Jan. 18, 1912, finding there the Amundsen records. On the return journey every member of the party perished. Seaman Edgar Evans died from concussion of the brain on Feb. 17; Capt. Oates from exposure on March 17; and on March 19 the rest of the party (Scott, Wilson and Bowers) died from starvation and exposure in a blizzard when only 11 miles from One Ton Depot.

Scott, Sir Walter (1771-1837), one of the greatest of British novelists and a distinguished poet. He was educated for the Bar. His *Minstrelsy of the Scottish Border* was published in 1802. This was followed in 1804 by "The Lay of the Last Minstrel," in 1808 by "Marmion"; "The Lady of the Lake," "Rokeby," and "The Lord of the Isles" coming afterwards in quick succession. In 1814 he published *Warley* anonymously, which obtained instant success. Other stories followed, and the Waverley novels and their author, "the great Unknown," were everywhere the subject of discussion. *Guy Raverling*, *The Antiquary*, *Old Mortality*, *Rob Roy*, and *The Heart of Midlothian* were all published before the secret of their authorship was disclosed. Scott made large sums of money by his writings, purchased Abbotsford, and was in the full tide of success when the failure of Ballantyne, his publisher, saddled him with liabilities to the extent of £150,000. Scott, who was then fifty-five, placed himself in the hands of trustees, retired into private lodgings, and within five years paid to his creditors £50,000, and before his death had satisfied all his obligations and purchased back his old estate. He was created a Baronet in 1820.

Scroggs, Sir Wm., the notorious Chief Justice of the King's Bench under Charles II. Implicated for corruption in 1680, he was deprived of office, but granted a pension. He died in 1683.

Seabury, Samuel (1729-1790), was the first bishop of the American Episcopal Church. He was a native of Connecticut and had studied medicine at Edinburgh. There was some difficulty about his consecration, the English bishops hesitating about performing the ceremony, but three Scottish bishops were found more compliant, and the consecration ultimately took place at Aberdeen.

Seaman, Owen (b. 1860), a facile rhymester and pretty wit, who succeeded Sir Francis Burnand in the editorship of *Punch* on the death of that genial knight's retirement with long-service honours in 1906.

Sebastian, St. (A.D. 257-288), a Roman Christian soldier born at Narbonne in Gaul, who was one of the martyrs who suffered death under Diocletian.

He became revered in the Church as a protector against pestilence.

Seddon, The Hon. R. J. (1845-1906), born in Lancashire, emigrated to Australia in 1863 as a mechanical engineer. Was very successful in New Zealand and entered the House of Representatives in 1870, becoming Premier in 1873.

Sedgwick, Adam (1785-1873) was Woodwardian Professor of Geology at Cambridge from 1818, and devoted himself with great success to geological studies. His *Discourses* on the studies of the University of Cambridge is his best-known book.

Seely, Sir Robert (1834-1895), for many years Professor of History at Cambridge, was a historian of note, but acquired his chief fame as a writer by his *Ecc Homo* and *Natural Religion*, which were fiercely assailed by critics of the orthodox school.

Seely, Rt. Hon. Col. J. E. B., P.C., D.S.O., M.P., Secretary for War 1912-14. Resigned after misunderstanding as to offices at Curragh and the Ulster question. Under-Secretary for War 1917-18, Under-Secretary for the Colonies 1918-19. Served with distinction in the Boer War. M.P. for Abercrombie Division, Liverpool, 1900-13, and for Ilkerton since 1914.

Selborne, Earl of (b. 1859), 11th Commissioner in South Africa in 1905 to 1910, and had previously been Conservative Under-Secretary for the Colonies and First Lord of the Admiralty.

Selby, Viscount (1835-1909). Better known formerly as Sir William Court Gully, who entered Parliament in 1886 as member for Carlisle, was elected Speaker in 1895, holding the office for ten years.

Selden, John (1584-1654), was a prominent lawyer, statesman, and author in the reign of Charles I. He sat in Parliament for some years, and espoused the popular cause in a dignified sort of way, neither approving of the Civil War nor the execution of Charles. He was held in great esteem for his writings, which comprised besides his celebrated *Table Talk*—a work on titles of honour, a history of tithes, a treatise on the idols of the Syrians, and other volumes. In 1643 he was made Keeper of the Tower Records, and three years later Parliament granted him £5,000 for his "eminent services."

Selwyn, Bishop (1809-1898) was the first Bishop of New Zealand, and ruled the see for twenty-six years. In 1867 he was appointed Bishop of Lichfield.

Semiramis, Queen of Assyria and founder of Nineveh, flourished about 822 B.C.

Seneca, Lucius A. (circa 4 B.C.-A.D. 65), the famous Roman Philosopher who was tutor to Nero, and one of that emperor's most influential advisers. Disgusted with Nero's disgraceful acts, Seneca would fain have retired into private life, but Nero distrustful of him and had him charged with conspiracy, and sentenced him to end his own life; a headstall belief which the philosopher courageously carried out.

Senefelder, Aloys (1772-1834), was the son of an actor at Munich, and himself engaged in dramatic composition. Being too poor to bear the cost of having his works printed, he turned his attention to inventing lithography, the main feature of the invention being discovered by accident. The King of Bavaria granted him a pension, and the London Society of Arts awarded him their gold medal.

Sennacherib was King of Assyria from 702 to 680 B.C. He built himself a splendid palace at Nineveh, and greatly beautified the city. According to the Scripture narrative, his great host of 195,000 men, while on the eve of attacking Palestine, was destroyed in a single night by direct Divine visitation.

Servetus, Michael (1512-1553) was a learned Spanish physician and theologian, who, though an ardent Reformer, was opposed to the doctrine of the Trinity. His books, *De Trinitatis Erroribus* and *Christianismi Restitutio*, were denounced by Calvin, and he was imprisoned and sentenced to death, but escaped. Later, however, he was arrested at the instigation of Calvin, and sent to the stake.

Sesostris, the ancient Egyptian King who—according to Greek tradition—subjugated Ethiopia, a considerable portion of Asia, and part of Europe. Much of his history is evidently legendary, but the

authorities agree in acclaiming him a famous conqueror. His heroic exploits were founded, no doubt, on the deeds of Rameses II., Thothmes, and Sethos, and date back to the 14th century B.C.

Settle, Elkanah (1648-1729), a dramatist and versifier of the Reformation Period, the last to hold the office of City Poet of the Corporation of London. He died in the Charterhouse.

Severus, Lucius S. (146-211), was Roman Emperor from 193 to his death. After many victories in the East he passed over to Britain with an army, subjugated the Caledonians, and built the famous wall from the Solway Firth to the mouth of the Tyne, which bears his name. He died at York.

Sevigne, Marie, Marquise de (1666-1696) a French epistolary writer, whose famous letters to her daughter possess great charm, and throw a flood of light on the history of her time.

Seymour, Admiral Rt. Hon. Sir Edward Hobart (b. 1840), entered the navy in 1852, saw service in the Crimea, China, and Egypt; and rose to the rank of Vice-Admiral in 1905, and full Admiral in 1907; Admiral of the Fleet 1915-16. Commanded the Allied Expedition against the Chinese in 1900, and was one of the original members of the Order of Merit.

Shackleton, Sir Ernest (b. 1874), commander of the Nimrod Farthest South expedition of 1907-1909, succeeded in getting within 90 miles of the South Pole, and made many important discoveries.

Shadwell, Thomas (1648-1692), was Poet Laureate and dramatist, and wrote a number of plays. He was buried in Westminster Abbey. "The Lancashire Witches" was one of his dramas.

Shakespeare, William (1564-1616), England's greatest poet and dramatist, was born at Stratford-on-Avon, and was the son of a tradesman of that town who must have been at one time fairly well-off, seeing that he was made an alderman, and afterwards served as High Bailiff. Later on, however, he appears to have been unfortunate and fallen into straitened circumstances. William was the eldest son, and was probably educated at the Stratford Grammar School, but very little is known of his career up to his eighteenth year when we have it on record that he married Anne Hathaway, who was eight years his senior. Five years after his marriage he went to London, and the next we hear of him is that he was connected with the Globe Theatre and appeared in sundry small parts. He first appeared before the public as a poet in 1593, with his "Venus and Adonis," following this in 1594 with "The Rape of Lucrece." Shortly afterwards he was proprietor of the Globe Theatre, and also had an interest in the Blackfriars Theatre. Then he began that remarkable career of play-writing which has since been the wonder of the world. It is impossible to name the thirty-five plays that he wrote in the exact order in which they were produced, but "Love's Labour's Lost" and "The Comedy of Errors" seem to have been among the earliest, being followed by "The Two Gentlemen of Verona," "Romeo and Juliet," "A Midsummer Night's Dream," and others, the record being made up with "King Richard III.," "King John," "The Merchant of Venice," "The Taming of the Shrew," "The Merry Wives of Windsor," "King Henry VI." (Parts I, II, and III.), "Richard II.," "Henry IV." (Part I. and II.), "Henry V.," "Much Ado About Nothing," "As You Like It," "Hamlet," "Julius Caesar," "Coriolanus," "Twelfth Night," "Macbeth," "Measure

for "Measure," "Othello," "All's Well that Ends Well," "Antony and Cleopatra," "Troilus and Cressida," "King Lear," "Timon of Athens," "Cymbeline," "Pericles," and "Titus Andronicus," though as to the last two he could only have been part author. It was evident that his plays were remunerative, inasmuch as in a few years he was able to purchase property at Stratford, and when he retired from his profession (about 1610 or 1612) he returned to his native town to live in a house which he had himself built, and was to all intents and purposes a man of substance. He died at Stratford at the age of fifty-two, and was buried in Stratford Church. In addition to his plays he wrote a volume of sonnets, which in the main are worthy of his group.

Sharp, Granville (1775-1819), slavery abolitionist and founder of the colony of Sierra Leone.

Sharp, James (1618-1679), Scottish ecclesiastic; Archbishop of St. Andrews; murdered by Covenanters for treachery to the Revolutionist cause.

Sharp, John (1624-1714), chaplain to Charles II. and James II.; Dean of Canterbury, and later Archbishop of York.

Shaw, George Bernard (b. 1856, in Dublin). Went to London in 1876 and gradually worked his way as a journalist and Fabian Socialist writer and speaker, and by a bold unconventionality came to be much talked about. He has written a number of plays, many of which are tantalisingly brilliant and effective in parts, but just as tantalisingly inefficient as dramatic enterprises. He was musical critic for the *Star* for a time, also for the *World*. He discussed the drama in the *Saturday Review* for a few years. His best plays are "Man and Superman," "Androcles and the Lion" (1913), and "Pygmalion" (1914). Published two volumes of *Dramatic Opinions* in 1907.

Shearman, Sir William, M.A. (M. Justice Shearman), appointed Judge of the King's Bench Division, April, 1914 (b. 1857). Educ. at Merchant Taylors' School, and at St. John's College, Oxford.

Sheffield, Bishop of, See Burrows, Rt. Rev. L. H.

Sheil, Richard Lalor (1797-1851), the famed Irish orator of the days of the Catholic Emancipation. He was also a dramatist of ability, and occupied the offices of Vice-President of the Board of Trade, Judge-Advocate General, Master of the Mint, and British Minister at Florence.

Shelburne, Earl of (1717-1805), was Prime Minister in 1782, and it fell to him to acknowledge the independence of the United States. His administration was short-lived, and he passed into retirement, being created Marquis of Lansdowne.

Shelley, Percy Bysshe (1792-1822), one of the most brilliant poetic geniuses of the 19th century. For the daring and unorthodox opinions which he held. His "Queen Mab" (written when he was nineteen), "Alastor," "The Revolt of Islam," "The Witch of Atlas," and "Adonais" all breathe the true spirit of poetry, securing him a place in the first rank of British poets. He showed fine dramatic gifts in the "Cenci" and "Prometheus Unbound," almost reaching sublimity in the latter masterpiece. His "Adonais" was a splendid tribute to the genius of Keats. His first wife, whom he married while very young, committed suicide. He afterwards married Mary Wollstonecraft Godwin, and formed other attachments of a complicating nature. Was always at war with his family, and finally, after spending some time with Byron and Leigh Hunt and other friends in various parts of Italy, was drowned in the Gulf of Spezia by the capsizing of a boat in a storm.

Shenstone, William (1714-1753), an English poet of country life, whose poems were marked by a graceful simplicity of style and homeliness of thought which made them great favourites. His "School-mistress" is his principal poem. He lived at a quiet retreat called "Leasowes," near Halesowen.

Shenbrooke, Lord (Robert Lowe) (1811-1892). After being educated at Winchester and Oxford and becoming fellow and tutor of University College, he went to Australia, achieved considerable success at the Sydney bar and was elected to the

Colonial Parliament. Returning to England, he entered the House of Commons as a Liberal and held various offices under Mr. Gladstone, being in turn Vice-President of the Education Department, Chancellor of the Exchequer, and Home Secretary. He was made a peer in 1880.

Sheridan, Richard Brinsley (1757-1816), the greatest British comic dramatist of modern times. Was born in Dublin, and partly educated at Harrow. Showing considerable capacity for dramatic composition, he obtained an introduction to the Covent Garden management, and it was at the Covent Garden Theatre in 1775 that his first comedy, "The Rivals," was produced, with such a gratifying result that Garrick, who was then at Drury Lane, opened negotiations with the dramatist, which ended in Sheridan becoming part (and ultimately sole) proprietor of Drury Lane. The "Duenna," a musical comedy, was produced in 1775, and ran through the winter. From 1777 Sheridan managed Drury Lane, opening with an adaptation of Vanbrugh's "Relapse." This was followed by the production of the greatest of his comedies, "The School for Scandal," which had a wonderful success. In 1779 "The Critic" was given, and after that Sheridan wrote no more plays, until 1809, when "Pizarro" was produced. In the meantime he had gained a high reputation in another sphere. In 1780 he obtained a seat in Parliament and although he only spoke on certain set occasions, he acquired a reputation for oratory which stood him in very good stead, and he filled one or two minor Ministerial offices, remaining in Parliament until 1812. He only lived four years after, his last days being clouded by ill-health and pecuniary difficulties.

Shirley, James (1556-1660), was an eminent dramatist and poet, imbued with the Elizabethan traditions. For a period of nearly twenty years he held the attention of the public with a series of plays of singular merit, the principal of which were "Love Tricks," "The Maid's Revenge," "The Gamester," and "The Tractor." The shock of the Great Fire caused the death of himself and his wife.

Shore, Jane (1460-1524), was one of the beauties of her time, and the wife of a London goldsmith. Edward IV. was attracted by her personal attractions and wit, and she became his mistress. Later she was in the keeping of Lord Hastings, and is chiefly remembered by being compelled to do penance at St. Paul's. There is a tradition that she perished in a ditch in East London, and that the circumstance gave rise to the local name Shoreditch.

Shorter, Clement K. (b. 1859), an active editor and able writer, whose clinical and literary successes have been won in the field of illustrated weeklies. Edited the *Illustrated London News* from 1891 to 1900; edited *The Spectator* from 1903 to 1910; founded *The Sphere* and *The Times* in 1910, and has since edited those papers continuously. Author of works on the Brontës, and a *Life of George Bernard Shaw*. A founder of the Omar Khayyam Club.

Shorthouse, J. H. (1824-1903), was a Birmingham manufacturer who, turning his leisure to literary account, produced a remarkable historical novel, *John Ingelman*, which evidenced a sincere spirituality and a profound appreciation of the problems of life, and is a work that will live. He also wrote other novels, but failed in them to reach the high standard of his masterpiece.

Shovel, Sir Cloudesley (1630-1707), a celebrated British admiral who originally served before the mast, but greatly distinguished himself at the Battle of Bantry Bay in 1690, and commanded at the Siege of Toulon in 1707, being lost with his ship off the Scilly Isles on his return from that expedition.

Siddons, Sarah (1755-1831), was the daughter of Roger Kemble, a theatrical manager, and appeared on the stage while a child. At eighteen she married an actor named William Siddons, of no particular merit, but to whom she was sincerely attached. She was then playing leading parts, and showed such remarkable ingenuity that her fame soon reached London, and Garrick engaged her for Drury Lane at £5 a week, but her success was not

- such as to warrant a continuation of the engagement. She returned to the provinces for further experience, and in 1782 was again engaged for Drury Lane, after an absence of eight years, and made one of the most successful triumphs in the annals of the stage. From that time she was acknowledged to be the greatest actress of her time. She left the stage in 1819, and lived in retirement for twenty years. A statue of her by Chantrey is in Westminster Abbey.
- Sidgwick, Henry** (1838-1900), Professor of Mental and Moral Science at Cambridge, was a native of Skipton, Yorkshire, and besides being an eminent educationist in the broader sense, devoted himself with special success to the cause of women's education. Newnham and Girton being largely the outcome of his efforts.
- Sidgwick, Mrs. Henry** (b. 1845), widow of the late Prof. Henry Sidgwick, and sister of the Rt. Hon. A. J. Balfour. Appointed Principal of Newnham College, Cambridge, in 1892. Is a pioneer of the higher education, and a brilliant woman.
- Sidney, or Sydney, Algernon** (1622-1683), was a son of the second Earl of Leicester, and in the Civil War won some distinction under Cromwell. Disapproving of the Protectorate, he took no active part in the work of Cromwell's Government, and after the Restoration lived abroad for some years. In 1679 he was pardoned for all offences and permitted to return to England, but in 1683 was charged with being concerned in the Rye House Plot, sentenced to death by Jeffreys on notoriously insufficient evidence, and executed.
- Sidney, Sir Philip** (1554-1586), was one of Queen Elizabeth's favourites, and a man of singular ability and bravery. While living in temporary retirement he composed his famous "Arcadia," but did not allow it to be published in his lifetime. He did not lack for literary fame, however, his *Apology for Poetry and Defence of Poetry*, as well as numerous miscellaneous pieces, all distinguished for their beauty of expression and tender sentiment, having won much favour, especially in the circle of the Court. In 1586 he was given a command in the Netherlands, and was killed at Zutphen.
- Siemens, Sir William** (1817-1883), a German-born scientist and inventor, distinguished in physics, and particularly in electricity and heat. Was elected to the Royal Society, and served as President of the British Association.
- Sieyès, Comte Emanuel J.**, commonly called Abbé Sieyès (1748-1836), was a prominent figure in the French Revolution, taking an active part in shaping the Republic, and voting for the death of the King. Later he was Ambassador to Berlin, was made a member of the Directory, was Consul under Napoleon, and on the latter obtaining supreme power, was ennobled and retired on a pension.
- Sigmund, Emperor** (1301-1337), Emperor of the Holy Roman Empire, first of the House of Luxembourg. Succeeded Margrave of Brandenburg, King of Bohemia, and Emperor of Germany; infamous for allowing John Huss to be burned at the stake after giving him a safe conduct to the Council of Constance.
- Sigourney, Mrs. Lydia H.** (1791-1865), was an American poetess who, in addition to writing short poems that were highly popular, was the author of a volume of *Pleasant Memories of Pleasant Lands*, describing in an appreciative way her experiences during a tour of Europe in 1840.
- Silius Italicus, Gaius** (flourished in the 1st century of the Christian era), a Roman poet, orator, and statesman. Wrote a long historical poem (in sixteen books) on the second Punic war.
- Simson, Charles** (1759-1836), a popular Evangelical preacher and Fellow of King's College, and from 1783 to his death vicar of Trinity, Cambridge. His sermons had an immense sale. He was one of the founders of the Church Missionary Society.
- Simson Stylites**, a Syrian monk of the 5th century, who is said to have passed thirty years of his life on a pillar near Antioch, from which he preached daily to great crowds. Tennyson wrote a poem on the subject.
- Simon, Sir John A., K.C., M.P.** (b. 1873), represented the Walthamstow Division from 1906; Solicitor-General 1910-13; Attorney-General since Oct., 1913. A cultured and effective speaker, who has achieved a high reputation both at the Bar and in Parliament.
- Simon, Jules** (1814-1896), the eminent French philosopher and statesman. His refusal to take the oath of allegiance to Louis Napoleon debarred him from a public career while the Empire lasted. By his pen, however, he succeeded in keeping his opinions before the public, and was elected to the Legislature in 1863. When he saw his country drifting into war in 1870, he raised his voice against it, but ineffectually. After the war he became Minister of Public Education; in 1875 was made a life senator and was elected to the Academy; in 1876-1877 was Premier, after which he did not hold office again. His writings include a history of the Third Government, *Duty, Natural Religion, and Liberty of Conscience*.
- Simpson, Sir James Young** (1812-1870), the discoverer of the utility of chloroform as an anæsthetic, was a native of Scotland, and one of the most accomplished experimental surgeons of the 19th century. He was Professor of Medicine and Midwifery in the University of Edinburgh from 1840, and after a long series of experiments succeeded in bringing to plain and introduce his new anæsthetic agent. He also introduced remarkable improvements in gynecology. Was made a baronet in 1866.
- Sims, G. R.** (b. 1847), one of the most active of living journalists and authors. As "Daguet" of the *Referee*, he skims lightly and pleasantly over the surface of current events from week to week; he writes short stories and long stories and sketches and poems in papers and magazines with facility and success. He is a dramatist with many successes to his credit—"Liddy of London," "Lionel Rye," "In the Ranks," and so on; and is about as all-round a ready-writer as we possess.
- Sismondi, Leonard de** (1773-1842), a Swiss historian, was one of the most industrious writers of his time, and gained a high reputation. He wrote *History of the Italian Republics, History of France, and of The Literature of Southern Europe*.
- Skeat, Prof. Walter William** (1835-1912), an eminent philologist and scholar, and founder of the English Dialect Society. Appointed Prof. of Anglo-Saxon at Cambridge in 1878, and was the author of multitudinous works dealing with early English literature, poetry, history and biography. He also achieved early distinction as a mathematician; and published *The Proverbs of Alfred* in 1907.
- Skelton, John** (1460-1529), was a lively satirist with the courage of his convictions, fearless in denunciation, and as coarse as he was prejudiced. Was tutor to Henry VIII., and for the last twenty-five years of his life was tutor to his son. He wrote "Why Came ye not to Court?" and "Colin Clout," a satirical poem against ecclesiastical abuses, which incensed Wolsey, and led to the poet's downfall.
- Skobeleff, Michael** (1845-1882), a Russian general and statesman who served his country with brilliance in expeditions to Khiva and Khokand, and during the war with Turkey in 1877-1878. As commander-in-chief took Geok-Tepe and conquered the Turkomans in 1881.
- Sluane, Sir Hans** (1660-1751), was born in county Down, Ireland, but settled in London, and became famed as a physician and naturalist. For some years he held the office of President of the Royal College of Physicians, and was elected President of the Royal Society in succession to Sir Isaac Newton. He was created a baronet in 1716. His library of 50,000 vols., and treasures in natural history and MSS., worth from £50,000 to £80,000, were offered by his will to, and bought by, the nation for £20,000, and with that nucleus the British Museum was founded.
- Smart, Christopher** (1722-1771), was an English poet, more noted for his translations of Horace than for his own poems. Johnson, Garrick, and Goldsmith, however, gave him their friendship, and he might have achieved a fair success but for his reckless habits, which brought him to poverty and mental

incapacity. His "Song to David," written in a sane interval, is a vigorous poem.

Smeston, John (1724-1792), was the son of a Leeds lawyer, and was intended for his father's profession, but showing a strong inclination to mechanical pursuits, he was placed with a London mathematical instrument maker, and in time set up in that line of business for himself. In 1753, after a course of foreign travel, he submitted plans for rebuilding Eddystone Lighthouse, which had been burned down, and his proposals were accepted. The result was the soundest and best lighthouse that the world had seen up to that time. It made him famous, and he subsequently constructed many important works in connection with harbours and canals. He was also the inventor of an improved blowing apparatus for iron-smelting.

Smiedley, Frank E. (1818-1864), a novelist of note in his day, and sometime editor of *Sharpe's London Magazine*. His *Frank Fairleigh*, *Lewis Arundel*, and *Harry Coverdale's Courtship* were among his most popular stories, some of which were illustrated by Cruikshank and "Phiz."

Smiles, Dr. Samuel (1812-1904), was in early life a medical practitioner, and subsequently editor of the *Lords Times*. Later on achieved wide popularity by his *Self-Help*, a book that has had an enormous sale. His *Lives of the Engineers* formed his most solid contribution to literature.

Smith, Adam (1722-1790), the father of the science of political economy. Was born at Kirkcaldy, educated at Glasgow and Oxford, and in 1751 was appointed Professor of Logic at Glasgow, and in 1752 Professor of Moral Philosophy. It was in 1759 that he first attracted notice as an author by the publication of his *Theory of Moral Sentiments*. In 1776 his remarkable book *The Wealth of Nations* was published, which immediately obtained the admiration of the leading literary men and statesmen of the day, and secured him the friendship of Gibbon, Hume, Burke, Reynolds, and Dugald Stewart. Smith was made a Commissioner of Customs in 1776.

Smith, Alexander (1830-1867), a Scottish writer of great promise. In 1853 he attracted much notice by a poem, "A Life Drain." He was at the time working in a Glasgow factory. The position of Secretary of the University of Edinburgh was given to him in 1854, and he devoted his leisure wholly to literary pursuits, producing in succession "City Poems," "Edwin of Deira," and other poems, and also winning much success as a prose writer, his novel *Alfred Hagart's Household* and his *Dream-things* being works of sterling merit.

Smith, Rt. Hon. F. E., P.C., K.C., M.P. (b. 1872), one of the most prominent of the younger members of the Unionist party, a slashing speaker, and decidedly a man with a career before him both as barrister and politician. M.P. for Walton Division of Liverpool since 1906.

Smith, George (1840-1876), a successful student of Assyrian antiquities, whose excavations and researches were fruitful of many important discoveries. For some years he held an appointment in the Antiquities Department of the British Museum.

Smith, Goldwin (1823-1910), historian and educationist. Born at Reading, he was educated at Eton and Oxford, and interested himself conspicuously in educational reforms. From 1858 to 1866 he was Professor of Modern History at Oxford, and during that time took a prominent part in politics as an independent Liberal. In 1868 he settled in the United States, accepting the Professorship of English and Constitutional History at Cornell University. In 1871 he removed to Canada, becoming a member of the Senate of Toronto University. Among his works may be mentioned *A Political History of the United Kingdom*, *Essays on the Question of the Day*, and *Guesses at the Riddle of Existence*.

Smith, James and Horace, made a name for themselves by producing their "Rejected Addresses." In 1812, comprising a series of burlesques in which the varied styles of the eminent poets of the

day are happily hit off. They also wrote numerous works apart, Horace being successful as a novelist, and James continuing to write poetic pieces. James, who died in 1839, was Solicitor to the Board of Ordnance. Horace was a stockbroker, and died at Turkic, the Wells in 1849.

Smith, Captain John (1780-1831), the noted seafarer and adventurer who in 1805 was the leading spirit of an expedition to Virginia, and founded Jamestown. His autobiographical writings describe a marvellous career of fighting on land and sea, of piratical exploits and sufferings in slavery, and finally his being saved from the treachery of Red Indians by Pocahontas (q.v.), and his promotion to the governorship of the colony.

Smith, Joseph (1805-1844), the founder of Mormonism, was the son of an American farmer. He claimed to be the medium of Divine communications, including *The Book of Mormon*, which became the Bible of the sect established by Smith in Utah, and included polygamy as an article of faith.

Smith, Sir Sidney (1704-1810), was a noted British admiral, who by his defence of St. Jean d'Acre. In 1799, greatly distinguished himself as a commander.

Smith, Sydney (1771-1845), was for many years a canon of the Anglican Church, first of Bristol and then of St. Paul's, and enjoyed a great reputation as a wit and writer. Before migrating to England and entering the Church he lived in Edinburgh, and in association with Jeffrey and Brougham established the *Edinburgh Review*, which he edited for a time. His writings were for the most part on religious and political subjects, but he revealed such a fund of humour and geniality that in spite of the controversial nature of his work it was immensely popular. His "Peter Hymley" letters, in support of Catholic Emancipation, were especially successful efforts. He was twenty years parish priest at Boston, on the Yorkshire Wolds, before he edited for a time, to a prebend at Bristol. His life and letters were published by his daughter, Lady Holland.

Smith, William (1769-1839), achieved a high reputation as geographer and geologist. In 1815 he published the first geological map of England and Wales and later issued a more detailed series of geological maps of English counties. He was styled the "Father of English Geology," and was granted a pension of £700 a year.

Smith, Rt. Hon. William Henry (1825-1891), a newspaper and book agent in a colossal way of business who became prominent in British politics on the Conservative side and sustained high Ministerial rank with great credit and esteem. Representing first Westminster and then the borough of the Strand in Parliament, he became successively First Lord of the Admiralty, War Secretary (twice), Secretary for Ireland, First Lord of the Treasury, and Leader of his Party in the House of Commons; and was Lord Warden of the Cinque Ports when he died at Walmer Castle. His widow, who died in 1913, was created Viscountess Hambledon in her own right, with remainder to their son, the 1st Viscount Frederick Dunsen Smith, now Viscount Hambledon.

Smith, W. Robertson (1840-1894), a distinguished Scottish theological scholar and Orientalist; appointed Hebrew Professor in the Free Church College at Aberdeen in 1870. His Biblical criticisms led to charges of heresy, which, though unsuccessful, caused his removal from the chair at Aberdeen by the Assembly. Subsequently he was concerned with the editing of the *Encyclopædia Britannica*, and held the Professorship of Arabic at Cambridge University 1889-1894. He published a number of erudite works dealing with Old Testament themes.

Smollett, Tobias (1721-1771), a famous English novelist and humorist, whose *Roderick Random*, *Peregrine Pickle*, *Count Fathom*, and *Humphrey Clinker*, abound in fun and frolic and a genial characterisation, while the pictures of sea life are inimitable. His novels rank with those of Fielding, and, like Fielding's, contain much that is coarse.

Snyders, Frans, or Franz (1590-1672), a great Flemish animal painter, who was associated with Rubens, Jordaens, and other masters, putting in the

natural history subjects to their pictures. He was also an adept at flower and fruit painting, and skilful in landscape work. He died at Antwerp.

Soane, Sir John (1753-1837), was an eminent architect who designed numerous public buildings in London and other places, and was Professor of Architecture at the Royal Academy. By his will he left his museum, library, pictures, etc. for the use of the public, and the house in which he lived at Lincoln's Inn Fields still constitutes the Sir John Soane Museum.

Sobieski, John (1624-1666), King of Poland from 1674, and heroic defender of his country from Cossacks, Tartars, and Turks.

Socrinus, Lælius (1595-1662), an Italian Protestant thinker and anti-Trinitarian, and founder with his nephew, Faustus Socinus (1599-1664), of the Socinian system of theology, which taught that salvation consisted in the acceptance of Christ's teaching, and making His example the practical rule of life.

Socrates (469-399 B.C.), the distinguished Greek philosopher. Was the son of a sculptor, and for some time followed that calling himself; but, having other ambitions, joined the army, and was present at the battle of Potidea, and also at the battle of Delium, saving the life of Alcibiades in the first, and of Xenophon in the second. Returning to Athens he devoted himself to study and began to exhort the people on public questions and the conduct of life. In 405 B.C. he was made one of the Senate of Five Hundred, and had other honours accorded him, continuing his teaching alternately with his public duties. Not long afterwards Anytus charged him with impiety and he was found guilty and sentenced to death. When the fatal day came he calmly drank the poison which terminated his career.

Solomon, Rt. Hon. Sir Richard (1850-1913), was legal adviser to the Transvaal Administration and to Lord Kitchener in 1901-1902; Attorney-General of the Transvaal 1902-7; Agent-General in London for the Transvaal 1907-10; and High Commissioner for the Union of S. Africa from 1910 to his death.

Solon (638-558 B.C.), was one of the Seven Sages of Greece, and became an eminent legislator, after having made a reputation as a poet. Being appointed archon in 594, he began the introduction of a series of reforms which greatly improved the condition of the Athenians. Solon's Laws were so highly esteemed that they were adopted by the Romans in their Twelve Tables.

Solyman (1490-1566), the celebrated Ottoman Sultan known as "the Magnificent," who won fame as a conqueror, law-giver, administrator, and patron of learning.

Somerset, Duke of (1500-1552), was Protector of England in the early part of the reign of Edward VI., and was vigorous of rule, greatly aiding the work of the Reformation. After a time he developed an arrogance that was strongly resisted and was deposed from power, ultimately being tried for felony and executed.

Somerville, Mary (1780-1879), the daughter of Admiral Sir William Fairfax, and an eminent writer on scientific subjects, of which she had a clear and extensive knowledge, together with a capacity for presenting them in an attractive and lucid form. She was granted a pension of £300 a year in 1855. Her principal books are *The Mechanism of the Heavens*, *Physical Geography*, and *Molecular and Microscopic Science*. Her *Personal Recollections*, a fascinating work, appeared after her death.

Sophocles (495-406 B.C.), the famous Athenian dramatist, who enjoyed the highest popularity at Athens, and in a contest with Aeschylus was crowned the victor. Of the 100 odd plays of Sophocles only seven have survived: "Antigone," "Electra," "Oedipus," "Ajax," "Trachiniae," "Philoctetes," and "Oedipus at Colonus."

Soult, Marshal Michel Jean (1769-1851), was one of Napoleon's favourite and most capable generals, distinguishing himself in the Swiss and Italian campaigns, and also in the Peninsular War, where he was Wellington's bravest opponent. After

Waterloo he went into exile, but was allowed to return to France in 1819. His son, Napoleon Hector Soult (1801-1857) achieved some fame as a politician and diplomatist, and represented France at the Court of Berlin in 1834.

Southcott, Joanna (1750-1814), a fanatic who proclaimed herself prophetess and the mother of the promised second Messiah, whom she announced would be born on the 19th October, 1814. Thousands of ignorant people believed in her, but on the 9th of the month she died of dropsy.

Southey, Robert (1774-1843), the son of a draper, was educated at Westminster and at Oxford. Devoting himself to literature, he produced in rapid succession a number of poems, plays and romances of varying merit. In 1803 he went to live at Greta Hall, near Keswick, where he resided until his death. A Civil List pension of £160 a year was granted him in 1807, and in 1813 he was made Poet Laureate. In poetry he was overshadowed by the greater genius of Byron and Shelley, but in prose he was eminently successful, his *Life of Nelson*, his *Doctor*, *Commonplace Book*, and other works being as strong and vigorous as his verse was tame.

Southwell, Robert (1560-1595), a famous Jesuit and religious poet of Elizabethan times, who after serving as chaplain to several noble families in England was denounced by his Protestant enemies, condemned, and executed at Tyburn.

Spartacus was a Thracian who became a Roman slave and gladiator in Capua, and headed an insurrection in Italy in 73 B.C. The slaves he raised and their following routed several Roman armies, but he was eventually defeated by Crassus on the Silurus in 71 B.C. and slain in the battle.

Speke, Capt. J. H. (1827-1864), was the discoverer, along with Captain Grant, of the Kagera, the main source of the White Nile, in 1862. In 1865 he discovered Lake Tanganyika, and in 1868 Lake Victoria Nyanza. His *Journal of the Discovery of the Source of the Nile* described his experiences. He was accidentally killed by the discharge of his gun near Bath.

Spencer, 5th Earl (1824-1910), a very popular Liberal peer, who held office as First Lord of the Admiralty, and President of the Council on two occasions, besides serving as Viceroy in Ireland. He was once a mighty hunter, and his ample beard—sobriquet of the "Red Earl"—gained him the respectful sobriquet of the "Red Earl."

Spencer, 6th Earl, Rt. Hon. Charles Robert Spencer, P.C., G.C.V.O. (b. 1857), Lord Chamberlain 1905-1912; succeeded the 5th earl, his half-brother, in 1910. Had previously been raised to the peerage as Lord Althorpe. Was M.P. 1880-95 and 1900-5.

Spencer, Herbert (1820-1903), was the son of a Derby schoolmaster. For some time followed the profession of civil engineer, but ultimately applied himself entirely to literary pursuits. His first book was published in 1851, under the title of *Social Statistics*, when he was filling the position of sub-editor of the *Economist*. In 1855 his *Principles of Psychology* appeared, in which he seems to have anticipated Darwin's theory of Evolution. The *System of Synthetic Philosophy* began to appear in 1860, and the last of its ten volumes was issued in 1866.

Spenser, Edmund (1553-1599), was born in London, educated at Cambridge, and early attracted notice by his poetic effusions. After the publication of his "Shepherd's Calendar," he was made known to Queen Elizabeth, and in 1580 received the appointment of Secretary to the Lord Deputy of Ireland, and in the division of confiscated lands that afterwards took place, Spenser received Killoolman Castle and 3,000 acres of land. Here he remained for some eighteen years, and wrote his "Faerie Queen." In 1598 a rebellion broke out, and Spenser's castle was burned to the ground. He then returned to London, and there died.

Spinoza, Baruch (1632-1677), the greatest modern pantheist, was born in Amsterdam of a Jewish family, but, having expounded philosophical doctrines antagonistic to Judaism, was excommunicated by the

rabbis as a heretic. In 1663 he published his erasmian work on the Cartesian philosophy, from which he widely differed, and set forth a system of Pantheism which makes God the cause and substance of the universe, abolishes free-will, and establishes the necessity of the Divine nature. His most important treatise, the *Ethics*, was not published until after his death. He died at The Hague.

Spohr, Ludwig (1784-1859), a famous German violinist and composer. From 1803 to 1857 he was Capelmester to the Duke of Hesse-Cassel, and during that period gave to the world numerous compositions of high merit, including a number of oratorios, the most renowned of which were "The Last Judgment," "Calvary," and "The Fall of Babylon," several operas, and some of the finest violin music that has ever been written.

Spigg, Rt. Hon. Sir J. Gordon (1830-1913), went from Ipswich to Cape Colony in 1858, eleven years later was elected to the Cape Parliament, and was Prime Minister 1878-1881, and again 1886-1890, 1896-1898, and 1900-1904.

Spurgeon, Rev. C. H. (1834-1892), was born at Kelvedon in Essex, and while but a child evinced preaching gifts. In 1852 he became pastor of the Baptist Church at Waterbeach, and held the congregation spellbound by the originality of his sermons. Soon afterwards he was in London, taking charge of the New Park Street Chapel, which from being a place of empty pews was quickly filled to overflowing. The fame of the young minister spread far and wide. He preached at Exeter Hall, at the Surrey Music Hall, at the Crystal Palace, and was able to fill the available space everywhere. The Metropolitan Tabernacle was opened in 1861, and here he continued his wonderfully successful ministry for thirty years.

Stael, Madame de (1766-1817), the daughter of Neckar, the famous Finance Minister under Louis XVI., was married to Baron de Stael (Swiss Minister) at twenty. She was a brilliant woman, deeply imbued with philosophical sentiments. Two years after her marriage she made a considerable impression by her *Letters on Rousseau*, and was regarded as in sympathy with the Revolution. Later on, however, she was in disfavour, first with the Revolutionary leaders, and then with Napoleon, and was in turn exiled by both. She made good use of her exile by writing *Germany* and other able works.

Stainer, Sir John (1840-1901), an English organist and composer of sacred music. Organist, 1863-1879, at Oxford University, and from that time to 1888 at St. Paul's Cathedral, when he resigned through failing sight, and became Professor of Music for the next ten years at Oxford. He was the composer of a number of cantatas and anthems, the author of a treatise on harmony, and co-editor of a valuable dictionary of musical terms.

Standish, Miles (1584-1656), was a native of Lancashire and one of a band who crossed to America in the *Mayflower* and founded the English settlement in New England. He was a brave, resourceful man, who was especially servicable in warding off the attacks of the Indians.

Stanfield, Clarkson (1794-1857), the famous English painter, who excelled in sea pictures, and was the painter of a noted picture of the death of Nelson, amongst other important works. Was elected R.A. in 1835. In the early part of his career in London he was scene-painter at Drury Lane.

Stanford, Sir C. Villiers (b. 1852), Professor of Music at Cambridge University, and Professor of Composition and Orchestral Playing in the Royal College of Music. An organist and conductor of remarkable ability, and a composer of much fine instrumental, choral, operatic, and other music. Has conducted the Leeds Musical Festival since 1901.

Stanhope, Lady Hester (1776-1839), daughter of the 3rd Earl Stanhope, and niece of William Pitt, and for many years his private secretary. Her *Memoirs*, published subsequently to her demise, were deeply interesting. For the last three decades of her life she resided at a satrapy established by her

on Mount Lebanon, and exercised considerable influence for a while over Syrian affairs.

Stanley, Arthur Penrhyn, Dean (1825-1881). Was for some years settled at Oxford, and made a high reputation as a tutor; in 1845 scored a notable literary success with his *Life of Dr. Arnold*, whose pupil he had been. Being in Holy Orders he was made Select Preacher, and a volume of his sermons, printed in 1847, proved him to be no mean theologian. He published numerous works between this time and 1862, when he accompanied the late King (then Prince of Wales) in a tour to Egypt and the Holy Land. The next year he was made Dean of Westminster. He died in 1881, and is buried in the Abbey of which he wrote the *Historical Memorials*.

Stanley, Sir H. M. (1841-1904). Born at Denbigh, of humble parentage and placed in St. Asaph workhouse under the name of John Rowland. While young he went as cabin-boy on a sailing vessel to New Orleans. There a merchant named Henry Morton Stanley (whose name he afterwards adopted) gave him employment, adapted and educated him, but his benefactor dying, he was left without provision, and had to sell newspapers in the streets. On the outbreak of the Civil War he enlisted on the Confederate side, was made prisoner, and put to work on a warship. Escaping, he turned his attention to writing, establishing a connection with the *New York Herald*. After the war he got engaged on the reporting staff of that journal, and was sent as special correspondent with the United States forces in the Indian Territories. Next he was war correspondent for the *Herald* with the British expedition to Magdala. Later on Mr. Gordon Bennett commissioned him to go to Africa and find Livingstone, then supposed to be lost in the southern interior. Early in 1871 he left Zanzibar with a large party, and plunged into the "Dark Continent," succeeding in his quest the same year. From 1875 to 1900 Stanley sat in the British Parliament as M.P. for Lambeth, and was knighted in 1899. He published numerous fascinating works describing his adventures, and in 1890 married Miss Dorothy Tennant. His *Autobiography*, published since his death, is a remarkable work.

Stanton, Howard (1810-1874), Shakespearean commentator and writer on chess-play, being also at one time regarded as the strongest player of the game, defeating the French master, Salvé-Amant, in 1843. His *Memorials of Shakespeare* (1864) was a worthy work, as was his volume on *The Great Schools of England* (1865).

Stand, William Thomas (1849-1912). Educated at Silcoates School, Wakefield, served for a short time in a mercantile office at Newcastle, and in 1871 was editor of the *Northern Echo*, Larnington, a position which he held until 1880. Then he went to London and for three years was assistant editor of the *Pall Mall Gazette*, succeeding to the full editorship on the retirement of Mr. John Morley in 1883. His control of the *Pall Mall*, which continued until 1899, was signalled by exceptional vigour and animation, interviews and sensational social disclosures being a marked feature of the editorial policy. He was a powerful personality, and despite some eccentricities of view, achieved largely and well. In 1890 he started his *Review of Reviews*, here again achieving considerable success on bold and original lines. He was one of the victims of the *Titanic* disaster, on which he was voyaging to America on a Peace mission.

Steele, Sir Richard (1671-1729). Born in Dublin, he was the son of a lawyer, who died while Steele was a child. Through family influence he was sent to the Charterhouse School (where he made Addison's acquaintance) and to Oxford, and afterwards entered the Army and rose to be a captain in the Horse Guards. Then he drifted into literature, and wrote poems and pieces for the stage, but his first real success came when, in 1709, he began the publication of the *Tatler*, which made a great hit, Addison contributing many papers. Two years later he and Addison were associated in *The Spectator*. Addison, however, being the leading contributor.

The *Guardian* was another of Steele's ventures. He sat in Parliament for some time, and was knighted by George I.

Stephen (1105-1154) was King of England from 1135 to his death, usurping the crown that by right belonged to Matilda, the daughter of Henry I. He overcame the scruples of the nobles and of the ecclesiastics by granting them increased privileges, but he was in no sense a popular monarch.

Stephen, Sir James (1789-1859), an English statesman, writer, and sometime Regius Professor of Modern History at Cambridge University. He was Under-Secretary for the Colonies from 1834 to 1847, and published *Lectures on the History of France and Essays in Ecclesiastical History*.

Stephen, Sir James Fitzjames (1829-1896), a great English jurist and judge of the High Court, who published some valuable works on our Criminal Law, and an admirable *Digest of the Law of Evidence*. Son of the foregoing.

Stephen, Sir Leslie (1834-1904), an eminent writer, critic, and biographer (brother of the last mentioned). Married as his first wife the younger daughter of Thackeray, the novelist, and was at one time Clark Lecturer on English Literature at Cambridge. Edited the *Catholic Magazine* (1871-1880) and the *Dictionary of National Biography* (1882-1891). Was a great book-lover, and wrote *Hours in a Library* (three series), a *History of English Thought in the Eighteenth Century*, *Essays on Free-thinking and Plain Speaking*, and many admirable biographies and other volumes.

Stephens, James (1824-1901), a native of Kilkenny, and one of the prime movers in the Fenian agitation, known to his associates as the "Head Centre." Up to the point of open action he was of great help as an organizer, but at the critical moment showed more discretion than valour by taking refuge in America. Later he was allowed to return to Ireland, where he died.

Stephenson, George (1792-1848), was born at Wylam, near Newcastle, and up to 1804 was mainly engaged in ordinary colliery occupations. In 1804, however, an engagement as brakeman at a Killingworth colliery brought him in touch with the working of Watt's steam engine, and his first efforts in invention were in improving one of those engines, showing so much ability that he was offered an engine-wright's position at Killingworth, which he held for some time. Then it was that he began to think seriously of producing a locomotive engine, and managed to construct an engine that would draw coal trucks at the rate of four miles an hour. In 1825, when the Stockton and Darlington Railway was undertaken, he was appointed engineer, and when the railway was opened in 1825, as a line for the transport of coal only, Stephenson won his first great triumph, by putting a locomotive on the line that was able to draw a train of thirty-eight carriages, laden with goods and passengers, at a rate of twelve miles an hour. George Stephenson subsequently, assisted by his son Robert, constructed the Liverpool and Manchester line, and after that the railway era commenced.

Stephenson, Robert (1803-1859), was the only son of George Stephenson, and attained great eminence as a civil engineer. For some years he was assistant to his father. On the elder Stephenson's retirement, Robert was the most prominent man in railway engineering for many years, constructing numerous important railways, and winning especial fame in bridge building, being designer and contractor for the High Level Bridge at Newcastle, the Menai and Conway Tubular Bridges, the Victoria Bridge across the St. Lawrence at Montreal, and two notable bridges over the Nile. Sat in Parliament for some years as member for Whitby. He was buried in Westminster Abbey.

Stearns, Laurence (1713-1768), one of Britain's greatest humorists. Was born in Ireland, educated in Yorkshire and at Cambridge, and obtaining Holy Orders, was preferred to the living of Sutton, near York, at which place he resided for twenty years, becoming Prebendary of the Cathedral. It was here

that he wrote his great work *Tristram Shandy*, the first two volumes of which were published in 1759, and the last in 1767. The novel was so unique in character, and so sparkling with wit and high spirits that, despite a certain coarseness, which gave less offence in those days than it would have occasioned in our time, it made him famous. He also wrote *The Sentimental Journey*, and published some volumes of sermons.

Stevenson, Robert (1772-1850), a native of Glasgow, and famed as a builder of lighthouses, including that on Bell Rock. He also invented the "fashings" system of throwing light at sea.

Stevenson, Robert Louis (1850-1894), was born at Edinburgh, and was intended for the profession of a civil engineer, but his delicate condition of health stood in his way, and he tried his hand at various kinds of composition, including some essays which, in 1874, were published in the *Cornhill*. From that time he travelled for some few years on the Continent and it was while journeying through France that he met Mrs. Osborne, a Californian lady, of whom he became deeply enamoured. He followed her to America in 1879, and they were married the following year. For the next few years he drifted hither and thither in quest of health, was now in Scotland, now at Davos, now at Bourneville, and finally at Samoa, continuing to turn out a remarkable series of essays and stories to the end.

Stewart, Dugald (1753-1826), was Professor of Moral Philosophy in the University of Edinburgh from 1785 to 1820. He wrote largely on philosophical questions, but was more famed as a critic than as an original thinker. His works include *Elements of the Philosophy of the Human Mind*, *Outlines of Moral Philosophy*, and *Philosophy of the Active and Moral Powers*.

Stillingfleet, Edward (1635-1699), was Bishop of Worcester for the last eleven years of his life, and had previously been canon and dean of St. Paul's. He was a controversialist of great power, and as a theologian made a memorable mark. His *Rational Account of the Grounds of Natural and Revealed Religion* is still held in great regard.

Stoessel, General (b. 1848), a Russian General whose name was prominent in 1904 as that of the commander of the defence of Port Arthur against the Japanese. He entered the army in 1866, and served in the Russo-Turkish and Chinese campaigns. Tried before a court-martial in February, 1905, for neglect of duty at Port Arthur, he was condemned to death, but the sentence was commuted to one of ten years' imprisonment in a fortress. On the plea of ill-health he was liberated in 1909.

Stolypin, Peter Arkadievich (1863-1911), the eminent Russian statesman who after serving several high government positions became Premier in 1906. Assassinated at Kief in September, 1911, after many previous attempts on his life.

Stothard, Thomas (R.A. 1755-1834), a graceful and successful book-illustrator, whose services were in great demand for many years. He illustrated Scott, Shakespeare, and most of the British classics. He was made librarian of the Royal Academy, a post which he held for a considerable period.

Stow, John (1552-1660), was a famous antiquary, who in 1561 published *A Summary of English Chronology*, and in 1598 issued his celebrated *Survey of London and Westminster*, to which we owe so much of our knowledge of the early history of the capital. A larger work upon which he was occupied more or less for forty years, *Stow's Chronicles*, was not published until after his death.

Stowe, Harriet Beecher (1811-1866), a famous authoress, whose *Uncle Tom's Cabin* was one of the most successful books ever published. Written to expose the horrors of slavery, it did much to advance the cause of abolition which the Civil War finally effected. Her other works include *Dred*, another slave story, and *The Minister's Wooing*.

Strachey, Baron (b. 1858), formerly Sir Edward Strachey, Bart., was M.P. for South Somerset from 1892 to 1911; was Treasurer of His

Majesty's Household, and representative of the Board of Agriculture in the House of Commons.

Strachey, John St. Loe (b. 1860), editor and proprietor of the *Spectator*, a one-time editor of the *Cornhill Magazine*, and author of several works on economic questions. A Free Trader.

Stradivari, Antonio (1644-1730), an Italian maker of violins, first in his art in the world of all time; born at Cremona, pupil of Amati; two sons of Stradivari (name is usually Latinised into Stradivarius), Francesco and Omobono are also noted.

Stratford, Thomas Wentworth, Earl of (1693-1641), the distinguished statesman, sent by Charles I. to Ireland as Lord Deputy in 1633, where he incurred the odium of the people by his extreme harshness. He seems to have imposed cruel exactions upon the people, partly for his own enrichment and partly for the benefit of English trade, but he was the founder of the Irish linen manufacture and did much for the promotion of agriculture. He obtained the name of "Thorough" by his advocacy of sweeping measures for asserting the King's authority, but, falling under the suspicion of Charles, or having proved too domineering for the King's comfort, he was ultimately impeached in Parliament on a variety of charges, found guilty, and executed upon Tower Hill.

Strathcona, Lord (1820-1914), a Canadian railway magnate who amassed a fortune, was a munificent benefactor to the Dominion, by the ample bounds of which, however, his philanthropy and public spirit were not circumscribed. With Lord Mountstephen the fine old veteran produced the capital to yield £16,000 a year to the King's Hospital Fund, and when the South African War was on he raised Strathcona's Horse for service there. He went to the Hudson's Bay country as quite a youngster, and was Special Commissioner in the far-away days of the Red River Rebellion.

Strathnairn, Lord (1801-1885), as Sir Hugh Rose, won much distinction in the Indian Mutiny, and from 1860 to 1865 was Commander-in-Chief of the army in India, while from 1865 to 1870 he was Commander-in-Chief in Ireland.

Strauss, David F. (1808-1874), was an eminent German theological writer, who made a great stir in the religious world by his *Life of Jesus*, published in 1855, which attempted to prove that the evangelical history mainly rested on a series of myths. His opinions secured his dismissal from two important university posts at Tübingen and Zürich; but he continued his researches, and subsequently published several important works which were widely read, including *The Old and New Faith*, and a *Life of Ulrich von Hutten*.

Strauss, Johann (1804-1899), an Austrian composer and conductor, famous for his dance music, of which he produced some 250 pieces, many of them of a very high level. His son, *Johann* (1825-1899), was even more distinguished in the same line, as the composer of the "Blue Danube" waltz and nearly 400 other dance tunes; while a younger son, *Eduard* (b. 1835), became conductor of the Court balls at Vienna in 1870, and was responsible for well over 200 compositions; and yet another son, *Joseph* (1857-1870), composed some 270 dances. The famous Strauss band, with which the family have so long been associated, has compelled the admiration of generations of music lovers in this country as well as in the capitals of the Continent.

Strauss, Richard (b. 1864), the son of a horn player in the Court Opera House at Munich, where he himself became conductor in due course, and was later given the *baton* at the Royal Opera House, Berlin. He is the composer of many charming songs, and has won great distinction in the writing of elaborate instrumental music, operas, symphonies, etc. A notable Richard Strauss festival took place at the St. James's Hall in London, in 1903, when the Amsterdam Orchestra performed "Ein Heldenleben" and numerous others of the gifted composer's masterly conception.

Strickland, Agnes (1806-1874), an English authoress, who attained considerable popularity

during her lifetime by her *Lives of the Queens of England* and *Lives of the Queens of Scotland*, and other works, in the writing of which she was assisted by her sister, Elizabeth.

Strutt, Joseph (1742-1802), was the author of *The Sports and Pastimes of the People of England*, and numerous other works, all of which he himself illustrated. His books are full of antiquarian lore, and of great value to the historian.

Sturpe, John (1643-1737), the ecclesiastical biographer and historian whose lives of the English Reformation leaders and *Ecclesiastical Memorials* are held in high esteem.

Stuart, Arabella (1575-1615), daughter of the Earl of Lennox and cousin of James I., whose next heir she was both to the English and Scottish thrones. In 1610 she married William Seymour, afterwards Earl of Hertford and Duke of Somerset, and thereby incurring the King's displeasure, she was incarcerated in the Tower of London, where she died insane.

Stubbs, Bishop Charles William (b. 1845), appointed to the See of Truro in 1906, previously for twelve years Dean of Ely. Author of numerous theological works, miscellaneous writings, and some very creditable poetry.

Stubbs, Bishop William (1825-1901), a very distinguished Anglican churchman and learned historical writer, who was in turn Regius Professor of Modern History and Curator of the Bodleian Library at Oxford, Canon of St. Paul's, Bishop of Chester, and finally Bishop of Oxford. He was the author of *The Constitutional History of England and its Origin and Development* (1874-1878), *Epochs of Modern History*, and a large number of other important works on cognate themes.

Sturt, Sir Charles (1795-1859), an English explorer in Australia who discovered the Darling River in 1828, and the Murray River and Lake Alexandrina later, and conducted an expedition into the interior in 1844-1845. Mount Sturt in the Gawler range, South Australia, is named after him.

Suckling, Sir John (1609-1612), a favourite English poet, who wrote many dainty and well-known songs and ballads. For a time he served under Gustavus Adolphus; during the Civil War commanded "a ragged regiment"; was a member of the Long Parliament, and being discovered in a plot for the rescue of Stratford, in 1645, fled to France, and died there.

Sudermann, Herman (b. 1857), a German dramatic poet and disciple of Ibsen. Among his plays are "Humat"—in which Sarah Bernhardt has appeared with success—"Es lebe das Leben," and the tragedy "Johannes," while he has written some notable novels, including *Ein War and Frau Sorge*. He lives in Berlin, and formerly edited the *Deutsches Reichblatt*.

Sue, Eugène (1804-1857), a famous French novelist, and author of *Les Mystères of Paris*, *The Wandering Jew*, and other sensational and highly realistic works, were at one time immensely popular. He was the son of one of Napoleon's surgeons, and was a member of the Assembly in 1850, but his Socialistic leanings caused him to be expelled after the *coup d'état*.

Sulla, Lucius (138-78 B.C.), the Roman dictator, and a general of considerable renown. He attempted various constitutional reforms, reconstructed the judiciary and the senate, and established military colonies before he resigned the dictatorship, 79 B.C.

Sullivan, Barry (1824-1891), an English actor who attained great popularity in tragic and "heavy" parts generally, and had a long run of success in all parts of the United Kingdom, as well as in Australia and the United States.

Sullivan, Sir Arthur Seymour (1842-1900), one of the most gifted of modern British composers, gained his first musical experiences as choir-boy at the Chapel Royal, but early showed capacity as a composer. He won the Mendelssohn Scholarship at the Royal Academy of Music in 1860, and after that studied at Leipzig. In 1862 his music to Shakespeare's "Tempest" was successfully given. His first really ambitious work was his oratorio, "The Prodigal

Son," produced in 1868. A second oratorio, "The Light of the World," was given in 1873. Meanwhile, the composer had been cultivating with pronounced success a lighter vein. A musical version of "Box and Cox," and a mere original trifle, "Trial by Jury" for the libretto of which Mr. (now Sir) W. S. Gilbert was responsible, indicated a ready road to popularity, and from 1877, when the "Sorcerer" was produced, the Gilbert-Sullivan operas were for a number of years the most profitable stage-productions of the time. They comprised "H.M.S. Pinafore," "Pirates of Penzance," "Patience," "Princess Ida," "The Mikado," "Ruddigore," "The Yeomen of the Guard," "The Gondoliers," etc. A more serious opera of Sir Arthur's, "Ivanhoe" was produced at the opening of Mr. D'Oyly Carte's English Opera House, (now the Palace Theatre).

Sully, Maximilian (1850-1861), a French Protestant statesman, a friend and companion of Henry of Navarre. He was distinguished also in the field, especially at Ivry, and after being Minister of Finance, became Governor of the Bastille, and was later on made a duke and a Marshal of France. His *Memoirs* made notable reading.

Sunmer, Charles (1811-1874), an American statesman and anti-slavery orator of very considerable ability. He was at one time a vigorous opponent of the policy of Grant, and acted as Chairman of the Foreign Relations Committee of the United States for ten years, being removed therefrom for his antagonism to the proposal for the annexation of Santo Domingo. His published works, mainly handling political themes, ran up to fifteen volumes.

Sutherland, Sir Thomas (b. 1834), Chairman of the Peninsular and Oriental Steamship Company, was born in Aberdeen, and while a comparatively young man entered the service of the company, which he represented in China for several years. Later, under his able direction, the concern has developed into one of the most important undertakings of its kind. Sir Thomas sat in Parliament for a number of years as member for Greenock.

Sutro, Alfred (b. 1863), author and dramatist. His most successful plays have been "The Walls of Jericho" (1904) and "John Gladyde's Honour" (1907). Has published English translations of works by Maeterlinck.

Swan, Sir Joseph Wilson (1828-1914) was born at Sunderland, and first became known as an inventor in photography, being the discoverer of the auto-type process, and of the art of making rapid dry plates. Turning his attention to electric lighting, he invented the incandescent electric lamp. He was the recipient of numerous honours from scientific bodies at home and abroad, was M.A., F.R.S., and D.Sc., and received the honour of knighthood in 1904.

Sveinborg, Emanuel (1688-1770), was born at Stockholm, and for some years devoted himself to science. In later life he announced that Divine authority had been given him to explain natural and spiritual evidences. He published in quick succession *Arcana Caelestia*, *The Apocalypse Revealed*, *Four Preliminary Doctrines*, and *The True Christian Religion*. He also claimed that his soul had been permitted to travel into hell, purgatory and heaven, and propounded a new theology in which there was much sound wisdom.

Swift, Jonathan, Dean (1667-1745), was born at Dublin, educated at Trinity College at the expense of an uncle, became secretary to Sir William Temple, and looked for political preferment, but it did not come. Entering the Church, he was made Dean of St. Patrick's in 1713. Getting entangled in political controversy, and changing his views from the Whig to the Tory side, he lost favour with the popular party, but consoled himself with a devotion to literature, which he greatly enriched by some powerful satires, poems and discourses. *Gulliver's Travels*, *A Tale of Two Cities*, and *The Battle of the Books* are among his best-known works. His romantic attachment to "Stella" (Hester Johnson, whom he is believed to have married privately) and

"Vanessa" (Esther Vanhomrigh), and their devotion to him, are familiar stories.

Swinburne, Algernon Charles (1837-1909), was educated at Oxford, and in the early sixties of last century gave to the world a number of poems of singular poetic beauty and musical charm, which procured him high rank among English poets. Mr. Swinburne's most famous productions include "Atalanta in Calydon," "Songs before Sunrise," "Bothwell," and "Mary Stuart." Perhaps the best of his prose writings is his essay on William Blake.

Swithin, St. (circa 800-862), was made Bishop of Winchester in 825, and on the translation of his remains, with great ceremony, to a shrine in the interior of the cathedral from the graveyard, fixed for July 12th, 971, violent rain intervened, and it is said, continued for forty days; hence the superstition as to rain upon what thenceforward became known as St. Swithin's Day.

Sydenham, George Sydenham Clarke, 1st Baron, K.C.M.G., F.R.S. (b. 1848), educated at Haileybury and Wimbledon; entered the Royal Engineers 1868, served in Egypt, and made K.C.M.G. in 1893 for organising system of Colonial defence. Was Governor of Victoria 1901-1904, secretary of the Committee of Imperial Defence 1904-1907, member of War Office Reconstruction Committee 1908, and was appointed Governor of Bombay in 1907, retiring in 1913, when he was raised to the peerage.

Symonds, John Addington (1840-1906), was born in London, educated at Harrow and Oxford, and acquired fame as a poet and writer on *The Renaissance Period in Italy*, with which he was in complete sympathy. His style was scholarly, profound, and highly critical.

T

Tacitus, Gaius Cornelius (55-circa 120), was Consul in Rome under the Emperor Nerva, and held other appointments, but his chief claim to remembrance is the fact that he was one of the ablest of Roman historians, and left behind him a number of works—among them a life of Agricola—his *Annals*, which have formed the ground-work of much that has since been written on the period he covered.

Taelvas, Marcus Claudius (200-274), the Roman Emperor who succeeded Aurelian in A.D. 275. He had twice served as Consul, and was a descendant of the famous historian. His short reign was wise and marked by moderation.

Taft, Wm. Howard (b. 1857), American statesman, formerly a judge, came into note in connection with the Philippine Commission of 1900-4, of which he was President, acting as Civil Governor of the Islands from 1901 to 1904, in the latter year being appointed Secretary for War. Visited Japan in 1907. Succeeded Mr. Roosevelt as President in 1908. Was again a candidate for the presidency in 1912, but was defeated by Woodrow Wilson.

Taglioni, Maria (1804-1884), a famous dancer, daughter of the Italian ballet-master and composer of "La Sylphide," Filippo Taglioni (1772-1871). Her style was light and airy, as distinguished from the sensuousness of Madame Vestris. She was born at Stockholm, created a furore as première danseuse at Vienna as a mere girl in 1818, and later was the rage of London. Married Count de Volsins in 1839, and retired from the stage in 1844.

Taine, Hippolyte Adolphe (1824-1893), an able French historian and critical writer, appointed Professor at the School of Fine Arts in Paris in 1864, made L.L.D. of Oxford in 1871, and a member of the Academy of France in 1878. He wrote learnedly on English and French literature, history, and philosophy, ancient and modern, and was a scholar of great breadth and brilliance.

Tait, Archibald Campbell (1811-1882), was Archbishop of Canterbury from 1868 to his death. He was educated at Oxford, and allied himself with the Tractarian movement. He succeeded Dr. Arnold as headmaster at Rugby in 1842. Was Dean of

Carlisle from 1850 to 1855, in the latter year becoming Bishop of London, holding that position until his preferment to the Primacy.

Talbot, the Rt. Rev. E. S., D.D., Bp. of Winchester since 1881 (b. 1824). Educ. Charterhouse and Christ Church, Oxford; Warden Kettle Coll., 1870-88; Vicar of Leeds, 1888-95; Bp. of Rochester, 1895-1905; of Southwark, 1905-11. Author of books on theology.

Talbot, Major-Gen. Hon. Sir R. (b. 1841), Governor of Victoria 1904-8, has seen a good deal of active service. Went through the Zulu campaign of 1882; Egypt, 1884-5; military attaché in Paris, 1889-95; and commanded army of occupation in Egypt, 1899-1903.

Talfourd, Sir Thomas Noon (1795-1854), English judge and writer, and author of *Ivan*, a tragedy which was produced by Macready.

Talleyrand-Perigord, Prince (1754-1838), a distinguished French diplomatist, who lived through stirring times and took an active part in them, sometimes on one side, sometimes on another. For a time he was Bishop of Autun, but to escape the dangers of the Revolution relinquished his see and went to America. After the Terror he ventured back to Paris, and became Foreign Minister under the Directory, remaining in that office and greatly distinguishing himself in it, down to 1807, when the Emperor, becoming distrustful of him, deposed him. While Napoleon was at Elba Talleyrand was appointed Prime Minister to Louis XVIII and under Louis Philippe, he was Ambassador to London.

Tallien, Jean L. (1769-1820), was one of the prominent leaders of the later Revolutionary movement in France and Consul at Bordeaux during the early days of the Terror, carrying out Robespierre's instructions with apparent zeal. Under the influence of his wife, Therese de Cabarrus, better known as Madame de Fontenay, however, he gradually moderated his ardour, and eventually returned to Paris and was mainly instrumental in procuring the downfall of the tyrant. Under Napoleon Tallien rose to some honour, accompanied the Emperor to Egypt, and later on was appointed to a Spanish Consulate.

Tallis, Thomas (1515-1565), a distinguished musician, who was, as organist, attached to the Chapel Royal, Henry VIII., Edward VI., Mary, and Elizabeth, and was the composer of some of the finest of our Church music.

Tamerlane, or Timur the Tartar (1335-1405), descendant of a follower of Genghis Khan, and founder of the Mogul Dynasty in India. He succeeded as chief of the Berlas Turks in 1361, and in turn conquered Turkistan, Persia, and Syria. He was a masterful warrior, and a terrible butcher, the scourge of the East in his day, and, after establishing himself in India, died whilst preparing for the invasion of China. His familiar name is a corruption of Timur-lenk = "Timur the Lane."

Tancred (1078-1112) was a great Crusading hero, whose adventures and chivalrous deeds invested his name with considerable romance. He was a Sicilian prince of Norman descent and the most prominent personality of the first Crusade. His virtues and achievements were celebrated by Tasso in his "Jerusalem Delivered."

Tannahill, Robert (1774-1810), a tender and gifted Scottish poet, whose lyrics—chief amongst which are "The Flower of Dunblane" and "Gloomy Winter's noo awa"—were inspired by the desire to emulate Burns. He was bred a weaver of Paisley, and there died by his own hand.

Tannhäuser, a mythical German minnesinger of the 13th century, who belonged, according to the legend handed so romantically in Wagner's opera, to the Salzburg family of Tanhäuser, and was the beloved of Lisaura.

Tarquin Superbus (or "the Proud"), the last King of Rome, who reigned for twenty-four years. Was banished 509 B.C. in consequence of the infamous conduct of his son, Tarquinus Sextus, who wrought upon Lucretia "the deed of shame." Tarquin "the Proud" attempted to regain his power, but was completely defeated at the famous battle of Lake Regillus, and died subsequently of

the wounds he there received. After Tarquin's deposition came the Consuls.

Tarquin the Elder, 5th King of Rome, succeeded Ancus Marcius 615 B.C., reformed the laws, and embellished the city, and was assassinated, according to the legendary history, 577 B.C.

Tasman, Abel Janssen (circa 1600-1659), was a famous Dutch navigator about whose adventures there is much uncertainty, except that in 1642 he discovered the island of Tasmania and New Zealand shortly thereafter. He undertook a further Australasian voyage in 1644, of which little is known save that therein he discovered the Gulf of Carpentaria, and returned to Batavia, and there died fifteen years later.

Tasso, Torquato (1544-1595), was one of the great Italian poets of the 16th century. His fame chiefly rests upon his "Jerusalem Delivered," a nobly conceived work, which is known in all languages.

Tatian, a noted writer on Christianity, who flourished in Syria in the second century. His *Apology for Christianity* and *A Harmony of the Four Gospels*, shed considerable light upon the position of Christianity in his time.

Tauschnitz, Bernhard, Baron von (1816-1884), won wide celebrity by his enterprising enterprise of the Leipzig publishing business established by his uncle, and particularly by the cheap editions of English and German classics with which he flooded the Continent.

Tauler, Johann (1290-1361), a German Dominican monk and mystic, who was styled "the Illuminated." Disregarding the interdict of John XXII, in 1330, he established himself at Basel, and became associated with the "Friends of God," afterwards returning to Strasbourg. His sermons, printed after his death, and *The Book of Spiritual Poverty*—also ascribed to him—contain much that is remarkable.

Taylor, Bayard (1835-1878), an eminent American writer and traveller, who visited Central Africa, India, China, Japan, Greece, Russia, etc., and wrote very pleasant books describing those countries. He also wrote a life of Goethe, and translated that poet's "Faust." He was United States Ambassador to Berlin at the time of his death.

Taylor, Brook (1687-1731), an English mathematician of high attainments, who was some time Secretary to the Royal Society, solved the problem of the centre of oscillation, and is best known as the discover of "Taylor's theorem."

Taylor, Sir Henry (1800-1886), statesman, poet, and critic. Held an appointment in connection with the Colonial Office, and was author of the dramas, "Philip van Artevelde," "Edwin the Fair," and "Isaac Comnenus"; of "The Eve of the Conquest and other Poems"; and of *Notes from Books and The Statesman*, besides an autobiography.

Taylor, Isaac (1767-1865), originally a student of art, but became famous as a philosophical author, whose books, *The Natural History of Enthusiasm*, *The Natural History of Fanaticism*, *Physical Theory of Another Life*, *Restoration of Belief*, etc., were marked by much penetration. His son, Canon Isaac Taylor (1820-1907), was a philologist and antiquarian and historical writer, who poured forth multitudinous books from the Yorkshire rectory at Settrington, which he occupied for over a quarter of a century, the most notable of his productions, perhaps, being his *Words and Places*, and his works on the alphabet and the origin of the Aryan.

Taylor, Jeremy (1613-1667), an English divine of great influence, who was chaplain to Charles I., and suffered greatly in the troubled period of the Civil War, but on the restoration of Charles II. was made Bishop of Down and Connor. The most famous of his works was his *Holy Living and Holy Dying*. He married a natural daughter of Charles I.

Taylor, John (1680-1696), was a poet of some note in his day, who followed the occupation of a waterman. He wrote many quaint and interesting poems, including his "Penniless Pilgrimage," "Travels in Germanie," and "The Praise of Hempseed."

Taylor, Rowland, vicar of Hadleigh and chaplain to Cranmer; for refusing to renounce Protestantism

was condemned to the stake and suffered death in 1555 along with other martyrs.

Taylor, Tom (1817-1880), a clever humorist and dramatic writer, who was Professor of English History at University College, London, from 1845 to 1847, and succeeded Shirley Brooks as editor of *Punch*. His principal plays were "The Ticket of Leave Man," and "Still Waters Run Deep."

Taylor, Zachary (1784-1850), twelfth President of the United States. He was a distinguished soldier, as well as a statesman, earned the sobriquet of "Old Rough and Ready," and was President in 1849.

Teck, H.S.H., Prince Alexander of, G.C.B., D.S.O., appointed Governor-General of Canada, 1914 (b. 1874). 3rd son of the late Duke and Duchess of Teck. Educated at Eton and Sandhurst. Major and Life Guards. Seen active service in S. Africa.

Tegner, Esaias (1782-1846), Swedish poet, theologian, and Greek professor. Wrote a celebrated cycle of romances based on the old Norse Sagas, and became the principal poet of the so-called Gothic school. Much of his life was clouded by hereditary mental disease, but he achieved enduring fame by his "Frithjofs Saga."

Telford, Thomas (1757-1834), was a Scottish working stone-mason during the early part of his career, but by his ability obtained advancement, receiving the appointment of Surveyor of Public Works for Shropshire, and taking up the profession of civil engineer. Some bridges that he constructed in the Midlands led to his being entrusted with important contracts in various parts of the country. He attained special fame as a builder of bridges, the Menai Suspension Bridge being, perhaps, his greatest work. He constructed the Evesham Canal, made many hundreds of miles of difficult mountain roads, was chief engineer of the Caledonian Canal, and altogether did an immense amount of public work. He was buried in Westminster Abbey.

Tell, William, the celebrated Swiss patriot who was born about the end of the 13th century at Burglen, near Atdorf, and headed the resistance to the Austrians in 1307 and later. The story of his having been compelled to shoot an apple from the head of his boy by Gessler and his dramatic revenge is now regarded as a legendary localisation of a feat which had been attributed on English territory to William of Cloudbury, and had become a common Teutonic tradition before Tell's time. The Switzer hero of the Un had, however, a great part in the strenuous struggle of the mountaineers for independence against the Emperor Albrecht, and died circa 1350, after the firm foundation of the League which gave birth to the Helvetic Confederation.

Temple, Frederick (1827-1902), a famous Anglican Churchman, who graduated at Balliol College, Oxford, with a double first-class, became Headmaster of Rugby School in 1858, in 1860 attained notoriety as the author of the first of the much-controverted *Essays and Reviews*, advocated the disestablishment of the Irish Church in 1868, was appointed Bishop of Exeter in 1869, translated to London in 1885, and in 1896 was raised to the Primacy. He made a strong Archbishop, and dominated the Church with his vigorous personality.

Temple, Sir William (1628-1699), English statesman and author; was Ambassador to The Hague in Charles II.'s time, and is understood to have been instrumental in bringing about the marriage between William of Orange and the Princess Mary. William III. twice offered him the position of Secretary of State, but he declined the honour, spending the years of his retirement at Moor Park (where Swift served him for a time as private secretary) in literary pursuits. His essays are the work of a cultivated mind.

Teniers, David (the younger) (1610-1694), was one of the greatest of the Flemish painters. He was born at Antwerp, and his paintings of the old rustic Flemish life are unsurpassed in their humour and fidelity. He died at Brussels. His father, David Teniers, the elder (1582-1649), was also one of the leading landscape painters of the time, and learned his art under Rubens.

Tenniel, Sir John (1820-1914), was for over fifty years one of the leading artists of *Punch*, and, from the death of Leech, its principal cartoonist. His cartoons were remarkable for their accuracy of drawing, vigour of treatment, and clearness of idea. Some of his double-page cartoons were really great, as for instance, his "Dropping the Old Pilot," which appeared after Bismarck's dismissal from office. Tenniel also illustrated numerous books, including *Alice in Wonderland*. He was knighted in 1893, and retired from *Punch* in 1902.

Tennyson, Alfred, Lord (1809-1892), was Poet Laureate from 1850 to his death. Born at Somersby, in Lincolnshire, he evinced the poetic gift while quite young, and in 1827, joined his brother, Charles in the publication of "Poems by Two Brothers." In 1830 and 1832 he again appeared before the public, the two small volumes of those years, written entirely by himself, serving to mark him out as one of the coming men in poetry. It was not until 1842 that he was again attracting attention with two volumes; but these more than confirmed previous promise. In 1847 he published "The Princess"; in 1850 "In Memoriam," a poem of great beauty and depth of thought in which he enshrined his affection for the memory of his dead friend Arthur Hallam; and in 1855 "Maud" appeared. His other works include "The Idylls of the King," "Enoch Arden," "Queen Mary," "Harold," and "Becket." He was raised to the peerage in 1883.

Tennyson, Hallam, 2nd Baron (b. 1859), son and biographer of the great poet of the Victorian era last mentioned. Governor of South Australia 1899-1902, when he became first acting Governor-General of the Australian Confederation, and retained office for two years. Besides the memoir (in 2 vols.) of his father, Lord Tennyson has published some verse and magazine articles.

Terence (circa 194-158 B.C.), the famous Roman poet and dramatist, who by his talent rose from the position of a slave to that of one of the most honoured men in Rome. Six of Terence's comedies are extant—"Andria," "Hecyra," "Heauton-timorumenos," "Eunuchus," "Phormio," and "Adelphi."

Teresa, St., or Theresa (1515-1582), a Spanish saint and author, who was born at Avila in 1515, entered the Carmelite order in 1534, established a reformed order in 1562, became famous for her ascetic life and mystic visions later, and died in 1582 at Alba de Liste. She left behind her some notable religious writings, afterwards published, including *The Way of Perfection* and *The Castle of the Soul*. She was canonised by Pope Gregory XV.

Terry, Ellen (Mrs. James Carew) (b. 1848), one of the most distinguished of modern English actresses. Began her stage life when seven years of age in one of Charles Kean's great productions at the Princess's Theatre. She afterwards obtained other London engagements, and while yet quite young had made an important position for herself. It was not, however, until she became associated with Sir Henry Irving at the Lyceum that her greatest successes were obtained.

Tertullian, Quintus (circa 150-230), a Father and writer of the Latin Church, lived first in Carthage and then at Rome, and became a Montanist in 203 after conversion to Christianity some years previously. His chief work was his *Apologeticus*, a defence of Christianity called forth by the persecutions under Septimius Severus.

Tesla, Nikola (b. in Servia, 1857), electrician and inventor, was for a time connected with the Telegraph Engineering Department of the Serbian Government; later he was in Paris, engaged in electric lighting experiments; and in 1882 went to America (where he has resided ever since), and was associated with Edison for a time. He has been an active promoter of electrical developments.

Tetrazzini, Luisa, a prima donna who sprang into sudden prominence in 1807 by her wonderful singing at Covent Garden. She was hailed as a second Patti, and achieved a brilliant success. Her first appearance in opera was made at Florence, of which city she is a native, in 1806. Later she made a

tour in South America, and after her short season in London at the end of 1877 went to the United States, and was received with enthusiasm.

Tetzl, John (1455-1519), the German Dominican monk and Inquisitor, the scandal of whose sale of indulgences roused Luther to publish his memorable ninety-five theses at Wittenburg in 1517, and led up to the Reformation.

Thackeray, William Makepeace (1811-1863), was born in Calcutta, brought to England while young, and educated at the Charterhouse School in London and at Cambridge. His first ambition was to be an artist, and it is interesting to know that he at one time seriously proposed to be an illustrator of Dickens's works, but he never got much beyond the amateur stage in pictorial work, the drawings he made to illustrate some of his own novels being crude and inefficient. As a humorist and novelist he, however, attained very high rank. In *Fraser's Magazine* and in *Punch* he contributed a large number of burlesques, sketches, poems, etc., all full of spirit and fun; but it was not until later life that his greatest successes were won. *Vanity Fair*, which was issued in monthly parts between 1846 and 1848, proclaimed him a master in the realm of fiction. *Pendennis*, *Emmond*, *The Newcomes*, *The Virginians*, *Philip*, and *Lovel the Widower* make up the main of his finished stories, and English literature is all the richer for them. He edited the *Cornhill Magazine* from the first number, January, 1860, for a few years, his most notable contributions being his *Roundabout Papers*. His *Yellowplush Papers* and *The Book of Snobs* (republished from *Punch*) were widely read and admired; and the lectures he delivered in America on "The Four Georges" were pungently powerful. He was buried at Kensal Green, and his memory is honoured by a bust in Westminster Abbey.

Thales of Miletus (circa 640-546 B.C.), a famous geometer, astronomer, and philosopher, and one of the seven wise men of ancient Greece. The earliest of the Ionian philosophers, he created a sensation by the pre-calculation and prediction of an eclipse of the sun, which took place 585 B.C., and he looked upon water as the principle of all universal things.

Themistocles (circa 520-449 B.C.) was chief archon of Athens, and when Xerxes assailed Greece commanded the Athenian fleet with such vigour and ability that the invader was defeated at Salamis. Not long afterwards he was accused of corruption and fled to Persia, where, shielded by Artaxerxes, he lived for the remainder of his days.

Theocritus (285-247 B.C.), one of the great Greek poets, was born at Syracuse and lived for many years at Alexandria. We are only enabled to judge of his genius by the thirty "Idylls" which have come down to us bearing his name, and a number of "Epigrams." Most of these works are conceived in the true pastoral spirit.

Theodora, a Cypriot actress, who married Justinian circa 523, and four years later became Byzantine empress, taking a leading part in the administration of the realm. She died in 548.

Theodore, King of Abyssinia (1818-1868), a warlike and cruel despot, whose imprisonment of the British Consul, Cameron, led up to the expedition of Napier to Magdala, and the storming of that fortress in 1868. Upon his defeat by the British, Theodore committed suicide.

Theodoret (circa 390-457), a Greek theologian and historian of the school of Antioch. He wrote commentaries, lives of ascetics, and controversial works, and continued the history of Eusebius.

Theodoric the Great (454-526), a very celebrated King of the East Goths, born at Pannonia. In mediæval German romance he is renowned under the name of "Dietrich von Bern," and had a reputation for good government, akin to that ascribed in England to King Alfred. He was the founder of the Gothic Kingdom of Italy.

Theodosius the Great (346-395), was Roman Emperor of the East for nearly twenty years. He gained victories over the Goths, and the year before his death became sole Emperor. Noted in eccle-

siastical history for his conversion to Christianity, and for his submission to the penance imposed by St. Ambrose.

Theophrastus (circa 372-287 B.C.). Succeeded Aristotle as President of the Lyceum at Athens, holding the position thirty-five years, and devoting himself mainly to the elaboration of his predecessor's philosophy. His *History of Plants* and his *Moral Characters* are the best known of his writings.

Thierry, Jacques N. (1792-1856), was a distinguished French historian, best known in this country by his *History of the Norman Conquest*.

Thiers, Louis Adolphe (1797-1877), a French statesman and man of letters, was born at Marseilles, went to Paris after the fall of the Empire, and there began his career as an author by publishing (1823-1829) his *History of the French Revolution*, shortly afterwards entering political life as Deputy for Aix. Under Louis Philippe he held various prominent offices, and was Foreign Minister until a disagreement with the King caused him to resign. He was then out of office for a considerable period, and occupied his leisure in writing the early volumes of his finest work, *The History of the Consulate and the Empire*. After the *coup d'état* he spent some time in exile, and did not again take part in legislative work until 1863, when he was elected for the department of the Seine. After Sedan he rose rapidly to the chief position, devoting his whole energies to the establishing of peace. He put down the Commune, and restored order and prosperity. Was President from 1871 to 1873.

Thirlwall, Bishop Connop (1797-1875), an erudite English churchman, critic and historian, who was thirty-four years Bishop of St. David's, and wrote a number of notable essays and poems, also a *History of Greece*, and was associated with Hare in the translation of Niebuhr's *History of Rome*.

Thompson, Sir Edward Maunde (b. 1840), Director and Principal Librarian of the British Museum 1888-1909. Has edited numerous ancient chronicles and paleographical publications, and written much respecting early English literature and history, as also on Greek and Latin subjects.

Thomson, James (1790-1850), was a native of Ednam, in Roxburghshire, settled in London in 1795, and in the following year published "Winter," the first season of his famous poem, "The Seasons," which attracted much favourable attention. "Summer," "Spring," and "Autumn" followed, and increased his reputation. His other works included "The Castle of Indolence," a poem of rare imaginative power, "Liberty," and a masque on the subject of "Alfred," written in collaboration with his friend Mallet. It is in "Alfred" that "Rule Britannia" appears. He had a pension of £300 a year, and drew £300 a year as Surveyor-General of the Leeward Islands, the duties of which were performed by deputy.

Thomson, James (1834-1882), a Scottish poet of considerable power, who attracted much notice by the publication of "The City of Dreadful Night" in 1874, and followed that work up by other volumes, entitled "The Voice from the Nile" and "Pannonia."

Thomson, Sir Joseph (b. 1856), Cavendish Professor of Experimental Physics at Cambridge, and a great chemist and electrician, who has written learnedly on vortex rings, magnetism, dynamics and physics generally. Awarded the Nobel prize for distinction in Physics in 1906. President, British Association, 1909.

Thoreau, Henry D. (1817-1862), was a natural philosopher and nature worshipper, whose books he devoted himself to a primitive kind of existence in the American woods. He was the friend of, and for a time lived with, Emerson, but in 1845 adopted his career of solitude, and pursued those studies of nature which afterwards gained him a high reputation. His *Walden, or Life in the Woods*, is a unique book.

Thornbury, G. Walter (1828-1876), an admirable miscellaneous and archaeological writer, whose books on *Shakespeare's England*, *British Artists from Hogarth to Turner*, *Lays and Legends*, *Art and Nature at Home and Abroad*, *Life in Spain*, *Songs*

of the Cavaliers and Roundheads, and *The Buccaneers*, were remarkable for breadth of sympathy and facility of expression. He commenced *Old and New London* for Cassell's, but died after writing the first two volumes, leaving the late Edward Walford to carry the task to completion.

Thornhill, Sir James (1676-1733), was an eminent English painter who rose to great favour in the time of George I. Many of his decorative pictures are to be seen in St. Paul's, Hampton Court Palace, and Greenwich Hospital. He sat in the House of Commons for Weymouth for a number of years, and Hogarth studied under him.

Thornycroft, Sir John Isaac, Knight, LL.D., F.R.S., was born at Rome in 1843, and founded the well-known Thornycroft shipbuilding works, at Chiswick in 1866, where he built many noted high-speed vessels, and in recent years has devoted much attention to the improvement of motor vehicles. He was knighted in 1912.

Thornycroft, William Hamo, R.A. (born in London, 1850), an eminent modern English sculptor, has produced some of the best known sculptures of recent times, including the Gladstone Memorial, the statue of General Gordon in Trafalgar Square, of Queen Alexandra in the Royal Exchange, Lord Granville in the House of Parliament, Cromwell at Westminster, and John Bright in Rochester. Among his creative examples are "The Mower," "Lot's Wife," and "Teucer," the last-named being bought by the Chantry Trustees.

Thorwaldsen, Bertel (1770-1844), the famous Danish sculptor, who—born at sea—was in his youth assistant to his father, a ship's carpenter, but showing a special artistic capacity was sent to the Copenhagen Art Academy, where he won a scholarship and was sent to Rome. There he studied under Canova, and in the many years that he continued to reside in Rome produced some of the finest sculptures of his day.

Thucydides (471-401 B.C.) was a distinguished Greek historian, who was put in command of a force in the Peloponnesian War, but not having acquitted himself to the satisfaction of his superiors, he was exiled, and lived for twenty years in obscurity, occupying himself with writing the history of the war in which he had himself taken part, producing one of the most graphic historical narratives known.

Thurlow, Edward, Lord (1730-1806), was one of England's most celebrated Lord Chancellors, filling that office for thirteen years. It was said that "no one was ever so wise as Thurlow looked."

Tiberius, Claudius (42 B.C.-37 A.D.), was the second Emperor of Rome, a man of undoubted capacity, whose household affairs were notoriously involved and wicked. He was reserved and taciturn, however, and not strong enough to withstand the plottings of Sejanus, whose savage exercise of power in the Emperor's name during the last years of his reign turned Rome into a shambles.

Tickell, Thomas (1686-1740), was born in Cumberland and educated at Oxford, and had the good fortune to win the friendship of Addison, who, in 1717, obtained for him an Under-Secretaryship of State. Tickell figured as a poet, contributed to the *Spectator*, and altogether seems to have prospered. His poetry does not reach any high level, although he could handle the ballad metre pleasantly well, and his "Elegy on the Death of Addison" is a poem of real distinction.

Tieck, Ludwig (1773-1853), a renowned German poet and novelist, and one of the founders of the romantic school. Several of his romances are works of undoubted power—*Fair Eckbert*, *The Runenberg*, and the *Pictures*, among others—and his influence upon a special literary development was very marked. His younger brother, Christian Friedrich Tieck (1776-1851), achieved considerable reputation as a sculptor in Berlin, and was particularly successful with his portrait busts of Goethe, King Ludwig of Bavaria, Lessing, and many other celebrities.

Tillokean, Archbp. John (1560-1604), was born at Sowerby in Yorkshire, studied at Cambridge, and, becoming rector of Keddington in 1603, developed great

pulpit power. Securing the appointment of preacher at Lincoln's Inn, he soon extended his fame, and joined the ranks of the controversialists, "Popery" and "Atheism" being the main objects of his attacks. In 1579 he was Dean of Canterbury, and in 1579 became Archbishop. He was fearless in the expression of his opinions, and possessed much influence with William and Mary in his later years.

Tilly, Count (1559-1639), a Belgian-born soldier, who achieved fighting fame in the Spanish, Bavarian, and Imperial Service during the Thirty Years' War, in which he became generalissimo in 1630. In thirty-six battles Tilly proved victorious, but was defeated by Gustavus Adolphus near Leipzig in 1631, and fell mortally wounded before the same foe the year following at Lech.

Timoleon of Corinth (415-337 B.C.), the illustrious Greek general, who delivered Syracuse from Dionysius, defeated Hasdrubal and Hamilcar, and brought Sicily into prosperous tranquillity. He was as virtuous as valorous, and died greatly esteemed, after suffering blindness for some time.

Timon of Phlius, a noted Greek sceptic philosopher, poet, and dramatist, who flourished about 280 B.C. Another Timon, of Athens, known as "the misanthrope," is mentioned by Plutarch, from which source Shakespeare doubtless obtained the groundwork for his play "Timon of Athens."

Tindal, Matthew (1667-1726), a noted English Deist, who was converted from Protestantism to Romanism and back again to Protestantism. He published many controversial works, before attracting more direct public attention by his dialogue, *Christianity as old as the Creation*—which has been called the "Bible of Deism"—and was answered by Bishop Butler, Leland, Conybeare, and others.

Tintoretto (1518-1594), the famous Venetian painter, whose numerous religious pictures are of great value and interest, revealing fine imaginative force and a bold colouring. Examples of his work are to be met with in most of the great European galleries. His "Slaughter of the Innocents," "Worship of the Golden Calf," "Crucifixion," and "Belshazzar's Feast," are subjects that are familiar because of the frequency with which they have been engraved. His real name was Jacopo Robusti, and he received the cognomen of Tintoret, or Tintoretto, from his father's avocation, that of a dyer.

Tinworth, George (1843-1913), was brought up to the business of a wheelwright, but showing a strong bent for wood-carving, studied at the Lambeth School of Art and at the Royal Academy, and quickly developed considerable talent, winning numerous medals at home and abroad. For many years he was modeller to the Doultons, Lambeth Pottery. His work is to be seen in many cathedrals, churches, and public buildings, and is greatly prized for its beauty of conception and refinement of execution.

Tippoo Sahib, or Tippu Sahib (1749-1799), Sultan of Mysore, and son of Hyder Ali, who succeeded in 1782. Tippoo fought with the French against the English in India, and concluded the Treaty of Bangalore in 1784. On the renewal of the war in 1799 he was slain at Seringapatam.

Tiresias, the blind Theban soothsayer of Greek legend, alleged to have been stricken sightless whilst accidentally looking upon Athena bathing, receiving the gift of prophecy from the relenting goddess, who was unable to restore his vision.

Tischendorf, L. F. G. von (1815-1874), a celebrated German Protestant Biblical scholar and critic, and Professor at Leipzig. He was particularly learned in ancient MSS., and in the course of investigations in the East and elsewhere discovered the famous Sinaitic Codex, and many other invaluable scriptures illuminative of the Bible.

Titian (1477-1576), one of the greatest of painters, was born at Cadore, and while a child was taken to Venice to live with an uncle. Revealing remarkable artistic talent, he was placed first under, and then with, the Bellinis, and made his first essays in painting for the public in conjunction with Giorgione, whom he soon surpassed. In 1511 he was at Padua, where he painted some notable frescoes; in 1520 he

was back in Venice, with a studio on the Grand Canal, employed on important commissions. From this time forward he was in great demand, and exercised his marvellous powers almost to the end of his life, dying at ninety-nine of the plague.

Titians (or **Titian**), **Baron** (1518-1597), was a famous operatic prima donna and concert-room singer, who, from 1835 to the time of her death, was constantly before the public, and achieved very high distinction. She was the leading artiste at Her Majesty's Opera House, London, for many years, and filled to great variety of parts with almost unvarying success.

Titus (40-81), the Roman Emperor, and son of Vespasian. Attained great renown by his successful part in the Jewish war which terminated in the capture and destruction of Jerusalem by him, a feat of arms which is celebrated in the Arch of Titus still standing in Rome. On his return he took upon himself the practical control of government, and on the death of his father in 79 succeeded to the Imperial purple. Up to that time he was deemed a profligate and a tyrant, but no sooner was he in sole power than he exerted himself to the utmost to please the people, completed the Colosseum, gave plenty of exhibitions, built splendid baths, and otherwise made himself popular. He, however, only reigned two years.

Toqueville, Alexis de (1789-1859), an able French statesman and writer, who was educated for the law, and was at one time Juge d'Instruction at Versailles. He was sent out to America in 1831 to investigate the Penitentiary system, and while there he made a very close study of the conditions of popular government in the United States, and on his return to France published his celebrated book *Democracy in America*. He was a member of the Chamber of Deputies for some years, and when Louis Napoleon was President of the Republic became Foreign Minister. He did not associate himself with politics after the coup d'état.

Todhunter, Isaac (1800-1884), a great mathematician, and the author of a series of text-books which have had a very extensive vogue. He was the Senior Wrangler of his year at Cambridge, and perhaps his most valuable works were his *Researches on the Calculus of Variations* and his *History of the Theory of Elasticity and the Strength of Materials*.

Todleben, E. Ivanovitch, Count (1818-1884), a noted Russian general and military engineer who defended Sebastopol against the Allies, took charge of the Siege of Plevna in the Turkish War of 1877, was employed in the reduction of the Bulgarian fortresses in the year following, and later served as Governor of Odessa. He wrote a book on the Crimean War.

Togo, Admiral, Count (b. 1819), the most conspicuous naval commander of modern times. Was a student at Greenwich Naval College, where he obtained a complete mastery of British methods. In the war between his country and China he did splendid service, and on the outbreak of the conflict between Japan and Russia in 1904 speedily "got in the first blow" on the Russian fleet, and achieved a series of brilliant victories that resulted in the complete destruction of the enemy's ships. Raised to the rank of Count in 1907.

Tolstoi, Count Leo (1828-1911), was the most distinguished personality in modern Russian literature. Born of a good family, he was for a time in the army, but was so greatly moved by the trials and sufferings of the people that, out of pure sympathy of heart, he was impelled "to take up his pen and write." At twenty-four he published his *Childhood*, and in 1854, while in camp in the Crimea, wrote his *Tales from Sebastopol*, which procured him considerable literary fame. Later on he was a persistent advocate of progressive ideas, and, before the Emancipation Act for freeing all Russian serfs was enforced, he himself had given the serfs on his own estate their freedom. In 1860 he married, and settled down to a quiet country life, shortly afterwards publishing his *War and Peace* and *Anna Karenina*. In more recent years Tolstoi developed a sort of religious

mysticism. Among his later works are *The Power of Darkness*, *The Kreutzer Sonata*, *The Cossacks*, *The Resurrection*, and *The End of the Ages*.

Tone, Wolfe (1763-1798), the Nationalist agitator who founded the Society of United Irishmen in 1791, was captured on board a ship of a French squadron which he had induced to sail into Bantry Bay, and sentenced to death for treason, but escaped the gallows by suicide.

Tooke, John Horne (1735-1822), politician and philologist, was the son of John Horne, a London poultryer. Educated at Eton and Cambridge, he took Holy Orders, studied for the Bar, tried to enter Parliament, and became a fierce controversialist on the topics of his time. He in turn attacked Lord Mansfield, Wilkes, Junius, and Lord North, and frequently got himself into trouble by the violence of his language, being imprisoned on one occasion for libelling the King's troops in America. It was only in 1782 that he adopted the surname by which he became thenceforth known, in consequence of inheriting a property left to him by Mr. William Tooke, to whom he had rendered some legal service. In 1801 he was returned to the House of Commons as member for Old Sarum, but after sitting in one Parliament, he was excluded by the passing of a law rendering clergymen ineligible for Parliament. The book on which his literary reputation was chiefly based was *The Diversions of Purley*, in which a great amount of learning is mixed up with much politics and some pedantic, etymological parade.

Toole, John Lawrence (1839-1900), perhaps the most popular English comedian of his time. On leaving school he went into the office of a wine merchant, but at twenty adopted the actor's profession, making his first appearance at the Haymarket Theatre, afterwards playing with ever-increasing success for nearly half a century all over the United Kingdom.

Torquemada, Tomas de (1420-1498), the chief officer of the Spanish Inquisition organised under Ferdinand and Isabella. He was a Dominican prior who showed great ferocity of disposition and horrible inventiveness in the pursuit and punishment of "heretics."

Torricelli, Evangelista (1608-1647), the famous Italian mathematician and astronomer, who was Galileo's pupil, and became Professor at Florence. He invented the barometer and improved both the microscope and the telescope, making besides many important physical-science discoveries.

Tourgueniev, Ivan, or Turgueniev (1818-1883), a clever Russian novelist and writer, who suffered imprisonment for his fearless expressions of political opinion, but contributed by his pen materially to the emancipation of the serfs. The most striking of his stories "with a purpose" are *A Nest of Nobles*, *Fathers and Sons*, *Smoke*, and *The Diary of a Superfluous Man*.

Toussaint-L'Ouverture (1743-1803), negro leader in St. Domingo; after the revolt recognised as general-in-chief of the island by the French; carried out many reforms; established an independent republic in 1801; resisted Bonaparte's attempt to re-establish slavery; surrendered to the French in 1802; died in prison in Paris in the year following.

Toynbee, Arnold (1852-1883), the son of an architectural surgeon, Joseph Toynbee (1816-1866), who published a very valuable treatise on *Diseases of the Ear*. Arnold Toynbee, after graduating at Oxford, devoted himself to practical philanthropy and social reform. From his self-denying efforts sprang the settlement in East London—Toynbee Hall, Whitechapel—as associated with his name and the cause he gave his life to, for he died of overstrain in his work amongst the poor.

Trajan (circa 53-117) was Roman Emperor from 98 to his death, and led in person the imperial armies to victory in many lands. The famous Trajan column in his Forum at Rome was erected to celebrate his victories over the Dacians. Dacia, Armenia, and Mesopotamia were all brought under his sway. His rule was enlightened, and he was held in great honour by the people.

Tree, Sir Herbert Beerbohm (b. 1853), the London actor-manager who has scored successes at the Haymarket and His Majesty's Theatres, and whose ability as a character-actor has earned him a great reputation in very many dissimilar parts. His later productions have included many Shakespearean revivals, and a number of original pieces and adaptations from novels, among which may be enumerated "Oliver Twist," "Colonel Newcome," "Edwin Drood" (1908). He was knighted in 1909.

Treloar, Sir William, Bart. (b. 1843), has for many years been a prominent member of the London Corporation. Was elected to the Common Council in 1881, became Alderman in 1892, was Sheriff in 1899, and Lord Mayor 1906-1907. Knighted in 1899, Bt. 1907. His work for the relief of crippled children has been insistent, long-continued, and highly beneficial.

Trench, Richard Chenevix (1807-1886), Anglican ecclesiastic, poet, scholar, and miscellaneous writer; a divine and prelate of distinction and an author of outstanding ability. Born in Dublin and educated at Harrow and Trinity College, Cambridge, he was Hulsean Lecturer in 1845, and a Professor at King's College, London, in 1847. Dean of Westminster in 1865, he was preferred to the Archbishopric of Dublin eight years later, and held the Primacy of Ireland for a decade. His publications included volumes of "Poems," "Parables," "Miracles," "Lectures on Medieval Church History," and numerous philosophical works.

Trevelyan, Rt. Hon. Sir George Otto (b. 1838), was educated at Harrow and Cambridge, and spent some years in the Indian Civil Service. In 1865 entered Parliament as a Liberal, and in 1868 was Civil Lord of the Admiralty in Mr. Gladstone's first Ministry. In 1880 he was Parliamentary Secretary to the Admiralty, and in 1882 Chief Secretary for Ireland. Was afterwards Chancellor of the Duchy of Lancaster, and Secretary for Scotland, but separated himself from Mr. Gladstone on the Home Rule question. Was again Secretary for Scotland from 1892-1895, and retired from political life in 1897. As a writer Sir George has attained no mean reputation; his *Life and Letters of Lord Macaulay* is one of the best of modern examples of biography, and since leaving public life he has made his mark as an historian by his book on the American Revolution. He is also author of a *Life of Charles James Fox*, of a witty production entitled *The Ladies in Parliament*, and *Interludes in Verse and Poetry*, published in 1905.

Treves, Sir Frederick, 1st Bart. (b. 1853), a skilful surgeon, who was Sergeant-Surgeon-in-Ordinary to King Edward VII. from 1901, in which capacity he successfully operated upon the King for perityphlitis prior to the Coronation. Retired from practice in 1903. Has placed his skill at the service of the military authorities on many occasions, and was Consulting Surgeon on the spot to the forces in South Africa in 1900. Sir Frederick was made K.C.V.O. in 1901, and created a baronet in 1902.

Trevithick, Richard (1771-1833), a Cornish mine-manager's son, who won enduring fame by the invention of the road-locomotive, putting upon the highway on Christmas Eve, 1801, the first steam-propelled vehicle for the conveyance of passengers; starting another in London streets in 1803, and applying the idea to a tramline laid in Wales the year following. The Stephensons took up Trevithick's principle, and hence came the railway as well as road locomotion. He constructed, in 1808, a curving railway near where Euston Station now stands in London, carrying passengers round circular sweeps at twelve to fifteen miles an hour by the traction of his locomotive.

Trollope, Anthony (1815-1882), was the second son of Mrs. Trollope (1776-1863), the novelist, and himself the author of many popular novels. His *Barchester* series, in which he depicted a number of scenes of higher clerical life with great fidelity and success—*Framley Parsonage*, *Barchester Towers*, *The Small House at Allington*, and *Orley Farm*—were among the best of his stories.

Tryon, Admiral Sir George (1822-1893), was a distinguished English naval officer, who rose to high rank, and in 1891 was appointed to the command of the Mediterranean fleet. A mistaken order caused a collision between his flagship and another vessel in 1892, during some naval manoeuvres, when the Admiral and many of the crew lost their lives.

Tschalkovsky, Peter Ilitch (1840-1893), a Russian musical composer of great force and originality, whose orchestral pieces are full of subtle beauties and grace. He was professor at the Conservatoire of St. Petersburg from 1866 to 1878.

Tullius, Servius, was, according to tradition, the sixth King of Rome, who reigned 578-534 B.C., and reformed the constitution and extended the city limits, building also the Serran wall.

Tulloch, Dr. John (1823-1882), an eminent Scottish Divine, and Moderator of the Established Church in 1878. He was educated at and became Principal of St. Andrew's, and was the writer of learned philosophical and historical works, and a man of much influence upon the religious thought of his time.

Tupper, Sir Charles, Bart., G.C.M.G. (b. 1821), for 35 years member of Nova Scotian and Canadian Parliaments, Premier of the former, 1864-7; of the latter in 1866; High Commissioner in England 1887 and 1888-90, published his biography in 1914.

Tupper, Martin Farguhar (b. 1688), a student of some pretensions, who abandoned law for literature, and is best remembered by his "Proverbial Philosophy" (three series) at one time widely read.

Turenne, Vicomte de (1611-1675), was a famous French commander and Marshal of France, who was highly successful in the Thirty Years' War, when he commanded the United French and Swedish forces. He was killed at Salzbach, and his remains were translated to the Church of the Invalides in 1800.

Turgot, Anne Robert Jacques (1727-1781), a political economist, France, who held high positions of State, advocated many of the measures which the Revolution afterwards carried, and was dismissed from the position of Controller-General of France by the King in consequence.

Turner, Joseph Mallord William (1775-1851), was the son of a London barber, but while quite a child showed the possession of artistic genius. In 1789, after some miscellaneous schooling, he entered the Royal Academy classes, and soon began to make his way, being elected A.R.A. in 1799, and four years later R.A. Of his larger pictures, may be mentioned "The Sun Rising through Vapour," "Crossing the Brook," "Dido building Carthage," "The Fighting Temeraire," and "Calais Pier."

Ruskin in his *Modern Painters* wrote with great eloquence and critical insight regarding Turner's work, and brought about a fuller appreciation of his genius. He was never married, and took little interest in anything outside his art. He left the oil paintings and drawings he had presented to the National Gallery. He bequeathed the fortune of £20,000 for founding an institution for the decayed English artists, but the will was disputed by his next of kin, who succeeded, owing to the want of clearness in the testator's wording of his desire, in obtaining the greater part of the estate, with the exception that £20,000 went to the Royal Academy, and the whole of the pictures and drawings to the nation.

Turner, Sharon (1768-1847), a painstaking writer whose *History of the Anglo-Saxons* (in four volumes) and *History of England* (published later, were works of considerable literary value.

Tussaud, Madame (1760-1860), a Swiss who, while practising the art of modelling in wax in Paris at the time of the French Revolution, made her escape to England and set up a small exhibition of wax figures in Marylebone Road, which became such an attraction that she was encouraged to extend it. The present Tussaud collection is the result.

Twain, Mark. (See *Clemens, Samuel L.*)
Tweedmouth, Edward Marjoribanks, 2nd Baron (1840-1909), a prominent Liberal peer who served as Whip to his Party when a member of the House of Commons, and was in turn Chancellor of

the Duchy and Lord Privy Seal under the Earl of Rosebery, and First Lord of the Admiralty under Sir H. Campbell-Bannerman.

Tyler, Wat, or "Wat, the Tyler," stands out in Britain's historical record as the leader of the peasants' revolt of Richard II's time against the iniquitous poll-tax. Over 100,000 peasants followed Tyler into London in June, 1381, and the king met them in Smithfield and made promises of redress that were never fulfilled. It was at this meeting that Sir William Walworth, Lord Mayor of London, stabbed Tyler with a dagger, and afterwards handed him over to his followers to kill outright.

Tyndale, William (1484-1536), was educated at Oxford, and conceived a strong desire to be the medium of presenting the Bible to his countrymen in their own language. He set about this work with great earnestness, and for some years, first in England and then in Germany, continued his task, completing the translation of the New Testament at Wittenburg, where he was associated with Luther. This version was first published at Antwerp, and then found its way to England, where it was publicly burnt at St. Paul's Cross. Tyndale afterwards was associated with Miles Coverdale in a translation of the Old Testament, but only completed the Pentateuch and the book of Jonah. Antwerp was Tyndale's retreat during this later period, and in 1535 he was arrested for heresy and put to death by strangling and burning.

Tyndall, John (1820-1893), was an eminent scientist who, in 1852, became Professor of Natural Philosophy at the Royal Institution, a position which he retained until 1891. His books on *Light, Sound, and Heat* are well-known text-books. He ranked amongst the foremost thinkers and writers of his time, and was a zealous materialist. Professor Tyndall was an inveterate mountaineer, and much noted for his tireless investigations of magnetism.

Tyler, Patrick Fraser (1791-1849), was a Scottish historian. Was born at Edinburgh, and after a course of education at the University, devoted himself largely to literary work, producing a number of miscellaneous biographical and historical studies, and finally, at the suggestion of Sir Walter Scott, he entered upon the chief work of his life—that of writing the *History of Scotland*, which is a monument of painstaking research in nine volumes.

U

Udal, John, was a Puritan Divine who died in prison in London, in 1592, under condemnation of heresy in connection with his writings for the Marprelate press. Was the author of the first Hebrew grammar printed in English, entitled *A Key to the Holy Tongue*.

Udall, Nicholas (1595-1556), was a quaint humorist, whose rollicking comedy, *Kalypso Roister Doister*, is the first English sample of that kind of composition. He was for a time head-master of Eton, and was patronised both by Henry VIII. and Mary.

Uhland, Johann Ludwig (1787-1862), a German poet who won great fame by his ballads and songs. He caught much of the old ballad spirit, and invested his themes with a weirdness that made them very impressive; most of them have been translated into English by Longfellow, Skeat, and others. Uhland was for a few years Professor of German Language and Literature at the Tubingen University.

Unwin, Prof. William Cawthorn F.R.S. (b. 1838), an eminent civil engineer and physical scientist, and authority on hydraulics and bridge-construction, concerning which he has read before the Royal Society and British Association important papers and published various learned works. He has been professionally connected with the City and Guilds of London Institute and the Royal Indian Engineering College.

Ursula, St., is said to have been an English princess, who with 11,000 virgins set out on a pilgrimage, but compelled by a fierce storm to take

refuge in Cologne, was there put to death with her following by an army of Huns. She is a Saint of the Roman Calendar, and relics exhibited at the Church of St. Ursula at Cologne, for which miraculous powers were claimed, have been the object of veneration by countless pilgrims.

Usher, or Ussher, Bishop James (1581-1656), was born in Dublin and educated for the Church. He was Bishop of Meath from 1629 to 1652, and in the later year was created Archbishop of Armagh, which post he held until the Irish rebellion of 1647 forced him from the country. Charles I. then appointed him to the see of Carlisle, but the disorder caused by the Civil War prevented his taking up the position. He was then made Preacher at Lincoln's Inn, and while holding that position wrote the theological works on which his reputation chiefly rests. His *Annals of the Bible* and *Notes on the Old Testament* was a chronological outline of the world's history.

Uvarov, Count Sergei (1785-1853), Russian statesman and scholar. President of the St. Petersburg Academy of Science, and Minister of Public Instruction. Did much to promote higher education, and wrote some useful works on language, literature, and politics.

V

Valentin, Arthur A., 11th Viscount (b. 1843). Premier baronet of Ireland, a Conservative statesman who held the office of Comptroller of the Royal Household 1898-1905, and has done service as one of the Parliamentary Whips of his Party. Interested in local government and served with distinction with the Yeomanry in the South African War.

Valentine, St., was a Christian martyr of the reign of the Emperor Claudius (c. 270-275). His festival was commemorated on February 12, before Gregory the Great's time. The custom of sending valentines had its origin in a heathen practice associated with the worship of Juno about this date in the calendar, and had no connection with the saint. It was believed anciently that the birds began annually to pair on the day upon which Juno was honoured as referred to, and Juno and Valentine became a conventional interwoven in one popular observance which underwent variant development.

Vamberg, Arminius (1822-1913), a celebrated Orientalist and traveller who mastered many languages and travelled in many lands. His works include *Travels in Central Asia*, *Wanderings and Adventures in Persia*, *Manners in Oriental Countries*, *The Turkish People*, and *The Coming Struggle for India*.

Vanbrugh, Irene (Mrs. Dion Boucault) and **Vanbrugh, Violet** (Mrs. Arthur Bourchier), are the stage names of two talented and talented actresses, the daughters of the late Rev. R. H. Barnes, who was a Preliminary of Exeter Cathedral. Both have played many parts with charm and distinction in comedy and drama.

Vanbrugh, Sir John (1666-1726), was a prominent architect as well as a successful dramatist. Among his architectural triumphs may be mentioned the palatial edifices of Blenheim and Castle Howard. Of his dramatic successes it is enough to mention "The Relapse," "The Provoked Wife," and "The Confederacy," the two former of which were especially successful.

Vancouver, George (1758-1798), a British navigator who served under Captain Cook in his second and third voyages, and later undertook an expedition to the Pacific, during which he explored the Gulf of Georgia and the Straits of San Juan de Fuca, as also the shores of what later became known as Vancouver Island. He left an interesting narrative of his discoveries, which was published after his death.

Vanderbilt, Cornelius (1794-1877), a noted American merchant and railway speculator, who accumulated a fortune of twenty millions sterling. His son, William Henry Vanderbilt (1821-1885), inherited the bulk of the wealth of the elder railway

king's wealth, and added thereto by operations in the same direction.

Van Dyck, or Vanduyke, Sir Anthony (1599-1641), was born at Antwerp, and after studying under Rubens went to Italy and there made a name as a portrait painter. In 1629 he came to England on the invitation of Charles I., but only remained a short time; in 1631 Charles prevailed upon him to return, made him a knight, granted him an annuity, and he became the Society painter of the day.

Yane, Sir Harry (1613-1662), was a prominent statesman and diplomatist who at one time was governor of Massachusetts. In 1640 he was elected to the British Parliament, and one of the Council of State under Cromwell. At the Restoration he was arrested as an enemy to the State, and ultimately beheaded on Tower Hill.

Van Tromp, Admiral (1597-1653), a famous Dutch commander who after many victories over the Spanish fleet was opposed to that of England during the Commonwealth, and fought gallantly in five engagements, being killed in the last encounter with Monk's ships.

Vasari, Giorgio (1511-1574), was born at Arezzo, and was eminent alike as an architect, painter, and a writer. His fame chiefly rests, however, upon his well-known work *The Lives of the Most Excellent Painters, Sculptors and Architects*.

Vasco de Gama. (See Gama.)

Vashti, queen of King Ahasuerus, who, according to the Scripture, lost the royal favour and was divorced, being succeeded by Queen Esther.

Vauban, Sébastien (1633-1707), was a renowned French military engineer, who introduced great improvements in methods of fortification, became Commander General of Fortifications under Louis XIV., and was made Marshal of France. He invested France with an entirely new series of fortifications, conducted fifty-three sieges, and took part in 140 battles.

Vaucanson, Jacques de (1709-1782), a clever French mechanician, who invented and exhibited some wonderful working automata, including a life-like flute-player, a tambourine and fife-player, and a duck which went through the movements of eating and drinking, and "cuck" quite naturally. He also devised improvements in weaving machinery that to a certain extent anticipated the Jacquard loom.

Vaughan, Father Bernard (b. 1847), brother of the late Cardinal Vaughan, a fearless Romanist preacher, whose fulminations against the sons of the "smart set" from the pulpit of the Farm Street Jesuit Church in London in 1906 created considerable consternation in Society.

Velasquez, Diego (1465-1533), a Spanish soldier and companion of Columbus, who was sent to conquer Cuba. Velasquez founded Santiago and Havana, and despatched Cortés to Mexico, afterwards quarrelling with the latter over the spoils, and dying, it is said, of vexation at his failure to get the better of Cortés.

Velasquez, Diego (1599-1660), was a famous Spanish painter, whose pictures rank among the finest in Spanish art. His style was sombre and dramatic, but he invested his works (especially his portraits) with such a natural force that they never lack in distinction. He held a court appointment to Philip IV. His "Adoration of the Shepherds" is at the National Gallery.

Vardi, Giuseppe (1813-1907), the most popular composer of Italian opera of the 19th century. Was the son of poor parents, and, showing an early talent for music, was put in the way of obtaining an adequate musical training. His first opera to obtain anything like popularity was his "Nabuccodonosor," produced in 1845. "Il Lombardi" followed in 1843, and "Ernani" in 1844, which were even greater successes, and gave him a first place among European composers. In 1851 he produced "Rigoletto," and in the next few years "Il Trovatore," and "La Traviata." In 1871 he astonished the world by the production at Cairo of an opera conceived on really great lines. This was "Aida," which was followed at intervals by "Otello," and "Falstaff."

Varne, Jules (1828-1905), was one of the most popular authors of wonder-stories in Europe. The best-known of his numerous works are *Few Weeks in a Balloon*, *A Journey to the Centre of the Earth*, *Twenty Thousand Leagues under the Sea*, *Round the World in Eighty Days*, and *Michael Strogoff*.

Vernet, Horace (1789-1863), was a distinguished French painter of battle-pieces, the best of which are in the galleries of Versailles and the Louvre. Both his father, Carle Vernet (1758-1835), and his grandfather, Claude J. Vernet (1714-1789), were also painters of note, the former excelling in historical and military subjects, and the latter in marine and landscape pictures.

Vernier, Pierre (1580-1637), an ingenious Spaniard, who invented the mechanism of the *vernier* auxiliary scale, enabling lines and angles to be measured to a much more minute degree than had previously been possible. The vernier, however, is now superseded for the most part by micrometer-screws.

Veronese, Paul, or Paolo Callari (1528-1588), a celebrated Italian painter of religious subjects, who was great as a colourist and produced some of the most important works of his time. His "Marriage Feast at Cana in Galilee," "The Feast in the House of Simon," and "The Presentation of the Family of Darius to Alexander," are paintings of world-wide celebrity, while his "Adoration of the Magi," in our National Gallery, is a grand work. Alessandro Veronese (1582-1648) is the name by which another Italian painter (of historical pictures) is generally known, but the two are in no way to be confounded, the latter's real surname being Turchi.

Veronica, St., a legendary Saviour of Jerusalem, who was said to have handed to Christ his kerchief on His way to Calvary. The old belief was that the Redeemer wiped His brow therewith, leaving on the handkerchief a miraculous impression of His face, the so-called "Veronica." The Saint is commemorated on February 4th.

Vespasian (9-79), was Roman Emperor during the last nine years of his life. At one time he commanded the Roman army of occupation in Britain. Later he saw active service in A.D. 69, where he held the position of Pro-Consul, and A.D. 70, when he made war upon the Jews. He interested himself in the building of the Colosseum.

Vespucci, Amerigo. (See "Amerigo.")

Victor Emmanuel II. (1820-1878) was King of Sardinia from 1849 to 1861, became King of Italy, according to the Proclamation of the Sardinian Senate; but it was not until 1870, when the unification of Italy was fully secured, that the title came to have its true significance.

Victor Emmanuel III. (b. 1869), son of Humbert I. and grandson of Victor Emmanuel II., succeeded his father as King of Italy in 1900.

Victoria (1819-1901), Queen of Great Britain and Ireland and Empress of India, was daughter of the Duke of Kent, and came to the throne in 1837 on the death of her uncle, William IV., being crowned in Westminster Abbey in the following year. In 1840 she married Prince Albert of Saxe-Coburg-Gotha, who died in 1861. There were nine children of the marriage, namely: Victoria Adelaide, Princess Royal, born 1840; Albert Edward, Prince of Wales, 1841; (Edward VII.); Alice Maud, 1843; Alfred Ernest, 1844; Helena, 1846; Louise, 1848; Arthur, 1850; Leopold, 1853; and Beatrice, 1857. Of these Edward VII. died in 1901; the Princess Royal, who was married to Prince Frederick William of Prussia, became Empress of Germany, and was the mother of the present Emperor of Germany, died in 1901; Princess Alice, who married Prince Louis of Hesse Darmstadt, died in 1878; Prince Alfred (Duke of Edinburgh) and afterwards of Saxe-Coburg died in 1900; whilst Prince Leopold died in 1884. Lord Melbourne was Prime Minister at the date of the Queen's accession, and for a number of years the country lived through troublesome times, the Corn Law and Chartist agitations being at times very threatening, but a more settled condition of things supervened, and for the remainder of the long and illustrious Victorian reign there was no serious home

unrest. The principal events, beyond the bounds of the United Kingdom, of her Majesty's reign were the Crimean War, the Indian Mutiny, her proclamation as Empress of India, and finally the Boer War. The Jubilee of Queen Victoria's accession was celebrated in 1887, and the Diamond Jubilee ten years later.

Vieuxtemps, Henri (1820-1881), a celebrated Belgian violinist who was an executant of much power and dexterity, and for many years appeared at the leading London concerts, and was an equal favourite in the various European capitals. He also composed numerous fine pieces for the violin.

Villars, Duc de (1653-1734), a noted French diplomatist and military commander who was in turn Ambassador at Munich and Vienna, became Marshal in 1702, lost the battle of Malplaquet in 1709, defeated Eugene in 1713, and captured Milan in 1733 during the Lombard War.

Villeneuve, Pierre (1763-1806), the French naval commander who was opposed to Nelson at Trafalgar and captured along with his ship, the *Bucentaure*. For a time he was held a prisoner in England, and felt his defeat so keenly that on his release and return to France he committed suicide.

Villiers, Charles Pelham (1802-1898), was one of the Free Trade leaders of the Golden and Bright, an untiring worker and an eloquent advocate of the cause. He represented Wolverhampton in the House of Commons from 1835 to 1867. He was a brother of the fourth Earl of Clarendon.

Villiers, Geo. Wm. Fredk., 4th Earl of Clarendon. (See Clarendon.)

Villon, François (1431-1461), was a clever French adventurer and poet, who lived an unscrupulous, romantic life in quarrelsome times. Although mainly a vulgar vagabond, he had the poetic gift and a lively fancy, and in his calmer moments could throw off a song or a ballad with the best. Many of these compositions have been preserved.

Vincent, Sir C. E. Howard, M.P. (1849-1908), a prominent Conservative politician, and an enthusiastic Protectionist, who had been in the Army, and was learned in the law, besides distinguishing himself as Director of Criminal Investigation.

Virchow, Rudolf (1821-1902), a celebrated German anatomist and physiologist, the founder of cellular pathology, professor first at Wurzburg and then at Berlin, he also figured as a politician, and was one of the leaders of the Progressist and later of the German Liberal Party in the Reichstag.

Virgil (70-19 B.C.), the great Roman epic poet. Was born near Mantua, and cultivated a farm in the adjacent village of Andes. He proceeded to Rome in his thirtieth year to obtain redress for the occupation of his lands by the military. Became known to Octavian and Mæcenas, and, having had his demand satisfied, began the writing of his *Eclogues*. The *Georgics* followed in his forty-third year, after which he began his most famous work, the *Æneid*, which, when completed, comprised twelve books, dealing with the story of the wanderings of Æneas after the destruction of Troy. The poet resided in Rome during his later years, and became wealthy.

Virginius, Lucius, was, according to legendary history, a Roman centurion, whose daughter, Virginia, having attracted the eye of Appius Claudius, the latter instructed one of his retainers to lay claim to the girl as his slave. Appius Claudius himself presided at the tribunal, before which the claim was heard, and awarded the girl to his dependant. At this point, the enraged father, rather than see his daughter handed over to dishonour, killed her in the presence of the court. This was the signal for a popular rising, Virginius was proclaimed tribune, and Appius Claudius cast into prison, where he committed suicide.

Vitus, St. Roman Catholic saint and martyr, who lived in the 4th century. It used to be the custom to dance before his shrine on his festival day, June 12th, in the belief that good health was thereby ensured for the next twelvemonth. The nervous ailment, St. Vitus' dance, derives its name from this practice.

Volta, Count Alessandro (1745-1827), was born at Como, and became Professor of Natural Philosophy both there and at Pavia University. In the course of his studies in electricity he discovered the voltaic pile, giving his name thereto, and also to the electrical unit, the volt. To Count Volta is due also the invention of the electroscop.

Voltaire, François Marie Arouet de (1694-1778), one of the greatest of French philosophers and writers, who was educated for the bar but preferred literature. His first essays offended the authorities, and he lived in London for a couple of years (1726-1728), and there wrote some of his dramas. Returning to France, he published his *Philosophical Letters*, which aroused the enmity of the priesthood to such an extent that the book was publicly burned. At this juncture, the Marquise du Châtelet offered him the asylum of her castle of Cirey, and for the next fifteen years he made this his home, and there wrote some of his most famous works—*Discourses on Man*, *Essay on the Morals and Spirit of Nations*, *Age of Louis XIV.*, among the rest. From 1750 to 1753 he lived in Berlin, on the invitation of Frederick the Great. Later he resided mostly at Ferney.

Yorck, a famous British prince who, when at war with the Persians, was aided by the Calcutta in the Jute pirates, Hengist and Horsa, to his aid, and so secured victory.

W

Wace, Very Rev. Henry. D.D. (b. 1836), Dean of Canterbury since 1903, formerly Principal of King's College, London; author of numerous important theological works.

Waddington, William Henry (b. 1826, d. 1894), French statesman and archaeologist; Plenipotentiary at Berlin Congress, 1873; Ambassador to Great Britain, 1883-1893.

Wade, Benjamin Franklin, American statesman (b. 1800, d. 1878), anti-slavery leader and acting Vice-President of the U.S.A., under Johnson.

Wagner, Richard (1813-1883), born at Leipzig, was the composer who exerted the greatest influence upon musical art during the 19th century. He revolutionised operatic methods, and doing away with set ballads and choruses, endeavoured to give the same unity of action to an opera as would be realised in a play without music. This continuity of musical thought and action was a long time in forcing itself into acceptance, but to-day is acknowledged as the only adequate interpretation of dramatic musical expression. Wagner fought for his position with great pertinacity and courage, but it was not until the King of Bavaria enabled him to indulge his aims to their full development that he realised his ambition. At the famous opera house at Bayreuth were produced all the later Wagnerian operas of the "King des Nibelungen" tetralogy. His last work, "Parsifal," given in 1882, shows the fullness of his powers.

Wain, Louis (b. 1860), a clever artist and animal caricaturist, widely popular for his humorous and fanciful drawings of cats, concerning which he is an expert. President of the National Cat Club.

Wakefield, Gilbert (1750-1801), a theological and classical writer, who became Principal of Hackney College, and before becoming a Nonconformist was in Anglican Orders. He was a violent pamphleteer, and suffered imprisonment for two years for a particularly bold attack upon the Bishop of Llandaff.

Wakefield, Rt. Rev. Henry Russell, D.D. (b. 1854), Bishop of Birmingham, has been an indefatigable worker on behalf of social betterment and unemployment, was the Rector of St. Mary's, Bryanston Square, 1891-1900. Dean of Norwich, 1900-1911, and Mayor of St. Marylebone, 1903-1905.

Walker, Frederick (1840-1895), a clever painter and black-and-white artist, who from 1860 to his death had a very promising career, and produced many works that are highly valued.

Walker, Frederick William (1830-1910), was High

- Master of St. Paul's School, London, from 1896 to 1905; an eminent classical and mathematical scholar.
- Walker, General Sir Frederick William E. F. Forester** (1844-1910); served in Kaffir War 1877-1878; Zulul War 1879; commanded troops in 1897-1898-1899; Lieut.-Gen. in command of Lines of Communication, South Africa Field Force, 1899-1900.
- Walker, George**, the hero of the siege of Londonderry, in 1688, a clergyman, who, after Lundy's desertion, took command of the defence of the town and kept the besiegers at bay for 105 days. Two years later he was killed at the Battle of the Boyne.
- Wallace, Alfred Russel** (1822-1913), the celebrated naturalist, a native of Uxbridge, attracted much notice as far back as 1853 by his book *Travels on the Amazon*, detailing his experiences in that region. In 1883, while down with illness in the Moluccas, the idea of the evolution theory occurred to him, and curious to say, he drafted his first notes upon it and sent them to Darwin in England while the latter was on the eve of publishing his own exposition of the theory, the result being the reading of a joint paper on the subject to the Linnean Society. The coincidence was fully acknowledged by Darwin. There are differences, Sir Alfred, between the points of view of the two thinkers. Wallace's *Descentism* fully expresses his own views on the subject. He also wrote on *Miracles and Modern Spiritualism*. He enjoyed a Government pension from 1891, and in 1905 published a deeply interesting autobiography.
- Wallace, Sir Donald Mackenzie** (b. 1841), journalist, traveller, and picturesque miscellaneous writer. Accompanied the present King and Queen (then Duke and Duchess of York) on their Colonial tour in 1901 as assistant private secretary and official recorder. Edited the tenth edition of the *Encyclopædia Britannica*, and has written notable books on Russia and Egypt, and a volume entitled *The Web of Empire*.
- Wallace, General Lewis** (1827-1905), a popular American novelist; served in the Mexican and Civil Wars, and was Governor of New Mexico from 1876 to 1881, and subsequently Minister to Turkey. His first literary work was *A Tale of the Conquest of Mexico*, and seven years later his historical romance, *Ben Hur: A Tale of the Christ*, made him famous.
- Wallace, Sir Richard** (1828-1895), son of the Marquis of Hertford, and inheritor from him of a famous collection of pictures and other works of art, to which he himself added largely. This collection was bequeathed to the nation by his widow along with Hertford House, and now forms one of the most important exhibitions in London.
- Wallace, Sir William** (circa 1270-1305), the great Scottish patriot and chieftain who led the Scottish armies with so much success against Edward I. that for a time the English were kept completely in check. Later, Edward defeated him at Falkirk, and finally in 1304 he was captured, taken to London, condemned for treason, and executed at Smithfield.
- Wallenstein, Albrecht von** (1583-1634), a great Bohemian general and Duke of Friedland, who, raising an army of his own, proceeded against the Lower Saxon League, and occupied a number of provinces as commander. This led to Gustavus Adolphus setting out to oppose him, and at the famous battle of Lützen, Wallenstein was defeated, though Gustavus Adolphus himself was killed. Wallenstein afterwards tried to obtain Bohemia for his own kingdom, but was assassinated.
- Waller, Edmund** (1605-1689), was one of the most graceful of English poets, who tuned his lyre to suit both the Cromwellians when they were a power, and Charles II. when his turn came. Suspected of being implicated in some plot against Parliament, he was fined and banished, but was allowed to return to England later. After the Restoration he became a favourite of Charles II., and had a high reputation among the fashionable people of that day.
- Waller, Lewis** (b. 1860 in Spain), a Grove actor, who established himself as a London favourite after much hard work on tour, as an interpreter of romantic leading and other parts.
- Walpole, Horace** (1717-1797), was the younger son

- of Sir Robert Walpole, filled a number of Government positions, and was a member of the House of Commons. He retired in 1768 to his favourite house at Strawberry Hill, and devoted himself to the writing of books and the accumulation of works of art.
- Walpole, Sir Robert** (1676-1745), was the great Whig statesman of the early part of the 18th century. He resolutely opposed the South Sea scheme, and showed enlightened views of financial policy. On becoming first Lord of the Treasury and Chancellor of the Exchequer in 1715, he evinced such boldness and capacity in handling the affairs of the country that a long term of office was assured to him. He was Prime Minister for twenty-two years, and propounded the then new theory that the extension of commerce would be best promoted "by making the exportation of our manufactures, and the importation of the commodities used in the manufacturing of them as practicable and easy as may be"; and he relieved from duty more than 200 export and forty import articles, a policy which greatly extended the scope of British commerce.
- Walpurga, St.**, was an abbess who emigrated in the 8th century from England to Germany, and became associated with the legends of Walpurgis Night in legendary lore. Her day in the calendar of the Church is May 1st.
- Walsh, Most Rev. Wm. J.** (b. 1847), Roman Catholic Archbishop of Dublin, 1885-1910, an eminent churchman of Irish birth, who became Professor at and President of Maynooth College, and was made Primate of Ireland in 1885. He has been closely associated with the Nationalist movement, has sat upon several Parliamentary Commissions, and had a hand in the framing of the Irish Land Acts of 1881 and 1885. Chancellor of the National University of Ireland.
- Walsingham, Sir Francis** (1530-1590), a British diplomatist and statesman, who was Ambassador to France, 1570-1573, and later Secretary of State and Chancellor of the Duchy of Lancaster. He was a strenuous opponent of Mary Queen of Scots, and a great patron of learning in his day.
- Walter, John**, the name borne by the founder of the *Times*, and also by the next two managing proprietors of the paper. The second John Walter was the leading spirit of the *Times* from 1833 to 1847, and it was his efforts that made the journal the greatest newspaper in the world.
- Walton, Izaak** (1593-1683), one of the most lovable of English writers and particularly famous as the author of *The Compleat Angler, or the Contemplative Man's Recreation*, which has gone through hundreds of editions and is still read with gratification by all followers of "the gentle art," as well as by lovers of country life generally. Up to the age of fifty he was a London draper.
- Walton, Sir J. Lawson, K.C., M.P.** (1840-1908), a leading man at the Bar and in Liberal politics, and the son of an Ex-President of the Wesleyan Conference. Appointed Attorney-General by Sir H. Campbell-Bannerman in his Government formed at the end of 1905, and died on January 7th, 1908.
- Warbeck, Perkin**, was for a time a Pretender to the English Crown. The son of a Tournai Jew, he claimed to be Richard, Duke of York, supposed to have been murdered in the Tower, and therefore entitled to the throne of England in preference to its then occupant, Henry VII. The Duchess of Burgundy declared him to be indeed "her dear nephew," and Charles VIII. of France and James IV. of Scotland also gave him their countenance, the first allowing him a pension, the second giving him the hand of his relative Lady Catherine Gordon in marriage. Warbeck was enabled in 1497 to appear in England at the head of a force of 7,000 men, but was easily defeated, and after some delay was tried for treason and hanged eventually at Tyburn on November 23rd, 1499.
- Warburton, William** (1658-1739) was a celebrated English divine, who from 1700 to his death was Bishop of Gloucester. He wrote a number of theological books which greatly exercised the clerics of the time, the work of his which awakened the

- greatest amount of controversy being the *Divine Legation of Moses*.
- Ward, Edward Matthew** (1816-1879), was a prominent English painter and R.A. who executed some of the frescoes in the Houses of Parliament and produced numerous large and notable canvases. Many of his pictures were engraved.
- Ward, Col. Sir B. W. D., K.C.B.** (b. 1853), was permanent Under-Secretary to the War Office 1901-13. He entered the army in 1874 and served with distinction in various parts of the world in later years, being with the Soulan Expedition in 1885, in the Ashanti War 1895-1896, and during the Ladysmith siege, was assistant adjutant-general, subsequently being appointed Director of Supplies for the South African Field Force.
- Ward, Mrs. Humphry** (b. 1851), is a granddaughter of Dr. Arnold, of Rugby renown, and wife of Mr. T. Humphry Ward. She first sprang into notice as a novelist with her *Robert Elsmere* in 1888, and since then has written several other stories which have, in the main, realised the high promise of her first work. These include *Marcia*, *Sir George Trevelyan*, *David Grieve*, and *Fennick's Career*.
- Ward, Hon. Sir Joseph G., K.C.M.G.**, Bart., Premier of New Zealand, 1906-1911. A vigorous personality and a strong supporter of the Unity of Empire. Attended the Imperial Conferences of 1909 and 1911.
- Ward, Leslie** (b. 1851), a portrait painter of considerable distinction, and widely famous as "Spy," the caricaturist of *Vanity Fair*.
- Warner, Charles Dudley** (1859-1900), American author and humorist, who was for a while absorbed in journalism, and later became associate editor of *Harper's Magazine*. His *Back-Log Studies*, *My Summer in a Garden*, *Being a Boy*, *Captain John Smith*, and other writings possess much charm.
- Warner, Susan** (1819-1883), an American novelist better known by her pen name of "Elizabeth Wetherell." Her books, *The Wide Wide World*, *Daisy*, *The Old Helmet*, gained her universal favour.
- Warren, Henry** (1798-1879), was a popular English painter of Oriental and Biblical subjects, and for a number of years was President of the Institute of Painters in Water Colours.
- Warren, Samuel** (1807-1877), was a well-known barrister and novelist, who by his *Diary of a Late Physician*, and *Ten Thousand a Year*, won a very considerable popularity. He was for many years Recorder of Hull, and later a Master in Lunacy.
- Warton, Joseph** (1722-1800), clergyman, poet, and miscellaneous writer, and for twenty-seven years Head Master at Winchester School. He edited Pope, and wrote a masterly essay on that poet.
- Warton, Thomas** (1728-1790), brother of the last named, was the author of a *History of English Poetry*, and for the last five years of his life was poet Laureate. He also filled the position of Professor of English poetry at Oxford, and was an esteemed authority on that subject.
- Warwick, Countess of** (b. 1861), wife of the present (5th) Earl, has been identified with many public movements for the betterment of her sex, and is an ardent advocate on the platform and in the Press of Socialism. She has established at Stodley a college for the agricultural training of women, a horticultural college and hostel at Reading for the daughters of professional men, a science and technical school for boys and girls in Essex, and a home at Warwick for crippled children.
- Warwick, Richard Neville, Earl of** (c. 1428-1471), "The King Maker," was the leader of the York party in the Wars of the Roses and carried his ambitious plan through with great energy and success. At the battle of Northampton he made Henry VI. captive, and afterwards proclaimed Edward, Earl of March, king under the title of Edward IV. Then, when Edward showed a disposition to resent Warwick's protection, the latter drove Edward from the country and once more placed Henry VI. on the throne. He lost his life at the battle of Barnet.

- Washington, George** (1732-1799), was of English descent, and was living on his American estate at Mount Vernon when the dispute between the British home government and the colonies broke out. He became one of the leaders of the local opposition, and later was elected to the first Congress at Philadelphia. The following year, 1775, saw him Commander-in-Chief of the American army, and from that time to the end of the struggle in 1783 he was trusted and adored by the people, and on the founding of the Republic became its first President in 1789. He served a second term of office from 1793 onwards, and refused election for a third time. He was one of the noblest characters in history—good, simple, honest, brave, and efficient.
- Watkin, Sir Edward** (1819-1901), a great English railway magnate in his day. Became Secretary to the Trent Valley line in 1845, and later was Chairman of the South Eastern, the Manchester, Sheffield and Lincolnshire the Metropolitan, and the East London Railway companies, and had a good deal to do with the founding of the Great Central. He fought hard for the promotion of the Channel Tunnel, and was a tireless worker for railway progress in all directions.
- Watson, Rev. John** ("Lantern Slane") (1818-1897), became a Free Church Minister in 1875, in 1886 removing to Sefton Park Church, Liverpool, the charge of which he retained until his retirement in 1905. In 1861 he came before the public as a writer of Scottish stories, and his *Beside the Bonnie Briar Bush* obtained an immense popularity. He followed this up with other popular stories and idylls, including *Kate Carnegie*, *The Days of Auld Lang Syne*, and *Young Barbarians*. He was on a lecturing tour in the United States when he died.
- Watson, William**, b. 1852 at Burley-in-Wharfedale, and educated at Liverpool. In 1880 his "Prince's Quest" was published, followed in 1884 by "Epigrams of Art, Life and Nature." These, however, attracted no special attention, but when 1890 he issued his "Wordsworth's Grave," it was felt that a new poet had arisen, and from that time everything he has published has been received with admiring appreciation. He has been in receipt of a Civil List pension of £100 a year since 1895.
- Watt, James** (1736-1819). Born at Greenock, this genius was originally a mathematical instrument maker, and being brought into touch with mechanical problems, conceived the idea of the steam engine, to which he afterwards devoted his life. Others had worked at the idea before him, but no very practical success had been obtained. Watt took out his first patent in 1769; the engine, however, was only used for mining operations until 1785, when it was applied to the working of a cotton factory, Watt being greatly aided in his developments of the engine by the business ability of his partner Matthew Boulton. His son James (1793-1848) was also a mechanical engineer of considerable ability.
- Watteau, Jean** (1684-1721), a French landscape painter of transcendent ability, and especially great in *genre*. His shepherd and shepherdess, rustic dance and fête scenes were wonderful for their harmonious brilliancy of coloration. His *chef-d'œuvre* is the "Embarquement for the Isle of Cythera" in the Louvre.
- Watts, Alario** (1797-1864), poet, miscellaneous writer, and editor of the *Literary Souvenir*, *Poetical Album*, and *Cabinet of Modern Art*. His *Lyrical of the Heart* contained some of his best poetry.
- Watts, George Frederick, R.A.** (1817-1904), occupied a unique place in English art, the majority of his works being marked by depth of thought and a poetic meaning which rendered them highly distinguished. His works are numerous, but among the best of them may be mentioned "Love and Death," "Hope," and "The Angel of Death." He bequeathed to the nation a large number of his finest pictures. His portraits of Swift, Keats, Carlyle, Cardinal Manning, Browning, and Tennyson are especially fine. He was one of the original members of the Order of Merit.
- Watts, Isaac** (1664-1748), the great English hymn

writer, was born at Southampton, and became a Nonconformist minister. It was mainly as a writer of hymns, however, that he became distinguished, some of his compositions being among the finest in the language, while others are the merest doggerel. Watts was the guest of Sir Thomas Abney for thirty-six years. His book on the *Improvement of the Mind* was at one time exceedingly popular.

Watts, Sir Philip (b. 1830), a great naval architect and Director of Naval Construction to the Admiralty, 1901-11. Designed the first *Dreadnought* launched in 1906.

Watts-Dunton, Theodore (b. 1836), a native of St. Ives, Huntingdon, educated for the law and practised as a solicitor in his native town for some years. Showing a strong literary bent, however, he settled in 1872 in London, and at once took up a prominent position as a critic—especially as a critic of poetry. From 1875 to 1898 he was the chief critic of poetry for the *Athenaeum*. Mr. Watts-Dunton, published the *The Coming of Love* in 1897, and in 1898 his brilliant romance *Aylwin*.

Watts, Edwin (1817-1890), the Lancashire poet and writer of dialect sketches and stories, the best among the latter being his *Yuffs of Heather*, *Chimney Corner*, and *Bessie's Story*. His *Lancashire Verse* contains many of these tender and pathetic, despite their difficult phraseology to non-Lancastrians—were first collected in 1850.

Weardale, Philip Stanhope, 1st Baron (b. 1847). Liberal member for Wednesday (1886-1892), Burnley (1893-1900), and the Harborough Division from 1904 until his elevation to the Upper House upon the Liberals succeeding to power at the end of 1905. He is one of the trustees of the National Gallery.

Webb, Sir Aston, R.A. (b. 1840), one of our foremost latter-day architects, and the designer of the general scheme of the Victoria Memorial in front of Buckingham Palace, also of the projected new façade of the palace, the new Birmingham University, the Britannia Naval College at Dartmouth, and many other fine structures.

Webb, Matthew (1848-1893), an intrepid swimmer, who in 1875 swam the English Channel in twenty-two hours, and was drowned eight years later in an attempt to swim through the Niagara rapids.

Webb, Sidney (b. 1839), an active Progressive politician, and writer on economic questions. Was a member of the London County Council, 1892-1910, and is one of the Senate of London University. He has written a *History of Liquor Licensing*.

Weber, Carl Maria von (1786-1826), was a distinguished German opera composer. He was for some years Chapel-master to the King of Saxony at Dresden. His best known opera, "Der Freischütz," was immensely popular, and is still frequently given. Other favourite works of his are "Oberon," and "Euryanthe."

Webster, Benjamin (1800-1882), a London actor-manager of much popularity in his day. Built the Adelphi Theatre in 1828, and was later lessee of the Olympic. He was a fine comedian.

Webster, Daniel (1792-1852), was a famous United States lawyer and politician. He was for many years Secretary of State, and rendered splendid service to his country. It was as an orator, however, that he was chiefly famed, being the most eloquent public speaker of his time.

Webster, Noah (1793-1843), the famous American lexicographer and grammarian, whose *Lawyer's Dictionary of the English Language* was a monumental achievement. He wrote extensively also on literary and political themes, and produced a brief history of the United States.

Wedgwood, Josiah (1730-1795), was the most famous of English potters. He was born at Burslem. Served an apprenticeship that carried him through all the branches of the trade, and in 1759 was able to set up in business for himself with money he had saved. He persevered through failure after failure, and in a few years produced such an improved form of ware that it came into great demand. He engaged Flaxman to make classical designs for him, and his

pottery became the fashion, and led to a great extension of the Staffordshire earthenware industry. His works at Etruria were the most extensive of the kind in the kingdom.

Wells, Harrison (1824-1906), artist, journalist, author, and authority on poultry and pigeons. Wrote *Our Poultry and All About Them*, the preparation and illustration of which occupied him for twenty years, and contributed countless animal drawings and stories to the illustrated press.

Welsmann, August (b. 1824), a noted German natural scientist, particularly distinguished in zoology, of which he was appointed Professor at the University of Freiburg in 1867. Author of numerous learned works on heredity.

Weldon, Bishop, J. E. C. (b. 1824), a distinguished Greek scholar, now Dean of Manchester. Has been successively Head Master of Dulwich College, Chaplain in Ordinary to Queen Victoria, Head Master at Harrow, Bishop of Calcutta and Metropolitan of India, and Canon of Westminster, which he left for the Manchester Deanery in 1906.

Welllesley, Marquess of (1760-1842), elder brother of the great Duke of Wellington, and himself a statesman of note, who was in turn Governor-General of India, Ambassador at Madrid, Foreign Secretary, and twice Lord-Lieutenant of Ireland.

Wellington, Arthur Wellesley, Duke of (1769-1852), was the most famous British general of the 19th century. He was a younger son of the Earl of Mornington, and entered the army in 1787. His first experience of active warfare was obtained in India, where he acquitted himself so well that he was knighted on returning home in 1805. He next found himself pitted against the army of Napoleon in the Peninsular War, and scored a brilliant victory over Soult at Talavera in 1809. A number of equally important victories followed; Ciudad Rodrigo and Badajoz were captured; another triumph was achieved at Salamanca; then came the battle of Vitoria, which was such an overwhelming defeat for the French that the abdication of Napoleon and the entry of the allied forces into Paris became inevitable. Peace was proclaimed, and Wellington returned to England, and was received as a hero. In 1814 he was British Ambassador at Paris. Then came Napoleon's escape from Elba, the short and sharp campaign which terminated at Waterloo, and the final overthrow of Napoleon. Honours and gifts were showered upon Wellington, and he was the most prominent man in the Empire. From 1828 to 1830 he was Prime Minister. From 1824 to his death he held the position of Commander-in-Chief. His funeral at St. Paul's was one of the great pageants of last century.

Wells, C. J. (1800-1879), a gifted but neglected poet, the schoolfellow of Keats, and author of a fine dramatic poem "Joseph and His Brethren," ranked by Swinburne very highly indeed.

Wells, H. G. (b. 1866), one of the most imaginative or living English novelists, who lets his fancy loose upon the world of science and creates new conditions, inventions, and forces, weaving them all into a texture of seeming actuality with a possibly remote future as his background. His *Time Machine*, *The Wheels of Chance*, *The Invisible Man*, *The War of the Worlds*, *The Food of the Gods*, and *Mankind in the Making*, *New Worlds for Old* (1907), and *War in the Air* (1908), are all books of mark.

Werner, Friedrich (1768-1823), a German romantic poet and dramatist, founder of the "fate-tragedy" school. Among his dramas may be mentioned "Martin Luther," "The Sons of the Valley," and "The Cross on the Baltic." He entered the priesthood after three unfortunate matrimonial experiences.

Wesley, Charles (1708-1788), brother of John Wesley, the founder of Methodism, and the poet of that denomination. Wrote a large number of hymns for almost all religious occasions, many of them of enduring merit.

Wesley, John (1703-1791), the founder of the great religious communion of the "people called

Methodists," and the son of a clergyman or the Anglican church. Taking orders himself, in 1735, he went to Georgia as a missionary and allied himself with the Moravians, but later he abandoned all ecclesiastical traditions, and established on a wonderfully well-devised basis, the connexion called by his name. His own open-air preaching was powerful in the extreme, his energy and depth of purpose inspiring, and his organising ability exceptional. He accomplished a great work of religious revivification, taking the world as his parish; and profound was his conviction of his high calling as an Evangelist, John Wesley "built better than he knew" in rearing the denominational edifice which is the monument of his faith and strenuousity.

West, Benjamin (1738-1820), was born in America, but settled in England in 1762, and soon acquired a high reputation as a painter of religious and historical pictures. In his own day his larger paintings, such as "Christ Healing the Sick," "Penn's Treaty with the Indians," "The Black Prince at Poitiers," and "The Death of General Wolfe," were much admired. He was President of the Royal Academy from 1792 until his death.

West, Rt. Hon. Sir Algernon (b. 1829), a Privy Councillor who began life as a clerk in the Admiralty, and was secretary to Sir Charles Wood at the India Office before acting in the same capacity with conspicuous success for Mr. Gladstone. Became Chairman of the Board of Inland Revenue, and sat on several important Commissions. Has published a volume of reminiscences, and a memoir of Admiral Sir Henry Keppel.

Westcott, Rev. Brooke Foss (1825-1901), biblical scholar, Professor of Divinity at Cambridge, 1870-9, Bishop of Durham, 1890-1901. One of the revisers of the New Testament.

Westmacott, Sir Richard (1775-1856), a great English sculptor who studied under Canova at Rome, and succeeded Flaxman as Professor at the Royal Academy. He executed many fine monuments in Westminster Abbey, at St Paul's Cathedral, and elsewhere. Perhaps his most conspicuous statue was that of Achilles in Hyde Park, his last sculptural work being that in the pediment of the British Museum. His son, Richard (1799-1872), was also a capable sculptor and a Royal Academician.

Weyman, Stanley (b. 1858), the novelist, was educated at Oxford, and studied for the Bar, but developing a strong gift for fiction, has been able to take high rank among the story writers of the day. His first success was *The House of the Wolf*, published in 1890, in which he struck a mystic-romantic note of old days that proved very fascinating. His other best-known novels are, *A Gentleman of France*, *Under the Red Robe*, *The Man in Black*, and *The Captain's Inn*.

Wharton, Philip, Duke of (1668-1731), son of Thomas, Marquis of Wharton (1640-1715), a Whig statesman who in Parliament opposed the Court during the reigns of Charles II. and James II., and joined the Prince of Orange at the Revolution. The younger Wharton was a political weathercock and a sad spendthrift, but a poet of some pretensions. He got his barren dukedom from the Pretender whilst travelling to evade trouble, and died in indigence ultimately in Spain.

Whately, Archbishop (1787-1863), was for over thirty years Archbishop of Dublin, and achieved a high reputation as a writer on theology and philosophy. His treatises on *Rhetoric* and *Logic* are among the most notable books of their class.

Wheatstone, Sir Charles (1802-1875), was an eminent English electrician and scientist, whose experiments in association with Mr. W. F. Cooke resulted in the first application in this country of the principle of the electric telegraph. The stereoscope was also one of his inventions. In 1834, he was appointed Professor of Natural Philosophy to King's College, London, a position which he held for many years.

Whewell, William (1794-1866), English philosopher and scientist; Professor first of Mineralogy

and then of Moral Theology and Casuistical Divinity at Cambridge, and later Master of Trinity and Vice-Chancellor; President of the British Association in 1841.

Whistler, J. A. McNeill (1829-1903), was an original artist, writer, and wit who first came to Europe from America in 1857, and made a name as an etcher both in Paris and in London. His studies of Thames scenery were especially fine and now fetch large prices. When he began to exhibit pictures in oils he greatly puzzled the critics, some of whom discovered in his "nocturnes" and other studies an impressionist of surpassing genius, while others, including Mr. Ruskin, who described one of the "nocturnes" at the Grosvenor Gallery as "a pot of paint flung in the public face," looked upon them as mere audacious eccentricities. The finest of his oil paintings are his portrait of his mother and that of Carlyle. He brought an action against Ruskin for the criticism referred to, but only obtained a verdict of one farthing damages without costs. His "Gentle Art of Making Enemies" is a brochure that will long be remembered.

Whiston, William (1667-1752), succeeded Newton as Lucasian Professor at the University of Cambridge. Later he adopted Arian views, and indicated them in a work published by him in 1717. This cost him his professorship. His translation of "Josephus" is still the standard English version.

White, Blanco (1775-1845), was originally a Spanish priest, but was led to disavow his faith, and on settling in this country became connected with the Church of England. He was a man of great learning and of some literary gifts. He enjoyed the friendship of many eminent men, including Arnold, Newman, and Wiatley. In later life he became a Unitarian.

White, Field-Marshal Sir George (1833-1901), the heroic defender of Ladysmith in the South African War, and a soldier who achieved renown at many points of a long military career. Was a wearer of the V.C., twice won, and a member of the Order of Merit. Went through the Mutiny, was in the march to Kaudahar, commanded the Gordons in Burmah, served in Egypt and conducted the Zhoeb Expedition, was Commander-in-Chief in India, led the Natal forces till shut for so long in Ladysmith, and was later Governor of Gibraltar.

White, Gilbert (1727-1793), was born and lived and died at Salisbury, in Wiltshire, where he held the position of clergyman. The main portion of his life was devoted to the study of the flora and fauna of his parish, and his book, *The Natural History and Antiquities of Salisbury* is a British classic.

White, Henry Kirke (1785-1820), was the son of a Nottingham butcher, and attracted much notice by some early religious poems, which were marked by an ardent piety and a graceful if not powerful imaginative capacity. He died from the strain of overstudy.

White, Sir William H., K.C.B. (1845-1913), a great naval engineer and architect, connected for a long period with the constructive department of the Admiralty and for some seventeen years at its head. Designed 250 ships for the navy, and retired with a Parliamentary grant in 1902.

Whitefield, George (1714-1770), was for a time associated with John Wesley at Oxford in the propagation of Methodism, and attracted great attention by his gifts as a preacher. He had been ordained, and while he co-operated with Wesley was his most powerful champion. In 1741, differing from Wesley on a point of doctrine, he left the Methodists, and thenceforward simply preached as an evangelist, allying himself with no sect, but expounding Calvinistic doctrines with fervour and eloquence. The Countess of Huntingdon built and endowed numerous chapels for him in various parts of the country. He died in America on his seventh tour through that country.

Whitehead, Robert (1823-1906), inventor of the Whitehead torpedo, was a native of Bolton, and built his first torpedo in 1866, which was taken up by the Austrian Government, and later was adopted by the British and other leading navies of the world.

Whiteing, Richard (b. 1840), a successful journalist and author. Has been leader-writer on the *Morning Star* and *Daily News*, editorially connected with the Press Association and the *Manchester Guardian*, and Paris correspondent for English and American dailies. The author of some clever novels, notably *No. 5, John Street*. Received a Civil List pension in 1920.

Whiteley, George. See **Lord Marchamley**.
Whitfield, Archbishop (1530-1604), a gifted Anglican prelate. Regius Professor and Master of Trinity at Cambridge, then Vice-Chancellor of the University. Later Bishop of Worcester, and Archbishop of Canterbury in 1533. Persecuted the Puritans, and was one of the authors of the famous *Lambeth Articles*.

Whitley, Rt. Hon. J. H., M.P., Deputy Speaker and Chairman of Committees since 1911; previously Deputy Chairman of Committees, and had served as Government Whip. Is a member of a well-known firm of cotton spinners at Halifax, for which town he has sat since 1900.

Whitman, Walt (1819-1892), was an original figure in the world of American authorship, and produced many works of striking poetic merit. He served in the Civil War, and his vigorous humanity, as expressed in his writings, made him a distinguished personality. *Leaves of Grass*, *Drum Taps*, and *Democratic Views* were volumes that strongly attracted the critics, mostly in admiration, sometimes in censure. Whitman's work being often marred by a bluntness of expression on subjects not usually talked about in the family circle.

Whitney, Eli (1765-1825), an American school teacher who was mechanically gifted, invented the cotton gin, and subsequently amassed a fortune in the manufacture of fire-arms.

Whittaker, Sir Thomas P. (b. 1850), M.P. for Spen Valley since 1892, and one of the leaders of temperance reform, being chairman of the Temperance Legislation League. Was knighted in 1900.

Whittier, John Greenleaf (1807-1882), America's Quaker poet, was the son of a New England farmer, and for a time followed the trade of a shoemaker. Then, after some experience in journalism, he published his first book of poems "Legends of New England" (1831), which was warmly received both for the strong abolition sentiment it expressed, and for its worth as poetry. His ideals were high, and he lived up to them. His best known volumes are, "Lays of My Home" (1843), "Voices of Freedom" (1846), "Songs of Labor" (1850), and "National Lyrics" (1855).

Whittington, Sir Richard (c. 1280-1352), the son of a Gloucestershire knight who was outlawed. Richard went up to apprenticeship in London, and there found fortune and fame eventually as a merchant. Thrice Lord Mayor and representative of the City in Parliament, he was a great man in his time, engaging in many profitable and honourable enterprises. Sir Richard was well styled "the model merchant of the Middle Ages," and he did marry his master's daughter, and no doubt drew some sort of inspiration from the bells of Bow.

Whitworth, Sir Joseph (1823-1887), an English manufacturer and inventor of guns and artillery who was born at Stockport, and brought out in 1855 the rifle bearing his name. In 1868 he founded the Whitworth scholarships which have done such splendid service.

Whymper, Edward (1840-1911), a wood-engraver and artist, who was also one of the best known Alpine climbers, being the first to reach the summit of the Matterhorn. His books on mountaineering in various countries are fascinating alike for their literary merits and their pictorial value.

Whyte-Melville, G. J. (1821-1878), a novelist of country life and breezy action, who had been a captain in the army before he turned to authorship. He wrote many stories, among the best being *Digby Grand*, *The White Rose*, and *Good For Nothing*.

Wieland, Christopher (1773-1813), German poet and miscellaneous writer. "Oberon" an epic, was his best poem; his most notable prose romance *The*

Golden Mirror. He was Professor of Philosophy and Literature at the University of Erfurt.

Wilberforce, Van. Archdeacon Basil (b. 1841), Chaplain to the House of Commons since 1895, son of the late Samuel Wilberforce, Bishop of Oxford and Winchester. A great temperance champion, and an eloquent speaker.

Wilberforce, Samuel (1805-1873), father of the Venerable Archdeacon last named, was the son of William Wilberforce. Educated privately and at Oriel College, Oxford, he took orders, and after achieving distinction as a preacher and High-Church writer, in 1845 became Bishop of Oxford. He was an indefatigable worker, a trenchant writer and speaker, and one of the most esteemed prelates of his time. In 1869 he was translated to the bishopric of Winchester.

Wilberforce, William (1759-1833), was the son of a Hull merchant, and inherited a considerable fortune on reaching manhood. He was educated at Cambridge, and entered Parliament in 1780. From the first he identified himself with the emancipation question, and in 1789 made the first of his many proposals in the House of Commons for the abolition of the slave trade, but it was not until 1807 that an Act embodying these proposals was carried.

Wilfrid, St. (634-709), An English ecclesiastic, who took the Roman side at the Synod of Whitby in 662, and was made Archbishop of York the year following.

Wilkes, John (1727-1797), was a forcible, daring, and original politician, who championed the cause of the people with great vigour, and was or a time exceedingly popular. For a violent attack on the Government in his paper *The North Briton*, he was committed to the Tower, but obtained release on the ground that he was a member of Parliament. He was then sued for libel, and retaliated by reprinting the paper containing it. He also got into trouble for publishing an *Essay on Mankind* of a very objectionable nature, and was expelled from the House. He then went abroad, and remained away for some years, but in 1768 returned, and not long afterwards was elected M.P. for Middlesex. A fresh prosecution, however, and a second time took place, and three times, was he expelled and as often re-elected. A great agitation ensued, and so high was he in favour among the people, that he was made alderman, then sheriff, then Lord Mayor of London. In the end his opponents gave way, the orders against him were withdrawn, and from 1779 he was Chamberlain of the City of London.

Wilkie, Sir David (1785-1841), was an eminent R.A., whose paintings of popular subjects, mostly of rural life, were highly successful. Many of these works were engraved, including "The Village Politicians," "The Rent Day," "The Blind Fiddler," and "Blind Man's Buff," and had an immense vogue. In later life he chiefly painted historical subjects. In 1830 he was appointed painter in ordinary to the king, and was knighted six years later.

Wilkinson, Sir John Gardner (1797-1875), an English Oriental archaeologist, who spent many years in explorations and excavations in Egypt, and threw much light upon the land of the Pharaohs and its ancient history. Amongst the numerous valuable works published as the result of his enthusiastic investigations were *The Architecture of Ancient Egypt*, *Materia Hieroglyphica*, and *The Egyptians in the Time of the Pharaohs*.

William I. (1027-1087), better known as "William the Conqueror," was Duke of Normandy when he claimed the throne of England as legally appointed successor to the Confessor. The claim was resisted by Harold II., but the battle of Hastings, in which Harold was slain and his army routed, gave the victory to William, who in due course was crowned in Westminster Abbey. The story of his life and reign is the story of the crushing of Saxon power, the parceling out of the country among his Norman followers, and, for the rest, a firm rule that made England respected, and settled this country as a great Power among the nations.

William I. of Prussia (1797-1888), the maker of

modern Germany. Succeeded to the throne of Prussia in 1861, and it fell to him to have the control of his country during a period of mighty transition and development, with Bismarck as his chief minister. The war with Austria which signalled the opening year of his reign rendered him highly popular, and when in 1870 the war with France was entered upon the whole German people rallied round him, and after a series of brilliant achievements by his army he was proclaimed German Emperor on the 18th of January, 1871.

William II. 1858-1900, the Conqueror's son, surnamed "Rufus" was king of England from 1857 to his death. He was in constant conflict with his barons, lived a life of wanton pleasure, was oppressive to his subjects, and was shot (by accident or design) while hunting in the New Forest.

William II. German Emperor, born 1859. Educated at Cassel and Bonn, afterwards entered the army and took a keen interest in military affairs. Succeeded his father, the Emperor Frederick, in 1888. His reign has been marked by a strong militarism and an intense ambition to secure the dominance of Germany in the Councils of Europe—an ambition which by unscrupulous action and utter disregard of treaty obligations brought about the present war—the most destructive in the history of the world. To him is due the introduction of a system of war savagery which greatly increases the horrors of warfare and must leave an indelible stain upon his name. Visited England in 1907, was present at King Edward VII's funeral in 1910, and in 1911 at the unveiling of the memorial to Queen Victoria.

William III. of England (1679-1702), while Stadtholder of Holland, married Mary, eldest daughter of the Duke of York (afterwards James II.). As captain-general of the Dutch forces he was successful against the French, and in 1688, when James had abdicated and fled the country, William was invited to succeed him, and he and Mary afterwards became joint King and Queen. There was resistance in Scotland and Ireland, however, where the Stuart cause was still espoused, but by resolute action James's cause was defeated in Ireland at the Battle of the Boyne, and in Scotland by measures that were not wanting in cruelty, as was shown in the Massacre of Glencoe. Later he was at war with France, and suffered defeat, but ultimately gained the upper hand and effected an honourable peace by the Treaty of Ryswick, in 1697.

William of Malmesbury. the 12th century English historian, to whose *Gesta Regum Anglorum* and others we owe so much of our information regarding the early history of England.

William the Silent (1533-1584), Prince of Orange, who by his fine gentlemanship and personal bravery, after a protracted struggle, succeeded in freeing the Netherlands from the yoke of Spain. His nickname resulted from his habit of complete secrecy regarding his plans of operation until the moment of their being put into effect.

William IV. of England (1766-1837) was the third son of George III., and ascended the throne in 1830 in succession to his brother, George IV. He had seen some sea service, and was flatteringly styled the "Sailor King." During his brief seven years' reign he showed little of kingly coquetry, but was genial and pleasure-loving, and placed no obstacles in the way of government, so was, at a sort, popular. It was in the early part of his reign (1832) that the first great Reform Bill was passed.

Williams, Sir George (1818-1901), the founder of the Young Men's Christian Association, and an assiduous temperance and social reformer. A London drapery warehouseman in a large way of business, who was a personal factor of great good in an influential sphere during the Victorian era.

Williams, John (1796-1839), the martyr-missionary to the South Seas, who was murdered at Heronunga by hostile natives. He was brought up in North London to the ironmongery trade, but entered the service of the London Missionary Society, and devoted himself zealously and with great capacity to

the pious work of carrying Christianity and good government to the South Sea Islanders.

Williams, Sir Monier (1819-1899), a great Sanskrit scholar and Professor at Oxford, who translated the *Sakuntala*, wrote grammar and dictionaries of Hindustani and Sanskrit, and generally laboured with distinction in bringing westward the wisdom of the Orient.

Williams, Roger (1600-1684), a Welshman who went out to New England in 1631. Originally in Anglican orders, he became a Puritan preacher, and obtained great political and personal influence, founding the first Baptist Church in America. He obtained a charter for the colonisation of Rhode Island in 1644.

Williams, Rt. Rev. Watkin Herbert, M.A. since 1899 Bishop of Bangor (b. 1845). Ordained 1870. Dean of St. Asaph, 1882-9.

Willington, Lord, 1st Baron, of Rotton. **Freeman Freeman Thomas** (b. 1869), appointed Governor of Bombay, 1913. Was Junior Lord of the Treasury, 1905-13, and, as Sir Freeman Thomas, was M.P. for Hastings 1900-1913, and for Bodmin 1907-1910, being raised to the peerage in the last-named year.

Willis, Nathaniel Parkes (1827-1897) was an American writer of mark. His first real success was obtained with *Penicillings by the Way*, a series of sketches of living European celebrities and scenes. The best of his other works were the *Slingsby Papers* and *Darwins at Life*. His sister, Sarah Payson Willis (1811-1892), acquired celebrity as "Fanny Fern."

Willoughby, Sir Hugh (d. 1554), a 16th century English navigator, who was the first to open up British trade with Russia by way of Archangel, and later led an expedition fitted out by London merchant adventurers for extending discoveries in northern latitudes, but the whole of his force perished in a storm off the coast of Laland.

Wilson, Alex. (1790-1843), a Paisley weaver who suffered imprisonment for writing lampoons respecting a dispute between masters and men in his native town, and went out to Philadelphia, where he tramped about and obtained an intimacy with the life of the woods, which resulted in his publication of a seven-volume work on *American Ornithology*.

Wilson, Andrew (1853-1921), Ph.D., M.B., F.R.S.E., Lecturer on Physiology and Health to the George Combe Trust, and Gilchrist Trust Lecturer, was a writer on medical subjects. His *Modern Physics* attained great popularity. His opinion of Pears' Soap is worth recording here. He said that "no purer article of its kind had ever been offered."

Wilson, Admiral Sir Arthur, G.C.B. (b. 1824), was Commander of the Channel Fleet from 1907 to 1907. Served in the Crimean War, 1854, Chinese War, 1857, and elsewhere, and was promoted from Captain to Rear-Admiral in 1865, Vice Admiral, 1901, and Admiral, 1905. First Sea Lord 1909-12.

Wilson, Sir Daniel (1816-1882), a Scottish Canadian archaeologist, poet and scholar. Professor of History and English Literature at and subsequently President of Toronto University. Wrote *Memories of a Journey in the Olden Time, Archaeology and Prehistoric Antiquities of Scotland, Caliban, The Missing Link, The New Atlantis*, etc.

Wilson, Sir Erasmus (1800-1884), an eminent physician and specialist in skin diseases, first Professor and founder of the Chair of Dermatology at the Royal College of Surgeons. Author of a learned discussion on diseases of the epidemics, respecting which he was the leading authority of his time. He pronounced Pears' Soap to be "one of the most agreeable and refreshing of lotions for the skin, and calculated to preserve it in health and maintain its complexion and tone." Transported "Cleopatra's Needle" to London at his own cost from Alexandria.

Wilson, George (1818-1890), Regius Professor of Technology at Edinburgh University, and Director of the Industrial Museum of Scotland; a distinguished chemist and President of the Physical Society; published valuable *Researches on Colour-Blindness*, and many scientific, biographical, and other works of an important and popular character.

Wilson, Sir Guy Fleetwood (b. 1841), Assistant Under-Secretary of State for War in 1898, and since

1904 Director of Army Finance. Finance Minister, Council of India, 1908-13, and Vice-President of the Legislative Council of India, 1911-13. A great departmental administrator, who was Lord Kitchener's financial adviser in South Africa.

Wilson, John (1782-1864), was a highly esteemed writer who, as "Christopher North," contributed *Notae Ambrosianae* and many other essays, stories, and criticisms to *Blackwood*. He had £300 a year from the Civil List, and for thirty years was Professor of Moral Philosophy at Edinburgh University.

Wilson, Richard (1714-1782), a landscape and portrait painter who attained considerable eminence, and was one of the first members of the Royal Academy. He was a native of Montgomeryshire.

Wilson, Woodrow, Ph.D., Litt. D., LL.D., President of the United States, elected by an overwhelming majority over Taft and Roosevelt at the election of Nov. 1912 (b. 1856). The first democratic president since 1860. Has held professorships of History, Political Economy, Politics and Jurisprudence at various American universities; and was Governor of New Jersey, 1911-12. In 1913 carried a considerable measure of Tariff reduction; and in the same year took up a strong attitude against General Huerta, Provisional President of Mexico, whom he refused to recognise, in April, 1914, sent ships and troops to Mexico to avenge insult to U.S. flag.

Winckelmann, Johann (1717-1768), classical scholar and writer on art, born of poor Prussian parents; became librarian to Cardinal Albani at Rome, and produced some very learned discussions on art and history. Was assassinated at Trieste.

Wingate, Major-General Sir Francis G. (b. 1861), Sirdar of the Egyptian Army and Governor-General of the Sudan since 1899. A soldier of experience and distinction in military expedition to the Nile and its neighbourhood. He was Kitchener's chief Intelligence Officer, succeeded him as Sirdar, and completed the rout of the Khalifa.

Winifred, St., the patron saint of virgins, a Welsh maiden who, importuned by Prince Caradoc, treated him with scorn, and he had her beheaded. The well of St. Winifred in Flintshire is supposed to indicate the spot where she perished.

Winkelried, Arnold von, a Swiss patriot who is said to have saved the victory of his compatriots against the Austrians at Sempach in 1386 by grasping the pikes of a number of the opposing host and burying them in his breast, thus creating a gap in the ranks, through which the Swiss rushed over his body to triumph. The heroic deed is scouted by many modern investigators as a baseless tradition.

Winthrop, John (1587-1649), an English Colonial governor who in 1629 settled at Boston, where he was for some time in supreme authority. He opposed Vane and the Antinomians, wrote a *History of New England*, and a *Model of Christian Charity*.

Wiseman, Cardinal (1802-1865), a Roman Catholic dignitary of commanding ability; born at Seville; subsequently Vicar-Apostolic at Rome, eventually Archbishop and Cardinal at Westminster. Chief among his learned writings are his *Horae Syriacae*, *Letters on the Catholic Church*, *The Connection between Science and Revealed Religion*, and *The Real Presence*.

Withart, George (circa 1500-1546), a Scottish schoolmaster and associate of John Knox the Reformer; was one of the Commission sent by Henry VIII. to Scotland to endeavour to arrange a marriage treaty between the boy Prince Edward and the infant Queen Mary, and vigorously joined in the preaching of the Reformation until he was burnt at the stake.

Wither, George (1588-1667). Puritan poet and satirist; committed to prison for publishing his pungent "Abuses Stript and Whipt" in 1613. Espoused the popular cause in the Civil War, and commanded a troop of horse. Again incarcerated after the Restoration for writing "Vox Vulgi." Some of his poetry possesses much merit.

Witte, Count Benjamin de (b. 1849), the Russian statesman, began life in a humble position in the railway service but showed such striking capacity for organisation that he rose high and was made

Finance Minister of the Empire in 1899. Under his direction the Siberian railway was constructed. He is a man of liberal tendencies, and the maker of industrial Russia. He is descended from a family of Dutch emigrants to Russia. He negotiated the peace with Japan after the failure of the Czar's operations in Manchuria, and was created a Count and called to the Premiership, but resigned in 1906.

Woffington, Peg (1720-1760), an Irish bricklayer's daughter, who became a celebrated actress, and was great at the impersonation of male characters and a fine singer. She also shone in the round of Society-lady and high-comedy parts, and was much sought after in private life by people of rank and talent. For a while she lived with Macklin and Garrick in Bow-street, and stoned a good deal for her lack of moral restraint by her abounding charity. She was stricken with paralysis whilst playing Rosalind in 1757.

Wolcott, John (1738-1819), was in turn doctor, clergyman, and author, settling in London in 1781, where he soon began to attract notice by various topical satirical effusions, many of them directed against George III. Writing under the pseudonym of "Peter Pindar," he poured forth a rapid succession of pungent satirical ballads, odes, epistles, and what not. He sold his works for an annuity of £500.

Wolf, Friedrich (1759-1824), a great German scholar, regarded by some as the founder of scientific classical philology. A student at Göttingen, he was Professor at Halle for a quarter of a century, and was later in the Government service at Berlin. His great work was the *Prolegomena in Homerum* in which he maintained that the "Iliad" and the "Odyssey" were the joint productions of many chorists.

Wolf, Charles (1791-1823), was an Irish clergyman and writer whose literary fame was won by a single poem, "The Burial of Sir John Moore." The splendid elegy first appeared in the *Newry Telegraph* in 1817. The poet died of consumption.

Wolfe, General James (1727-1759), commanded the British forces in Canada at the siege of Quebec, where he won a brilliant victory, which cost him his own life. He was buried at Greenwich and a monument to him exists in Westminster Abbey.

Wollaston, William Hyde (1766-1842), celebrated English chemist and physicist, President of the Royal Society in 1820. Discovered rhodium and palladium, the dark lines in the solar spectrum and the ultra-violet rays, invented the goniometer and the camera lucida, and carried out many important investigations in electricity and optics.

Wolsley, Viscount (1833-1913). Entered the Army in 1852 and saw active service almost from the first, being in the Burmese War of 1852-1853, and immediately afterwards in the Crimean War. Subsequently he was in the Indian Mutiny, and served in China in 1860, by which time he had risen to the rank of Lieut.-Col. In 1870 he had command of the Red River expedition, and in 1873 led the expedition against the Ashantis on the Gold Coast. Governor next of Cyprus and of Natal in succession, he was entrusted with the command of the South African War of 1899-1900, of the Egyptian Expedition of 1882, and of the Gordon Relief Expedition of 1884. Was made Adjutant-General in 1855, Commander of Ireland, 1860, Field-Marshal, 1894, and in 1895 succeeded the Duke of Cambridge as Commander-in-Chief, which position he held in 1901, when Earl Roberts succeeded him. He was the author of several books, including a *Life of Marlborough* and *The Decline and Fall of Napoleon*, and was a member of the Order of Merit.

Wolsey, Cardinal Thomas (1471-1530), was the son of an Ipswich butcher. Showing ability, he was sent to Oxford to be educated, and later on entered the Church, where he gradually rose to a position of eminence, and was entrusted with several diplomatic missions. He was especially favoured by the King, Henry VIII., and secured rapid preferment under that monarch, being in turn Bishop of Lincoln, Archbishop of York, and Archbishop of Canterbury. Then he was made Cardinal and

became Henry's Chancellor. For a number of years he was supreme, and by his diplomacy did much to strengthen the king's power. But when Wolsey was unable, though willing enough, to obtain the papal sanction for Henry's divorce of Katharine, he fell into disfavour, and his decline was rapid indeed. From being a great personage, with a princely entourage, he was humbled, persecuted, and harried, and died at Leicester Abbey a broken, dejected man.

Wood, Anthony A. (1632-1695), a famous English antiquary, the historian of Oxford University, and biographer of its worthies. He attacked Clarendon and was expelled from Oxford in consequence, whilst his pre-jacobite prejudices involved him in violent controversies.

Wood, Sir Evelyn, Field Marshal, V.C. (b. 1838), who retired from the army at the end of 1904, began his career in the Navy, in 1852, and was in the Crimea in 1855. In 1855 he joined the Army as a cornet in the 13th Light Dragoons, and six years later was promoted captain in the famous "Death or Glory Boys." In the Indian Mutiny served as brigade-major, and won the Victoria Cross. In the Ashanti War of 1873 he gained much distinction, and was made C.B. In the Boer War of 1899 he was specially commended, and given his K.C.B. Sir Evelyn's next service was in the Boer War of 1880-81. One of his finest achievements was the raising of the Egyptian Army, of which he was made Sirdar after the expedition to Egypt of 1882. He has also been Quartermaster-General, Adjutant-General, and, in the absence of Lord Roberts in South Africa, was Acting Commander-in-Chief. He has written lucidly on the Crimean campaign, and with considerable professional skill on cavalry matters. He wrote a series of articles in the *Times* on the Indian Mutiny. Appointed Constable of the Tower, 1911.

Wood, Sir Henry J. (b. 1870), the most popular of present-day English musical conductors. After filling the position of organist at St. Mary's, Aldermanbury, and other places, and conducting numerous opera and concert companies on tour and in London, he started his Queen's Hall concerts in 1895, which have done more than any other enterprise for the cause of high-class music in London. Knighted, 1911.

Wood, Mrs. Henry (1814-1887), was a prolific Victorian novelist, and won a prize for a temperance story, *Danvers House*. Next she wrote *Est Lynne*, the most popular of all her works, which at once established her fame. After that she wrote novel after novel, and attained a high degree of success, being seldom brilliant, and never dull.

Forester, Marquis of (1600-1667), was the first of our nobleman scientists, whose quaint and instructive work, *A Century of Inventions*, contained the foreshadowings of many later inventions of importance, notably the steam-engine. He was a devoted Royalist, and sacrificed much in the King's cause.

Wordsworth, Charles (1806-1892), second son of Christopher Wordsworth, Master of Trinity College, Cambridge, and nephew of William Wordsworth, was educated at Harrow and at Oxford. He was for some years second master of Winchester College, and produced a *Greek Grammar* that was long regarded as a standard work. He was elected Bishop of St. Andrews in 1865, and retained that high office until his death.

Wordsworth, Christopher (1774-1845), father of the last-named, and brother of the poet, was educated at Hawkshead Grammar School and at Trinity College. He became Domestic Chaplain to Manners-Sutton, Archbishop of Canterbury, and enjoyed many other preferments. In 1820 he was made master of Trinity College, holding that position until 1841.

Wordsworth, Christopher (1807-1885), was the youngest son of the last-named. He had a distinguished career at Winchester and Trinity College, graduating in 1830 as senior classic. In 1836 was appointed head-master of Harrow; in 1841 became Canon of Westminster; in 1865 was Archdeacon of Westminster; and in 1869 was nominated Bishop of Lincoln, resigning the see in 1885, and

dying the same year. He was a voluminous author, his chief work being a commentary on the Old and New Testaments.

Wordsworth, William (1770-1850), the chief of the "Lake Poets," and one of the most inspired of all British bards, was a native of Cockermouth, and was educated at Hawkshead and St. John's College, Cambridge. In association with Coleridge he issued a volume of "Lyrical Ballads" in 1798. The following year saw him settled at Grasmere, and there and at Rydal Mount he passed the rest of his days. In 1802 he married Mary Hutchinson, his cousin, and the two, with the poet's sister, Dorothy, formed an ideally poetic household. Here he carried out his creed of "plain living and high thinking," and produced at intervals some of the purest and noblest poetry in the language. As an interpreter of nature in her many moods, he stands unrivalled. From 1813 to 1842 he was stamp distributor for Westmorland, and succeeded to the Poet Laureateship on the death of Southey in 1843, enjoying thereafter for the rest of his life a pension of £300 a year.

Woodville, Elizabeth (1437-1492), a daughter of Sir Richard Woodville, and wife of Sir John Grey, played a prominent part in the historical events of her time. After her first husband's death she made a secret marriage with Edward IV., and became the mother of Edward V. and his brother Prince, both of whom were put to death in the Tower by order of Richard III. She was also mother to Elizabeth, Queen of Henry VII.

Wornum, Ralph Nicholson (1812-1877), for many years keeper of the National Gallery, was a native of London, and early displayed great interest in art matters. He was a portrait painter for a time, but later became a writer and lecturer upon art. He entered upon his duties at the National Gallery in 1854, and did much to develop and improve the Trafalgar Square galleries. His books on painting and painters are of great merit.

Wotton, Sir Henry (1568-1639) whose life was written by Isaac Walton, was in Elizabeth's reign Secretary to the Earl of Essex, and under James I. was for twenty years in the diplomatic service. In 1624 was made Provost of Eton, a position which he held for fifteen years. He was a poet and Latin pamphleteer, and wrote a book on the *Elements of Architecture*, and another on *The State of Christendom*.

Wotton, William (1661-1726), a scholar of marvellous precocity, who was entered at Cambridge University in his twelfth year, took his B.A. a year later, then knowing twelve languages, and was Fellow of St. John's at nineteen. Wotton became a clergyman of some distinction, and is best remembered as an author by his *Reflections upon Ancient and Modern Literature*.

Wren, Thomas Philip (1612-1688), a Dutch painter of landscapes and hunting scenes, whose works are much appreciated by connoisseurs for their breadth and animation of treatment.

Wrexall, Sir Nathaniel William (1757-1831), baronet, whose memoirs are of importance for its sidelights they throw upon the history of the later Georgian period, was born in Bristol and educated there. He was an indefatigable traveler, and moved in the best society in various countries. His books of gossip are entertaining, though perhaps not too reliable. He was M.P. for Hindon from 1780, and afterwards sat for Wallingford. The baronetcy was conferred upon him in 1813 upon the nomination of the Prince Regent.

Wren, Sir Christopher (1632-1723), the most famous English architect of his time, who had unique opportunities, and mainly made a masterly use of them. St. Paul's Cathedral—as his epitaph appropriately implies—is his best monument. He did not quite have all his own way with the tremendous thirty-five years' task he accepted of undertaking the reconstruction of St. Paul's after the Fire, but he produced a masterpiece of which Britain may well be proud. Chelsea and Greenwich Hospitals and a number of London's finest churches were also Sir Christopher Wren's work, and very

beautiful most of it is. He was President of the Royal Society, and Surveyor-General until some scurvy passing political preferences deprived him of the latter office, and he rests beneath the magnificent cathedral he reared "in London's central roar."

Wright, Joseph (1774-1797), usually styled "Wright of Derby," was a painter of note, who produced many pictures of the "candlelight" order, and won much success also in landscapes, portraits, and figure subjects. His "Air-pump," in the National Gallery, is considered his masterpiece.

Wright, Thomas, F.R.S. (1810-1877), a well-known and industrious antiquary, was a native of Bradford in Yorkshire. He was educated at Trinity College, Cambridge, and from 1836 lived mostly in London, occupying his pen in the production of a notable series of antiquarian studies. His works comprise 129 separate publications.

Wyatt, James, R.A. (1746-1813), a celebrated architect in his day; President of the Royal Academy in 1805, succeeded Sir William Chambers as Surveyor-General to the Board of Works. He built Fonthill Abbey for Bedford, and the Royal Military Academy at Woolwich.

Wyatt, Sir Thomas (1593-1592), was the first writer of English sonnets, and a poet who did much to develop the earlier forms of verse. He was also a distinguished diplomatist and was employed by Henry VIII. on several important missions.

Wyatt, Sir Thomas ("The Younger"), b. 1520, executed 1554; joined with the Duke of Suffolk in favour of Lady Jane Grey and against Queen Mary. Son of the last-mentioned. Led the men of Kent in rebellion on London in 1554, but was captured, and with many of his followers suffered death.

Wyerley, William (1640-1715), the Restoration dramatist, was for many years in high favour at Court. His genius for comedy writing was remarkable, and readily adapted itself to the Restoration atmosphere; thus while he provided wit and intrigue and plot and characterisation in plenty and of great merit, the taint of the time was over it all. His plays include "The Country Wife," "Love in a Wood," "The Plain Dealer," and "The Way of the World." He lived recklessly, was generally in pecuniary difficulties, and, marrying the Dowager Countess of Drogheda late in life, placed himself in bondage to a highly jealous woman.

Wyllie, John (1324-1384), was born in Yorkshire, educated at Oxford, and became one of the most eminent ecclesiastics of his time. He adopted the principles of the Reformation, and on that account brought down upon himself the bitter enmity of the Roman Catholic leaders, and would probably have been put to death but for the protection of John of Gaunt. It was while in comparative retirement as Rector of Lutterworth in Leicestershire, that he finished his translation of the Bible.

Wykeham, William of (1224-1294), was Bishop of Winchester from 1260 to his death, and from 1397 to 1397 Lord Chancellor. He was a man of great learning and an excellent preacher, and wielded great influence. He founded New College, Oxford.

Wyndham, Sir Charles (b. 1841), was educated for the medical profession, took part in the American Civil War, then went on the stage, and migrating to London in 1868 began a highly successful career. Was for a long time lessee of the Criterion Theatre where he brought out "Pink Dominoes," "Betsy," and other plays of that class with great acceptance. Now proprietor of Wyndham's Theatre, and the New Theatre. Was knighted in King Edward's Coronation Year.

Wyndham, Rt. Hon. George (1863-1913). Educated at Eton and Sandhurst and was for a time in the Guards, but feeling drawn towards a political career became private secretary to Mr. Balfour in 1887 and in 1890 entered Parliament as Member for Dover. In 1898 he became Under-Secretary for War, and in 1902 was made Chief Secretary for Ireland with a seat in the Cabinet. He had a large share in the passing of the Land Act of 1903, and resigned his Ministerial position in 1905 when

attacked over the MacDonnell incident in connection with the "Devolution Scheme." He married the Countess Grosvenor, mother of the Duke of Westminster, in 1899, and was chosen Lord Rector of Glasgow University in 1902.

Wynn, Sir Charles Watkin Williams (1775-1850), was a well-known politician. From 1822 to 1828 he was President of the Board of Control and Cabinet Minister. Displaced by Wellington he went over to the opposition. He sat in Parliament to the year of his death, and is said to have thrice declined the Governor-generalship of India.

X

Xantippe (flourished 5th century B.C.), the irascible spouse of the Greek philosopher Socrates, and the type of the scolding wife.

Xavier, St. Francis (1506-1552), the apostle of the Indies, was the follower of Ignatius de Loyola, and devoted his life to missionary work in the East with unbounded success. He was canonised in 1622.

Xenocrates (356-314 B.C.), a Greek philosopher and the disciple of Plato; he succeeded Spencarpus as head of the Academy at Athens, over which he presided for a quarter of a century.

Xenophon (444-359 B.C.), the Athenian general and follower of Socrates, accompanied the Greek army under Cyrus the Younger in the march against Artaxerxes, and after Cyrus's death, assumed the command of the Greek troops, and conducted the famous five months' retreat through a mountainous hostile country to Trebizond. In his *Anabasis* he describes this expedition with graphic minuteness. In the war between Sparta and Persia he declared against his own country and was banished. Most of his works were written in the days of his exile at Scillus. He afterwards lived at Corinth. His chief works are *Anabasis*, *Hellenica*, and *Cyropædia*.

Xerxes (circa 510-465 B.C.), King of Persia, was the son of the first Darius, and a great commander. In 481 B.C. he started on his famous expedition against Greece, when, according to Herodotus, he had a combined army and navy of over two and a half million men. He defeated the Spartans at Thermopylae, but his fleet was overcome at Salamis. He reigned from 485 to 465 B.C. and met his death by assassination.

Ximenes, Francisco (1473-1517), a Spanish statesman and Cardinal who, after being Queen Isabella's confessor, became Archbishop of Toledo, Provisional Regent of Castile, and Cardinal and Inquisitor-General in 1507. He printed the *Complutensian Polyglot Bible*.

Ximenes de Quesada, Gonzalo (b. 1498), a Spanish lawyer who undertook an expedition to and became the conqueror of New Granada in 1538. Later he went up the Orinoco valley in quest of El Dorado, and some accounts say he died a centenarian, but that is doubtful.

Y

Yamagata, Field-Marshal Prince, is a Japanese statesman of very considerable ability and astuteness, and a soldier also of some prowess. In November, 1898, he was at the head of the Imperial Government, forming a Cabinet on the old lines of Japanese clan statesmen, which endured for two years, he then giving way to the Marquis Ito, the chief of the Constitutional Political Party. Later he became a Privy Councillor of the Mikado, and made Prince in 1907.

Yates, Edmund (1831-1904), an able English journalist and novelist, who was the editor of *Tinsley's Magazine* in 1867, and established *The World* in 1874, which he made a powerful Society political and literary weekly. He was the London correspondent for some years of the *New York Tribune*, and also at one time acted as Special Correspondent of the *New York Herald* at Vienna and St. Petersburg. His novels were many and clever, including *Black Sheep*, *Broken to Harness*, *For Better, For Worse*, and *A Wasting Race*.

Yerkes, Charles Tyson (1840-1905), was born in Philadelphia, and at the age of twenty-one started in business as a stockbroker, achieving considerable success; and, about 1875, became connected with a tramway enterprise in Philadelphia, which he developed with great profit. A few years later he settled in Chicago, and there installed a tramway system which realised him a very considerable fortune. From 1901 to his death he was mainly resident in London, devoting himself to improving the means of transit in and around the metropolis. He was associated with numerous "tube" and other short railway undertakings, and had managing control of the District system, which he electrified.

Yonge, Charlotte (1822-1901), this favourite novelist and historical and miscellaneous writer was born at Otterbourne, and published her immensely popular story, *The Heir of Redclyffe*, in her thirtieth year, following it with the scarcely less successful *Deity Chain* three years later.

York, Archbishop of. (See Lang.)

York, Duke of (Frederick Augustus), second son of George III. (1793-1827). Commanded the unsuccessful British expedition to Holland in 1795-1796 and 1799. Opposed Catholic emancipation, and was in his younger years Prince-bishop of Osnabrück.

York, Duke of (Richard) Killed at the Battle of Wakefield in 1460. He was the son of Richard, Earl of Cambridge and Anne Mortimer, and Protector during Henry VI.'s imbecility. A claim on his part to the help to the throne precipitated the War of the Roses.

Yount, William (1776-1847), the eminent naturalist and writer on livestock, was the son of an Exeter surgeon. He set up a veterinary hospital in London in 1812, and later wrote a series of handbooks on the breeds, management, and diseases of various farm animals. Yount was one of the founders of the Royal Agricultural Society.

Young, Brigham (1801-1877). The famous Mormon leader, and head of the Latter Day Saints of Salt Lake City. Sometime Governor of the Territory of Utah, a position from which he was removed by President Buchanan, and indicted for polygamy in 1871, but not convicted. At his death he had seventeen wives. He was originally a house-builder's workman in New York State, but embraced Mormonism in 1832 and became first elder, then apostle, and finally president in 1844 in succession to Joseph Smith.

Young, Charles Mayne (1777-1856), a noted actor and a native of London, who from 1802 to 1832 had an almost uninterrupted career of success, being regarded as the most distinguished representative of the Kemble school of acting, sharing the honours with Kean and Macready. He had a fine stage presence, and possessed a very musical voice.

Young, Edward (1684-1758), an English poet and clergyman who acquired considerable fame as the author of "Night Thoughts," a long didactic poem in heroic couplets, containing much felicitous moralising and poetic power. He also wrote a couple of tragedies, "The Revenge" and "Busiris," both of which were produced at Drury Lane. He was vicar of Welwyn for many years.

Young, James (1811-1899), a Glasgow chemist, who discovered the method of distilling oil from shale, and founded the mineral oil industry of Scotland, which led to the development of petroleum concerns in America and elsewhere. He was the founder of the Chair of Technical Chemistry at Anderson's College in his native city.

Younghusband, Col. Sir Francis (b. 1863), who headed the British Mission to Tibet in 1903-1904, is Resident in charge of the Mahratta States, India. He is an enterprising ex-Dragon Guardsman who has "roof of the world," and elsewhere, and was *Times* correspondent with the Chitral expedition, and also in the Transvaal and Rhodesia. He was the first British representative to set foot in the "Forbidden City of Lhasa."

Yule, Sir Henry (1820-1889), an Anglo-Indian military engineer, who was secretary to the British

Mission sent in 1858 to Ava, and wrote a narrative of the expedition. He was a learned Orientalist, and compiled a useful glossary of Anglo-Indian colloquial words and phrases, besides publishing a number of notable travel papers dealing chiefly with Central Asian ground; making, moreover, a fascinating translation of Marco Polo entitled *Cathay and the Way Thither*.

Z

Zadkiel (the angel of Jupiter in Jewish rabbinical lore) was the name assumed by Lilly the astrologer, and also by Lieut. R. J. Morrison, in the prophetic almanack first issued by him in 1839.

Zagoskin, Michael (1749-1825), a skilful historical novelist and play-wright; born at Penza; sometimes styled the Walter Scott of Russia. His most notable book was *Yuro Mirvolaiski*, published in 1829.

Zahn, Theodore (b. 1838), an erudite Biblical scholar, who wrote illuminatingly on the New Testament canons.

Zahn, Wilhelm (1800-1871), German architect, painter, and critical writer on the art of ancient Pompeii, Stalwa, and Herculaneum.

Zamella, Giacomo (1821-1888), Italian poet and Professor of Literature in the University of Padua. His "La Conchiglia Fossile" was a fine conception, lyrically strong and in touch with the scientific spirit of the age.

Zangwill, Israel (b. 1864), was educated at a Jews' elementary school in Spitalfields, and is President of the International Jewish Territorial Organisation. Made a hit with *The Premier and the Pastor* in 1888; afterwards edited a short-lived but brilliant comic weekly called *Arise!*; then began novel writing. His *Children of the Ghetto*, published in 1892, *The Master* (1895), *Dreamers of the Ghetto*, and *Ghetto Comedies* (1901), are works of originality and power. Mr. Zangwill has also written plays, of which *Merry Mary Ann* (1904), and *The Melting Pot and Plaster Saints* (1914), are prominent examples.

Zeller, Edward (1814-1892), a noted German writer, and Professor of Philosophy at Berlin from 1872. Published works on Plato and various Protestant theology; 11 volumes of new or profound.

Zeller, Jules Sylvain (1820-1900), French historiographer and biographical author; his chief works dealing with Italian and German history and the lives of the Roman Emperors.

Zeno of Citium was an eminent Greek philosopher, who founded the Stoic system. He lived in the 3rd century B.C., and was a teacher of great influence. He held that virtue was the only good, vice the only evil, and the philosophy elaborated on those lines took deep root.

Zenobia was Queen of Palmyra in the latter part of the 3rd century, and after the murder of her husband King Odenathus, proclaimed herself Queen of the East. This aroused the jealousy of the Emperor Aurelian, and though she showed great courage and ability in opposing him, he ultimately defeated her and took her captive to Rome in 273, and later she resided in or near the Imperial city.

Zenodorus (flourished A.D. 54-48), a Greek sculptor who executed the colossal of Nero and of Marcus.

Zenodotus, an Alexandrian Hellenic scholar, who lived in the 3rd century B.C., and was the first superintendent of the famous library at Alexandria.

Zephaniah (flourished about 630 B.C.), the Hebrew prophet who foretold judgments to come to the Jews for their sinfulness, but predicted an ultimate Hebrew restoration.

Zeppelin, Count, German general, served in the Franco-German War of 1870; and in later years has devoted himself with remarkable success to the perfecting of his air-ship, which in spite of serious disasters, has achieved marvellous flights.

Zeuxis, a famous Greek painter who flourished in the 5th century B.C. One of his finest works was his "Eros Crowned with Roses," in the temple of Aphrodite at Athens.

Zieten, Hans von (1770-1848), a Prussian general and divisional commander at Ligny and Waterloo.

Ziethen, Hans Joachim von (1599-1786), a Prussian officer of cavalry, who distinguished himself in the first and second Silesian War, and particularly by a forced march with his Hussar regiment in 1745.

Zimmerman, Ritter von (1798-1798), was a Swiss philosopher who practised as a physician at Brugge, and acquired considerable fame by his book on *Solitude*, which was full of a sort of sentimental charm that was more appreciated in his day than in ours. His reputation as physician and philosopher gained him the friendship of Frederick the Great, whom he attended in his last illness; and of George III. who made him his private physician at Hanover.

Zimmermann, Helen (b. Hamburg, 1846), a charming writer on many literary and artistic subjects, as also a popular lecturer in this country and on the Continent on Italian art.

Ziska, John (1360-1424), a famous Hussite leader, who repelled the Imperialists from Witkow in 1420, and invaded Moravia and Austria, but was slain at the siege of Prábrislav. His exploits were the subject of an epic by Albert Meissner, the Bohemian bard.

Zoffany, John (1733-1810), painter, was a native of Ratisbon, and came to England in 1758. After a period of struggle, during which he painted clock-faces for a clock-maker in Seven Dials, he began to make headway as a portrait painter and obtained some distinguished patronage. Later he was very successful in a series of pictures of stage-scenes—"conversation pieces" they were called, and included representations of the favourite actors and actresses of the time in their best impersonations. He was made a member of the Royal Academy in 1769, and was thenceforward in high repute. Many examples of his work are to be met with in the various galleries and collections.

Zola, Émile (1840-1902), was the son of an Italian engineer, and came before the public as a novelist in 1867 with *Thérèse Raquin*, which at once caused him to be talked about. He then conceived the idea of a series of novels which should depict the history of a Second Empire family in various realistic phases, and began the series with *La Fortune des Rougon*, in 1871, following with five others. In 1877 he made a higher success by *L'Assommoir*. From that time every novel he published had an immense sale. *Nana*, *La Débâcle*, *Le roman expérimental*, *Paris*, and others appeared in quick succession. In the render-

ing of horror and gloom and repulsiveness Zola had no equal, and he lapsed into deplorable coarseness at times. Zola championed the cause of Dreyfus with great courage. He died from accidental asphyxiation.

Zonaras, Johannes, a Greek historical writer who compiled in the 12th century a chronicle from the creation down to his own day, and was also the author of commentaries on the Apostolic canons.

Zoroaster is supposed to have lived in the 6th century B.C. As to his real personality, however, we have little but conjecture to go upon. The religious system which bears his name dates back to the days of ancient Persia, and is set forth in the *Avesta*, the sacred writings of the Parsees, and in the "Gáthás" (hymns). Only a few thousand Zoroastrians survive in Persia, but in India the sect is numerous. The idea of the theology of Zoroaster is that "Ormuzd" is the creative force of all that tends to goodness and happiness, and that Ahriman is the spirit of evil, these two powers being in eternal conflict in regard to the destinies of the human race.

Zuccarelli, Francesco (1702-1788), a very celebrated Italian artist, who came to England, succeeded, made a handsome fortune, was one of the first members of our Royal Academy, and then returned to his own country. He was greatest in landscape.

Zumpt, Karl (1792-1849), a German classical scholar of distinction, Professor of Roman Literature at Berlin from 1827. He published a very good Latin grammar, edited Cicero's orations, Curtius, and Quintilian, and wrote learnedly on Roman antiquities.

Zwicker, Daniel (1612-1658), a Dutch Socinian doctor, who published in 1658 a notable book entitled *Treuecon Treueconum*.

Zwingli, Ulrich (1484-1531), was one of the ablest of the Swiss Reformation leaders. He preached the new doctrine with great earnestness, and wrote several works in support of them. His chief sphere of action was in Zurich, in the cathedral of which city he was preacher. He was killed in a conflict with the Roman Catholics at Cappel.

Zwerner, Ernst Friedrich (1822-1861), an eminent Silesian architect, who restored Cologne Cathedral, and built the fine Apollinaris church at Remagen.

Zyllus, Otto von (1588-1656), a zealous Dutch Jesuit and poet of some note in his day.

AMERICAN CUSTOMS DUTY.

The following are the customs duties charged on various classes of articles entering the United States:—

Glassware, Undecorated, Engraved, Cut, or Coloured Glass, 45 per cent. Cutlery, Knives, and Razors, 25 to 35 per cent. Firearms, 25 per cent. Paints and Colours, 20 per cent. Watches and Clocks, 20 per cent. Jewellery, 60 per cent. Cigars and Cigarettes, 25 per cent., and \$4.50 per lb. and Internal Revenue Tax. Brandies, Spirits, and

Liqueurs, \$2.60 per gallon. Champagnes, etc., quarts, \$9.60 per doz.; pints and half-pints, rateably. Hosiery, 20 to 50 per cent. Silks and Silk Goods, 40 to 50 per cent. China, 50 per cent. Pearls and Precious Stones, 20 per cent. Fans, 50 per cent. Laces and Embroideries, 25 to 60 per cent. Furs, 45 per cent. Carpets, 20 to 50 per cent.

American residents returning from abroad can only take back with them £50 worth of articles, purchased by them in foreign countries, free of duty.

HOLIDAYS IN THE UNITED STATES.

New Year's Day, January 1, all States.
Lincoln's Birthday, February 12 (in ten States).
Washington's Birthday, February 22, all States except Iowa and Mississippi.

Decoration Day, May 30, nearly all States.
Independence Day, July 4, all States.
Labour Day, September (first Monday), most States.

General Election Day, first Tuesday after first Monday in November, most States.

Thanksgiving Day, last Thursday in November, all States.

Christmas Day, December 25, all States.

There are many other holidays in separate States, such as the Mardi Gras in Louisiana (February 26), Confederate Day in Tennessee (May 30), Admission Day in California (September 9), and so on; but strictly speaking there is no national holiday, not even the Fourth of July. For commercial purposes, certain days have been recognised as holidays, but there is no general statute on the subject, and even the proclamation of the President appointing a day of thanksgiving, including territories, makes it a legal holiday only in those States which provide for it by law.

PEARS'
CLASSICAL
DICTIONARY.

Pears' Classical Dictionary

A knowledge of the Classics may not be a necessity to success in business, or in any other sphere except a purely scholastic one. At the same time, it greatly adds to one's enjoyment of literature, art, and conversation to possess some acquaintance with the imaginary characters, places and incidents of the ancient mythology which has been such an inspiring influence to writers of all ages. Few people outside literary and educational workers have opportunity or leisure sufficient to acquire or keep up a knowledge of this particular branch of learning. Thus, it may be useful to present in dictionary form the stories in brief of the Classic gods, goddesses, heroes, and heroines of the old Grecian and Roman literature. It will help to a better understanding of the countless references which are made from time to time in the literature of the day to Classic subjects. It is a great wonderland of poetry and romance, and forms a realm all its own.

Abas, a town of Phocis, famed for its oracle of Apollo.
Abalus, an island where amber was supposed to drop from the trees.

Abbarbarea, a Naiad, mother of Æsepius and Pedasus.

Abartimon, a district of Scythia, where the people had toes behind their heels, and could only breathe their native air.

Abas, a son of Metanira, changed into a lizard for laughing at Coreus. Also the name of the twelfth king of Argos, father of Proetus and Acrisius by Ocalea.

Abastor, one of Pluto's horses.

Abderus, armour bearer to Hercules. He was torn to pieces by the mares of Diomedes.

Abeyrtus, a son of Æetes, King of Colchis, whose sister Medea fled with Jason and murdered him.

Abydos, on the Hellespont, memorable for the loves of Hero and Leander.

Abecallia, a nymph, mother of Philander and Phylaxis, by Apollo.

Acamas, son of Theseus and Phedra, went with Diomedes to demand Helen from the Trojans, and afterwards took part in the Trojan war.

Acantha, a nymph loved by Apollo, and transformed into the acanthus.

Acarnas and Amphoterus, sons of Alcmaeon and Calirrhoe.

Acearacomes, the unshorn, a title of Apollo.

Acasta, a town of Sicily, named after King Acestes, and built by Æneas.

Acastes, King of Drepanum, assisted Priam at Troy, and entertained Æneas on his voyage.

Acetes, an attendant of Evander.

Achæa, a name of Pallas, from her temple in Daunia being defended by dogs, which attacked everyone but Greeks.

Achæi, descendants of Achæus expelled from Peloponnesus by the Heraclidæ after the Trojan war, who seized the twelve Ioman cities on the north of Peloponnesus.

Achæmenides, son of Adramastus, abandoned by Ulysses on the coast of Sicily, and found by Æneas.

Achates, friend of Æneas, renowned for his fidelity, whence the term *fides Achates*.

Acheloides, the Sirens, daughters of Achelous.

Achelous, son of Oceanus or Sol, and Terra or Trithys, god of the river Achelous, in Epirus. Contending with Hercules for Dejanira, he changed himself into a serpent, and then into an ox, when Hercules broke one of his horns and defeated him.

Acheron, a river of Thesprotia, regarded as one of the rivers of Tartarus, and whose god was a son of Ceres, who concealed himself in hell for fear of the Titans, where he was changed into a bitter stream, over which the souls of the dead are first conveyed.

Acherusia, a lake near Memphis, over which the bodies of the dead were ferried by Charon.

Achillea, an island of the Ister, where Achilles was buried, and over which birds never flew.

Achilles, son of Peleus and Thetis; when an infant, was plunged by his mother into the Styx, and made invulnerable, except in the heel, by which she held him. Went to Troy, but, quarrelling with Agamemnon about Briseis, refrained from the war till the death of Patroclus. He then slew Hector in battle at the Scaean gate, and achieved other deeds of valour, but ultimately was slain, being wounded with an arrow in his vulnerable heel by Paris.

Achillides, Pyrrhus, son of Achilles.

Acidolia, one of the names of Venus, from her fountain of that name in Bœotia.

Actis, a Sicilian shepherd, son of Faunus and Simaethis, loved by Galatea, crushed to death by his rival Polyphemus with a piece of rock, but changed by the gods into a stream on Mount Ætna.

Acomonides, one of the Cyclopes.

Acoetes, pilots of the ship which carried off Bacchus when asleep, and were changed into sea-monsters for ridiculing the gods.

Aconteus, a hunter changed into stone by Medusa's head at the nuptials of Perseus and Andromeda.

Acrisioiades, one of the names of Perseus, from his grandfather Acrisius.

Acrisius, son of Abas (King of Argos) and Ocalea, and father of Danaë, whom he confined in a brazen tower, where she was wooed by Jupiter in a golden shower, and gave birth to Perseus.

Actæa, a Nereid; also Ceres.

Actæon, son of Aristæus and Autonoe, changed into a stag, and was devoured by dogs for watching Diana at her bath.

Actius, one of Apollo's titles from Actium, where he had a temple.

Actoria, a maid of Ulysses.

Adamas, a Trojan prince, killed by Merion.

Admetus, daughter of Eurystheus, and priestess of Juno's temple at Argos. Hercules presented her with the girdle of the Queen of the Amazons.

Admetus, son of Pheres and Clymene, king of Phereæ, in Thessaly, married Theone, daughter of Thestor, and, on her death, Alceste, daughter of Peleus. Apollo served Admetus for nine years as shepherd, and the Fates granted him that Admetus should never die if another person laid down his life for him, which Alceste did. Admetus was one of the Argonauts, and was present at the hunt of the Calydonian boar.

Adonis, son of Cinyras by Myrrha and beloved by Venus. Was killed by a wild boar while hunting, and changed by Venus into the anemone. Proserpine restored him to life, on condition of his spending half the year with her.

Adrastia, daughter of Jupiter, and called Nemesis the avenger.

Æa, a huntress, changed into an island by the gods, to rescue her son from her lover, the river Phisus.

Æacus, son of Jupiter and Aegina. His people being destroyed by pestilence, Jupiter transformed ants into men, who became his subjects, and Æacus called them *Myrmidones*. Æacus became judge of hell with Minos and Rhadamanthus.

Æetes, King of Colchis, and father of Medea, Absyrtus and Chalciope, killed Phryxus, who had fled to his court on a golden ram to gain the fleece, which the Argonauts regained by the aid of Medea, though guarded by fire-breathing bulls and a dragon.

Ægeus, King of Athens, who consulted the oracle about children, and on his return rested at the court of Pittheus of Troezen, whose daughter Æthra he married. He told her if she had a son, to send him to Athens as soon as he could lift a stone under which Ægeus had concealed his sword. A son was born, Theseus, who went to Athens where Ægeus was living with Medea; the latter tried to kill Theseus, but he escaped and revealed himself by the sword to Ægeus. When Theseus returned from Crete, after the death of the Minotaur, he forgot to do so, as agreed on, and white sails as a signal of success, and Ægeus, concluding he was dead, threw himself from a high rock into the sea.

Ægina, daughter of Asopus and mother of Æacus by Jupiter, who visited her in the form of a flame.

Æglochinus, a title of Jupiter, from his being brought up by the goat Amalthea in Crete, and using her skin instead of a shield at the war with the Titans.

Ægis, the shield of Jupiter, who gave it to Pallas, and when placed on Medusa's head petrified all who looked upon it.

Ægisthus, King of Argos, son of Thyestes and Pelopea, who was told he could avenge himself on his brother Atreus only by a son by himself and his daughter, whom he consecrated to Minerva in order to preserve her, but afterwards not recognising her, a son was born to him. Pelopea who had married Atreus, sent Ægisthus to murder Thyestes; but recognising him from his own sword, which Pelopea had kept, Thyestes sent him to murder Atreus, after which Ægisthus ascended the throne, and banished the Atreidae—Agamemnon and Menelaus—who fled to Polyphides of Sicyon, and thence to Ceneus of Ætolia. They married the daughters of Tyndarus, King of Sparta, to whom Menelaus succeeded, while Agamemnon went to claim Argos. But Ægisthus became reconciled to the Atreidae, and was made guardian of Agamemnon's kingdom, and his wife Clytemnestra during his absence at Troy. Falling in love with her, she and he murdered Agamemnon on his return, but both were subsequently killed by Orestes, son of Agamemnon.

Ægle, a nymph, daughter of Sol and Nereia, also of the Nereides.

Ægeon, an animal into which Pan transformed himself when flying before Typhoea in the war with the giants.

Ægyptus, son of Belus, and brother of Danaus, to

whose fifty daughters he gave his fifty sons in marriage. Danaus having fled to Argos in fear of his brother's fifty sons, they followed him from Egypt into Greece, and Danaus accepting them as sons-in-law, induced his daughters to murder their husbands the first night of their marriage—which all did, excepting Hypermnestra who spared Lynceus. Ægyptus was afterwards killed by his niece Polyxena.

Ælio, one of the *Harpiæ*; also one of Actæon's dogs.

Ælurus, a deity worshipped by the Egyptians in Bubastis, where cats were enshrined and buried.

Æneades, descendants of Æneus.

Æneus, a Trojan prince, son of Anchises and Venus, reared by a Nymph, and taught by Chiron. Fought in the Trojan War with Dionides and Achilles, and rescued his mother, Anchises, and the household gods from the flames of Troy, and led his son, Ascanius, leaving Creusa, his wife, to follow. Retiring to Ida he built twenty ships and visited Polymnestor in the Thracian Chersonesus, Delos, the Strophilades, Crete, and Epirus, and then King Acestes at Drepanum, in Sicily, where he buried his father: hence he sailed for Italy, but was driven to Africa, and was entertained by Queen Dido of Carthage, who became enamoured of him, but Æneus left suddenly, by order of the gods, and Dido killed herself. He was then driven to Sicily and went thence to Cumæ, where the Sibyl conducted him to the lower world. After a voyage of seven years and the loss of thirteen ships he reached the Tiber, where King Latinus promised him his daughter, Lavinia, betrothed to Turnus by her mother, Amata. Turnus declared war, and in a combat with Æneus was killed. Æneus then married Lavinia, and in her honour built Lavinium; he succeeded Latinus, and after a short reign was killed in war with the Ruturnans or drowned in the Numicus. The Cæsars traced their origin to Æneus, and his wanderings form the subject of the *Æneid* of Virgil.

Æolia, an appellation of Arne, daughter of Æolus.

Æolias, seven islands N. E. of Sicily: Lipara, Hiera, Strongyle, Didyme, Iriausa, Phœnicusa, and Isonymus; supposed to be the retreat of the winds, whose King was Æolus.

Æolus, son of Hippotus, and made king of the winds in Æolia; presented Ulysses, on his return from Troy to Ithaca, all the adverse winds in bags; but his companions from curiosity having opened them, they proved useless.

Æsacus, son of Priam by Alexirhoe, or by Arisla; enamoured of Hesperia, he pursued her into the woods, when she flung herself into the sea and was made a bird, Æsacus being at the same time changed into a cormorant.

Æsculapius, the god of healing, son of Apollo by Corvus, or by Latona, daughter of Pilegias; was physician to the Argonauts, but was struck by Jupiter, whereupon Apollo killed the Cyclops Æsculapius after death was worshipped at Epidaurus, Pergamus, Athens, Smyrna, etc., goats, bulls, lumps and pigs were sacrificed, and the cock and serpent were sacred to him. A temple was raised to him at Rome.

Æson, son of Cretheus, and brother of Pelias, succeeded his father in Iolchus, but was deposed by Pelias. He married Alcemele, by whom he had Jason. Jason demanded his father's kingdom of Pelias, but the latter persuaded Jason to go in search of the golden fleece. On his return with Media, she filled the vens of Æson with the juice of certain herbs, and so restored him to youth, but he afterwards killed himself by drinking bull's blood to avoid the persecution of Pelias.

Æsyetes, a Trojan, from whose tomb Polites, the Greek, watched ships during the Trojan War.

Æthalides, a herald, son of Mercury.

Æthion, a horse of Pallas, which shed tears at the death of his master.

Æthra, daughter of Pittheus and mother of Theseus by Ægeus. Was carried away by Castor and Pollux when they recovered Helen, and accompanied the latter to Troy.

Agamemnon, king of Mycenæ and Argos, brother of Menelaus, and son of Priestheus. On the death of Atreus, Thyestes seized Argos and removed Agamemnon and Menelaus. Agamemnon married Clytemnestra and Menelaus Helen, daughters of Tyndarus, king of Sparta, who helped them to recover their father's kingdom; Agamemnon established himself at Mycenæ, and Menelaus succeeded Tyndarus at Sparta. When Paris carried off Helen, Agamemnon assumed command of the forces against Troy and showed great valour. After the capture of Troy, Cassandra prophesied his murder by Clytemnestra, but disregarding her he returned to Argos, where, as he was leaving the bath, Clytemnestra and Ægisthus murdered him.

Agapenor, commander of Agamemnon's fleet.

Agathenor, father of Polyxenus.

Agenor, King of Phœnicia, son of Neptune and Libya, and brother of Belus, married Telephassa, by whom he had Cadmus, Phoenix, Cilix and Europa.

Aglaia, or **Paniphaë**, one of the Graces.

Aglauros, daughter of Erechtheus, changed into a stone by Mercury.

Agonalia, or **Agonia** were Roman festivals in honour of Janus.

Agrotaria, festivals in honour of Bacchus.

Agrotaria, a yearly sacrifice of 500 goats to Diana at Athens.

Agylæus, one of the names of Apollo.

Ahenobarbus, so named because his beard was changed to bronze by Castor and Pollux, for refusing to believe in the victory at Lake Regillus.

Ajax, the son of Telamon and Peribœa. The most famous fighter of the Greeks next to Achilles. Sought to gain possession of the arms of Achilles at the latter's death, and on their being granted by Ulysses, he slaughtered a flock of sheep under the impression that they were the sons of Atreus; he then stabbed himself, and the blood from his wound changed into the hyacinth.

Aias, armour bearer to King Sarpedon, of Lycia, killed by Ulysses.

Aibion, Neptune's son by Amphitrite. Founded Britain and introduced astronomy and shipbuilding.

Aicander, attendant of Sarpedon, killed by Ulysses.

Aicenor, a Trojan, father of Pandarus and Bittas.

Aicthous, son of Pelops, who, being accused of slaying his brother Chrysippus escaped to Megara, where, killing a lion that had destroyed the King's son, he succeeded to the kingdom.

Aicæ was one of Actæon's dogs.

Aicæste, daughter of Pelay and Anaxibia, conspired with her sisters to put to death Pelias that he might be restored to youth by Medea, but she refused. They then escaped to Admetus, who married Aicæste.

Aicæmede, mother of Jason by Æson.

Aicæneus, son of Nautilus and Peribœa, King of Phœcia. Married his niece, Arete, by whom he had several sons and a daughter, Nausicaa.

Aicthous, daughter of Minyas, changed into a bat, and her spindle and yarn into a vine and ivy, for ridiculing Bacchus.

Aicmone, daughter of Electryon of Argos, and was promised to Amphitryon on condition that he would revenge on the Teleboæ the death of his sons. In Amphitryon's absence Jupiter assumed his form, and became by Alcmena father of Hercules, who was born at the same birth with Iphiclus, her son by Amphitryon.

Aictrion, a youth placed on guard by Mars when visiting Venus, to warn him of the approach of Phœbus. Transformed into a cock for falling asleep.

Aicirrhœa, a daughter of the river-god Granicus.

Aicirrhœus, a son of Neptune, died when attempting to cut down Pallas's olive on the Acropolis.

Aicæus, a giant, son of Neptune and Terra, wedded Iphimedia, who by Neptune had twins, Orus and Ephialtes, the Alcides.

Aicæus, a river of Arcadia, whose god fell in love with Arethusa, changed by Diana into a fountain in

Ortygia, a small island near Syracuse, where the Alpheus was supposed to rise again after passing under the sea.

Aicæa, daughter of Thestius and Eurythia, married King Ceneus by whom she had Meleager. It was ordained that Meleager's life should last as long as a log of wood, thrown into the fire by the Parca at his birth, was preserved; but on his killing his two maternal uncles, Alcæa hung it into the fire and destroyed it. Meleager died and Alcæa killed herself.

Aicæthma, daughter of King Melissus, of Crete.

She fed Jupiter with goat's milk.

Aicæraus, an officer of Chyrras, changed into marjoram.

Aicæta, wife of King Latinus, espoused the claims of Turnus, to whom she had betrothed Lavinia before Æneas's arrival. On Æneas succeeding, she destroyed herself.

Aicævalia, festivals in honour of Ceres.

Aicævalia, the food of the gods, which gave immortality to its consumers. Venus healed Æneas's wounds with it.

Aicæmon, turned into a fountain near Lake Lerna.

Daughter of Danaus.

Aicmon, a name assumed by Jupiter in Libya, where he appeared as a ram to Hercules and revealed a fountain, nine days' journey from Alexandria. Here a temple was erected which had a famous oracle.

Aicæmus, a favourite nymph and satyr of Bacchus.

Aicæraus, son of Oecleus, or of Apollo, by Hypernestra; figured in the hunt of the Calydonian boar, and in the Argonautic expedition. To escape going with Adrastus against Thebes, he hid himself, but being discovered by Epiphyle, was forced to proceed to Thebes, where the earth swallowed him and his chariot.

Aicædamus, son of Busiris, killed by Hercules.

Aicæmedon, a sutor of Penelope, killed by Telemachus.

Aicæmonius and **Aicæpius**, two brothers who saved their parents on their shoulders when Catana was burning, and for their bravery were placed by Pluto in Leuce after death.

Aicæmon, the twin brother of Zethus, born to Jupiter by Antiope on Mount Cithæron, whither she had fled to avoid the wrath of Dæce. A shepherd succoured the infants, and Amphion became a great musician. Amphion and Zethus besieged Lycus in Thebes, and put him to death, and tied his wife to a wild bull, which dragged her over precipices till she died.

Aicæstratus, charioteer to Castor and Pollux.

Aicætrite, the daughter of Oceanus and Tethys, and mother of Triton, by Neptune.

Aicætrion, King of Thebes, who, as avenger of the deaths of the sons of Electryon, was offered the latter's crown and daughter Alcmena. Jupiter appeared in the form of Amphitryon, and Alcmena bore Hercules.

Aicætrionides, a name given to Hercules as the presumed son of Amphitryon.

Aicætrius, a river of Thessaly on whose banks Apollo fed Admetus's flocks.

Aicænetus, a lake of sulphur in the Hirpini country, whence Aicæto descended into hell.

Aicæus, son of Neptune, became King of Melia, and had great skill with the cestus. Was killed by Pollux.

Aicætor, king of Argos, blinded his son Phoenix for insulting Clyta, his concubine.

Aicæto, daughter of Danaus and Europa. Married to Enceladus, and killed him on the marriage night. She was the only one of the fifty Danaides absolved from the duty of filling the leaky vessel in hell, because of having supplied Argos with water in a drought. Neptune falling in love with her carried her off, and she bore him Nauplius.

Aicæta, an Armenian goddess whose festivals were marked by excessive licence.

Aicæbia, sister of Agamemnon, wife of Nestor.

Aicæbus, an Argonaut, son of Neptune and Astypalæa, acted as pilot of the *Argo*. Was king of

Ionis, and married Samis, daughter of the Mæander, by whom he had four sons, Perilas, Eneides, Samus, Alitherus, and a daughter Parthenope. While behaving cruelly to a slave, the latter turned scornfully and told his master he would never taste the wine. Anceus angered pressed the grapes into his cup, when the servant exclaimed "There's many a slip 'twixt the cup and the lip." The next moment a wild boar rushed into the vineyard and Anceus was killed in attempting to drive the beast away.

Anchises, the son of Cyprius by Themis, and so beautiful that Venus paid court to him on Mount Ida, and bore him *Æneas*.

Anchurus, the son of Midas, and when the oracle declared that a certain gulf in the earth would never cease to swallow up what was above until what Midas held most dear was thrown into it, he leapt in and was never seen again. Midas erected an altar of stones on the spot, which was changed to gold after Midas became possessed of his fatal gift.

Androclus, a Roman slave who was thrown into the arena to the lions, but was saved by being recognised by one of the animals, Androcles having once extracted a thorn from its foot in an African cave.

Androgynæ, a mythical race of hermaphrodites, who lived in the region of Africa beyond the Nasonides.

Andromache, daughter of King Eetion of Thebes, and wife of Hector. The scene in Homer's *Iliad*, describing her taking leave of Hector on his going forth is one of the best known passages in the poem. After Hector's death and the fall of Troy, Andromache became the prize of Pyrrhus. Still later she married Priam's son Helenus.

Andromeda, daughter of King Cepheus, by Cassiope, having been promised as a bribe to Phæneus, hence she became the victim of Neptune's anger, by reason of the boast of her mother that she was more beautiful than Juno. The sea-god visited the country with an inundation and sent a huge sea-monster to ravage the land. The people were in desperate straits, and, to appease Neptune, Andromeda, at the command of the oracle of Ammon, was chained to a rock and given up to the monster. Perseus came to the rescue with Medusa's head, turned the dragon to stone, liberated and married Andromeda.

Andrus, an island of the Cyclades where there was a temple to Bacchus with a fountain whose waters, during the ides of January, tasted like wine.

Angitia, a wood near Lake Fucinus, inhabited by descendants of Cui-e, to whom serpents were harmless.

Anicetus, son of Hercules and Hebe.

Anigrades, nymphs of the Anigrus.

Anigrus, a river of Thessaly wherein the Centaurs washed the wounds inflicted on them by Hercules.

Anius, son of Apollo, was king of Delos, and father of Gen, Sperus and Elais, to whom Bacchus gave the power of changing whatever they pleased into wine, corn and oil. He afterwards transformed them into doves to prevent Argæumion carrying them off to Troy to supply the Trojan forces with provisions.

Anisus, a Liliyan giant, son of Terra and Neptune, who had an encounter with Hercules, by whom he was finally vanquished, Hercules holding him in the air and squeezing the life out of him.

Antenor, a Trojan who urged the Greeks to build the wooden horse which was forced into Troy by a breach made in the walls. Antenor went to Italy after the fall of Troy, where he built Padua.

Anteros, son of Mars and Venus, and named the god of mutual love.

Anthesphoria, feasts held in Sicily in honour of Proserpine.

Anthesteria, Greek festivals held in honour of Bacchus in the month of February, lasting three days.

Anthus, epithet of Bacchus at Athens and Patra.

Anthos, companion of Hercules, killed in the Rutulian War.

Antilibanus, a mountain of Syria.

Antilocheus, son of Nestor and Eurydice, killed at Troy by Memnon.

Antimachus, a Trojan who conspired with Paris

to oppose Helen, when Menelaus and Ulysses came as ambassadors.

Antinous, son of Eupelthes of Ithaca, suitor for the hand of Penelope, and conspired to destroy Telemachus. He was killed by Ulysses.

Antiope, daughter of King Nycteus, of Thebes, was wooed by Jupiter, and to escape her father's anger fled to Mount Cithæron, where she bore the twins Amphion and Zethus. After many other lovings, marryings, and wanderings, she finally became the wife of Phocus, son of Ornytion.

Antiphates, King of the Læstrigones, and said to have eaten one of Ulysses' messengers, and afterwards sunk with stones the whole of the ships except the one Ulysses was on.

Antiphys, son of Priam, killed by Agramemnon.

Antubis, an Egyptian god, in the form of a man with a dog's head. Disguised in sheep's skin he accompanied Osiris against India.

Aon, son of Neptune, became King of Bœotia, after whom the Boeotians were called A'ones, and the country Aonia.

Aornos, a fortress on the Ganges, besieged by Hercules, but afterwards taken by Alexander.

Apheta, a city of Magnesia, where the *Argo* was launched.

Apreodasia, an island in the Persian Gulf, where Venus was worshipped.

Aphrodite, the Greek name of Venus.

Apis, an Egyptian god in the form of an ox which had several distinctive marks: a black body with a square white spot on the forehead; the figure of an eagle on its back; a white spot like a crescent on the right side; the hairs of the tail double; and a knot under the tongue like a beetle. The Apis festivals lasted seven days, the ox being led in solemn procession. If he lived twenty-five years he was drowned in the Nile, embalmed and buried by Memphis. Then came the period of mourning, continuing until another ox was found with the right marks. There were two temples to Apis.

Apollo, the son of Jupiter and Latona, and born on the Isle of Delos, which Neptune raised from the bottom of the sea as a refuge for Latona, who was persecuted by Juno. Apollo became the god of the arts, of medicine, music, poetry and eloquence; his oracle at Delphi was the most famous in the world.

When Jupiter killed Apollo's son *Æsculapius* by his cyclopean thunder, Apollo killed Cyclops, who had forged the bolt, for which Jupiter banished Apollo from heaven. Then Apollo went to Thessaly, and served nine years as a shepherd. He aided Neptune to build the walls of Troy, and on King Laomedon refusing him his promised reward, he destroyed the inhabitants with a pestilence. Among his other names were Pythius, Phœbus, Cynthius, Lycius, Clarus, Ismenius, Volturius, Smintheus, etc. His oracles were at Delphi, Delos, Claros, Tenædoe, Cyrrha, and Patara. Augustus built a temple of Apollo on Mount Palatine, although he was not originally a Roman god.

Apollonia, a festival held at Ægælea, in honour of Apollo and Diana.

Applades, the name of a temple on the Apian road dedicated to Vesta, Venus, Minerva, Concord, and Peace.

Arachne, daughter of Idmon, dyer, and so expert with her needle that she challenged Minerva. Suffering defeat, she committed suicide, and was turned into a spider by the goddess Minerva.

Arctas, son of Jupiter and Callisto, who ruled over Pelagia, which was called Arcadia after him.

Arceolus, son of Jupiter and grandfather of Ulysses.

Archegetes, one of the titles of Apollo.

Arctonens, a title given to Apollo, because of his carrying the bow with which he killed the python.

Arctos, a mountain near Propontis, where giants and monsters dwelt.

Arestanus, the peasant whose goat suckled *Æsculapius*.

Arctia, daughter of Rhexenor and mother of Nausicaa.

Arcthusa, daughter of Oceanus, who was changed into a fountain by Diana to enable her to avoid Alpheus.

Aetna, son of Nestor and Anaxibia.

Arga, a huntress changed into a stag by Apollo.

Argentaum, a promontory of Ionia.

Argentanum, a town in Gallia Belgica.

Arges, son of Colus and Terra; had only one eye, in his forehead.

Argæus, son of King Perdiccas of Macedonia, succeeded on the deposition of Amyntas.

Argl. (See **Argos**.)

Argia, daughter of Adrastus, married Polynices, and was put to death by Creon for burying her husband against Creon's orders.

Argilas, founded Chalcedon.

Argiletum, a trading quarter at Rome.

Argilius revealed to the Ephron of Sparta the correspondence of Pausanias with the Persian king.

Argillus, a mountain of Egypt.

Argilus, a town built by a colony of Andrians in Macedonia, near the Strymon.

Arginussæ, three islets where Conon defeated the Spartan fleet, 405 B.C.

Argiphontes, a name given to Mercury after killing the hundred-eyed Argus.

Argo, the ship in which Jason and his fifty-four Argonauts sailed to Colchis to recover the golden fleece, and on its prow was a beam which pronounced oracles.

Argonautæ, the companions of Jason on the *Argo*. The expedition was to recover the golden fleece which was guarded by a sleepless dragon at Colchis. *Æetes* promised to deliver the fleece if Jason would perform certain seemingly impossible tasks, but by the aid of *Medea* he achieved them, and carried off the fleece. Among the Argonauts were *Hercules*, *Theseus*, *Æsculapius*, *Nestor* and *Orpheus*.

Argos, the capital of Argolis, built by seven Cyclopes. *Amyntemon* was King of Argos during the Trojan War.

Argus, possessed of a hundred eyes, of which only two slept at a time. Juno set him to watch Io, but Mercury slew him; afterwards his eyes were put on the tail of Juno's sacred peacock.

Ariadne, the daughter of *Minos* II. of Crete. Falling in love with *Theseus* she gave him a clue to extricate himself from the labyrinth where he was in danger of being destroyed by the *Minotaur*. *Theseus* slew the monster and married *Ariadne*, but deserted her later. *Bacchus* gave her a crown of seven stars, which was turned into a constellation.

Aricia, niece of *Ægeus*, married *Hippolytus* after he was raised from the dead by *Æsculapius*.

Arimaspiæ, a river of Scythia that ran with golden sands. The *Arimaspi* of the district had but one eye, in the middle of the forehead.

Aristæus, son of *Apollo* and *Cyrene*, born in *Libya*, reared by the Seasons, and fed on nectar and ambrosia. Married *Antiope* by whom he had *Actæon*. Later he pursued *Orpheus's* wife *Eurydice*, who died from being stung by a serpent. Afterwards atoned for it by the sacrifice of four bulls and four heifers, and regained prosperity. Was deified at his death.

Aristhenes, the shepherd who rescued *Æsculapius* when deserted by his mother.

Aristocrates, King of *Arctida*, killed by his subjects for offering violence to a priestess of *Diana*.

Arne, daughter of *Æolus*, wooed by *Neptune* in the form of a bull.

Artemis, the Greek name of *Diana*.

Avantius, a Roman made drunk by *Bacchus* for ridiculing his rites, and killed by his daughter *Medullina* for insulting her.

Ascalaphus, son of *Acheron*, being appointed by *Pluto* to watch *Proserpine* in the Elysian fields, testified that the goddess had eaten pomegranates. Jupiter ordered her to be six months of each year with *Pluto*, and the other with her mother. For this *Proserpine* changed *Ascalaphus* into an owl.

Ascolismæus, an Athenian winter festival of husbandmen in honour of *Bacchus*. A goat was slain, and they filled its skin with oil and wine, and whoever could leap upon it and stand steady, gained it as his prize.

Astarte, a Syrian goddess, corresponding to the Greek *Venus*.

Asteria was the daughter of *Cosus*, the Titan, married *Crius's* son *Pereus*, and bore the celebrated *Hecate*. Zeus paid court to her in the form of an eagle.

Astræa, daughter of *Astræus*, or, according to others, of *Titan*, was the goddess of Justice, and lived during the Golden Age. Disgusted with the wickedness of mortals, she returned to heaven, and was made the constellation *Virgo*, and is represented as holding a pair of scales in one hand, and a sword in the other.

Astræus, husband of *Aurora*, and one of the Titans. **Astyanax**, son of *Hector* and *Andromache*. His mother saved him from the flames of *Troy* but he was afterwards killed.

Astyochæ, daughter of *Actor*, was mother, by *Mars*, of *Ascalaphus* and *Ialmenus*.

Atabulus, the Apulian name for the south-east wind.

Atalanta, the daughter of King *Schoeneus*, was born in *Arcadia* and was very beautiful, but vowed never to marry. She had hosts of admirers and in order to free herself from them she proposed to run a race with them, she carrying a dart, while they carried nothing. The lovers started first and the conditions were that she was to kill all whom she overtook, but if one of them reached the goal before her she was to marry him. At last *Hippomenes* favoured by *Venus* had three golden apples from the garden of the *Hesperides* given him, and as he ran he threw them down one after another. *Atalanta* fascinated by them stopped to pick them up and thus *Hippomenes* won the race. *Atalanta* bore a son, *Parthenopæus*, to *Hippomenes*.

Atë, the goddess of evil, and daughter of *Zeus*, banished for sedition from heaven to earth.

Athamas, king of *Boeotia* *Orchomenos*, and son of *Æolus*. He married *Themisto*, who bore him *Phryxus* and *Helle*. Later he divorced her and married *Ino*, by whom he had *Learchus* and *Melicerta*. *Ino* was jealous of *Themisto's* children and wanted to kill them, and persuaded an oracle to predict that a pestilence then raging could only by their sacrifice be arrested. On being led to the altar they fled to *Colchis* through the air on a golden ram, and *Ino* despatched the fury *Tisiphone* to torture *Athamas* to madness. In this condition he imagined *Ino* to be a lioness, and her sons whelps, whereon *Ino* threw herself into the sea, and was changed into a sea-deity.

Athens, the Greek goddess corresponding to the Roman *Minerva*.

Atlantides, a name given to the descendants of *Atlas*, including *Mercury* and *Hermæpandrus*.

Atlantides, the seven daughters of *Atlas*—*Maia*, *Electra*, *Taygeta*, *Asteropæ*, *Merope*, *Aëcyone*, and *Clæneo*. Called *Hesperides*, after their mother *Hesperis*, and at death changed into *Pleiades*.

Atlas, the son of *Japetus* and the Oceanian *Clymene*, and married *Hesperis*, who bore him the seven *Atlantides*. After vanquishing the *Gorgons*, *Perseus* sought refuge with *Atlas* who refused; whereon *Perseus* produced *Medusa's* head, and changed him into the *Atlas* mountain, which is so lofty as to have given rise to the notion that *Atlas* carried the world on his shoulders. There are other versions.

Atræus, son of *Pelops* by *Hippodamia*, was king of *Mycenæ*. Suspected of the murder of *Chrysippus*, he fled to *Argos* and succeeded *Eurystheus* as king, marrying his daughter, who bore him *Plisthenes*, *Agamemnon*, and *Menelaus*.

Atrides, any descendant of *Atræus*, but especially *Agamemnon* or *Menelaus*.

Atropatia, the N.W. part of *Media*.

Atropos who cut the thread of life, was one of the *Parce* daughters of *Nox* and *Erëbis*.

Attes, son of *Calæus*, made the worship of *Cybele* popular in *Lydia*. *Junô* had him killed by a wild boar.

Augeæ, a town of *Laconia*.

Aulis, son of *Eleus*, an Argonaut, and afterwards king of *Elis*. He had enormous stables which had never been cleaned, and *Hercules* was set to clean

them as one of his great tasks for which he was to receive a tent of the herds of Augeas. Hercules diverted the waters of the Alpheus into the stables, but Augeas regarding this as a trick refused the reward. Hercules then conquered Elis, killed Augeas, and gave the crown to his son Phylax.

Aulis, the harbour of Euboea, where the Greek expedition against Troy was detained by tempests. Agamemnon was about to offer up his daughter, Iphigenia, to Diana, but the goddess substituted a ram.

Aurora, daughter of Hyperion and Thia, was married to Astræus by whom she had the winds and stars. She went with Orion to Delos where he was killed by Diana's arrows. Aurora is depicted as a veiled figure in a rose-coloured chariot drawn by white horses opening the gates of day.

Auster, a south-west wind that brought rain and fog in winter, and a dry wind in summer.

Auligeus, son of Mercury, was an Argoonaut. He was a robber of flocks whose marks he changed, but Sinypus, son of Aiolus, got the better of him by putting his marks under the feet of his oxen.

Automedon, son of Dioneus, was charioteer to Achilles, an afterwards to Pyrrhus.

Avernus, a lake between Cumæ and Puteoli, the waters of which were so fatal that no birds could live near it. It was one of the entrances to Tartarus.

B

Bacchanalia were Roman festivals in honour of Bacchus and were marked by wild revelry.

Bacchantes, priestesses of Bacchus who danced and threw themselves about in barbaric abandonment at the Bacchanalian orgies.

Bacchus, the god of wine, son of Jupiter and Semele, the daughter of Cadmus. Juno was jealous of Semele and compassed her death before Bacchus was born, but the child was saved by Jupiter's protection, and nursed by Ino. While sojourning with the nymphs of Nysa he made wine from the grape, and afterwards made expeditions to many lands to teach the use of the vine, the tilling of the earth, and the art of collecting honey, and was raised to the rank of a divinity. He is generally represented crowned with vine and ivy-leaves. Bacchus married Ariadne after she was deserted by Theseus at Naxos.

Bacchis, an old Phrygian woman who lived with her husband, Philemon, in a hut and was visited by Jupiter and Mercury in disguise, and as a reward for the hospitality extended to them Jupiter transformed the cottage into a splendid temple. The couple lived to a ripe old age and at death were changed into trees before the temple's doors.

Bellerophon, son of Glaucus, King of Ephrya, and named Bellerophon after slaying Bellerus. After many other adventures, he set out to subdue the Chimæra, and, aided by Minerva, achieved his task, afterwards marrying Cassandra. Attempting to fly to heaven on the back of Pegasus, Jupiter sent a gadfly to sting the horse, which threw Bellerophon to earth, and he wandered about blind for the rest of his life.

Bellona, the goddess of war, daughter of Phorcys and Ceto, and companion or sister of Mars. The temple to Bellona on the Campus Martius was built 290 B.C. by Appianus Claudius Cæcus. At Comana she had about 5,000 priests, Hellonari, who inflicted wounds on themselves when offering sacrifices.

Bergion and Albion, two giants, sons of Neptune, were killed with stones from heaven when opposing Hercules crossing the Rhodæ.

Bergistani, a people on the east of Illyria.

Bermius, a mountain of Macedonia.

Beros, the nurse of Semele, whose shape Juno assumed in approaching Semele.

Biston, son of Mars and Callirhoe and founder of Bistonia in Thrace.

Bomoloch, youths who were whipped at the altar of Diana Orthia during her festivals, the one who cried out the least being awarded a prize.

Bona Dea, the Roman goddess of chastity, who was sister, wife or daughter of Faunus. The Vestals celebrated her festival on 1st May, when no male was permitted to be present.

Boreas, the personification of the north-east wind. Boreas is said to have been the son of Astræus and Aurora, and carried away Orithyia to Mount Hæmus in Thrace. He was worshipped as a deity, and is said to have possessed twelve mares of such fleetness that they could cross the sea without wetting their feet.

Branchus, son of Sminicus of Miletus, and loved by Apollo, who gave him power of prophecy, and he delivered oracles at Didyme.

Briareus, a colossal giant with a hundred hands and fifty heads, son of Cœlus and Terra. He climbed Olympus to join the conspiracy for the overthrow of Jupiter, for which he was cast beneath Mount Ætna.

Briséis, a beautiful woman who was part of the spoils appropriated by Achilles on the conquest of Lyrnessus. Later Agamemnon claimed her, causing Achilles to withdraw from the Trojan War. After the death of Patroclus she was given back to Achilles.

Busris, king of Egypt and son of Neptune and Libya. When Hercules was in Egypt Busris had him bound hand and foot and carried to the altar; but Hercules freed himself and slew both Busris and his courtiers.

C

Caballinus Fons, the Hippocrene fountain on Mount Helicon dedicated to the Muses, the water being made to gush from the ground by a blow from the hoof of Pegasus.

Caburan, a chief of the Helvi.

Cacus, the giant, was a son of Vulcan and Medusa, and lived on Mount Aventine. He stole some of the herds of Hercules and dragged them; by the tails to his cave. Hercules heard them low, however, when passing, and attacked and strangled Cacus, afterwards erecting on the spot an altar to Jupiter Servator.

Cadmus, son of Agenor, King of Phœnicia, who, while searching for his sister who had been carried off by Jupiter, came to Thrace, and at the command of the Delphic oracle, founded a city where a certain heifer was seen to sink in the grass. This city was Thebes. Cadmus married Hermione, daughter of Venus. Juno persecuted his children, who were changed into serpents.

Caduceus, the magic wand of Mercury with which he conducted the souls of the dead across the Styx and could raise the dead to life.

Cæneus, a maiden changed into a man by Neptune, and took part in the Argive expedition and Calydonian hunt. Was later transformed into a bird, but in Elysium once more became a maiden.

Calchas, the Greek soothsayer and high priest. Was chosen to go with the Greeks against Troy, but declared that the fleet could not sail until Iphigenia was sacrificed; that the plague could not be stopped till Chryseis was restored to her father; and that Troy could not be taken without Achilles' aid, nor without a ten years' siege.

Calliope, the Muse of poetry, and daughter of Jupiter and Mnemosyne. She was sister to Orpheus by Apollo.

Callirhoe, daughter of Scamander, married Tros, and became the mother of Ganymede and Assaracus. Coreus fell in love with her, but she scorned him. This angered Bacchus, whose priest Coreus was and the god sent a pestilence, whereupon the oracle demanded that Callirhoe should be sacrificed. Coreus, compelled to lead the nymph to the altar, stabbed himself. Callirhoe fled to Attica, and on the brink of a fountain there, killed herself.

Callisto, an attendant of Diana, and a daughter of King Lycaon, of Arcadia. She bore a son to Jupiter, Arcas, and Juno changed her into a bear.

Calysse, daughter of Æolus, and mother of Endymion. Calysse, a city of Attolia devastated by a bonè sent by Diana in revenge for the neglect of her divinity.

This gave rise to the famous hunt of the Calydonian Boar, in which many noted princes took part. Meleager succeeded in slaying the animal, and presented its head to Atalanta.

Calyppo, the goddess of silence, was queen of Cygia. She offered Ulysses hospitality on his being shipwrecked, then entreated him to make her his wife, and on his refusal detained him seven years.

Capaneus, one of the Seven against Thebes, son of Hipponous and Astinome, and husband of Evadne. Having vowed to take Thebes in spite of Jupiter, the god killed him with a stroke of lightning, and on hearing the news Evadne committed suicide.

Carna, a Roman goddess, protectress of the human body and the exterior of houses. Offerings of vegetables were made to her.

Cassandra, daughter of Priam and Hecuba, and beloved by Apollo, who granted her the gift of prophecy, but afterwards withdrew it. After the fall of Troy she became the captive of Agamemnon who took her to Mycenæ, where Clytemnestra put her to death.

Cassiopea, mother of Andromeda. As she boasted of being fairer than the Nereides, Neptune sent a sea monster to ravage Æthiopia, and to appease him Andromeda was exposed on a rock, but delivered by Perseus; and Cassiopea was made a southern constellation of thirteen stars.

Castalia, a Parnassian fount whose waters inspired those who drank of them with the poetic spirit.

Castor and Pollux, twin sons of Jupiter by Leda. They were members of the Argonaut expedition and showed great valour. Pollux afterwards became the god of boxing and wrestling, and Castor performed great achievements with horses. Castor and Pollux cleared the Hellespont, and were proclaimed the patron of navigation. They contended with Theseus for Helena, but Castor was killed by Idas, and Pollux appealed to Jupiter to restore Castor, and the god granted them conjoint immortality, so that when one was on earth, the other was in the world below.

Celano, daughter of Atlas, and beloved by Neptune.

Centauri, a race half horses and half men, who inhabited the Mount Pelion region. Led by Chiron, one of their number, they engaged in many savage contests, but in the end the greater part of them were killed by Hercules, and the rest driven to Mount Pindus.

Cerberus, the many-headed dog which kept watch over the many-headed gates of Hades. It was one of the "labours" of Hercules to bring Cerberus to earth, and his hardest task.

Ceres, in the Roman mythology, called Demeter by the Greeks, was the goddess of the earth's produce, especially of corn. The festivals to Ceres, Cerialia, were among the most elaborate displays that the Romans gave, consisting of a grand show of games in the Circus Maximus.

Chaos, the unfathomable void from which the world and its first occupants, gods, men, and all things of the earth, were gradually shaped.

Charon, son of Erebus, whose duty it was to ferry the souls of the dead over the waters of the Styx and Acheron, to the infernal regions, receiving an *obolus* for each ferrying; hence the old Roman custom of putting an *obolus* into the mouth of a corpse before interment.

Charybdis. (See Scylla and Charybdis.)

Chiron, the most famous of the Centaurs, killed by an arrow from the bow of Hercules.

Circe, daughter of the Sun (Helois), and Perseis, gained fame as a sorceress, and after putting to death the Prince of Colchis, her husband, was banished to the Island of Ææa. It was to this island that Ulysses and his companions were also exiled, and, drinking of Circe's magic cup they were turned into swine, Ulysses himself being saved by partaking of a herb that made the magic potion powerless. Circe was then forced to give his companions back their former shape. Circe, a water-snymph with whom Apollo fell in love, but because of her revengeful conduct towards Leucothea who had deserted her, Apollo transformed

her into a sunflower, so that it might always be turned towards him in his daily journey across the heavens.

Comus, the god of revelry and feasting. As treated by Milton in his famous poem he is the son of Bacchus and Circe. As represented in ancient times, he is a winged youth overcome by drinking.

Cornucopia, the horn of plenty, and the symbol of abundance, was supposed to have its origin as the gift of Jupiter to Amalthea, in return for her having fed him while young with goat's milk. The horn was to yield her in plenty everything that she desired.

Cupid, god of love, by the Greeks called Eros. He was the son of Venus, by Jupiter (or, as some represent, Mercury), and was generally pictured as a fair youth with wings, carrying bow and arrows, with which he fired his love shots. Cupid fell in love with Psyche, but concealed his identity from her until an accident discovered him to her. They were ultimately united in an immortal existence.

Curetes, Cretan priests of Jupiter, to whom Rhea gave the charge of the infant Jupiter (Zeus), and they concealed him from Kronos, his father, by crashing their shields and cymbals together whenever he approached, so that the cries of the child could not be heard.

Cyclopes, a race of Sicilian shepherds of gigantic stature, with only one eye, in the middle of the forehead, who lived on human beings. Polyphemus, the son of Neptune, was their chief. They lived in the region of Mount Ætna, and assisted Vulcan at his forges. The legend has other versions.

D

Dactyls were ten priests of Cybele who inhabited Mount Ida, where they are said to have discovered iron, and introduced the art of manipulating the metal by smelting.

Danae, who was visited by Jupiter (Zeus) in a shower of gold, was the mother of Perseus, Jupiter being the father. Before the birth of Perseus, an oracle predicted that the son that would be born would kill his grandfather, Acrisius, king of Argos, and father of Danae. To avoid that calamity the mother was immured in a brazen tower, and after the birth of Perseus, she and the child were put in a chest and thrown into the sea, but drifted to the shore of Seriphus and were saved. The oracle's prediction was afterwards fulfilled, Acrisius being accidentally slain by Perseus.

Danaus, son of Belus, king of Tyre, and twin brother of Ægyptus. Ægyptus had fifty sons, Danaus had fifty daughters, and Danaus, to escape his brother and his sons, fled with his daughters to Argos and became king. Hearing of this the sons of Ægyptus betook themselves to Argos, and demanded their uncle's daughters for wives. Their aims were frustrated, however, by each wife killing her husband on the wedding night, with a dagger provided by their father. One only escaped, Lynceus, who killed Danaus. Another version says that the uncle and nephew were reconciled, and reigned together for many years.

Dardanus, son of Jupiter (Zeus) and Electra, was the founder of Troy and ancestor of the Trojans. It is his name that is commemorated in the Dardanelles.

Delos, the smallest of the islands of the Cyclades, supposed to have been raised from the bottom of the sea by Neptune, and became the birthplace of Apollo.

Delphi, in ancient Greece, was the seat of the temple and oracles of Apollo, and the wealthiest of all contemporary shrines. It possessed over 3,000 statues, and was plundered by Nero and other emperors for the enrichment of Rome.

Deucalion, a son of Prometheus, and his wife Pyrrha, were the only persons saved when Jupiter (Zeus) destroyed Hellas by a deluge. To effect the re-peopleing of the earth, they were ordered to throw behind them the bones of their mother, and picking

up some stones from "mother earth," they flung them from them, and the stones cast by Deucalion were transformed into men, and Pyrrha's stones into women.

Diana, (called Artemis by the Greeks), the goddess of hunting, and twin sister of Apollo. She was also the goddess of light.

Diomedes, king of Argos, and one of the champions of the Grecian army in the Trojan War. He overcame Ajax in single combat, and is one of the most prominent fighting figures of the Iliad.

Dragon of the Hesperides, which kept guard over the golden apples of the famous garden, had a hundred heads and as many different voices. It was one of the "labours" of Hercules to procure some of the golden apples, and by slaying the dragon he accomplished the feat.

Dryades, the nymphs of the trees, were supposed to have their birth with and die with the trees, over which they were the divinities.

E

Echo, a sportful nymph, who diverted the attention of Juno (Hera) while Jupiter (Zeus) made love to other nymphs. When Juno discovered the deception, she transformed the deceiver into an Echo, depriving her of the power of speaking except when spoken to. Subsequently Echo pined away for the love of Narcissus, until only her answering voice remained to perpetuate her name.

Electra, daughter of Agamemnon, seeing the danger that her brother Orestes was in after the murder of her father by her mother Clytemnestra, had him sent away to Phocis, where he was protected by King Strophilus. In revenge for this, Clytemnestra compelled Electra to marry a peasant, but the peasant never sought to be more than husband in name, so that when later Orestes returned, Clytemnestra was put to death, and Electra became the wife of her brother's friend, Pyrrhus.

Elysium, the abode of "the shades of the blessed," situated in some undefined part of the lower world.

Erato, the muse of lyric and amatory poetry. She is usually depicted crowned with roses and myrtle, and holding in her hand a lyre.

Erebus, the son of Chaos, and one of the deities of Hades. This name is also used as a synonym for darkness, referring especially to the region through which departed souls pass to the Inferno.

Eteocles, a son of Œdipus, king of Thebes. After his father's death, he and his brother Polyneices agreed to reign in alternate years, Eteocles, as the elder, taking the first turn. At the end of his year he refused to relinquish the crown to Polyneices, and Adrastus, king of Argos, was appealed to. Adrastus, whose daughter had become the wife of Polyneices, sent an army and seven of his bravest generals (the Seven against Thebes) to his son-in-law's aid, and a severe conflict ensued. In the end the two brothers agreed to settle their differences by single combat, and both were slain.

Euphrosyne, one of the three graces, Aglaia and Thalia being the other two.

Europa, daughter of Phœnix and beloved of Jupiter (Zeus), who assumed the shape of a white bull and carried her off to Crete, where she became the mother of Minos, Sarpëdon, and Rhadamanthus. Later she married Asterus, king of Crete, who adopted Europa's children by Jupiter.

Eurydice. (See *Orpheus*.)

Eurytheus. (See *Hercules*.)

Euterpe, the muse who presided over music, and was regarded as the inventress of the flute, the instrument which she is usually represented as holding in her hands.

F

Flora, the goddess of flowers (the Chloris of the Greeks). The feasts in her honour were of the most lavish description lasting from April 28th to May 1st.

Furies (the Eumenides of the Greeks) represented as three in number, Tisiphone, Megara, and Alecto, whose work was to carry out the vengeance of the gods upon countries, people and individuals. They are depicted as winged females of threatening aspect, with serpents hanging from their hair and blood dropping from their eyes.

G

Galatea. (See *Acis*.)

Ganymede, Jupiter's cup-bearer, a mortal youth of such grace and beauty that the god had him carried off to Olympus on the back of an eagle.

Ganymede, the special divinity allotted to a particular place or building.

Glaucus, the Boeotian fisherman, who was made a sea deity by Oceanus, and carried off Anaxidice from Naxos. Apollo granted him the gift of prophecy.

Golden Fleece (The) forms one of the most entrancing of the legends of mythology. The fleece was that of the ram Chrysomalus and was deposited on a tree at Colchis, being guarded by a terrible dragon. Jason undertook the task of recovering the fleece (See *Argonauts*), the *Argo* was fitted out and among the heroes taking part in the expedition were Hercules, ... many exciting adventures the fleece was recovered and Jason was duly rewarded.

Graces (Greek Charites) were three in number, Euphrosyne, Aglaia, and Thalia, and represented the perfection of grace and beauty of body and mind. They were daughters of Jupiter (Zeus) and are usually shown as attendants on Venus (Aphrodite).

H

Hades or Pluto, was the god of Inferno, son of Saturn (Cronos), brother of Jupiter (Zeus) and Neptune (Poseidon), and had for wife Proserpine (Persephone). In classical depictions the god is represented seated on a throne, Cerberus lying at his feet. Hades is also the name given to the internal regions, rendered *sheol* in the Hebrew.

Habe, cup-bearer to Jupiter (Zeus) and the gods, and daughter of Jupiter and Juno (Hera). She is represented as the goddess of youth, and by the Romans was named Juventas.

Hecate, often represented with three heads, was supposed to preside over magic and enchantments, and her dominion extended over hell, heaven, earth, and sea. In heaven she was Luna, on earth Luna and in Hades Proserpine or Hecate. She was the daughter of Jupiter and Latona. It was the custom to propitiate her by sacrifices of dogs, lambs, and honey.

Hector, son of King Priam and Hecuba, and husband of Andromache, was captain of the Trojan forces, and the most valiant of them all. After repeated victories over Grecian leaders, he was at last slain by Achilles, and his body was borne in triumph three times round the walls of Troy. Jupiter (Zeus) interposed and ordered the body to be given up to Priam, after which the warrior was buried with great pomp and solemnity.

Hecuba, wife of Priam was a dignified and much enduring mother, whose lot it was to see her husband and her favourite sons killed by the enemy. After the fall of Troy she fell to the lot of Ulysses and accompanied the conquerors on the voyage back to Greece, but while halted in the Thracian Chersonesus, after trying to avenge the murder of her son, Polydorus, she cast herself into the sea at Cyneum.

Helena, daughter of Jupiter (Zeus), and Leda, famed for her beauty. Among her suitors were the most celebrated princes of the age, but she ultimately became the wife of Menelaus, king of Lacedæmon. After three years of happiness, Paris, son of Priam, king of Troy, came on a visit to the court of Menelaus, and persuaded Helena to follow him to Troy. To avenge this outrage the Trojan

War was begun. When Paris was killed, in the ninth year of the war, she married Deiphobus, but afterwards betrayed him in order to regain the favour of Menelaus, which she succeeded in doing, and remained with him until his death.

Helle, daughter of Athamas and Nephele, and sister to Phryxus. Nephele escaped with her two children, when the sacrifice of Phryxus was demanded, the three being carried away upon the back of the ram with the golden fleece, but crossing the sea between the Chersonesus and the Sigeum, Helle fell into the sea, which now bears her name, the Hellespont.

Heracleidae, the name given to the descendants of Hercules, who were said to have led the Dorians in the invasion of Peloponnesus, which resulted in the three Heracleidae obtaining kingdoms, Argos falling to Temenus, Messenia to Cresphontes, and Lacedaemon to the two sons of Aristodemus, who died before the conquest was completed.

Hercules (Greek, Heracles), son of Jupiter (Zeus) and Alcmena, is the personification of physical strength, and the most wonderful stories are related of his exploits. Even while in his cradle he strangled two serpents which Juno (Hera) had sent to destroy him. At eighteen he killed the lion of Mount Cithaeron. Afterwards, having been rendered mad by Juno, he killed his own children and those of his brother, and on recovering was so plunged in grief that he exiled himself and went to consult the oracle of Apollo at Delphi. He was commanded to serve Eurystheus for twelve years, during which period he was to perform twelve "labours." The gods equipped him for his tasks and he carried them through successfully. The first was to kill the lion of Nemea, which he choked to death; the second was to destroy the seven-headed Lernaean hydra, which he killed with his club of brass, the gift of Vulcan; the third was to capture the Arcadian stag, which he caught in a trap; the fourth to destroy the wild boar of Erymanthus; the fifth, to clean Augean stables; sixth, to kill the carnivorous birds of Stymphalia; seventh, to capture the wild bull of Crete; eighth, to capture the mares of Diomedes; ninth, to obtain the girdle of the Queen of the Amazons; tenth, to slay the monster Goryon, eleventh, to obtain some golden apples from the garden of the Hesperides; and twelfth, to bring to earth Cerberus, the three-headed dog of Hades. He was now free from service to Eurystheus and returned to Thebes. He continued to achieve wonderful feats, and died at last from the poison of -- of his own arrows, was carried to Olympus and endowed with immortality.

Hermes, son of Jupiter (Zeus) and Maia, and the patron of arts and inventions. He is said to have been the inventor of astronomy, gymnastics, the alphabet, the lyre, and other important things. As the herald of the gods, he was entrusted with the guidance of the shades of the dead to the under world, and was called the god of roads, the Greeks erecting statues to him on the waysides.

Hero and Leander. (See *Leander*.)

Hesperides, the three daughters of Atlas and Hesperia, appointed to protect the golden apples which Juno (Hera) gave to Jupiter (Zeus) on the day of their nuptials. The hundred-headed dragon, Ladon, was always on guard at the foot of the tree, but was slain by Hercules when he made his successful attempt to regain possession of the apples.

Hippocrene, a fountain at the foot of Mount Helicon, originally set flowing by the ground being struck by the hoofs of Pegasus, the winged horse. This fountain was dedicated to the Muses and regarded as the source of poetic inspiration.

Hydra, a monster of seven or more heads, each of which grew again when cut off, whose ravages in the marshes of Lerna kept the country in terror. It was one of the twelve "labours" of Hercules to destroy this Hydra.

Hygieia, the goddess of health, said to be the daughter of Asclepius, and held in great veneration among the ancients. Some authors confound her with Minerva. She is usually depicted holding a serpent in one hand and a cup in the other.

Hymen, the god of marriage, was one of the Muses and the son of Apollo. He is generally represented as crowned with flowers, and holding a bridal torch in one hand and a purple vestment in the other. Hymen's good offices were always invoked by the Greeks at their marriages.

Hyperion, one of the Titans, was father by Thea of the Sun (Helios), the Moon (Selene), and the Dawn (Eos). His father was Heaven (Uranus), his mother Earth (Ge).

I

Iphigenia, daughter of Agamemnon and Clytemnestra. At the outbreak of the Trojan War it was proclaimed by the priest of Apollo that the wrath of the gods, aroused by the killing of the sacred stag by Agamemnon, could not be appeased except by the sacrifice of Iphigenia, and contrary winds detained the fleets until this was performed. Just as the knife of the priest was uplifted, Artemis carried off Iphigenia to Taurus, and a goat that appeared in her place was unharmed instead of her. The Greeks then proceeded against Troy. Iphigenia became a priestess, and was afterwards the instrument in saving the life of her brother Orestes when he was about to be sacrificed.

Iris, daughter of Thaumas and Electra, was one of the Oceanides and messenger of the gods. Her office was to cut the thread of life as the body was expiring. She was the goddess of the rainbow, and is represented as a winged figure with a herald's staff and pitcher.

Isla, daughter of Saturn and Rhea, and one of the chief divinities of the ancient Egyptians.

Ixion, King of Thessaly, and husband of Dia, to whose father Deioneus, he promised a valuable gift, but being unable to obtain the gift, he put his father-in-law to death to get out of his promise. Jupiter (Zeus), after a long period of expiation, summoned him to Olympus and placed him at the table of the gods. Afterwards Ixion began to make love to Juno, but Jupiter substituted a cloud of the shape of the goddess, and from this the Centaurs were born. Then as a punishment Ixion was condemned to be bound to a fiery wheel that never ceased to roll through Hades.

J

Janus, son of Apollo, was supposed to have two faces, symbolising the sun and the moon respectively. He presided over gates and avenues, and is represented with a key in one hand and a rod in the other. The first month of the year was named after him, as also one of the seven hills of Rome.

Jason. (See *Argonauta*.)

Juno (Greek Hera), wife of Jupiter (Zeus), and queen of heaven. Some authors represent her as the daughter of Saturn and Rhea. She was an exacting and jealous wife, and avenged herself with severity upon those of whom Jupiter became enamoured as well as upon their offspring. She was the mother of Mars, Hebe, Lucina, and Vulcan. She aided the Greeks in the Trojan War. The worship of Juno in Rome dates from an early period, and the Kalends were dedicated to her.

Jupiter (Greek Zeus), son of Saturn and Ops, was the lord of heaven and presumed father of gods and men. He was educated in a cave on Mount Ida, and while a child made war against and conquered the Titans. Thus he became master of the world, and after giving the empire of the sea to Neptune, and that of the infernal regions to Pluto, installed himself king of heaven. The story of his adventures and amours occupies a chief part of the mythological legends, and are referred to under the distinctive names of the personages or places concerned. He is usually depicted seated on a throne, with thunderbolts in one hand ready to be hurled against his enemies, and a sceptre of cypress in the other, and wearing a wreath of olive or myrtle. The temples to Jupiter were numerous, and at Rome the worship of the god was under the charge of the chief of the flames.

L

Laocoon was the priest of Apollo, and son of Priam, and for the part he took in opposing the entrance into Troy of the wooden horse of the Greeks, Minerva caused two gigantic serpents to issue from the sea and engage Laocoon's two sons in their coils. The father rushed to the rescue of his sons, and the next moment all three were in the grasp of the serpents, and were crushed to death. One of the finest pieces of sculpture of ancient Rome represents this dramatic scene. It is at the Vatican.

Læander, a youth of Abydos, who fell in love with Hero, a priestess of Venus at Sestos, by whom his passion was returned. They met clandestinely, Læander swimming over the Hellespont nightly, guided by a lamp which Hero hung out on the top of a tower. The light being blown out one wild night Læander lost his way and was drowned, on discovering which Hero threw herself into the sea.

Leda, wife of Tyndarus, king of Sparta. Jupiter discovered her bathing, and became enamoured of her, assuming the shape of a swan so as not to alarm her. Leda afterwards brought forth two eggs, from one of which sprang Helen, and from the other Castor and Pollux.

Loki, the god of evil of the Scandinavian mythology.

M

Mars (Greek Ares), the god of war, and one of the three tutelary deities of Rome, was a son of Jupiter and Juno. His love for Venus led to many adventures, and gained him the enmity of Apollo and Vulcan, and in the wars of Jupiter and the Titans he was seized and imprisoned until Mercury interceded for him. In the Trojan War he espoused the cause of the besieged. The Romans believed him to be the father of Romulus.

Meleager, son of Cleus, king of Aetolia, and Althea, was one of the heroes of the expedition of the Argonauts, and subsequently led the chase after the Calydonian boar. It had been decreed by the Fates after his birth that he should live as long as a certain firebrand, which on the fire should not be burned up, and his mother scratched the brand from the fire and thereafter jealously guarded it. When Althea heard of Meleager's slaying of the boar she went to the temple of the gods to return thanks, but on the way she saw the bodies of her brothers, whom Meleager had slain because they protested against the skin being given to Atalanta. This so incensed Althea that she went home and cast the fatal firebrand on the fire, and when it was consumed Meleager died.

Melpomene, the Muse of tragedy, was a daughter of Jupiter and Mnemosyne. She was generally represented wearing a mask, with a tragic mask in her hand and sometimes a dagger.

Memnon, son of Tithonus and Aurora, led a force of 10,000 of his own men in aid of his uncle King Priam in the Trojan War. He was slain by Achilles after a long and terrible encounter. The famous statue of Memnon at Thebes is now declared to be that of an ancient Egyptian king, and not of Memnon.

Meneleus, king of Sparta and brother of Agamemnon, was the husband of Helen, and after she left him and followed Paris to Troy, he entered upon the Trojan War, in which he bore himself with great bravery. After the war he forgave Helen and took her back, but they did not reach Sparta until eight years later.

Mentor, the friend of Ulysses, who, during the latter's absence at the Trojan War, saw to the training and education of Ulysses's son Telemachus, a task of which he acquitted himself so well that the term Mentor has become proverbial for that of a wise guide.

Mercury (Greek Hermes), son of Jupiter and Maia, was Jupiter's messenger, and patron of travellers, shepherds, traders, and robbers, and god of merchandise. Many of his exploits turn upon

thievery or mischief, and he is credited with having robbed Neptune of his trident, Venus of her girdle, Mars of his sword, and Jupiter of his sceptre. He wore a winged cap and had wings to his feet, and could transport himself from place to place with the speed of the wind. He was the father of Pan, Hermaphroditus, Autolykus, and many others.

There was a famous temple of Mercury at Rome. **Midæa**, king of Phrygia, who having done Bacchus some service was permitted to choose whatever reward he pleased. So he asked that whatever he touched might be turned into gold, and his prayer was granted. The gift was a fatal one. The things he ate, the clothes he wore, the water he washed in, the very sands on which he stepped after bathing, turned into gold, and there was soon such a plethora of it that he had no comfort in life. For giving the opinion that Pan made better music than Apollo he was given ass's ears. His death came about from drinking hot bull's blood.

Minerva, the goddess of wisdom, war, and the liberal arts (Greek, Athena, also Pallas), was the daughter of Jupiter and Metis, and sprang direct from her father's brain. She is represented as being impervious to the passion of love and a virgin of divinity. Many temples were erected to her in Greece and Rome. She is depicted as wearing a helmet, and carrying a shield.

Minos was king of Crete and took for his wife Pasiphae, who bore him several children. (See **Minotaur**).

Minotaur was half bull, half man, and was the unnatural offspring of Pasiphae and a bull. This came about by Minos's refusal to sacrifice a white bull to Neptune, whereupon the latter caused Pasiphae to become enamoured of a beautiful bull. The Minotaur was confined in a labyrinth by Minos, and every year the monster devoured seven youths and seven maidens, which the king compelled the Athenians to yield up to him. Ultimately the Minotaur was slain by Theseus, and Minos was subsequently put to death by Clearchus, King of Sicily.

Mnemosyne, the goddess of memory and mother of the Muses. She was wooed by Jupiter in the form of a shepherd.

Morpheus, son of Somnus, was the god of sleep and dreams. He is generally represented as a chubby, winged child, holding poppies in his hand.

Nyx, one of the eternal deities, the offspring of Night.

N

Narcissus, a beautiful youth, son of the river god Cephissus. The nymph Echo (see **Echo**) fell in love with him, but he did not return her passion. To avenge this offence, Venus caused him to become enamoured of his own reflection in the waters of a fountain. Unable to possess himself of this shadow, he at last killed himself.

Nemesia, daughter of Nox and goddess of vengeance. She is sometimes represented with a helm and a wheel, and sometimes in a chariot pulled by griffins.

Neptune (Greek Poseidon) was the son of Saturn and Ops, and brother of Jupiter and Pluto. To him was given the kingdom of the sea, but he did not regard this as equal to the empire of heaven and earth, and he conspired with other gods to dethrone Jupiter. For this he was punished, but afterwards accepted his portion peacefully. He made love to Amphitrite as a dolphin, and assumed other shapes for other like deceptions. He is usually represented with a trident in his hand being drawn across the sea in a chariot by brazen-hoofed horses, attended by tritons and nymphs.

Nereus, a sea deity, son of Oceanus and Terra, and husband of Doris, by whom he had fifty daughters called the Nereides. His abode was the Aegean Sea, where he was surrounded by his daughters, who often sported and sang around him. He was gifted with prophecy, and foretold to Paris the consequences of his elopement with Helen.

Nestor, King of Pylos, and grandson of Neptune.

When Hercules slew Nestor's father and eleven brothers, Nestor was saved because his tender age detained him at home. He joined the Greeks in the Trojan War, although an old man, and did more good service by wise counsel than many of the heroes by force of arms. Agamemnon declared that if he had had ten generals like Nestor Troy would soon have been reduced to ashes.

Nicestaria, a festival at Athens in memory of Minerva's victory over Neptune in their dispute about naming the capital of the country.

Niopsus, a tyrant of Cos, one of whose sheep is said to have brought forth a lion, which was regarded as portending future greatness and sovereignty to Cos.

Niobe, daughter of Tantalus, King of Lydia, and wife of Amphion, King of Thebes, by whom, according to Hesiod, she had ten sons and ten daughters. Intense pride of her offspring caused her to sneer at Leto, who had only two children, Apollo and Diana, and, to avenge this insult, all her daughters, except Chloris, were destroyed by Diana, while Niobe herself was transformed by Jupiter into stone, which in summer sheds incessant tears.

Nireus, a King of Naxos, son of Chloropus and Algaia, much celebrated for his beauty of person. He was one of the Grecian chiefs during the Trojan War.

Nisus, a son of Hyrtacus, born on Mount Ida. He accompanied Aeneas to Italy, and showed great bravery against the Rutulians. In endeavouring to rescue his friend Euryalus from the enemy he was himself slain as well as Euryalus. Their friendship became proverbial.

Noctiluca, a surname of Diana. She had a temple on Mount Palatine, Rome, where it was customary to show lighted torches by night.

Nocturnus, one of the gods of night, and supposed to be identical with Vesper or Nox.

Notus, the south wind, also called Auster. Ovid described Notus as having wet wings, with a forehead covered with dark clouds, and the beard heavy and swollen with mists.

Numa Pompilius succeeded Romulus as king of Rome, and reigned wisely and peacefully for thirty-nine years.

Numenia, or **Noemania**, a festival observed by the Greeks at the beginning of every lunar month, in honour of all the gods, but especially of Apollo, or the sun.

Nymphs, female deities of two classes, of the land, and of the sea, and supposed to live for thousands of years.

O

Onus, a son of the Tiber and of Manto, who assisted Aeneas against Turnus.

Oedipus, son of Laius, King of Thebes, and Jocasta. It was predicted before Oedipus was born that Laius would perish by the hands of his son, so as soon as the boy was born he was ordered to be destroyed, but Jocasta gave the child to a servant who carried him to a mountain and left him there. He was discovered by a shepherd and educated as his own child. When grown to manhood he had an accidental meeting with Laius. The latter was driving along in his chariot, and the son, being narrow the King ordered Oedipus to make way for him. Oedipus refused and in the encounter that ensued Laius was slain by his son, as the oracle had predicted. Proceeding to Thebes, Oedipus found the population in the power of the Sphinx sent by Juno to lay waste the country, everyone who failed to answer the riddle the Sphinx propounded being destined to death. The kingdom and the hand of the Queen were offered to whomsoever would answer the riddle and free the people from the monster. Oedipus solved the riddle, the Sphinx killed itself out of mortification, Oedipus became king and married his own mother. Later, Thebes

was overrun by the plague and the oracle announced that the epidemic would not stop until the murder of Laius was discovered. In the end, Oedipus was made aware of his true position and identity, and the revelation caused Jocasta to hang herself, and Oedipus to tear his eyes out. Afterwards he wandered forth with his daughter Antigone and died at Colonus.

Oenomaus, a son of Mars by Sterope, the daughter of Atlas. He was king of Pisa, in Elis, and father of Hippodamia.

Enone, a nymph of Mount Ida, daughter of the river Cebrenus in Phrygia. She foretold to Paris that his voyage to Greece would be fatal to him and the ruin of his country. When Paris was dying, and saw that her predictions were being fulfilled, he ordered his body to be carried to her, in hopes that she still might save him, but he expired as he came into her presence.

Ogmios, a name of Hercules among the Gauls, who looked upon him as the god of eloquence and persuasion.

Olympus, a mountain of Macedonia and Thessaly (now Lacha). The ancients supposed that its top reached the heavens, and from that development the idea of its being the abode of the gods and the location of Jupiter's court.

Omphale, queen of Lydia, and daughter of Jarlanus. She desired to see Hercules, and her wish was gratified. After the murder of Eurystus, Hercules fell sick, and was ordered to be sold as a slave, that he might recover his health and senses. Omphale bought him out of slavery, and he became enamoured of the queen, who bore him a son.

Opus, a city of Locris, on the Apsopus, destroyed by an earthquake. It was the birthplace of Abder, the favourite of Hercules, and it was there that Patroclus accidentally killed Elyonimus.

Orbona, a goddess of Rome, who was supplicated not to deprive children of their parents. She was the protectress of orphans.

Orades, nymphs of the mountains, daughters of Phoroneus and Hecate. They generally rode upon Diana, and accompanied her in hunting.

Orestes, son of Agamemnon and Clytemnestra, was the murderer of his mother and Aegisthus. (See **Electra**.) After that deed the Furies haunted him and he fled from one country to another. He afterwards, by Apollo's command, submitted himself to the court of the Atræopagus, and being acquitted returned to Argos and ascended the throne. (See **Iphigenia**.)

Orion, a famous giant, sprung from Jupiter, Neptune and Mercury. Demanding the hand of Hero or Merope, daughter of Cepion, king of Chios, in marriage, her father set him the task of clearing the island from wild beasts as the price of betrothal. This deed Orion easily achieved, and Cepion, on the pretence of complying, solicited Orion, and when he was asleep put his eyes out. Afterwards he recovered his eyesight by turning his vacant eyes to the rising sun, and at once revenged himself upon the king. After death, Orion was placed in heaven, where one of the constellations bears his name.

Orpheus, son of Oëgar by Calliope, had a lyre given to him by Apollo, and played upon it so exquisitely that all things inanimate as well as animate were charmed. He was one of the heroes of the Argonautic Expedition, and on his return married Eurydice. Later Eurydice died from the sting of a serpent, when Orpheus followed her to Hades and charmed Pluto and his associates so much that his wife was allowed to accompany him back to earth, on condition that he did not look upon her until the borders of Hades had been passed. The temptation was too great: he looked, and lost her for ever.

Orthus, a dog which belonged to Geryon, from whom and the Chimæra sprang the Sphinx, and the Nemean lion. He had two heads, and was destroyed by Hercules.

Ostris, the son of Jupiter and Niobe, and the chief divinity of the ancient Egyptians.

Ossa. (See **Pellion**.)

P

Pan, the god of shepherds, huntsmen, and rural people, said to have been the son of Mercury and Penelope. He is represented with two small horns, a fat nose, and the lower limbs of a goat. He was full of tricks and mischief, and by transforming himself into other shapes, captivated in turn Diana and Echo. He was chief of the Satyrs.

Pandarus, son of Lycaon, who assisted the Trojans against the Greeks, and, being without a chariot, generally fought on foot. He was killed by Diomedes.

Pandia, a festival established at Athens by Pandion. **Pandora**, the first woman that trod the earth, was first made as an image by Prometheus, and then invested with life with fire stolen from heaven. In revenge, Jupiter ordered Vulcan to make a woman out of the earth, who was also called Pandora, and endowed with every gift. She married Epimetheus, and gave her husband a box which she had brought with her from heaven. When this box was opened, there issued from it every kind of human ill and disaster, which spread themselves over the world. Hope alone remained at the bottom of the box to shed its influence in easing the troubles of life. Thus a gift which is more noted for the bad which accompanies it than the good is called a Pandora's box.

Parce, the three Fates—Clotho, who held the distaff upon which the thread of life was spun; Lachesis, who turned the spindle and decided the actions and events of life; and Atropos, who held the scissors to cut the thread of life.

Paris, son of Priam, king of Troy, was brought up as a shepherd, and made himself prominent, and won and married Crione. At the marriage of Peleus and Thetis, the goddess of discord threw an apple among the assembly, inscribed "for the fairest." Each of the goddesses present claimed the apple, and when the claimants had been reduced to three—Juno, Venus, and Minerva—Paris was called upon to give judgment, and decided in favour of Venus, who rewarded him with Helen. (See *Helen*.)

Parnassus, a mountain of Phocis, dedicated to the Muses, and to Apollo and Bacchus.

Patroclus. (See *Achilles*.)

Pax, an allegorical divinity to whom the Athenians raised a statue, representing her as holding the infant Plutus, god of wealth, in her lap, to intimate that peace is a prosperity. The Romans represented her with the horn of plenty.

Pegasus, the winged horse which sprang from the blood of Medusa after Perseus had cut off her head. He ascended to Olympus and became thunder and lightning carrier for Jupiter (Zeus). He was given to Bellerophon to conquer the Chimera, and after the task was completed, Bellerophon wanted to scale the heavens on the back of Pegasus, but the animal threw him, and flew up to Olympus alone, and was placed among the constellations by Jupiter.

Pelias, the twin brother of Neleus, and the son of Neptune by Tyro, the daughter of Salmones. His birth was concealed by his mother, and he was exposed in the woods, but his life was saved by shepherds and he received the name Pelias from a spot of the colour of lead on his face. Pelias visited his mother and after the death of Cretheus, Tyro's second husband, he seized the kingdom. Later Jason demanded the kingdom which Pelias had usurped, and the latter offered to resign it to him if he would recover the Golden Fleece. After the return of Jason, Medea caused Pelias to be put to death.

Pelion, a mountain of Thessaly, the top of which was covered by pines. In their wars against the gods, the giants placed Mount Ossa upon Pelion, to scale the heavens with greater ease.

Persephone, wife of Pluto and queen of the nether world. She was the daughter of Jupiter and the mother of the Furies.

Perseus, son of Jupiter and Danaë. One of the first achievements of his manhood was to slay the Gorgon Medusa, and bring the head to Polydectes, who had set Perseus the task in the hope of getting rid of

him. Obtaining Pluto's helmet, which rendered him invisible, and other aids from other gods and goddesses, he flew through the air to the land of the Gorgons. Finding the Gorgons asleep, he was able to cut off Medusa's head, and flew away with it, reaching the court of Polydectes in time to save his mother Danaë from falling into his toils. He married Andromeda, whom he had rescued from death in Ethiopia. (See *Andromeda*.)

Phoenix, a fabulous bird of the Egyptian mythology, said to have lived for hundreds of years, and then consumed itself on a funeral pyre set aflame by its wings, springing up again into new youthful life from the ashes.

Pleiades, the seven daughters of Atlas and Pleione, who being pursued by Orion appealed the gods for succour and were transformed into doves, placed among the stars.

Pluto. (See *Hades*.)

Polyphemus, son of Neptune and chief of the Cyclops. He lived in a cave near Mount Ætna. Ulysses and twelve companions entered this cave, and six of them were devoured by the monster. Then he fell asleep, and Ulysses put his one eye out and escaped. (See *Achilles*.)

Pomona, the goddess of fruit trees.

Priam, king of Troy and father of Hector and Paris. (See *Paris* and *Hector*.)

Proteus, a soothsayer who lived in a cave on the island of Pharos, and who could only be made to utter his prophecies when caught asleep, as while awake he had the power of changing his shape so as not to be recognised.

Psyche, a nymph whom Cupid married and visited nightly, concealing his features from her and leaving before dawn. She contrived to see him one night however, as she slept, by lighting her lamp, enraptured with his beauty. He was awakened by the falling upon him of a drop of oil and fled. After that she wandered in search of him, but incurred the hatred of Venus, who tried to thwart the love. Psyche was ultimately united to Cupid, however, and endowed with immortality.

Pygmalion, a sculptor who, having carved a beautiful statue in ivory of a woman, appealed to Venus to breathe life into it, which the goddess did, and he married the animate statue, who bore him Euphrasia, founder of the city of that name in Cyprus.

Python, the famous serpent of the caves of Mount Parnassus. It was born from the mud left by the Deucalion deluge. Apollo slew the monster.

R

Rhadamanthus, son of Jupiter and Europa, who lived such a life of rectitude that at his death he was appointed one of the three judges of Hades, Minos and Æacus being the other two.

Ripheus, a Trojan who joined Æneas the night that Troy was reduced to ashes, and was eventually killed after making a great carnage among the Greeks.

Romulus, twin brother to Remus, son of the vestal virgin Sylvia. The mother was condemned to be buried alive and the children thrown into the Tiber. The boys were rescued, however, and suckled by a she-wolf. Afterwards they resolved to found a city, but quarrelled as to its situation, and in the conflict Remus was killed. This left Romulus free to act upon his own choice and Rome was accordingly built.

S

Salamis, daughter of the River Asopus, by Methone. Neptune fell in love with her, and carried her to an island of the Ægean, which afterwards bore her name, and where she gave birth to a son called Cecrops.

Salmones, a king of Elis, son of Æolus and Enarete, who married Alcide, by whom he had Tyro. To imitate the thunder he used to drive his

chariot over a brazen bridge, and darted burning torches on every side to imitate lightning. This angered Jupiter, who struck Salmonius with a thunderbolt and placed him in Hades near his brother Sisyphus.

Saturn (Greek, Chronos), the oldest divinity of the Greek and Roman mythologies, and supposed to be the god of agriculture. From before the founding of Rome, festivals in his honour, called Saturnalia, were held. He is generally represented as a bent old man, holding a child in one hand (indicating his habit of devouring his children) and a scythe in the other.

Saturn, a son of Cælus, or Uranus, by Terra. He avenged his father's cruelty by mutilating him with a scythe, and afterwards obtained his father's kingdom, his brothers assenting on condition that he did not bring up any male children. Saturn therefore always devoured his sons as soon as they were born, but his wife Rhea, concealed from her husband her sons Jupiter, Neptune, and Pluto, and gave him large stones to swallow instead of her male offspring. It was this that led to the Titans making war upon Saturn, and his ultimate overthrow. Jupiter banished him, and he fled to Italy, where Janus received him with marked attention.

Scylla and Charybdis. Scylla was a dangerous rock near the Italian coast in the Strait of Messina. This rock was a peril to mariners, but in avoiding it they were often drawn into the Charybdis whirlpool on the opposite side; hence the proverb, "to escape Scylla and fall into Charybdis."

Semele, daughter of Cadmus and mother of Bacchus. Jupiter visited her as the god of thunder and she was killed by the lightning, but gave birth to Dionysus, whom Jupiter saved and protected.

Serapis, an Egyptian divinity, to whom many temples were built.

Sibylla, ten in number, were endowed with the gift of prophecy. They compiled and kept the Sibylline Books, of which there were nine volumes, three of which were bought by Tarquin and carefully preserved, until destroyed in the great fire of Sulla's time.

Sinocæstus, a Trojan prince, son of Anthemion, killed by Ajax.

Sphinx, the monster that Juno sent to propound the riddle to the Thebans. It had the head of a winged lion. The great Sphinx of Egypt is 170 feet long and 56 feet high, and carved out of solid rock.

Tantalus, a son of Jupiter. For revealing his father's secrets he was punished with a raging thirst and unable to obtain the water and fruits that he saw close at hand.

Telemachus, son of Ulysses and Penelope. (See Mentor.)

Terpsichore, the Muse of Choral Dance and Song.

Thalia, the Muse of Comedy.

Themis, the goddess of law and justice, and wife of Jupiter.

Thïsbe, a maiden beloved by Pyramus. Their parents opposed their union and they appointed to meet at the tomb of Ninus. Thïsbe reached the place first, but seeing a lion ran away, letting her garment fall in her flight. Pyramus seeing this when he came thought she had been murdered and killed himself. Then Thïsbe returned and at the sight of her dead lover put an end to her own life.

Titans were a race of giants who waged a ten years' war with Jupiter, but were ultimately conquered and imprisoned in a cavern near Tartarus.

U

Ulysses, one of the Greek leaders of the Trojan War and inventor of the wooden horse.

V

Venus, the goddess of love, daughter of Jupiter and Dione, but according to later legend born of the foam of the sea. She received the prize of beauty in the judgment of Paris. Cupid was her son.

Vesta, the goddess of the hearth, a maiden divinity who was attended by vestal priestesses, all pure as the goddess herself.

Vulcan, the god of fire, and son of Jupiter and Juno. He made the armour of the gods and had his work shops in several volcanic mountains as well as one in Olympus.

Z

Zeus. (See Jupiter.)

PRESIDENTS OF THE UNITED STATES.

The terms are for four years, and no President has served more than two terms.

PEARS'
OFFICE
COMPENDIUM.

Pears' Office Compendium.

This compendium comprises a variety of items of ready reference on every-day matters and routine, and will be of special utility to business men, accountants, clerks, and others engaged in office work, as well as to the general reader. It includes a number of useful tables, the latest postal and other official information, numerous statistical compilations, full lists of frequently employed—but not always understood—abbreviations, pseudonyms, foreign phrases, etc.; with a host of other matters such as people generally want to know in a hurry.

THE BRITISH EMPIRE.

The British Empire comprises the United Kingdom of Great Britain and Ireland, the Empire of India, and the British Dominions beyond the seas, including the self-governing Dominions, and the Crown Colonies, Protectorates, and other Dependencies, the whole forming one Empire under George V., King and Emperor, whose title rests upon the Act of Settlement of 1701, which settled the succession to the throne on the Princess Sophia of Hanover and "the heirs of her body being Protestants."

The British Empire contains a total area of nearly 12,000,000 square miles, equal to upwards of one-fifth of the earth's surface. Its population is about 416,318,665, or over one-fifth of the inhabitants of the globe.

Component parts of the British Empire.

	Extent in Square Miles.	Population.
United Kingdom of Great Britain and Ireland	121,000	45,216,665
Empire of India and its Dependencies	1,900,000	314,955,240
Ceylon and Maldives	26,000	4,100,000
Eastern Asia	2,000	1,000,000
Dominion of Canada, Newfoundland, etc.	3,750,000	7,081,869
West India Islands, South America, Falkland Islands	130,000	1,572,000
Commonwealth of Australia, etc.	3,100,000	4,449,983
Dominion of New Zealand	105,000	1,050,000
South Africa	1,238,000	6,300,000
West Africa	600,000	33,000,000
East and Central Africa	750,000	8,000,000
Mauritius, Seychelles, etc.	900	400,000
Gibraltar, Malta, and Cyprus	3,721	450,000

THE ROYAL FAMILY.

His Majesty George V., King of the United Kingdom of Great Britain and Ireland, and of the British Dominions beyond the seas, Emperor of India, born June 3, 1865; married July 6, 1893, to Princess Mary of Teck (born May 26, 1867); succeeded his father, King Edward VII., May 6, 1910.

CHILDREN.

Prince of Wales (Edward Albert Christian George Andrew Patrick David), born June 23, 1894; Prince Albert Frederick Arthur George of Wales, born December 14, 1895; Princess Victoria Alexandra Alice Mary of Wales, born April 25, 1897; Prince Henry William Frederick Albert, born March 31, 1900; Prince George Edward Alexander Edmund, born December 20, 1902; Prince John Charles Francis, born July 12, 1905.

SISTERS LIVING.

Princess Louise Victoria Alexandra Dagmar (Princess Royal), born February 20, 1867; married July 27, 1889, the Duke of Fife, K.T., and has issue—Lady Alexandra Victoria Alberta Edwina Louise Duff, born May 17, 1891 (married to Prince Arthur of Connaught, October 15, 1913); Lady Maud Alexandra Victoria Georgina Bertha Duff, born April 3, 1893; Princess Victoria Alexandra Olga Mary, born July 6, 1898.

Princess Maud Charlotte Mary Victoria, born November 26, 1869, married July 22, 1896, Prince Charles, and son of the then Crown Prince of Denmark. The latter succeeded to the Danish throne on January 29, 1906, Prince Charles having meanwhile

been chosen to rule over Norway. He was crowned King Haakon VII., on June 22, 1906, and he and Queen Maud have a son, Olav (born July 2, 1903), who thereupon became Crown Prince of Norway.

BROTHERS DECEASED.

Albert V. C. E. (Duke of Clarence and Avondale), born January 8, 1864; died January 14, 1892. Alexander J. C. A., born April 6, 1871; died April 7, 1871.

UNCLES AND AUNTS LIVING.

Duke of Connaught (Arthur William Patrick Albert), born May 1, 1850. Princess Christian of Schleswig-Holstein (Helena Augusta Victoria), born May 4, 1846. Duchess of Argyll, formerly Marchioness of Lorne (H.R.H. Princess Louise Caroline Alberta), born March 18, 1848. Princess, Henry of Battenberg (Beatrice Mary Victoria Feodora), born April 14, 1857, whose only daughter, the Princess Victoria Eugenie (Ena), was married to King Alfonso of Spain on May 31, 1906.

UNCLES AND AUNTS DECEASED.

Prince Alfred, Duke of Edinburgh, afterwards Duke of Saxe-Coburg and Gotha, born 1844; died 1900. Prince Leopold, Duke of Albany, born 1853; died 1884. His son, Prince Charles Edward, became Duke of Saxe-Coburg and Gotha in 1900, on his uncle's demise. Empress (Frederick) of Germany (mother of Kaiser William II.), born 1840; died 1901.

TABLE OF PRECEDENCY.

The Sovereign.
 The Prince of Wales.
 Other Sons of the Sovereign.
 Brother (or brothers, when more than one) of the Sovereign, Sovereign's Uncles, Sovereign's Nephews, Ambassadors.
 The Archbishop of Canterbury.
 (In Scotland, Moderator of the General Assembly if in attendance at a royal function.)
 The Lord High Chancellor.
 The Archbishop of York.
 Prime Minister.
 Lord Chancellor of Ireland.
 The Lord President of the Council.
 The Lord Privy Seal.
 The Lord Great Chamberlain.
 Lord High Constable.
 The Earl Marshal.
 The Lord Steward of His Majesty's Household.
 The Lord Chamberlain.
 The last five rank above all Peers of their own degree.
 Dukes, according to their Patents of Creation.
 1. Of England;
 2. Of Scotland;
 3. Of Great Britain;
 4. Of Ireland;
 5. Those created since the Union.
 Marquesses, according to their Patents, in the same order as Dukes.
 Dukes' eldest Sons.
 Earls, according to their Patents, in the same order as Dukes.
 Marquesses' eldest Sons.
 Dukes' younger Sons.
 Viscounts, according to their Patents, in the same order as Dukes.
 Earls' eldest Sons.
 Marquesses' younger Sons.
 Bishops of London, Durham, and Winchester.
 All other English Bishops, according to their seniority of Consecration.
 Bishops of the Irish Church, created before 1869, according to seniority.
 Secretaries of State, if of the degree of a Baron.
 Barons, according to their Patents, in the same order as Dukes.
 Speaker of the House of Commons.
 Treasurer of H.M.'s Household.
 Comptroller of H.M.'s Household.
 Master of the Horse.
 Vice-Chamberlain of Household.
 Secretaries of State under the degree of Barons.
 Viscounts' eldest Sons.
 Earls' younger Sons.
 Barons' eldest Sons.
 Knights of the Garter.
 Privy Counsellors.
 Chancellor of the Exchequer.
 Chancellor of the Duchy of Lancaster.
 Lord Chief Justice King's Bench.
 Master of the Rolls.
 The Lords Justices of Appeal.
 Lords of Appeal.
 Judges according to seniority.
 Viscounts' younger Sons.
 Barons' younger Sons.
 Sons of Life Peers.

Baronets of England, Scotland, Ireland, and United Kingdom, according to date of Patents.
 Knights of the Thistle.
 Knights of St. Patrick.
 Knights Grand Cross of the Bath.
 Knights Grand Commanders of the Star of India.
 Knights Grand Cross of St. Michael and St. George.
 Knights Grand Commanders of the Indian Empire.
 Knights Grand Cross of the Royal Victorian Order.
 Knights Commanders of the Bath.
 Knights Commanders of the Star of India.
 Knights Commanders of St. Michael and St. George.
 Knights Commanders of the Indian Empire.
 Knights Commanders of the Royal Victorian Order.
 Commanders of the Royal Victorian Order.
 Knights Bachelors.
 Judges of County Courts.
 Companions of the Bath.
 Companions of the Star of India.
 Companions of St. Michael and St. George.
 Companions of the Indian Empire.
 Members 4th Class of the Royal Victorian Order.
 Companions of the Distinguished Service Order.
 Members 5th Class of the Royal Victorian Order.
 Eldest Sons of younger Sons of Peers.
 Baronets' eldest Sons.
 Eldest Sons of Knights:—
 1. Garter;
 2. Thistle;
 3. St. Patrick;
 4. The Bath;
 5. Star of India;
 6. St. Michael and St. George;
 7. Indian Empire;
 8. Royal Victorian Order;
 9. Knights Bachelors.
 Younger Sons of the younger Sons of Peers.
 Baronets' younger Sons.
 Younger Sons of Knights in the same order as eldest Sons.
 Gentlemen entitled to bear arms.
 Women rank as their husbands or as their eldest brothers; but the daughter of a peer marrying a Commoner retains her title as Lady or Honourable. Daughters of Peers rank next after the wives of their elder brothers, and before their younger brothers' wives. Daughters of Peers marrying Peers of lower degree are given only thenceforth the same order of precedence as that of their husbands; thus the daughter of a Duke marrying a Baron ranks as Baroness only, while her sisters married to commoners would retain their rank and take precedence of the Baroness. Official rank on the husband's part does not afford recognised similar precedence to the wife. There are three Orders confined to Ladies: the Order of Victoria and Albert, the Crown of India, and the Royal Red Cross, but no special precedence attaches to such membership.
 Precedence is formed by statute, patent, or usage, but the chief regulations regarding the order of precedence were settled by Parliament in the reign of Henry VIII.
 Precedence locally, in county or city, has not been promulgated by written code, but in any county the Lord Lieutenant naturally stands first, followed by the Sheriff. In London and other Municipal Corporations—civic or borough—the aldermen, sheriffs, and chief officers have precedence in the order named after the Mayor (or Lord Mayor, as the case may be); the Livery coming next, where such is existent.

IN WRITING LETTERS TO PERSONS OF RANK

THE PROPER FORM OF ADDRESS IS AS FOLLOWS:

TO THE KING.

Begin: Sir.

Conclude: I remain,

Your Majesty's faithful and dutiful Servant.

Superscribe:

To the King's Most Excellent Majesty, etc.

THE QUEEN.

Madam.

I remain,

With profound veneration,

Your Majesty's most faithful Servant.

Superscribe:

To the Queen's Most Excellent Majesty, etc.

THE PRINCE (OR PRINCESS) OF WALES

Sir (or Madam).

I remain,

With the greatest respect,

Sir (or Madam),

Your Royal Highness's most dutiful

and most devoted Servant.

Superscribe:

To His Royal Highness the Prince of Wales, K.G.

To Her Royal Highness the Princess of Wales

PRINCES AND PRINCESSES OF THE BLOOD

ROYAL.

Madam (or Sir).

I remain, Madam (or Sir),

Your Royal Highness's most humble

and obedient Servant

Superscribe:

To Her Royal Highness the Princess of, etc., or To

His Royal Highness the Duke of C—; or To Her

Royal Highness the Duchess of C—; or To His

(or Her) Royal Highness Prince E— (or Princess

B—)

DUKES.

NOBILITY.

My Lord Duke.

I remain, my Lord Duke,

Your Grace's most obedient Servant.

Superscribe:

To His Grace the Duke of A—, K T., etc., etc., etc.

MARQUISES.

My Lord Marquis.

Concluding as in the case of a Duke, but with

"Lordship" in lieu of "Grace"

Superscribe:

To the most Honourable the Marquis of Ripon, K.G.,

etc., etc., etc.

EARLS, VISCOUNTS, AND BARONS.

My Lord.

Conclude as to a Marquis.

Superscribe:

To the Right Honourable the Earl of —; or To The

Right Honourable the Lord Viscount —; or To

The Right Honourable Lord —.

BARONETS AND KNIGHTS.

Sir.

I remain, Sir, Your most obedient Servant.

Superscribe:

Sir Francis T—, Bart.; or Sir John B—, etc., etc.,

etc.

Wives of Dukes: Madam. I remain, Madam,

Your Grace's most obedient Servant. *Superscribe:*

To Her Grace the Duchess of O—.

Wives of Marquises: Madam. I remain, Madam,

Your Ladyship's most obedient Servant. *Superscribe:*

To the most Honourable the Marchioness of Q—.

Wives of Earls, Viscounts, and Barons: Begin and

end as to a Marchioness. *Superscribe:* The Right

Honourable the Countess of —; or The Right

Honourable the Lady Viscountess —; or The Right

Honourable Lady —.

Wives of Baronets and Knights: Madam. I remain,

Madam, Your most obedient Servant. *Superscribe:*

Lady —.

CLERGY.

ARCHBISHOP.

My Lord Archbishop.

I remain, my Lord Archbishop,

Your Grace's most obedient Servant

Superscribe:

To His Grace, the Lord Archbishop of Canterbury.

The style of address to the Archbishop of Armagh

is: To His Grace the Lord Primate of Ireland, or the

Right Hon and Most Rev. the Archbishop of Armagh.

The other Irish Archbishop (Dublin) is addressed in

the same style as the English Archbishops.

BISHOPS.

My Lord Bishop.

I remain, my Lord Bishop,

Your Lordship's most obedient Servant.

Superscribe:

To the Right Reverend the Lord Bishop of —, etc.,

etc., etc.

Colonial Bishops are addressed in the same manner

as those of England. Bishops of the Episcopalian

Church of Scotland and of the United States are not

addressed by the title of Lord, and letters begin:

Right Reverend Sir, and end: I remain, Right

Reverend Sir, Your most obedient Servant. *Super-*

scribe: The Right Reverend Bishop — [surname

simply]

DEANS.

Reverend Sir

I remain, Reverend Sir,

Your most obedient Servant.

Superscribe:

The Very Reverend The Dean of —.

ARCHDEACONS.

Begin and end as to a Dean, and superscribe: The

Venerable The Archdeacon —.

JUDICIAL OFFICERS.

LORD CHANCELLOR.

My Lord.

I have the honour to be, with great respect,

Your Lordship's most obedient Servant.

Superscribe:

The Right Honourable The Lord Chancellor, etc.,

etc., etc.

LORDS OF APPEAL IN ORDINARY.

As to Lord Chancellor.

Superscribe:

The Right Honourable Lord —.

LORD CHIEF JUSTICE.

As to Lord Chancellor.

Superscribe:

The Right Honourable The Lord Chief Justice of

England

MASTER OF THE ROLLS.

My Lord (or Sir).

I have the honour to be, My Lord (or Sir).

Your most obedient Servant.

Superscribe:

To the Right Honourable Lord — (or Sir —),

Master of the Rolls; or His Honour The Master

of the Rolls.

LORDS JUSTICES OF APPEAL.

Sir (only addressed as "My Lord" when on the

Bench)

I have the honour to be, Sir,

Your most obedient and humble Servant.

Superscribe:

The Right Hon The Lord Justice —; or The Right

Hon. Sir —, Lord Justice of Appeal.

LORD MAYOR.

The Right Honourable the Lord Mayor of —

My Lord

Your Lordship's obedient Servant,

Superscribe:

The Right Hon. The Lord Mayor of —.

POPULATION OF THE BRITISH EMPIRE.

British Empire (1911)	404,300,321	Isle of Man, Channel Isles, etc.	148,934
United Kingdom	45,216,665	Colonies, Dependencies, etc.	358,934,622

COMPARATIVE DECENNIAL RETURNS FOR THE BRITISH ISLES. 1811-1911.

The total population of the British Isles as a whole for 1911 showed an increase of 3,757,934 on the population of 1901. The number of inhabited houses in 1909-10 was 9,060,520, showing an increase of 114,420 on the number of the previous year.

ENGLAND AND WALES.

Year.	Total Population.	Decennial Increase.	Per Cent.
1811	10,164,256	1,271,720	14.00
1821	12,000,236	1,835,980	18.00

19.

TABLE SHOWING HOW AN INTESTATE'S PERSONAL PROPERTY (INCLUDING LEASE-HOLDS) IS DIVISIBLE AT DEATH IN ENGLAND AND SCOTLAND.

Under the Intestates' Estates Act, 1890, the widow of a man dying intestate and without issue, is entitled to the whole estate, real and personal, if under £500 in value; and if above that amount she is entitled to take £500 out of the real and personal estate rateably before any distribution is made, and to such share in the remainder as she would have been entitled to before the Act of 1890. By the Intestate Husband's Estate (Scotland) Act of 1911, the same provisions are applied to Scotland.

Where an asterisk (*) appears the clause applies to Scotland only

<i>Intestate dying, leaving</i>	<i>His representatives take in the proportions following.</i>
Widow only	Half to widow. Half to the Crown.
Widow and child or children	One-third to widow, two-thirds to children in equal shares. In case of deceased children who have left issue, such issue take amongst their deceased parent's share.
	*One-third to widow. One-third to living children in equal shares (but the heir must collate the heritable estate, and those children who have been advanced by intestate during life must collate the advances). One-third amongst living children <i>per capita</i> and issue of deceased children <i>per stirpes</i> .
Widow and father	Half to widow. Half to father.
Widow and mother, no father	Half to widow. Half to mother.
	*Half to widow, one-sixth to mother. Two-sixths to Crown.
Widow, brothers, or sisters	Half to widow. Half equally amongst brothers and sisters, whether of the whole or half-blood; if a deceased brother or sister has left issue, such issue take amongst them their deceased parent's share.
Widow, mother, nephews or nieces	Half to widow. One-fourth to mother. One-fourth to nephews and nieces <i>per stirpes</i> .
	*Half to widow. One-sixth to mother, two-sixths to nephews and nieces <i>per stirpes</i> .
Husband, with or without children	All to husband.
Father, brothers, and sisters	*Half to husband. Half to wife's next-of-kin. All to father.
	*One-half to father. One-half equally amongst brothers and sisters.
Mother, brothers, and sisters	All equally.
	*Mother one-third. Brothers and sisters two-thirds equally.
Mother, but no other kin	All to mother.
Child, children, or grandchildren by deceased child	*One-third to mother. Two-thirds to the Crown. Amongst children in equal shares, the grandchildren by deceased children taking amongst them their deceased parent's share.
Brother or sister, and nephews or nieces	Amongst brothers or sisters in equal shares, the children of deceased brothers, or sisters taking amongst them their deceased parent's share.
Brother or sister, and grandfather	All to brother or sister.
Brother or sister, and uncles or aunts	All to brother or sister.
Grandfather, no nearer relation	All to grandfather.
Father's father, and mother's mother	Equally to both.
Grandmother, uncles, and aunts	All to grandmother.
	*All to uncles and aunts if paternal
Great-grandfather, uncles, and aunts	Equally <i>per capita</i> .
Uncles and aunts	All equally.
Uncle and deceased uncle's child	All to uncle.
Uncle by mother's side, and deceased uncle or aunt's child	All to uncle.
	*Child of deceased paternal uncle or aunt takes in exclusion of maternal uncle.
Aunts, nephew, and niece	All equally.
	*Nephew and niece.
Cousins	Equally <i>per capita</i> .
Nephew by brother, and nephew by half-sister	Equally <i>per capita</i> .
	*All to nephew by brother.

Taking per capita is taking by head individually. *Taking per stirpes* is taking by descent or representation.

By English Law, brothers and sisters of the half blood share equally with the whole blood. By the Scottish Law, brothers and sisters german (that is, by the same father and mother) and their issue take in exclusion of brothers and sisters consanguinean (that is, by the same father only) and their issue. And brothers and sisters consanguinean and their issue take in exclusion of brothers and sisters uterine (that is, by the same mother only) and their issue.

Posthumous children take equally with those born in the lifetime of their father.

TABLE SHOWING HOW THE REAL ESTATE OF AN INTESTATE IS DISTRIBUTED.

The persons named are those who are entitled to administer when the Intestate leaves no nearer relations than those indicated. It should be noted that leaseholds are accounted *personal* and not *real* property; and an illegitimate child cannot inherit real estate.

Intestate dying, leaving

The Real Estate falls to—

Wife only, no blood relations	Third to wife for life, rest to Crown; copyholds to lord of manor.
Wife and child, or children, and children of a deceased child	Third to wife for life in any case. Rest to eldest son or his issue, such son and his issue, whether male or female, being preferred to any other son and his issue, and all sons and their issue, whether male or female, being preferred to all daughters and their issue, whether male or female. If no son, rest to daughters equally. If daughters and grandchildren (sons and daughters of deceased daughter), rest to daughters and eldest son of deceased daughter.
Wife and father	Third to wife for life; rest to father, if deceased purchased same, or had it left him by will.
Wife and mother	Third to wife for life; rest to mother, there being no heirs on father's side
Wife, brother, or sister, and children of a deceased brother or sister	Third to wife for life in any case; rest to eldest brother or his issue. Sister and children of deceased sister, rest equally between sister and nephew (eldest). Sisters and nieces, only, children of deceased sister, rest equally between nieces.
Wife, mother, nephews, and nieces . .	Third to wife for life; rest to nephew (eldest), or nieces, if brother left no son
Wife, mother, brother, sisters, and nieces (children of deceased brothers and sisters)	Third to wife for life in any case; rest to eldest brother. Rest to nieces, equally, if children of elder brother deceased.
No wife or child or issue of a deceased child	Lineal ancestor paternal, males of whole blood first.
Children by one or more wives, and the issue of deceased children	All to eldest son, or his issue. Daughters equally, if no son.
Husband and child or children	Husband for life; afterwards to only child or to eldest son or issue of a deceased eldest son If all daughters, to them equally.
Mother, but no wife, child, or issue of a child, father, brother, sister, nephew, or niece, or more distant descendants of father	All to mother in default of lineal ancestors on the father's side or issue of such ancestors.
Mother, and brothers and sisters . . .	All to eldest brother.
Mother and sisters	All to sisters.
Father, and brothers and sisters . . .	All to father.
Child and grandchild by deceased child	Governed by precedence indicated in paragraph "Rest to eldest son or his issue," under head "Wife and child," &c.
Brother and grandfather	All to brother.
Brother's grandson, and brother or sister's daughter	All to great-nephew, if eldest brother's grandson All to brother's daughter, if child of eldest brother.
Brother and two aunts	Brother, all.
Brother and wife	Third to wife for life; rest to brother.
Grandfather (no nearer)	All to grandfather.
Father's father, and mother's mother .	All to father's father.
Grandmother and uncle, or aunt on father's side (no nearer)	All to uncle or aunt.
Uncle, and deceased uncle's child . .	Uncle, unless deceased uncle was elder brother, when his child takes all.
Uncle by mother's side, and deceased uncle or aunt's child	Child of deceased uncle on father's side, or (if none) child of deceased aunt on father's side.
Two aunts, nephew, and niece, children of deceased brother	Nephew.
Uncle or aunt's children, and brother's grandchildren through a son	Eldest brother's grandson; if no grandson, but granddaughters only then the latter between them equally.
Nephew by brother, and nephew by half-sister	Nephew by brother.
Nephew by deceased brother, and nephews and nieces by deceased sister	All to eldest nephew, son of deceased brother.

STAMPS, TAXES, DEATH DUTIES, &c.

*NEW DUTIES IMPOSED BY THE FINANCE ACT 1909-10.

CONTRACT NOTES, for the sale or purchase of stocks and marketable securities. New Scale of Stamp Duties, according to the value of the stock, etc.: £5 to £100, 6d.; over £100 up to £500, 1s.; over £500 up to £1,000, 2s.; over £1,000 up to £2,500, 3s.; over £2,500 up to £5,000, 4s.; over £5,000 up to £10,000, 5s.; and so on (2s. extra for each additional £1,500) up to a maximum of £1, where the value exceeds £20,000.

Continuation Notes to be chargeable on one only of the two transactions embraced.

Option Contract Notes to be chargeable with half the above rates only, unless the option is a double one.

Contract Note following a duly stamped option contract note to be relieved from half the duty.

CONVEYANCES or TRANSFERS on sale of any property: existing duties (*vide scale* in Table above) to be doubled, except conveyances or transfers of stocks or marketable securities, except also those in which the consideration does not exceed £500.

Conveyances by way of gift inter vivos to be charged as conveyances on sale. Exceptions for marriage settlements, and certain gifts of property for preservation of open spaces, and for conveyances to appoint new trustees, etc.

ESTATE DUTY: *Increased rates*, in the case of persons dying on or after April 30, 1909:—

Principal value of Estate	Rate per cent.	Principal value of Estate	Rate per cent.
£100	£3	£100,000	£3
500	2	150,000	10
1,000	3	200,000	11
5,000	4	400,000	12
10,000	5	600,000	13
20,000	6	800,000	14
40,000	7	1,000,000	15
70,000	8		

Settlement Estate Duty, to be increased from £1 to £2 per cent.

Gifts made by deceased during his life to be charged, unless made more than three years before death; gifts made for public or charitable purposes, or in consideration of marriage, or as part of deceased's reasonable normal expenditure, excepted. Gifts of less than £100 in value or amount also excepted.

Payment of Estate or Succession Duties may, by agreement with the Commissioners, be made, wholly or in part, in the form of real or leasehold property comprised in the estate.

INCOME TAX: *Rate* raised from 1s. 6d. to 1s. 3d. in the £ by the Budget of 1914. On Nov. 17, 1914.

to meet the vast expenditure on the War, the income tax was doubled, although for 1914 the increased amount was only to be collected in respect of one-third of the income. Thus for 1914 the income tax was to be levied at the rate of *ss. 8d.*; viz., *ss.* in respect of earned income on the ninepenny class, and *ss. 8d.* on the rest; in 1915 at the rate of *ss. 6d.* and *ss. 6d.*; and the same applied to the super-tax.

Super Tax, 6d. in the *£*, imposed on persons whose total incomes exceed *£5,000*, but the first *£3,000* income not to be charged.

Allowance for Children may be claimed by persons whose total incomes do not exceed *£500*. *£10* to be free of tax in respect of each child under 16 years old.

Allowance to Owners of Land and Houses, for average cost of maintenance, repairs, insurance, and management, may be claimed in addition to the present fixed allowance, subject to a limit of one-eighth of the annual value in case of land and one-twelfth in the case of houses. This special allowance does not apply to houses of annual value exceeding *£3*. Five years' average to be taken.

Residents abroad.—No exemption or other relief dependent on total income is to be given to persons not residing in the United Kingdom.

Exemptions: Present or former servants of the Crown, missionaries, servants of native States under British protection, residents in the Channel Islands or the Isle of Man, and persons residing abroad for their health.

LAND VALUES DUTIES:

(I.) **INCREMENT VALUE DUTY:** payable on the occasion (a) of any transfer or sale of land or any interest therein; (b) of any lease for more than 14 years; (c) of the land, or interest in it, passing on death. (d) In the case of Corporations, in addition to (a) and (b), and in place of (c), the duty is payable in 1914 and every 15 years thereafter.

Rate of duty (payable as a stamp duty by (a) the seller, (b) the lessor, (c) the deceased's estate, or (d) the corporation): *£1* for every *£5* of "Increment value," i.e., the increase in the value of the site—apart from the value of buildings, etc., thereon—since April 30, 1909, or since the last payment of duty.

Exemptions.—Agricultural land, while it has no higher value than for agricultural purposes only.

Small residences occupied by the owner, or holder of lease of 50 years, where annual value does not exceed *£40* in London, *£25* in towns of 50,000 population, and *£16* elsewhere.—Small agricultural holdings, where land and dwelling do not exceed *£30* annual value, occupied and cultivated by the owner, and not exceeding 50 acres (of average value not exceeding *£75* an acre).—Recreation grounds owned by corporate and other bodies, without view of profit, not to be liable to the judicial charge.—Flats (transfer, lease, etc., of separate dwelling).—Ten per cent. of increment allowed free on first and on any subsequent occasion, but such allowances not to amount to more than 25 per cent. in any period of five years.—Allowance is to be made where Reversion Duty has been paid for the same benefit or increment.—Minerals which were the subject of a mining lease or were being worked on April 30, 1909.—Minerals not so exempt are subject to a special basis of charge to Increment Value Duty, as an annual duty.

(II.) **REVERSION DUTY:** payable by the lessor on the determination of a lease.
Rate of Duty: *£1* for every *£10* of the value of the benefit accruing to the lessor.

Exemptions, etc.—Reversions purchased before April 30, 1909, under leases which determine within 40 years of purchase.—Leases of agricultural land.—Leases the original term of which did not exceed 21 years.—Allowance to be made where fresh lease is granted before expiration of original lease, 25 per cent. of duty for each unexpired year, up to 50 per cent. of whole duty.—Allowance is to be made where Increment Value Duty has been paid for the same benefit or increment.—Mining leases not to be charged.

(III.) **UNDEVELOPED LAND DUTY:** payable by the owner (including a lessee for a term of fifty years or more) of any land which has not been developed by the erection of dwelling-houses or buildings for the purpose of any trade, &c., other than agriculture (but including glasshouses or greenhouses or trade buildings), or is not otherwise used *bona-fide* for any trade, &c., other than agriculture.

Rate of Duty: One halfpenny annually for every *£1* of the "site value," i.e., the market value of the fee simple of the land if divested of buildings, timber, &c., and less the value of any minerals.

Exemptions, etc.—Land the site value of which does not exceed *£50* an acre.—Agricultural land, except on such part of the site value as exceeds its agricultural value.—Parks and spaces open to the public as of right, or to which the public are allowed reasonable access.—Recreation grounds, used as such under agreements for not less than 5 years.—Land not exceeding 1 acre occupied with a dwelling-house.—Garden (with a dwelling-house) up to 5 acres, when site value of the whole does not exceed 5 times its annual value.—Agricultural land held under an existing agreement, not chargeable until agreement terminates.—Agricultural land occupied and cultivated by the owner, if all land owned by him does not exceed *£500* in value. Allowance is to be made where Increment Value Duty has been paid in respect of undeveloped land.

(IV.) **MINERAL RIGHTS DUTY:** payable in respect of the rental value of all rights to work minerals and of all mineral wayleaves.

Rate of Duty (payable by the proprietor where he works the minerals, or, in any other case, by the immediate lessor of the working lessee): *1s. 6d.* annually for each *£1* of rental value.

Exemptions, etc.—Common clay, common brick, common brick earth, sand, chalk, limestone and gravel not to be charged.—**Reversion Duty** is not to be charged on the determination, nor **Increment Duty** on the grant, of a mining lease.—Minerals which were the subject of a mining lease or were being worked on April 30, 1909, are exempt from **Increment Value Duty**, and minerals not so exempt are to be charged to that Duty on a special basis in the form of an annual duty.

LEASES: the existing Stamp Duties (*vide scale in Table*) to be doubled, except those which are charged with the fixed duty of *1d.*

LEGACY AND SUCCESSION DUTIES: The existing duties (*vide Table*) are thus affected:—

The 1 per cent. duty, which was abolished in most cases, is to be reimposed and extended to husbands and wives, as well as descendants and ancestors.
Fixations.—Estates not exceeding *£15,000*.—Legacies and successions of less than *£1,000* (*£2,000* in the case of widow or child of deceased), whatever may be value of whole estate.

The 3 per cent. duty (brothers and sisters and their descendants) raised to 5 per cent.

The 5 per cent. and 6 per cent. duties (more distant relatives) to 10 per cent.

MARKETABLE SECURITIES, transferable by delivery: Stamp Duties to be doubled, except as regards Colonial Government and certain Colonial Municipal Securities.

The classes affected are:—(1) Bearer Securities dated or signed on or before August 6, 1885, will be charged double the duty on a mortgage.—(2) Bearer Securities dated, signed, or offered for subscription after August 6, 1885, *ss.* for every *£10* or fraction.—(3) Bearer Securities given in substitution for like securities duly stamped, *ss.* for every *£20* or fraction.—(4) Foreign or Colonial (except Colonial Government) Bearer Securities, on negotiation in the U.K., *ss.* for every *£20* or fraction.

SHARE WARRANT AND STOCK CERTIFICATE TO BEARER of any Foreign or Colonial Company to be charged *ss.* for every *£10* or fraction.

For other EXCISE DUTIES AND LICENCES administered by the Board of Customs and Excise, see p. 476.

letters will be forwarded by the next available train for delivery by the postman at destination.

EXPRESS LETTERS.

Letters may be expressed for immediate delivery (from any Telegraph delivery office) at a charge of 3d. per letter per mile, during the hours of opening for Telegraph business at the offices. On packets over 1 lb. weight, 3d. extra is charged. See *Post Office Guide* for full details of this service.

REGISTRATION OF LETTERS, PACKETS, OR NEWSPAPERS.

Fee 3d., which, with the postage, must be prepaid, and a receipt obtained at the office where it is posted. Under certain circumstances, explained at length in the *Post Office Guide*, the Postmaster-General will make good the loss of a registered letter, etc., to the value of £5 without extra fee; subject to the same rules he will grant compensation beyond £5 and up to a limit of £400 upon prepayment of a fee in addition to the postage and the ordinary registration fee of 3d.; but if money be sent, it must, to obtain this benefit, be posted in an envelope provided for registered letters by the Post Office, and prices of which are appended including the stamp covering the charges for registration and postage.

F. 3d. in. by 3d. in.	3d. each, or 12 for 3s. 3d.
G. 6 " 3d. " "	3d. " " 3s. 3d.
H. 8 " 3d. " "	3d. " " 3s. 3d.
I. 9 " 4 " " "	3d. " " 3s. 3d.
K. 12 " 6 " " "	4d. " " 4s. 6d.

PREPAYMENT OF POSTAGE IN MONEY.

As a rule, the postage of letters, parcels, newspapers, and book packets can only be prepaid by means of postage stamps; but in London, at the General and principal District Post Offices, as well as at the Head Offices in Edinburgh, Dublin, and certain large provincial towns, every kind of inland correspondence, other than newspapers, may be, if handed in within fixed hours, prepaid in money, provided the amount paid be in no case less than 1s., and that the letters and packets be tied in bundles representing a postage of 5s. each, or in the case of exceptionally bulky packets, 2s. 6d. each, with the addresses arranged in the same direction. The prepayment, however, cannot be made partly in money and partly with stamps, and the money must be paid at the time the letters, etc., are handed in at the Post Office. The acceptance of bulk correspondence (including postcards and halfpenny packets) at many small provincial towns, by payment instead of stamp attachment, can be arranged for with the Post Office now by giving timely notice.

PARCEL POST.

Parcels not exceeding 11 lbs. in weight are transmitted by the Inland Parcel Post under the following general conditions:—

The rate of postage, to be prepaid in ordinary postage stamps is for an Inland Postal Parcel of a weight of

Not exceeding 1 lb.	3d.
" 2 lbs.	4d.
" 3 " "	5d.
" 5 " "	6d.
" 7 " "	7d.
" 8 " "	8d.
" 9 " "	9d.
" 10 " "	10d.
" 11 " "	11d.

The dimensions allowed for an Inland Postal Parcel are:—

Greatest length 3 ft. 6 ins.

Greatest length and girth combined 6 ft. 0 in.

Compensation for damage or loss of parcels, uninsured, is given, "as an act of grace," by the Postmaster-General, if the loss sustained be due to the Post Office handling of the parcel, the amount paid in no case to exceed £2. On payment of registration or insurance fees over and above the

postage, compensation for loss is given, provided the regulations have been complied with, as follows:—

Fee.	Limit of Compensation.	Fee.	Limit of Compensation.
2d.	£5	1s. 6d.	£200
3d.	20	1s. 1d.	220
4d.	40	1s. 3d.	240
5d.	60	1s. 6d.	260
6d.	80	1s. 9d.	280
7d.	100	1s. 5d.	300
8d.	120	1s. 6d.	320
9d.	140	1s. 7d.	340
10d.	160	1s. 8d.	360
11d.	180	1s. 9d.	380
		1s. 10d.	400

Live bees are allowed to pass by letter or parcel post within the U.K. if sent in suitable cases. Parcel must be handed in at a Post Office, and the postage prepaid.

CASH ON DELIVERY.

A cash on delivery system has been established for trade between the United Kingdom and certain British possessions and Egypt, in respect of amounts not exceeding £20. For particulars of this system, see *Post Office Guide*.

POSTAL ORDERS.

These Orders are for certain fixed sums from 6d. to 21s.; on those for 6d., 1s., 1s. 6d., 2s., and 2s. 6d., the charge is 1d.; for 3s. 3d., 4s., 4s. 6d., 5s., 5s. 6d., 6s., 6s. 6d., 7s., 7s. 6d., 8s., 8s. 6d., 9s., 9s. 6d., 10s., 10s. 6d., 11s., 11s. 6d., 12s., 12s. 6d., 13s., 13s. 6d., 14s., 14s. 6d., and 15s., it is 1d.; for 15s. 6d., 16s., 16s. 6d., 17s., 17s. 6d., 18s., 18s. 6d., 19s., 19s. 6d., 20s., and 21s., it is 1d. Broken amounts may be made up with stamps affixed to the face of the order.

MONEY ORDERS.

Ordinary and Telegraphic.

Money Orders are granted in the United Kingdom at the following rates:—

For sums not exceeding £1	2d.
" above £1 and not exceeding £3	3d.
" " £3 " " £10 " " " " " "	4d.
" " £10 " " £20 " " " " " "	6d.
" " £20 " " £30 " " " " " "	8d.
" " £30 " " £40 " " " " " "	10d.

No order may contain a fractional part of a penny.

Money may be sent by Telegraph Money Order at the same rate of poundage as for ordinary Inland Money Orders, plus supplementary fee of 2d. and cost of official Telegram of Advice, the minimum charge being 6d. Amounts to £40 can be wired from and to any Telegraphic Money Order Office.

POST OFFICE SAVINGS BANKS

No deposit of less than 1s. is received, nor any pence and not more than £50 in one year. No further deposit is allowed when the sum standing in depositor's name amounts to £200, including interest. Interest is allowed at the rate of 3 per cent. (or 6d. in the £) per annum—that is 3d. 7½c. 6 per month. Separate accounts may be opened in the name of wife and children.

INVESTMENTS IN GOVERNMENT STOCKS.

Depositors in Post Office Savings Banks may invest not less than 1s. or more than £200 in any one year ending December 31st or £500 in all, in Two and Half per Cent. Consolidated Stock (1903); Two and Three-Quarters per Cent. Annuities (1903); Two and a Half per Cent. Annuities; Local Loans Three per Cent. Stock; Guaranteed Two and Three-Quarters Stock, and Guaranteed Three per Cents.

LIFE INSURANCE AND ANNUITIES.

The Post Office undertakes the Insurance of lives (children between 8 and 14 years old for £5, and persons between 14 and 65 years old from £5 to £100) and granting of Annuities, Immediate or Deferred, from £1 up to £100. For full particulars, see *Post Office Guide*.

FOREIGN AND COLONIAL POSTAL INFORMATION.

RATES OF POSTAGE AND PRINCIPAL REGULATIONS.

THE rate of postage on letters to British Possessions generally, the United States, Egypt, Morocco, and the Malay Peninsula, where there are British Post Office Agencies, is 1d. per oz. The charge to all other places abroad is 2½d. per oz., and 1½d. per oz. above. The following is a list of the British Colonies and Dependencies (including Egypt) to all of which the letter postage is 1d. per oz.

Aden (including Perim)	British Guiana	Hawaii (Sandwich Isls.)	Orange River Colony
Afghanistan (extra local postage payable beyond the Indian frontier)	British Honduras	Hong Kong and its Agencies in China (see <i>Post Office Guide</i>)	Papua
Antigua	British New Guinea (Papua)	India (<i>Post Office Guide</i>)	Rhodesia
Ascension	British North Borneo (<i>but not Dutch Borneo</i>)	Jamaica	St. Helena
Australia (including South Australia, West Australia, Victoria, New South Wales, Queensland, Tasmania, British New Guinea, and Norfolk Island; also New Zealand)	Brunei	Labrador	St. Kitts
Bahamas	Canada	Labuan	St. Lucia
Bahrain	Cape Colony	Lagos	St. Vincent
Barbados	Cayman Islands	Malay States	Sandwich Islands
Basutoland	Ceylon	Malta	Sarawak
Bechuanaland	Cook Islands	Mauritius	Seychelles
Bermudas	Cyprus	Montserrat	Sierra Leone
British Central Africa	Dominica	Muscat	Somaliand
British East Africa and Uganda	Egypt	Natal	Strait Settlements
	Ellice Islands	Nevis	Tobago
	Falkland Islands	Newfoundland	Tonga
	Fanning Island	New Guinea (British but not German)	Tortola
	Fiji Islands	New Zealand	Transvaal (including Swaziland)
	French India	Nigeria, Northern and Southern	Trinidad
	Gibraltar	Norfolk Island	Tristan d'Acunha
	Greenada	Nyasaland	Turk's and Caicos Islands
			United States
			Zanzibar

LETTERS must in no case exceed 2 feet in length, or 1 foot in width or depth; and the transmission by post of numerous articles, particularly coin, gold, silver, precious stones, jewellery, and dutiable commodities (except under regulations as to payment of charges) is prohibited to many Foreign Countries.

POSTCARDS, single, are charged 1d. postage to all British Colonies and to all foreign countries; reply postcards, 2d. each. The maximum size limit is 5½ in. by 3½ in. and many places abroad object to the transmission of pictorial postcards with correspondence on the left hand half of the address side. For the countries permitting this see *Post Office Guide*; the British Post Office can give no guarantee that foreign offices will allow the privileges it permits as to attachments to picture or other postcards.

PRINTED PAPERS pass through the post to all places abroad at the rate of ½d. per 2 oz.; COMMERCIAL PAPERS at the rate of 1d. for the first 2 oz., and ½d. per oz. thereafter. To Foreign Countries in the Postal Union the size-limit is 1½ feet in length by 1 foot in width or depth; to all other destinations

abroad packets may be 2 feet in length. Rolls in all cases may reach 30 in. in length, and 4 in. in diameter. The maximum weights vary.

SAMPLES (under regulations given in *Post Office Guide*) pass at the rate of 1d. for the first 4 oz. and ½d. per 2 oz. thereafter. To Foreign Countries in the Postal Union the maximum allowable size for sample packets is 12 in. by 8 in. by 4 in., or if in rolls 12 in. long by 6 in. in diameter. To all other destinations the maximum size-limits for printed papers are observable. The regulations as to advertising and other prohibitions, customs charges, etc., should be carefully regarded by senders; as also the top-weight regulations at different places.

REGISTRATION for all articles abroad is 2d.; registered articles may secure acknowledgment of delivery on payment of a further fee of 2½d. Letter insurance abroad costs 2d. for £10 and 1½d. for every additional £10 to the maximum limit, which varies; is not uniform, while in many cases there is no insurance service. See *Post Office Guide*.

FOREIGN AND COLONIAL PARCELS POST.

PARCELS sent to the Colonies and Foreign Countries through the Post Office are subject to the Customs regulations of the country to which they are addressed and to many prohibitions. Declarations have to be made by the sender on forms obtainable at the Post Office. Generally an invoice may be inclosed in the parcel, but not a letter. The weight and dimension limits, and the amount insurable on values, vary considerably. For full particulars see *Post Office Guide*. The following are the rates of postage on parcels to the more important countries:—

Argentina.—3 lb. 1s.; 7 lb. 3s.; 11 lb. 4s.
Australia (by P. and O. or Orient Line direct, 44 days to Sydney).—1 lb. 1s.; and 6d. per lb. for each additional lb. up to 11 lb. By Italy (6 days faster), 1 lb. 2s.; 6d. for each lb. additional up to 11 lb.
Austria-Hungary (*via Germany*).—3 lb. 1s. 4d.; 7 lb. 1s. 8d.; 11 lb. 2s.; *via Ostend* 3½d. Flushing, 3 lb. 1s. 7d.; 7 lb. 1s. 11d.; 11 lb. 2s. 3d.
Barbados.—Up to 3 lb. 1s.; up to 7 lb. 1s.; up to 11 lb. 2s.
Belgium.—3 lb. 1s.; 7 lb. 1s. 4d.; 11 lb. 1s. 9d.
Brazil.—Up to 3 lb., 3s. 6d.; to 6½ lb. (limit), 4s.
British Honduras.—Same as Barbados.
Bulgaria.—*via Ostend* or Flushing, 3 lb. 2s. 6d.;

7 lb. 2s. 10d.; 11 lb. 3s. 2d. By Hamburg, 3 lb. 2s. 4d.; 7 lb. 2s. 8d.; 11 lb. 3s.
Canada.—3 lb. 1s.; up to 7 lb. 2s.; up to 11 lb. 3s.
Cape Colony.—See *S. Africa*.
Ceylon.—From the Thames direct (25 days), as Barbados. By Marseilles (19 days), Naples, or Brindisi, 3 lb. 1s.; 7 lb. 1s.; 11 lb. 2s.
China (all places except Macao, by P. & O.).—3 lb. 2s.; 7 lb. 2s.; 11 lb. 4s.; *via Italy*, 3 lb. 3s.; 7 lb. 4s.; 11 lb. 5s.
Denmark (*via Harwich*).—3 lb. 1s.; 7 lb. 1s. 4d.; 11 lb. 1s. 7d.; *via Ostend* or Flushing, 3 lb. 1s. 7d.; 7 lb. 1s. 11d.; 11 lb. 2s. 3d.
Egypt.—3 lb. 1s.; 7 lb. 1s. 9d.; 11 lb. 2s. 6d.; *via Italy*, 3 lb. 2s.; 7 lb. 2s. 6d.; 11 lb. 3s.
France.—3 lb. 1s. 4d.; 7 lb. 1s. 9d.; 11 lb. 2s. 2d.
Germany (by sea to Hamburg direct, 3 to 4 days).—3 lb. 1s. 7d.; 7 lb. 1s. 11d.; 11 lb. 2s. 7d.; *via Ostend* or Flushing (1 to 3 days), 3 lb. 1s. 2d.; 7 lb. 1s. 6d.; 11 lb. 2s. 10d.
Gibraltar.—As Barbados.
Greece.—3 lb. 1s. 4d.; 7 lb. 1s. 8d.; 11 lb. 1s. 9d.
Holland.—3 lb. 1s.; 7 lb. 1s. 4d.; 11 lb. 1s. 6d.
Hong Kong.—From the Thames direct (5 weeks), 3 lb. 1s.; 7 lb. 1s.; 11 lb. 2s.; *via Marseilles* or Brindisi (4 weeks), 3 lb. 1s. 8d.; 7 lb. 1s. 8d.; 11 lb. 3s. 8d.

India (British).—From the Thames (23 days to Bombay, 25 to Calcutta), 3 lb., 1s.; 7 lb., 2s.; 11 lb., 3s. *via* Marseilles or Brindisi (5 week faster), 3 lb., 1s. 8d.; 7 lb., 2s. 8d.; 11 lb., 3s. 8d.
Italy (*via* France).—3 lb., 1s. 6d.; 7 lb., 1s. 10d.; 11 lb., 2s. 2d. By Belgium, 3 lb., 2s.; 7 lb., 2s. 6d.; 11 lb., 2s. 10d.
Jamaica.—3 lb., 1s.; 7 lb., 2s.; 11 lb., 3s.
Japan.—3 lb., 1s.; 7 lb., 2s.; 11 lb., 4s.; (*via* Russia) up to 7 lb., 6s.
Madeira.—3 lb., 1s. 4d.; 7 lb., 1s. 8d.; 11 lb., 2s.
Malta.—As Barbados if by P. and O. steamers if *via* France and Italy, 2s., 3s., and 4s.
Mexico.—3 lb., 1s.; 7 lb., 2s. 6d.; 11 lb., 3s. 6d.
Natal.—See *S. Africa*.
Newfoundland, as Barbados.
New Zealand, as Barbados.
Nigeria.—As Barbados. Northern Nigeria at additional charge and addressees' risks.
Norway.—3 lb., 1s.; 7 lb., 1s. 4d.; 11 lb., 1s. 7d.
Russia in Europe.—3 lb., 1s.; 7 lb., 1s. 3d.; 11 lb., 1s. 7d. (Slightly higher rates are in vogue by alternative routes to places in Transcaucasia and Asiatic Russia.)
S. Africa (including Cape Colony, Natal, Orange Free State, and Transvaal).—For each lb. or fraction thereof up to 11 lb., 6d.
Spain.—3 lb., 1s. 6d.; 7 lb., 1s. 10d.; 11 lb., 2s. 2d.
Sweden.—3 lb., 1s. 2d.; 7 lb., 1s. 10d.; 11 lb., 2s. 6d.
Switzerland (by Belgium).—3 lb., 1s. 7d.; 7 lb., 1s. 10d.; 11 lb., 2s. 3d. By France, 3 lb., 1s. 4d.; 7 lb., 1s. 8d.; 11 lb., 2s.
Transvaal (and Orange River Colony).—See *S. Africa*.
Trinidad.—As Barbados.

Turkey.—By Liverpool to Constantinople or Smyrna (3 weeks), 3 lb., 1s.; 7 lb., 1s. 4d.; 11 lb., 1s. 8d. Other routes faster, but costlier.
United States of America.—For New York City, Brooklyn, Jersey City, or Hoboken, 3 lb., 1s. 3d.; 7 lb., 2s. 3d.; 11 lb., 3s. 3d. For any other part of the United States, 3 lb., 1s. 6d.; 7 lb., 1s. 10d.; 11 lb., 2s. 6d. By Official Service, 3 lb., 1s. 3d.; 7 lb., 1s. 6d.; 11 lb., 2s. 3d.
Venezuela.—3 lb., 1s. 6d.; 7 lb., 1s. 10d.; 11 lb., 2s.
Zanzibar.—As Barbados.
A system is in force by which in many cases the senders of parcels can pay the Customs duties to which the parcels may be liable in the country of destination; for particulars, see the *Post Office Guide*.

MONEY ORDERS PAYABLE ABROAD.

Money Orders payable abroad in the British Colonies and most important Foreign Countries are issued at the following rates of poundage:—
For sums not exceeding £1 0 3
" " £2 0 6
" " £3 0 9
" " £4 1 0
" " £5 1 3
" " £10 1 6
To some Colonies and Foreign Countries sums up to £20 and £40 can be sent by Money Order, at proportionate poundage; and there is Telegraphic Money Order service to a number of places abroad. In many British Possessions overseas, Postal Orders are also issued and paid. See *Post Office Guide*.

TELEGRAPHIC SERVICE.

INLAND.

In inland telegrams addresses are charged. The charge for transmission—6d. for the first twelve words, and 3d. for every additional word—includes *delivery* within three miles of the receiving office, but, if a head office, within the postal delivery area when it extends beyond three miles. Beyond these distances, 3d. per mile is charged. The sender must pay the postage. *Replies* up to forty-eight words may be prepaid. *Repetitions* (refunded if the part of the message questioned prove a Post Office error), half the original cost of transmission, minimum 3d., and 3d. reckoned the smallest fraction. *Multiplication* of one telegram to more than one person within the same radius or district, ad. each copy and 3d. for each word in the addresses. *Late fees*: Telegrams may be taken after the usual hours. The charges are 1s. to 3s. in addition to the telegraphic rate (payable on one telegram only).
COUNTING.—Words not forming part of a European language or Latin are counted five letters to a word. Figures count five to one word, and fractions are counted each figure and one figure for the division between, thus "2½" is five figures or one word. The addition of a letter to a figure counts as one word, thus "42A" is two words. A few hyphenated words, such as "Newcastle-on-Tyne," "mother-in-law," and "forty-eight," count as one word; but not double names, such as "Smith Jones," which is two words. Exceptional names—e.g., "McLean," "O'Connor," and "De la Rue"—are counted as one word. The contractions "don't," "can't," etc., count as one. Each initial is reckoned as one word, but E.C. and other London postal districts as one word for the combination; "Drury Lane" and the like count, however, as two words. When words are underlined or placed in parentheses or inverted commas, one extra word is charged for. The symbols "c/o," "a/c," "v/o," and "6/c" each count as one word.

REGISTERED ABBREVIATED ADDRESS.—A charge of £1 1s. per year is made for the registration of abbreviated addresses, such as "Colonizers, London." Telegrams addressed to persons, care of such addresses, must be written thus—"Jones, c/o Colonizers, London."

CANCELLING TELEGRAMS.—The sender may have his telegram cancelled; and if it be cancelled before the commencement of transmission, the sum paid—less a fee of 6d. for cancelling—will be returned on application to the secretary at any time within three calendar months. If transmission has been completed,

an official telegram, prepaid by the sender, will be sent to the postmaster at the terminal office. If the official telegram should arrive too late, the sender will be informed that the attempt to cancel his telegram failed, but the sums paid will not be refunded.

MISCELLANEOUS REGULATIONS.—Telegrams may be handed to rural postmen on their way to telegraph offices. If the addressee of a telegram is known to the messenger, the messenger may be delivered to him by the messenger wherever on the road the messenger may meet him; if the place where they meet is within the free delivery area, no charge is made for postage; but, if beyond, postage is charged to the place of meeting at the rate of 3d. per mile or part of a mile, calculated from the delivering office door.

HOURS OF ATTENDANCE.—Week days, 8 A.M. to 8 P.M.; Sundays (England and Ireland), 8 A.M. to 10 A.M.; (Scotland), 9 A.M. to 10 A.M. There are offices in London and large provincial centres open all night, and many which are open to 12 mid.night.

FOREIGN.

Telegrams in ordinary language are reckoned by words, each not exceeding fifteen letters for European telegrams, and ten for extra-European; code words must be selected from English, French, German, Italian, Spanish, Portuguese, Dutch, and Latin dictionaries, and not more than ten letters; cypher telegrams count five figures to a word in European, and three to a word in extra-European telegrams. The address of the receiver must consist of not less than two words and must be paid for. The following are some of the most important rates per word; in no case, however, is a less amount than 10d. charged for a telegram or reply.

European.—Austria, 2d.; Belgium, 2d.; Bulgaria, 3d.; Denmark, 2d.; France, 2d.; Germany, 2d.; Gibraltar, 3d.; Greece, 5d.; Holland, 2d.; Italy, 2d.; Malta, 4d.; Norway, 2d.; Portugal, 3d.; Russia, 4d.; Spain, 3d.; Sweden, 2d.; Switzerland, 2d.; Turkey, 6d.

Extra-European.—Argentina, 2s. 6d. and 2s. 9d.; Australia and New Zealand (including New South Wales, Victoria, Western Australia, South Australia, Queensland and Tasmania), 2s. and 2s. 9d.; Brazil, 2s. 7d. to 5s. (Pernambuco only, 1s. 7d.); Canada, 8d. to 2s. 1d.; Cape Colony, 2s. 6d.;

Ceylon, 2s. (or, via Turkey, 1s. 11d.); Chile, 2s. 6d. to 2s. 9d.; China, 3s. 6d.; Dutch East Indies, 3s. 7d.; Egypt, 1s. to 1s. 4d.; India, 2s. (via Turkey, 1s. 10d.); Japan, 2s. 11d.; Mexico, 1s. 9d. to 2s. 4d.; Natal, 2s. 6d.; Newfoundland, 1s.; Orange River Colony, 2s. 6d.; Rhodesia, Southern, 2s. 8d.; Rhodesia, Northern, 2s. 11d.; Transvaal Colony, 2s. 6d.; United States, 11d. to 2s. 9d.; West Indies: Barbados, 4s. 9d.; Havana, 1s. 8d.; Jamaica, 3s.; Trinidad, 5s. 1d.; Zanzibar, 2s. 6d.; Zululand, 2s. 6d.

CABLE LETTERS.

A system of day and week-end cable letters, whereby letters of from 20 to 50 words can be cabled at very low rates, the messages being accepted at any Telegraph Office in the United Kingdom on the condition that they will not be delivered before the second day after they are received at the Cable Companies' Stations. Thus 20 words can be cabled to Canada or New York for 6s.; to California for 10s.; and various other places on the North American Continent, up to 50 words *pro rata*. The rates for week-end cable letters, sent on Saturday night and delivered the following Tuesday, are still lower. (See *Postal Guide*.)

Shore telegram letters between places in the United Kingdom (50 words for 6d.) which can be sent up to midnight and delivered at their destination the next morning's letters is also promised.

MAIL DAYS.

The principal mails for abroad are made up in London as follows:—

Canada.—Every Thursday evening and Wednesday afternoon; Saturday morning and afternoon.
United States.—See special detailed table, following.
Newfoundland.—Every alternate Friday evening.
West Indies.—Every alternate Wednesday and alternate Saturday.
Australia and New Zealand.—Every Friday evening.
India.—Every Friday evening.
China, Japan and Ceylon.—Every Monday, Wednesday, and Friday.
South Africa.—Every Saturday afternoon.
West Africa.—Every Friday evening.
Provincial letters should reach London six hours before the mails are made up.

AMERICAN MAILS.

Mails for America.

Days of Sailing.	Line.	Mails close in London.	Mails close in Paris.
Wed.	† N. G. Lloyd.	Tues., midn't.	Tuesday
Wed.	† White Star.	Wed., 6 p.m.	Tuesday
Fri.	† Hamburg.	Thurs., midn't	Thursday
Sat.	† American.	Fri., midn't	Friday.
Sat.	† Cunard.	Sat., 2 p.m.	Friday.

- * Must be addressed, "Per American Steamer."
- † Must be addressed, "Per N. G. Lloyd Steamer."
- ‡ Must be addressed, "Per Hamburg Steamer."

The Mail closes on Wednesday at the General Post Office, St. Martin's-le-Grand, and Queenstown, White Star Line, at 6 p.m.

Late fee of 1d. at 7 p.m.
Late fee of 2d. at 7.15 p.m.
Late fee of 3d. at 7.30 p.m.

Late fee of 2d. at Euston Station, where letters may be sent up to the train leaving, at 8.45 p.m.
The Mail closes on Saturday at the General Post Office, St. Martin's-le-Grand, and Queenstown, Cunard Line, at 2 p.m.

Late fee of 1d. at 2.30 p.m.

Late fee of 2d. at Euston Station, where letters may be sent up to the train leaving, at 4 p.m.

Mails from America.

Day of Sailing.	Line.	Due in London.
Tuesday . .	N. G. Lloyd	Mon. to Wed.
Wednesday .	American	Wednesday
Wednesday .	White Star	Wed. to Fri.
Thursday . .	Hamburg-American	Thursday
Saturday . .	Cunard	Saturday

The German services are suspended during the war.

DISTINCTIVE MARKS OF ATLANTIC STEAMERS.

Line	Funnel Marks	Lights.	Flags.
Allan	Red, narrow black band in centre of red, white band under black top.	Three blue lights in the form of a triangle.	Red, white, and blue, perpendicular stripes, red pennant above flag.
American	Black, white band near top.	Blue light forward and aft, and red light on bridge.	White, with blue eagle in centre.
Anchor	Black	Red and white lights alternately.	White swallow tail, red anchor in centre.
Atlantic Transport . .	Red, black top	A Roman candle throwing six stars, showing colours green, white, red, green, white, red.	Blue and white stars, American Union Jack
Cunard	Red, two narrow black bands, black top.	Blue light and two Roman candles, each throwing six blue stars.	Red, with yellow lion rampant in centre holding globe.

27	58	86	117	147	178	208	239	270	300	331
28	59	87	118	148	179	209	240	271	301	332
29		88	119	149	180	210	241	272	302	333
30		89	120	150	181	211	242	273	303	334
31		90		151		212	243		304	335

Examples.—1. From Jan. 1 to Aug. 17, both days inclusive, the number of days is 229. To find this look down the column headed Jan. to 17, and then carrying the eye in a horizontal line to the column headed Aug., you find 229, the number required.

2. If it be desired to know the number of days from any other given day after the 1st of Jan. to some other specific day, the number opposite the first day must be deducted from the number opposite to the second. For instance, to find the number of days between March 15 and Aug. 23, deduct from 235, the number in the table opposite to 23, and under Aug., 74, the number opposite to 15, and the number 161 is the number required.

In leap years, one must be added to the number after Feb. 28.

THE NATIONAL INSURANCE ACT. ITS BENEFITS AND PROVISIONS.

The National Insurance Act, which dates its operation from July 15, 1912, as far as regards its contributory sections—that is, the payment of premium moneys—came into full benefit force on January 15, 1913, except as to disablement benefit, which does not begin until July 15, 1914.

BENEFITS TO THE INSURED.

The benefits now in force are the following:—

- (1) Sick pay—10s. a week for 26 weeks for a man, and 7s. 6d. a week for a woman.
- (2) Medical benefit.
- (3) Medicine and surgical appliances.
- (4) Maternity benefit (30s. for each child born).
- (5) Sanatorium benefit for consumption cases.

The disablement benefit to come into force on July 15, 1914, will amount to 5s. a week for men and women alike, commencing after 26 weeks from the beginning of the illness and continuing as long as the disablement lasts or until the age of 70. No disablement can accrue until an insured person has contributed for two years, hence July 15, 1914, is the earliest date at which any insured person can be entitled to disablement allowance.

WHAT IS REQUIRED OF INSURED PERSONS.

On January 15, 1913, every person falling within the operation of the Insurance Act was presumed to have taken steps to fulfil the conditions of membership, that is, he or she must have made up the necessary 26 weekly contributions, which contributions must have been made by stamps affixed to cards of membership, effected either through the medium of an approved society or through the Post Office. The contributions payable are 7d. per week in the case of men and 6d. in the case of women, the employer being made liable for the payments and authorised to deduct the amount from the remuneration paid.

By January 15, 1913, every person then entitled to medical benefit is supposed to have received a ticket entitling him or her to medical benefit until April 30, 1913. These tickets are issued to members of approved societies by the societies themselves, and in the case of Post Office deposit contributors are issued to them direct by the Insurance Commissioners. Where a person has not received a ticket, application must be made either to his or her society or to the Commissioners.

CONTRIBUTIONS BY EMPLOYERS AND EMPLOYED.

The contributions of 7d. a week for men and 6d. for women must be seen to by the employer, who himself pays 3d. in each case towards the weekly sum. It is the duty of the employer to fix the stamp of the value of the joint contribution on the card on each occasion of payment of wages. Contributions are not paid in periods of sickness, nor do they count as arrears during such time; nor are they payable in cases of unemployment, although arrears in the latter case may affect the rate of benefit.

ON WHOM INSURANCE IS MADE COMPULSORY.

Practically all workers of either sex, between the ages of 16 and 70, whose wages do not amount to more than £100 a year, come in under the Act. There are special exceptions and exemptions, however, too numerous to be enumerated here, including soldiers, sailors, Government officials, and others.

HOW TO OBTAIN SICK PAY.

Members of approved societies should apply to the local secretary, and a certificate from the doctor must be sent to him. The sick pay of 10s. a week in the case of men and 7s. 6d. in the case of women is payable as from the third day after the illness begins. The insured person may go to or call in any doctor on the local panel list and ask to be treated. On accepting the insured person for treatment the doctor will sign the card, and the person will in future be counted as his patient. Where difficulty of any kind arises, the local Insurance Committee will deal with it. It amounts to this, that within the range of the panels, which in most cases offer an extensive list, there is a wide choice of doctors.

MEDICINE AND SURGICAL APPLIANCES.

When a doctor gives a prescription for an insured person, any chemist who has agreed to come on the Insurance List will make it up without charge, such list being put up in the local post offices. Nor is there anything to pay to the chemist for the medicine; that comes out of the Insurance funds. In the same way the insured person is entitled to such surgical appliances as the doctor may advise.

MATERNITY BENEFIT.

Every woman who is herself insured, and the wife of every insured man, is entitled to a payment of 30s. in respect of each confinement, provided that at least 26 weekly stamps have been put on the cards before the child is born. If both father and mother are insured under the Act, the mother is entitled to 7s. 6d. a week sickness pay as well as the 30s. This benefit is paid on application to the member's society, or, in the case of a deposit contributor, to the local Insurance Committee.

SANATORIUM BENEFIT.

Any insured person suffering from consumption can be treated either in a sanatorium or hospital; or the insured person may call at a dispensary from time to time for treatment, or be treated by a doctor in his or her own home. The local arrangements as to consumptive patients, however, will be under the control of the local Committee, and sufferers will be arranged for by them according to the provisions existing.

DEPOSIT CONTRIBUTORS.

Deposit contributors must apply to the local Insurance Committee when desiring to obtain sickness or maternity benefits, special forms being provided for this purpose. It must be borne in mind that deposit contributors can only claim benefit according to what the stamps on their cards entitle them; whereas those connected with approved societies have all the funds of their particular society against which to draw.

DISPUTES.

In the event of difficulty or dispute arising, the matter has to be settled according to the rules which apply by action in the county court. Where an insured person is unable to obtain his or her benefit by reason of the employer having neglected to affix the proper stamps, the employer may be proceeded against for recovery of the medical benefit which the insured person would otherwise receive.

ENGLISH MONEY AND ITS FOREIGN EQUIVALENTS.

Denominations.	United States Value.	French, Belgian, Swiss, Italian, and Greek Value.	German Value.

Farthing	0 0½	0 2½	0 2

French, Swiss, and Belgian *francs*, Greek *drachma*, and Italian *lire* possess the same value, and circulate within the countries named other than their own; with the exception of the Italian coin, which will not pass readily either in France, Switzerland, or Belgium. Spanish and Papai Silver is *below par*, though often found.

The above values are, of course, nominal, and a slight deviation from them in the way of money-changers' profit is to be expected.

Variant annual rates of salary may be worked out to their quarterly or other proportions with ease by employment of the figures here tabulated.

BRITISH WEIGHTS AND MEASURES.

Since January 1, 1826 there has been compulsory uniformity of Weights and Measures.

AVOIRDUPOIS WEIGHT.

27 11.32 grains	make 1 drachm=27 11.32 grains.
16 drams	" 1 ounce=437 1/4
16 ounces	" 1 pound (lb.)=7000 "
28 pounds	" 1 quarter (qr.).
4 quarters	" 1 hundredweight (cwt.).
20 cwt. (112 lbs. each)	" 1 ton (2240 lbs.)

This is the weight in common use in all ordinary trade dealings.

TROY WEIGHT.

4 grains	make 1 carat.
6 carats (or 24 grains).	" 1 pennyweight.
20 pennyweights	" 1 ounce.
12 ounces	" 1 pound.
25 pounds	" 1 quarter.
100 pounds	" 1 hundredweight.
20 hundredweights	" 1 ton of gold or silver.

The precious metals are weighed by this scale.

Gold plate, or any manufacture of gold, may be of any of the standards of 18, 15, 12, or 9 carats fine gold in every pound troy. The relative value of the carat of gold is 10 pennyweights.

APOTHECARIES' WEIGHT.

20 grains make 1 scruple.	8 drachms make 1 ounce.
3 scruples	" 1 drachm. 12 ounces " 1 pound.

The pound and ounce are the same as in troy weight. Medicines are compounded by this weight, but drugs are bought and sold by avoirdupois.

APOTHECARIES' LIQUID MEASURE.

60 minims make 1 drachm.	60 drops make 1 drachm.
8 drachms	" 1 ounce. 4 drms. " 1 tablespoonful.
20 ounces	" 1 pint. 2 ozs. " 1 wine-glassful.
8 pints	" 1 gallon. 3 ozs. " 1 teacupful.

There are 437 1/4 grains in a fluid ounce.

DRY MEASURE.

4 gills	make 1 pint.
2 pints	" 1 quart.
2 quarts (4 pints)	" 1 potle.
2 potles (4 quarts)	" 1 gallon.
2 gallons	" 1 peck.
4 pecks	" 1 bushel.
3 bushels	" 1 bag.
4 bushels	" 1 coomb.
5 bushels (or porter's load)	" 1 sack of flour.
8 bushels	" 1 quarter.
12 bags (36 bushels)	" 1 chaldron.
3 quarters (40 bushels)	" 1 wey or horse-load.
3 weys (120 quarters)	" 1 last.

WINE AND SPIRIT MEASURE.

4 gills	make 1 pint	=pt.
2 pints	" 1 quart	=qt.
4 quarts	" 1 gallon	=gal.
63 gallons	" 1 hogshead = hhd.	
84 gallons	" 1 puncheon = pun.	
2 hogsheads or 126 gallons	" 1 pipe or butt = pipe.	
4 hogsheads or 252 gallons	" 1 tun	=tun.

ALE, BEER, AND PORTER MEASURE.

4 gills	make 1 pint	=pt.
2 pints	" 1 quart	=qt.
4 quarts	" 1 gallon	=gal.
9 gallons	" 1 firkin	=fir.
2 firkins	" 1 kilderkin	=kild.
2 kilderkins	" 1 barrel	=bar.
3 kilderkins	" 1 hogshead	=hhd.
2 hogsheads	" 1 butt	=butt.
30 gallons	" 1 American barrel = Am. bar.	

SCOTCH LIQUID MEASURE.

4 gills	make 1 mutchkin.
2 mutchkins	" 1 choppin.
8 choppins	" 1 pint.

MISCELLANEOUS LIQUID MEASURES.

The Imperial Standard Gallon comprises 10 Imperial Standard Pounds weight of distilled water weighed in air, with water and air at the temperature of 62 deg. Fahrenheit, and the barometer at 30 inches.	
The measure of an Imperial Standard Gallon is 277.274 cubic inches.	
1 hogshead of Claret	46 gallons.
1 pipe of Sherry	108 "
1 pipe of Port	115 "
1 pipe of Madeira	92 "
1 pipe of Tenerife	100 "
1 pipe of Lisbon	117 "
1 pipe of Malaga	105 "
1 pipe of Cider	100 to 118 "
1 hogshead of Hock, Rhine, and Moselle	30 "
1 hogshead of Cape	92 "
1 hogshead of Tent	54 "
1 hogshead of Marsala Bronte	93 "
1 hogshead of Brandy	57 "
1 hogshead of Rum	54 to 60 "
1 puncheon of Scotch Whisky	112 to 120 "
1 puncheon of Brandy	100 to 110 "
1 puncheon of Rum	90 to 100 "
Quarter-cask of Brandy	28 "
American barrel of Beer	30 "
Pipe or butt	126 "
Tun of Wine	252 "

LINEAL MEASURE.

3 barleycorns	make 1 inch (in.).
12 inches	" 1 foot (ft.).
3 feet	" 1 yard (yd.).
5 1/2 yards	" 1 pole (po.), rod, perch.
4 poles, or 22 yards	" 1 chain.

MISCELLANEOUS MEASURES OF LENGTH.

1 Mile Geographical, Admiralty Knot, or Nautical Mile, 6,080 Feet = 1 1/16 Mile Statute.
League = 3 Miles.
Degree = 60 Geographical, or 69 1/2 Statute Miles.
Inch (lin.) = 72 Points, or 12 Lines.
Nail (1-16) = 2 1/2 Inches.
Palm = 3 Inches.
Hand = 4 Inches.
Link = 7 1/2 Inches.
Quarter (or a Span) = 9 Inches.
Foot = 12 Inches.
Cubit = 18 Inches.
Yard = 36 Inches.
Pace, Military = 2 Feet 6 Inches.
Pace, Geometrical = 5 Feet.
Fathom = 6 Feet.
Rod, Pole, or Perch = 16 1/2 Yards.
Chain (100 Links) = 22 Yards (4 Poles).
Cable's Length = 100 Fathoms, 600 Feet.
Furlong = 40 Rods, 220 Yards.
1 Mile = 8 Furlongs, 80 Chains, 320 Rods, 1,760 Yards, 5,280 Feet, 63,360 Inches.

The old *Scottish Mile* was 5,920 feet; ten *Scotts Miles* being about equal to 11 1/2 *Statute Miles*. Eleven *Irish Miles* were equal to 14 *Statute Miles*.

SQUARE, SURFACE, OR LAND MEASURE.

The square Foot contains 144 square inches.	
Yard = 9 feet = 1,296 inches.	
Rod, Pole, or Perch = 30 1/2 yards = 272 1/2 feet.	
Chain = 16 rods = 484 yards = 4,356 feet.	
Rood = 40 rods = 1,210 yards = 10,890 feet.	
Acre = 4 roods = 160 rods = 4,840 yards.	
Yard of Land = 30 acres = 120 roods.	
Mile = 100 acres = 400 roods.	
Mile = 640 acres = 2,560 rods = 6,400 chains = 102,400 rods, poles, or perches, or 3,072,000 square yards.	
An Acre roughly stated has four equal sides of 69 1/2 yards: accurate measurement gives each side 208 1/2 feet.	
The sides of a square half-acre would be 147 3/8 feet, and of a square quarter-acre, 104 3/5 feet.	

CUBIC OR SOLID MEASURE.

Cubic Foot = 1,728 Cubic Inches
Cubic Yard = 27 Cubic Feet, 21'033 Bushels.
Stack of Wood = 108 Cubic Feet.
Shipping Ton = 40 Cubic Feet merchandise.
Shipping Ton = 42 Cubic Feet of Timber.
Ton of Displacement of a Ship = 35 Cubic Feet.

MEASURES OF TIME.

60 Seconds = 1 Minute.
60 Minutes = 1 Hour.
24 Hours = 1 Day.
(24h. 56m. 4s. = 1 Sidereal Day.)
7 Days = 1 Week.
28 Days = 1 Lunar Month.
28, 29, 30, or 31 Days = 1 Calendar Month.
12 Calendar Months = 1 Year.
365 Days = 1 Common Year.
366 Days = 1 Leap Year.
365d. 5h. 48m. 46s. = 1 Tropical Year.

METRIC WEIGHTS AND MEASURES.

Linear Measure.

The unit for length is the metre.

	yds.	ft.	in.	
10 millimetres, or	0	0	0'3937	= 1 centimetre.
10 centimetres ..	0	0	3'9370	= 1 decimetre.
10 decimetres ..	1	0	3'3708	= 1 METRE.
10 metres ..	10	2	9'7079	= 1 decametre.
10 decametres ..	109	1	7'079	= 1 hectometre.
10 hectometres ..	1093	1	7'079	= 1 kilometre.

Surface, or Square Measure.

acres, sq. yds.

100 centiares, or 0 110'6033 = 1 A.R.E.
100 ares .. 2 226'3326 = 1 hectare.
A centiare measures 1'190033 sq. yard.

Solid Measure (Wood).

cu. ft.

10 centistères, or 3'3317 = 1 decistère.
10 decistères .. 35'317 = 1 stère.
A centistère measures 610'78 cubic inches.

Capacity.

The unit for capacity is the litre.
gals. qts. pints.

10 millilitres, or	0	0	0'176077	= { 1 centilitre or 10
10 centilitres ..	0	0	1'76077	= { cub. cent.
10 decilitres ..	0	1	7'6077	= { 1 decilitre, or
10 litres ..	2	1	7'6077	= { 100 cub. c.
10 decalitre ..	22	0	7'77	= { 1 litre or cub.
10 hectolitres ..	220	0	7'77	= { cent.
				= { 1 decalitre, or
				= { centistère.
				= { 1 hectolitre, or
				= { 1 kilolitre, or
				= { stère, or cubic
				= { metre.

A millilitre measures 1'00176 of a pint, or 1'0000275 of a bushel.

Weight.

The unit for weight is the gram.

lb. oz. drams.

10 milligrammes, or	0	0	0'0056438	= 1 centigramme.
10 centigrammes ..	0	0	0'056438	= 1 decigramme.
10 decigrammes ..	0	0	0'56438	= 1 gramme.
10 grammes ..	0	0	5'6438	= 1 decagramme.
decagrammes ..	0	5	6'438	= 1 hectogramme.
hectogrammes ..	2	3	4'38	= 1 kilogramme.

A milligramme measures 1'0543 of a grain.

ELECTRICAL MEASURES.

The chief units as generally accepted by electricians are as follows:—

Volt Electromotive force is equal to about 92½ per cent. of that given by one Daniell's battery cell.
Ohm Resistance equals the resistance offered to the passage of a current of electricity by a thread of mercury 106 cm. long and 1 mm. cross section at the temperature of melting ice.

Megohm Equals one million ohms.
Ampere Current equals the current 1 volt will drive through 1 ohm.
Coulomb Quantity equals 1 ampere flowing for 1 second of time.
Microfarad Capacity equals 1'000001 coulomb at 1 volt pressure.

Watt Power equals 44 ft. lbs. per minute.
Board of Trade Unit, officially defined as "the energy contained in a current of one thousand amperes flowing under an electromotive force of 1 volt during an hour."

Kilowatt equals one Board of Trade Unit. One Board of Trade Unit will keep a 16-candle incandescent lamp alight for about 16 hours.
746 Watts equals 1 horse-power.

HAY AND STRAW MEASURE.

Truss of Straw, 36 lbs. Truss of Old Hay, 56 lbs.
Truss of New Hay (to September 1st), 60 lbs.
Load, 36 Trusses—Straw, 11 cwt. 8 lbs.; Old Hay, 18 cwt.; New Hay, 19 cwt. 1 qr. 4 lbs.

WOOL WEIGHT.

Clove, *cl.* = 7 lbs.
Stone, *st.* = 7 Cloves 14 lbs.
Tol, *td.* = 2 Stones 1 qr.
Wey, *wy.* = 64 Tol 1 cwt. 2 qrs. 14 lbs.
Pack, *pk.* = 20 lbs.
Sack, *sk.* = 2 Weys 13 qrs.
Last, *la.* = 12 Sacks 39 cwt.

WORSTED YARN MEASURE.

Wrap, 80 yards; Hank, 560 yards = 7 Wraps. Counts are reckoned according to the number of hanks in a lb.

COTTON WOOL WEIGHT.

Cotton Wool, Bale variable; U.S.A. average 477 lbs.; Egyptian, 719 lbs.; East Indian, 396 lbs.; Brazilian, 220 lbs.

COTTON YARN AND SILK MEASURE.

Thread = 1½ yards.
Lea, or Skein = 120 yards.
Hank = 7 Skeins, or Leas.
Spindle = 18 Hanks.
Reels of Cotton vary from 30 to 1,760 yards, but the length must be correctly specified.

FISH MEASURE.

Herrings are sold by the *Cran*, containing 66½ imperial gallons except on the West Coast, Isle of Man, and in Ireland, where they are sold by the *Maas*, which contains 4 long hundreds of 125 each. On the East coast of England they are sold by the *Last*, which contains 13,200 fish. They are counted by the *Warp*, which is 4. 33 Warps = 1 Long Hundred, 132; 10 Hundred = 1 Thousand, 1,320; 10 Thousand = 1 Last, 13,200.

BREAD WEIGHT. lbs. oz. drs

1 peck loaf 17 6 2
1 half peck loaf 8 11 1
1 quarter loaf 4 5 8½
1 quarter (or quarter peck) of flour 3 8 0
Bakers are not allowed to sell bread by the peck or quarter. It is generally sold in 4 lb. and 2 lb. loaves (usually called quarter and half quarter loaves).

COAL WEIGHT.

14 lbs. 1 stone
28 lbs. 1 quarter
112 lbs. 1 cwt.
20 cwt. 1 ton
1 sack 1 cwt.
1 large sack 2 cwt.
21 tons 4 cwt. 1 barge or keel
20 keels (244 tons) 1 ship load
7 tons 1 room

GENERAL NUMBERS.

12 articles	1 dozen
12 dozen	1 gross
12 gross	1 great gross
12 articles	1 score
5 score	1 hundred
8 score	1 great hundred

MISCELLANEOUS WEIGHTS.

Almonds	12 to 14 cwt.
Beef	25 lbs.
Bristles	30 lbs.
Bullion	10 cwt.
Campbor	15 to 30 lbs.
Candles	1 cwt.
Cinnamon	120 lbs.
Cochineal	92½ lbs.
70,000 insects	1 lb.
Iron	140 lbs.
bag	200 lbs.
Cocoa	1 cwt.
bag	12 cwt.
Coffee	1 to 1½ cwt.
barrel or robin	5 to 7 cwt.
tie	2 to 3 cwt.
Currants	5 to 9 cwt.
barrel	15 to 20 cwt.
butt	1 cwt.
Feathers	24 lbs.
Figs	32 lbs.
frail (Turkey)	24 lbs.
frail (Faro)	32 lbs.
frail (Malaga)	25 lbs.
Galls	1 cwt.
Ginger	12 cwt.
bag (Barbadoes)	1 cwt.
bag (E. Indies)	1 cwt.
bag (Jamaica)	1 cwt.
Gum	4 cwt.
chest (Turkey)	4 cwt.

Gum Arabic	6 cwt.
Gunpowder	100 lbs.
barrel	24 barrels
last	12 lbs.
Honey	24 cwt.
gallon	24 cwt.
case	15 to 23 cwt.
Madder	1 cwt.
Magnesia	200 lbs.
Nutmegs	200 lbs.
Potash	1 to 3 cwt.
Prunes	20 cwt.
punchon	84 lbs.
Quicksilver	44 to 5 cwt.
bottle	24 cwt.
Rags	24 cwt.
bale (Mediterranean)	24 cwt.
bag (Hamburg)	24 cwt.
Raisins	24 cwt.
drum (Valencia)	1 cwt.
bag (Malaga)	22 lbs.
box	24 cwt.
Rice	24 cwt.
bag (E. Indies)	1 cwt.
bag (America)	1 cwt.
Sago	56 lbs.
bag	64 lbs.
Salt	256 lbs.
Soap	32 cwt.
firkin	1 to 1½ cwt.
barrel	13 to 18 cwt.
Sugar	1 to 1½ cwt.
bag (E. Indies)	10 to 14 cwt.
hoghead (W. Indies)	7 to 9 cwt.
mat or bag (Mauritius)	1 cwt.
tie (W. Indies)	1 cwt.
Tapioca	12 cwt.
barrel	80 lbs.
Tea	60 to 80 lbs.
chest (Congo)	84 lbs.
bag (Hyson)	4,000
bag (ordinary)	12 to 18 cwt.
Tiles	30 lbs.
Tobacco	1 cwt.
head	1 cwt.
Vermilion	1 cwt.
Walnuts	1 cwt.

PAPER.

Paper is sold by the ream (twenty quires), each ream consisting of from 480 to 500 sheets. In ordering paper it is necessary to give the size of the sheet and weight per ream, as well as the quality.

PRINTING PAPER.

Printing paper is made from wood pulp, treated by the sulphite process, the proportion being three to one. The sizes, with their names, are:—

Inches.	Inches.
Post 19½ × 15½	Super Royal 27½ × 30½
Demy 22½ × 17½	Double Crown 30 × 20
Sheet & Half Post 23½ × 19½	Imperial 30 × 22
Medium 24 × 19	Double Post 31½ × 19½
Royal 25 × 20	Double Demy 35 × 22½
Double Foolscap 27 × 17	Double Royal 40 × 25

(The weight varies, according to the thickness and quality of the paper, from 10 to 100 lbs.)

BOOK PAPER.

Book paper of the cheapest make resembles printing or news-paper, and is made of the same materials. It is used in the better qualities in an increasing proportion. It is made in white and various tints.

The following terms are used in the description of various papers:—

"S. & C." or sized and calendered. Sizing is a vegetable matter resembling resin, which is mixed with the wood pulp to make it impervious to ink. Other substances are used for "sizing," including china clay and gelatine, according to the quality of the paper. "Calendering" consists of passing the paper through hot revolving cylinders in close contact.

"S. & S.C." implies that the paper has been "sized" and "super-calendered." The latter is a second process, giving the paper a glossy finish.

"Enamelled" or "art" paper is that which has been coated on one or both sides with a mixture of China clay finely ground and mixed with gelatine.

"Antique" paper is of a high quality, which has not been calendered or enamelled.

The sizes are the same as in printing paper; but book paper is usually folded to the following sizes (edges uncut). The most common size is crown 8vo.

Inches.	Inches.
Demy 8vo 8½ × 5½	Demy 16mo 5½ × 3½
Post 8vo 7½ × 5	Imperial 24mo 5½ × 3½
Crown 8vo 7½ × 5	Foolscap 12mo 5½ × 3½
Demy 12mo 7½ × 4½	Royal 24mo 5½ × 3½
Foolscap 8vo 6½ × 4½	Demy 24mo 4½ × 3½
Demy 16mo 5½ × 3½	Crown 24mo 3½ × 2½

WRITING PAPER.

Cheap writing paper is made of wood pulp. The better classes of paper are made from selected rags, whilst high-class writing paper is made exclusively of linen, highly sized, and either "calendered" or "antique."

BRISTOL BOARD.

The uses of Bristol Board are numerous. It derives its name from the fact that it was first manufactured at that city, but the majority of large paper firms now produce it. The board is made in several sizes:—22 × 28, 18 × 28, and 25½ × 30½ ins. It can be obtained in almost any weight up to 160 lbs.

BROWN PAPER.

Used for wrapping; is made in a few stock sizes, of which the following are those most usually found:—

Casing 46 × 36	Imperial Cap 29 × 21
Double Imperial 45 × 29	Haven Cap 26 × 21
Elephant 34 × 24	Bag Cap 24 × 19½
Double Four Pound 31 × 21	Kent Cap 21 × 18

PSEUDONYMS UNDER WHICH WELL-KNOWN WRITERS AND OTHERS HAVE BEEN OR ARE KNOWN.

Achurch, Janet, Mrs. Charrington.
Adams, Mrs. Leith, Mrs. R. S. de C. Laifan.
Adams, Stephen, Michael Maybrick.
Adeler, Max, Charles Heber Clark.
Albani, Mdm., Mdm. Gye.
Alexander, Mrs., Mrs. Alexander Hector.
Allen, Mrs. Baker.
Allen, F. M., Edmund Downey.
Amateur, An, Pierce Egan the Younger.
Amateur Casual, James Greenwood.
Amyand, A., Captain E. Arthur Haggard.
Anderson, Mary, Mme. A. Navarro.
Ane of that ilk, Prof. W. E. Aytoun.
Angler, An, Sir Humphry David.
Ansted, Hope, Miss Burdett.
Anstey, F., Thomas Anstey Guthrie.
Ape (*Family Fair* caricatures), Carlo Pellegrini.
Arion, C. L., Chertsey.
Artist (Unknown), Joseph Pennell.
Ashwell, Lena, Mrs. Arthur Playfair.
Astor, Adelaide, Mrs. George Grossmith, Jun.
Atlas, Edmund Yates.
Aureole, Mrs. Berens.
Austin, Arthur, Prof. John Wilson.
Bab, W. S. Gilbert.
Baird, Dorothea, Mrs. H. B. Irving.
Banks, Archibald, Oswald Crawford.
Baron de Book Worms, H. W. Lucy in *Punch*.
Bede, Cuthbert, Rev. Edward Bradley.
Bell, Acton, Anne Brontë.
Bell, Currer, Charlotte Brontë.
Bell, Ellis, Emily J. Brontë.
Bell, Nancy, Mrs. A. Bell.
Belloc, M. A., Mrs. Lowndes.
Berwick, Mary, Adelaide Ann Proctor.
Bibliophile, Jacob, Paul Lacroix.
Bibliophile, Un, C. Uzanne.
Bickerdyke, John, C. H. Cook.
Biglow, Hosea, James Russell Lowell.
Billings, Josh, Henry Wheeler Shaw.
Bird, Isabella, Mrs. Bishop.
Blackburn, E. Owens, Mrs. Elizabeth Casey.
Blacksmith, The Learned, Elihu Burritt.
Bobbin, Tim, John Collier.
Bodkin, Tammas, W. D. Latta.
Boidewood, Rolf, T. A. Browne.
Bolina, Jack is, Augustus Victor Vecchi.
Bon Gaultier, Prof. W. E. Aytoun and Sir Theo. Martin.
Bouverie, Bartholomew, Rt. Hon. W. E. Gladstone, M.P.
Boz, Charles Dickens.
Braddon, Miss M. E., Mrs. Maxwell.
Brettmann, Hans, Charles G. Leland.
Brown, Tom, Thomas Hughes.
Brown, Tom, the Younger, Thomas Moore.
Browne, Matthew, W. B. Rands.
Bystander, The, Goldwin Smith.
Caliban, Jules Claretie, also M. Bergerat.
Callum Beg, J. C. O. Mac.
Cambridge, Ada, Mrs. George F. Cross.
Carroll, Lewis, Rev. C. Lutwidge Dodgson.
Caskoden, Edwin, Mr. Charles Mayor.
Chrystabel, Florence G. Attenborough.
Chudleigh, Arthur, Mr. Lillias.
C. K., Charles Kent.
Clare, Austin, Miss W. M. James.
Claribel, Mrs. Charles Barnard.
Clarinda, Mrs. MacLehose.
Clear, Claudius, Dr. Robertson Nicoll.
Cleave, Lucas, Mrs. Kingscote.
Cleishbottam, Jedediah, Sir Walter Scott.
Cobbleigh, Tom, Walter Raymond.
Collett, Stephen, T. Buryer.
Collingwood, Harry, W. J. C. Lancaster.

Collins, Mabel, Mrs. K. Cook.
Colman, R. W., James Hogg.
Colmore, George, Mrs. Gertrude Colmore Dunn.
Connor, Marie, Mrs. Robert Leighton.
Connor, Ralph, Rev. C. W. Gorlon.
Conway, H. Derwent, Henry W. Inglis.
Conway, Hugh, F. J. Fergus.
Coo-ee, W. Sylvester Walker.
Cordeux, Alfred, Honore de Balzac.
Cornwall, Barry, Bryan Waller Procter.
Cottonet, Alfred de Musset.
Country Parson, Rev. A. K. H. Boyd.
Craddock, C. E., Mary Nouilles Murfree.
Craig, Isa, Mrs. Knox.
Crawley, Capt., G. F. Parton.
Crayon, Christopher, J. Ewing Ritchie.
Crayon, Geoffrey, Washington Irving.
Cromarty, Doss, Mrs. Watson.
Crowfield, Christopher, Mrs. H. Beecher-Stowe.
Cruiser, Benedict, G. A. Sala.
Curate, A., Richard Rowe.
Cushing, Paul, Roland Wood-Seys.
Cynicus, Martin Anderson.
Dagonet, G. R. Sims.
Dale, Darley, Fanny M. Steele.
Danby, Frank, Mrs. Julia Frankau.
Dangerfield, John, Oswald Crawford, C.M.G.
Dart, Stephen, Adeline Sergeant.
Daryl, Sydney, Sir Douglas Straight.
Dean, Mrs. Andrew, Mrs. Alfred Sidgwick.
D'Anvers, N., Mrs. A. Bell.
D'Hardelot, Guy, Mrs. Rhodes.
Delta, David Macbeth Mon.
Democratic Tory, A., John Skelton.
Devereux, Roy, Mrs. Devereux Peimber.
Doctor Syntax, William Coombe.
Dods, Meg, Mrs. Johnstone.
Donovan, Dick, J. E. Muddock.
Dookey, Mr., E. P. Dunne.
Dowie, Menie Muriel, Mrs. E. A. Fitzgerald.
Downey, Edmund, F. M. Allen.
Druid, The, H. H. Dixon.
Duncan, Sarah Jeannette, Mrs. Everard Cotes.
Duran, Carolus, G. Auguste Emile Durand.
Egerton, George, Mrs. Egerton Clairmonte.
Eha, E. H. Atken.
Elbitt, Theodore, John Sterling.
Elia, Charles Lamb.
Ellot, George, Mrs. J. W. Cross, *nee* Marion Evans.
Ellot, Max, Mrs. Granville A. Ellis.
Emerald Isle, D. D. Hepburn.
Emery, Winifred, Mrs. Cyril Maude.
English Gentleman, An, Thos. Newte.
English Opium Eater, Thomas de Quincey.
Ennis, Graham, Mrs. Molesworth.
Ennuyée, Mrs. A. Jameson.
"Erskine Gower," Duchess of Sutherland.
Etchell, Mabel, Charlotte Phillips.
Etcher, An, Philip Gilbert Hamerton.
Ettrick Shepherd, James Hogg.
E. V. B., Hon. Mrs. Boscawen.
Ex-Trap, An, Frank Bellaw.
Fairleigh, Frank, Frank E. Smedley.
Falconer, Lanoe, Mrs. Mary Eliz. Hawker.
Fane, Violet, Lady Currie.
Farningham, Marianne, Mary Anne Hearn.
Fern, Fanny, Mrs. James Paston.
Field, Martyn, F. W. Horner.
Field, Michael, Miss Bradley and Miss Cooper.
Fieldmouse, Junon, W. B. Rands.
Filomena, Mrs. Fenwick Miller.
Fin-Bec, Blanchard Jerrold.
Fisher, Paul, A. W. Chatto.
Fitsvictor, John, Percy Bysshe Shelley.
Five of Clubs Richard A. Proctor.

Flaneur, The, Edmund Yates.
 Fleming, George, John C. Fletcher.
 Florry, J., Frank Kernan.
 Forbes, Athol, Rev. Forbes A. Phillips.
 Forrester, Frank, H. W. Herlieth.
 Forsyth, Jean, Jean W. Milwraith.
 Foucher, Paul, Victor Hugo.
 Foxcar, Nicolas, Rev. Francis Jacox.
 Francis, M. E., Mrs. Francis Blundell.
 Froissart, Jean, Alphonse Daudet.
 Garrett, Edward, Mrs. Isabella Fyvie Mayo.
 Gaultier, Bon, Sir Theodore Martin and W. E. Aytoun.
 Gerard, Dorothea, Mme. Longard de Longarde.
 Gerard, Emily D., Mme de Lazowski.
 Gerard, Morice, Rev. T. Jessop Teague.
 Gift, Theo, Theo. Boulger.
 Glyn, Elmor, Mrs. Clayton Glyn.
 Goodwell, Godek, Horace Greeley.
 Goolet, Paul, Chas. Lever.
 Gothamite, A., Colonel Thomas Picton.
 Graduate of Oxford, John Ruskin.
 Graham, Eunice, Mrs. Moleworth.
 Gray, Maxwell, Miss M. G. Tuttle.
 Great Tincianan Doctor, The, William Mitchell.
 Grey, Roland, Miss Brown.
 Grier, Sydney C., Miss Hilda Greig.
 Gubbins, Nathaniel, Edward Spencer Mort.
 Gushington, Angelina, Lady Duffern.
 Gushington, Impubia, Lady Duffern.
 Gyp, Comtesse de Martel.
 Hackle, Palmer, Robert Blakey.
 Hal, Dane, Haklane M'Fall.
 Haliburton, Hugh, James Logie Robertson.
 Halifax, Clifford, Dr. L. Beaumont.
 Hall, Owen, Mr. James Davis and Mr. H. H. Lusk.
 Hamilton, Gail, Mary Alison Dodge.
 Hamlet, Edith, Hon. Mrs. Alfred Lyttelton.
 Haunergaffersstein, Hans, Henry W. Longfellow.
 Harbst, Ophar, Ralph Thomas.
 Herbert, Lady, *née* Eliza a-Court.
 Hesba Stretton, Sarah Smith.
 Hewitt, Martin, Arthur Morrison.
 Hill, Heaton, F. Grangier.
 Historicus, Sir W. Vernon Harcourt, also George Grote.
 Hobbes, John Oliver, Mrs. Craque.
 Hoffman, Professor, Angelo Lewis.
 Holbeach, Henry, W. B. Rains.
 Holdreth, Lionel H., Percy Greg.
 Homely, Josias, John Bradford.
 Hookam, Bee, S. R. Wigram.
 Hope, Anthony, Anthony Hope Hawkins.
 Hope, Ascott R., N. Hope Moncreiff.
 Hope, F. T. L., Dr. Farrar.
 Hope, Graham, Jessie Hope.
 Hossup, H. M. Feist.
 Howart, Keble, Keble Bell.
 H. R. N., Captain J. T. Duane.
 Hughes, Annie, Mrs. Edmund Maurice.
 Hutton, C. M., Mrs. Mona Cuid.
 Hyacinthe, Pere, Charles J. M. Toyson.
 Ian MacLaren, Rev. John Watson.
 Iconoclast, Charles Bradlaugh, M. P.
 Ignatius, Father, Rev. J. L. Laine.
 Ignotus, James Franklin Fuller.
 Ik, Marvel, Donald Grant Mitchell.
 Impenitent, The, H. D. Lowry.
 Ingoldshy, Thomas, Rev. R. H. Barham.
 Iota, Mrs. Mammington Caffyn.
 Iron, Ralph, Olive Schreiner (Mrs. Cronwright).
 Isa, Craig, Mrs. John Knox.
 Jersey, Mr. Mrs. Langtry.
 Johnston, Edith, Mrs. Walter Ruding.
 Jules Verne, M. Olchewitz.
 Katharine Tynan, Mrs. H. A. Hinkson.
 Kaye, Eff, Mrs. Price, *née* Konstam.
 Kaye, Lorin, Lorin G. Lathrop, and Miss Konstam.
 Keith, Leslie, Miss G. I. Keith Johnston.
 Kendal, Mrs., Mrs. W. H. Grimston.
 King, Alice, Mrs. A. King Hamilton.
 Kipling, Alice M., Mrs. T. M. Fleming.
 Kirke, Edmund, James Roberts Gilmore.
 Knickerbocker, Washington Irving.
 Lafanque, Philip, Dr. Joseph Henry Philpot.
 Latouche, John, Oswald Crawford.

Laurence Slingsby, George Henry Lewis.
 Le Breton, John, Miss M. Harle-Potts and T. Murray Ford.
 Le Fanu, J. S., J. Sheridan.
 Lee, Holme, Harriet Parr.
 Lee, Vernon, Miss Violet Paget.
 Lehmann, Eliza, Mrs. Herbert Bedford.
 Leigh, Aston, Mrs. Diehl.
 Limer, Luke, Lord Leighton.
 Lewis, Angelo, Professor Hoffman.
 Lindsay, Harry, H. Lindsay Hudson.
 Lindsay, Mayne, Mrs. Clarke.
 Little, Thomas, Thomas Moore.
 Logroller, Richard Le Gallienne.
 London Antiquary, J. Camden Hotten.
 London, Clerk, A., Thomas Hughes, Q.C., M.P.
 Longway, Hugo A., Andrew Lang.
 Lord, M. L., Sydney Christian.
 Lothrop, Amy, Anna B. Warner.
 Loti, Pierre, Julien Viaud.
 Ludlow, Jolmy, Mrs. Henry Wood.
 Lumbard, Peter, Canon Beulian.
 Lusca, Sidney, Harry Harland.
 Lyall, Edna, Miss Ada Ellen Bayly.
 Lys, Christian, Percy J. Brebner.
 Maartens, Maarten, J. H. W. Van der Parren.
 McGrath, Terence, Sir Henry Arthur Bikes.
 McIntosh, Marjoe, Mrs. W. Graham Brown.
 Mackay, Marion, Marie Corilli.
 Mackenzie, Marian, Mrs. Smith Williams.
 McLaren, Ian, Rev. John Watson.
 MacNab, Frances, Miss Agnes Fraser.
 McQuill, Thursty, Wallace Bruce.
 Madge (in *Truth*), Mrs. C. E. Humphry.
 Maitland, Edward, Herbert Anshe.
 Maitland, Thomas, Robert Buchanan.
 Matlaw, John Wilson, William Watson.
 Malet, Lucas, Mary St. Leger Harrison.
 Man in the Row, Fred J. Ryner.
 Man of Kent, Dr. Robertson Nicoll.
 Marchant, Bessie, Mrs. J. A. Comfort.
 Mantelburgher, Pieter, Rev. T. Jackson.
 Market Gardener, A., R. D. Blackmore.
 Markham, Mrs., Mrs. C. P. Brown.
 Marlet, F. Henriette Eugenie, John.
 "Marquise," of *Truth*, C. E. Birmingham.
 Marry, at, Florence, Mrs. F. Lean.
 Mathers, Helen, Mrs. Reeves.
 Meade, L. T., Mrs. Toulmin Smith.
 Medium Teni Plum, Mostyn I. Piggott.
 Mercurius Rusticus, Dr. T. B. Duina.
 Meredith Owen, Lord E. R. Butler Lytton.
 Merlin (*The Examiner*), Lord Tennyson.
 Merriman, Henry Scott, H. S. Scott.
 Milford Earl, The, John Loftand.
 Miller, Joaquin, C. H. Miller.
 Mona, Maclean, Miss Todd.
 Montbard, G., Charles Auguste Loyes.
 Montgomery, Charles Montague, Sir T. Dick Lauder.
 Moore, Eva, Mrs. Henry Esmond. (Bart)
 More, Margarita, Miss Anne Muning.
 Morris, Peter, John Gibson Lockhart.
 Mortimer, Grace, Miss M. B. Stuart.
 Mulholland, Rosa, Lady Gilbert.
 Muloch, Dinah Maria, Mrs. Craik.
 Murphy, Dennis Jasper, Rev. Robert Charles Maturin.
 My Baronite, H. W. Lucy.
 Myrtle, Harriet, Mrs. Hugh Miller.
 Nancy Bell, N. d'Anvers.
 Nauticus, Owen Seaman.
 Neilson, Julia, Mrs. Fred Terry.
 Nerida, Miss Norman, Lady Hallé.
 Nesbit, E., Mrs. Hubert Bond.
 Nilsson, Mme. Christine, Countess Miranda.
 Nimrod, C. J. Apperley.
 North, Christopher, Prof. John Wilson.
 Nunquam, Robert Blatchford.
 Oates, Sergeant, J. B. Vawter.
 Ogilvy, Gavin, J. M. Barrie.
 O'Kara Family, J. and M. Banlin.
 O. K. (Olga Kireff), Madame de Novikoff.
 Old Skekarr, Major H. A. Leveson.
 Oldcastle, John, Wilfrid Meynell.
 Oldstyle, Jonathan, Washington Irving.

Oliver, Stephen, A. W. Chatto.
 One of the Crew, P. D. Haywood.
 One of the Family, Pierce Egan.
 Oram, Mona K., Mrs. Arthur Grenville.
 O'Reil, Max, Paul Blouet.
 Otter, H. J. Alfred.
 Ouida, Louise de la Ramée.
 Owen, J. A., Mrs. Owen Visger.
 Page, H. A., A. H. Japp.
 Pansy, Mrs. S. M. Alden.
 Paoli, Betty, Elizabeth Glick.
 Parley, Peter, William Martin.
 Paston, George, Miss E. M. Symonds.
 Pathfinder, H. C. Dean.
 Paul, Jean, Jean Paul F. Richter.
 Pauli, M. A., Mrs. John Ripley.
 Pawkie, James, John Galt.
 Pendennis, Arthur, W. M. Thackeray.
 Pendragon, Henry Sampson.
 Penn, Arthur, J. Brander Matthews.
 Penn, William, Jeremiah Everts.
 Peppercorn, Peter, M. D., Thomas Love Peacock.
 Percy, Keuben, Thomas Byerley.
 Percy Sholto, J. L. Robertson.
 Perier, Jules, Alfred Joseph Xavier.
 Periwinkle, Paul, Percy B. St. John.
 Persic, Peregrine, James Morier.
 Petroleum, V. Nasby, David Locke.
 Pfal, Hans, Edgar Allan Poe.
 Phelps, Eliza Stuart, Mrs. Herbert D. Ward.
 Phelps, Mrs. S. S., Frances J. B. Griswold.
 Philz, Hablot K. Browne.
 Physician, A. William Kitchener.
 Peter Pindar, John Wolcott.
 Plymley, Peter, Sydney Smith.
 Poet Wheelman, The S. Conant Foster.
 Pollex, D., and others, Wm. Allingham.
 Poor Richard, Benjamin Franklin.
 Porcupine Peter, William Cobbett.
 Prendergast, Paul, Douglas Jerrold.
 Prescott, E. L., Edith K. Spicer-Jay.
 Preston, George, Mrs. Nancy Hurston Banks.
 Prevost, Francis, H. F. Prevost-Batterby.
 Priggings, Peter, Rev. H. Hewlett.
 Prisoner in England, A. Charles Andrews.
 Prutchard, Martin J., Augustus Moore (Mrs.).
 Prout (Father), F. S. Mahony.
 Puck, John Proctor.
 Q., A. T. Quiller-Couch.
 Queen of the Dead Heads, Ida Pfeiffer.
 Query, Peter, Esq., Martin Farquhar Tupper.
 Quiz, Charles Dickens.
 Rae, Leonard, John Douglass.
 Rag, Tag, and Bobtail, J. C. Lees, D.D.
 Railway Reader, The, J. Spedding.
 Raymond, C. E., Elizabeth Robins.
 Raine, Allen, Mrs. Brynon Puddicombe.
 Raleigh, Cecil, Cecil Kewlands.
 Rumble, Robert, John Frost.
 Ramsbottom, Mrs., Theodore Hook.
 Ranger, The, Captain Black.
 Rapier, Alfred F. T. Watson.
 Reddie, Miss Sarah Tytler.
 Red Spinner, William Senior.
 Remus, Uncle, Joel Chandler Harris.
 Rip, Rowland Hill.
 Rita, Mrs. W. D. Humphreys.
 Rob Roy, John MacGregor.
 Roberts, Capt. A. C., Robert Pasha.
 Robinson, A. M., F. Mmo. Darneester.
 Rochester, Mark, Charles Kent.
 Rochford, Bernard, Aubyn Trevor-Battya.
 Rockwood, Thomas Dykes.
 Roe, Owen, Eugene Davis.
 Roslyn, Guy, Joshua Hatton.
 Ross, Adrian, Arthur Reed Ropes.
 Ross, Albert, Lynn B. Porter.

 Yorke, Oliver, Francis S. Mahony.
 Yorke, Stephen, Miss Linskill.
 Z. Z., Louis Zangwill.
 Zuck, Gwendoline Kents.
 Zadkiel, R. J. Morrison.
 Zeta, J. A. Froude.

SIGNATURES OF ENGLISH CHURCH BISHOPS.

Bishops of the Anglican Church sign thus, prefixing their baptismal name (or initials), as "Randall Cantuar" in the case of Dr. Davidson, and "A. F. London" in that of Dr. Winnington-Ingram. The signatures simply indicate (in most instances) Christian names, along with the Latin title of the see, surnames being ignored. Many Catholic bishops follow the example of the home prelates.

Canterbury, Arbp. *Randall Cantuar.*
 York, Arbp. *Cosmo Ebor.*
 London, Bp. *A. F. London.*
 Durham, Bp. *Handley Durolim.*
 Winchester, Bp. *Edw. Winton.*
 Bangor, Bp. *H. H. Bangor.*
 Bath and Wells, G. W. Bath & Wells.
 Birmingham, Bp. *Birmingham.*
 Bristol, Bp. *Bristol.*
 Carlisle, Bp. *C. H. Carlisle.*
 Chelmsford, Bp. *Chelmsford.*
 Chester, Bp. *F. J. Cest.*
 Chichester, Bp. *C. J. Linc.*

Elly, Bp. *Ely.*
 Exeter, Bp. *A. Exon.*
 Gloucester, Bp. *Edgar C. S. Gloucester.*
 Hereford, Bp. *Hereford.*
 Lichfield, Bp. *Lichfield.*
 Lincoln, Bp. *Lincoln.*
 Liverpool, Bp. *Liverpool.*
 Llandaff, Bp. *Llandaff.*
 Manchester, Bp. *Manchester.*
 Newcastle, Bp. *Newcastle.*
 Norwich, Bp. *Norwich.*
 Oxford, Bp. *C. Oxon.*
 Peterborough, Bp. *E. C. Peterburg.*
 Ripon, Bp. *Ripon.*

Rochester, Bp. *J. R. Koffen.*
 St. Albans, Bp. *Edgar Alban.*

 Salisbury, Bp. *F. F. Sarum.*
 Sheffield, Bp. *Sheffield.*
 Sodor & Man, Bp. *Sodor and Man.*
 Southwark, Bp. *Southwark.*
 Southwell, Bp. *Southwell.*
 Truro, Bp. *Wimfrid O. Truron.*
 Wakefield, Bp. *Wakefield.*
 Worcester, Bp. *Hughes Worcester.*

ABBREVIATIONS IN COMMON USE IN WRITTEN AND PRINTED MATTER.

Az.—First class (at Lloyd's).
 A.A.G.—Assistant Adjutant-General.
 A.A. and Q.M.G.—Assistant Adjutant and Quarter-master-General.
 A.B.—Able Seaman.
 A.B.—Bachelor of Arts.
 A.B.A.—Associate of the British Archaeological Association.
 Abp.—Archbishop.
 Ac.—Acre.
 A.C.—*Anno Christum* (before Christ).
 A.C.—acct. (account).
 A.C.A.—Associate of Chartered Accountants.
 Acad.—Academy.
 A.C.S.—Additional Curates' Society.
 A.D.—Anno Domini.
 A.D.C.—Aide-de-Camp.
 Ad eund.—*Ad eundem gradum* (admitted to the same degree).
 Ad fin.—*Ad finem* (to the end).
 Adj.—Adjutant.
 Ad. Lib.—*Ad libitum* (at discretion).
 Adm.—Admiral.
 Adv.—Advocate.
 Advt.—Advertisement.
 A.T.—*Aetat.*—*Aetatis* (aged).
 A.F.A.—Associate Faculty of Actuaries.

A.G.—Attorney-General.
 A.H.—*Anno Henrici* (the year of the Flight).
 A.I.A.—Associate Institute of Actuaries.
 A.K.C.—Associate King's College, London.
 Ala.—Alabama (U.S.).
 Alba.—Albion.
 A.L.S.—Associate of the Linnean Society.
 A.M.—*Anno Mundi* (Year of the World); *Anno Meridien* (before mid-day); Master of Arts (*Artium Magister*).
 A.M.I.C.E.—Associate Member of Institute of Civil Engineers.
 A.M.I.E.E.—Associate Member of Institute of Electrical Engineers.
 Anat.—Anatomy; Anatomical.
 Anon.—Anonymous.
 Ans.—Answer.
 A.O.D.—Ancient Order of Druids.
 A.O.F.—Ancient Order of Foresters.
 App.—Appendix.
 A.R.A.—Associate of the Royal Academy.
 A.R.A.M.—Associate of the Royal Academy of Music.
 A.R.C.E.—Academical Rank of Civil Engineers.
 A.R.C.O.—Associate of Royal College of Organists.
 A.R.I.B.A.—Associate of the Royal Institute of British Architects.
 Ark.—Arkansas (U.S.).

A.R.S.A.—Associate of Royal Scottish Academy.
A.R.W.S.—Associate of Royal Society of Water-
Colours.
A.S.—Anglo-Saxon.
A.S. Corps.—Army Service Corps.
Assoc. Sc.—Associate in Science.
Ass.—Assistant.
Ass.-Commis.-Gen.—Assistant-Commissary-General.
Ath.—Athabasca (Canada).
Atty. Gen.—Attorney-General.
A.U.C.—*Anno urbis condita*, "from the foundation of
the city" (Rome).
A.V.—Authorised Version.
Av.—Avenue.
Avoird.—Avoirdupois.
B.—Baron.
b.—born.
B.A.—Bachelor of Arts
Ball.—Balliol.
bar.—Barometer.
Barr.—Barrister.
Bart. or Bt.—Baronet.
Batt.—Battalion.
B.C.—Before Christ.
B.C.—British Columbia.

C.U.A.C.—Cambridge University Athletic Club.
C.U.B.C.—Cambridge University Boating Club.
C.U.C.C.—Cambridge University Cricket Club.
C.U.F.C.—Cambridge University Football Club.
Curr.—Current.
C.V.O.—Commander of the Royal Victorian Order.
Cwt.—Hundredweight.
D.—Duke; 500 (Roman numerals).
d.—Pence (Lat. *denarii*); also died; daughter.
D.A.G.—Deputy Assistant Adjutant-General.
D.A.G.—Deputy Adjutant-General.
D.C.—District of Columbia (U.S.).
D.C.L.—Doctor of Civil Law.
D.D.—Doctor of Divinity.
D.D.S.—Doctor of Dental Surgery.
deg.—Degree.
Del.—Delaware (U.S.).
del.—(L. *delinquent*), he drew.
Dele. or d.—Delete, cancel.
D.G.—(*Dei Gratia*), by the Grace of God; also
Dragon (united).
Dioc.—Diocese; Diocesan.
Dist. R.—(Metropolitan) District Railway.
Ditto or do.—The same.
D.L.—Deputy-Lieutenant.
D.L.I.—Durham Light Infantry.
D.Litt. or D.Lit.—Doctor of Literature.
Dol. or \$.—Dollar.
D.O.M.—Deo Optimo Maximo.
Dom.—Dominus.
Dow.—Dowager.
D.P.H.—Diploma in Public Health.
Dr.—Doctor, deltor.
dr.—Drachm.
Dr. Univ. Par.—Doctor of the University of Paris.
D.Sc.—Doctor of Science.
D.S.O.—Companion of the Distinguished Service Order.
D.Theol.—Doctor of Theology.
D.V.—(L. *Deo volente*), God willing.
D.V.H.—Doctor in Veterinary Hygiene.
D.V.Sc.—Doctor in Veterinary Science, Melbourne
University.
D.V.S.M.—Doctor in Veterinary State Medicine.
E.—East; Earl.
Eblan.—(Eblanensis) of Dublin.
Ebor.—(Eboracensis) of York.
E.C.—East Central (London postal district).
Ecc.—Ecclesiastical.
E.C.U.—English Church Union.
Ed.—Editor; Edition.
Edin.—Edinburgh.
E.E.—Early English.
e.g.—(L. *exempli gratia*), for example.
E.I.—East Indian.
Ency. Brit.—Encyclopedia Britannica.
Eng.—England.
eng.—Engineer.

Et al.—*Et alibi*, "and elsewhere."
 Etc., &c.—*Et cetera*, "and other things."
 Et seq.—and the following.
 E. & W.L.R.—East and West London Railway.
 f.—fathom; franc.
 F.A.—Football Association.
 Fahr.—Fahrenheit.
 F.A.I.—Fellow of the Auctioneers' Institute.
 F.A.S.—Fellow of the Antiquarian Society.

 leitmotif (Ger.), musical phrase denoting a certain person or idea, in an opera or oratorio.
 le jeu ne vaut pas la chandelle (Fr.), the game is not worth the candle.
 le style est l'homme même (Fr.), the style is the man himself [from Buffon].
 lettre de cachet (Fr.), a sealed letter.
 lever de rideau (Fr.), to raise the curtain.
 lex non scripta (L.), unwritten law.
 lex scripta (L.), statute law.
 lex talionis (L.), the law of revenge.
 licentia vatium (L.), poetic licence.
 litera scripta manet (L.), what is written down is permanent.
 locum tenens (L.), a deputy.
 locus penitentiae (L.), room for repentance.
 locus standi (L.), a right to interfere.
 lucri causâ (L.), for the sake of gain.
 lusus naturæ (L.), a freak of nature.
 magna est veritas et prævalebit (L.), truth is great and will prevail.
 magni nominis umbra (L.), the mere shadow of a mighty name.
 magnum bonum (L.), a great good.
 magnum opus (L.), a master work.
 maladie du pays (Fr.), home-sickness.
 malâ fide (L.), with bad faith.
 mal à propos (Fr.), ill-timed.
 mal de mer (Fr.), sea-sickness.
 malgré nous (Fr.), in spite of us.
 mandamus (L.), a command issued by a higher court to a lower.
 mariage de convenance (Fr.), marriage for convenience.
 materfamilias (L.), the mother of a family.
 materia medica (L.), medicines generally.
 matinée (Fr.), morning performance.
 matre pulchrâ filia pulchrior (L.), a daughter fairer than her fair mother.
 mauvaise honte (Fr.), bashfulness.
 mauvais sujet (Fr.), worthless fellow.
 meâ culpâ (Late Lat.), by my own fault.
 medio tutissimus ibis (L.), the middle course is safest.
 memento mori (L.), remember that you must die.
 memorabilia (L.), things to be remembered.
 mens sana in corpore sano (L.), a sound mind in a sound body.
 mens sibi conscia recti (L.), a mind conscious of rectitude.
 meo periculo (L.), at my own risk.
 misalliance (Fr.), marriage with one of lower station.
 meum et tuum (L.), mine and thine.
 mirabile dictu (L.), wonderful to relate.
 mirabile visu (L.), wonderful to see.
 mirabilia (L.), wonders.
 modus (L.), manner.
 modus operandi (L.), plan of working.
 modus vivendi (L.), a way of living or agreeing.
 more suo (L.), in his own way.
 motu proprio (L.), of his own accord.
 multum in parvo (L.), much in little.
 particeps criminis (L.), an accomplice.
 parvi componere magna (L.), to compare great things with small.
 pater patriæ (L.), the father of his country.
 per aspera ad astra (L.), to the stars by rough ways.
 per fas et nefas (L.), through right and wrong.
 personnel (Fr.), persons employed.
 pia desideria (L.), pious regrets.
 pia fraus (L.), pious fraud.
 pièce de résistance (Fr.), the substantial joint.
 pied-à-terre (Fr.), temporary lodging.
 pus aller (Fr.), the last shift.
 pleno jure (L.), with full authority.
 poeta nascitur, non fit (L.), the poet is born, not made.
 point d'appui (Fr.), point of support.
 populus vult decipi (L.), the people wish to be fooled.
 post mortem (L.), after death.
 post obitum (L.), after death.
 pour passer le temps (Fr.), to pass the time.
 pour pendre congé, or P.p.c. (Fr.), to take leave.

prescriptum (L.), a thing prescribed.
 preux chevalier (Fr.), a brave knight.
 primâ facie (L.), at the first glance.
 pro aris et focis (L.), for faith and home.
 profanum vulgus (L.), the rabble.
 pro pudor! (L.), oh, for shame!
 pro patriâ (L.), for our country.
 pro tanto (L.), for so much.
 pro tempore (L.), for the time being.
 pulvis et umbra sumus (L.), we are dust and a shadow.
 quære (L.), inquire.
 queritur (L.), the question is asked.
 qualis ab incepto (L.), as from the beginning.
 quantum mutatus ab illo! (L.), how much changed from what he was!
 quid rides? (L.), why do you laugh?
 quieti non movere (L.), let sleeping dogs lie.
 quis custodiet ipsos custodes? (L.), who will watch the watchers?
 qui s'excuse s'accuse (Fr.), he who excuses himself accuses himself.
 quis separabit? (L.), who shall separate?
 qui tacet consentit (L.), who is silent consents.
 quo va? (Fr.), where does there?
 quod avertit Deus? (L.), which may God avert?
 quod bonum, felix, faustumque sit (L.), may this be right, happy, and of good omen.
 quod erat demonstrandum (L.), or Q.E.D., which was to be demonstrated. [donec]
 quod erat faciendum (L.), or Q.E.F., which was to be done.
 quod hoc sibi vult? (L.), what does this mean?
 quod vide (L.), which see.
 quod jure? (L.), by what right.
 rara avis (L.), a rare bird, a prodigy.
 réchauffé (Fr.), warmed up again.
 reculer pour mieux sauter (Fr.), to draw back to take a better leap.
 redolet lucernâ (L.), it smells of the lamp.
 religio loci (L.), the religious spirit of the place.
 réponse, s'il vous plaît, or R.S.V.P. (Fr.), reply, if you please.
 requiescat in pace! or R.I.P. (L.), may he rest in peace!
 resque fiam (L.), look to the end.
 résumé (Fr.), an abstract.
 resurgam (L.), I shall rise again. [subject].
 reveillons nos moutons (Fr.), let us return to our ubique (L.), everywhere.
 ultima ratio regum (L.), the last argument of kings.
 ultima thule (L.), the utmost limit.
 ultra vires (L.), beyond one's powers.
 usque ad nauseam (L.), to disgust.
 utile dulci (L.), the useful with the pleasing.
 ut infra (L.), as below.
 ut supra (L.), as above.
 vade in pace (L.), go in peace.
 vade mecum (L.), a constant companion.
 vae victis! (L.), woe to the conquered!
 vale (L.), farewell.
 variae lectiones (L.), various readings.
 variorum notæ (L.), the notes of various authors.
 verbum sapienti sat est (L.), a word is enough for a wise man.
 veritas odium parit (L.), truth begets hatred.
 versus or v. (L.), against.
 via media (L.), a middle course.
 via trita, via tuta (L.), the beaten path is the safest.
 vice (L.), in the place of.
 vice versa (L.), the terms being exchanged.
 videlicet (L.), namely.
 vi et armis (L.), by force and arms; by main force.
 vigilate et orate (L.), watch and pray.
 virginibus puerisque (L.), for young people.
 vis comica (L.), comic power.
 vis inertiae (L.), passive resistance.
 vita brevis, ars longa (L.), life is short, art is long.
 vivat regina! (L.), long live the queen.
 vivat rex! (L.), long live the king!
 viva voce (L.), by the living voice.
 vive, vaeque! (L.), life and health to you!
 voilà tout (Fr.), that is all.
 volo, non valeo (L.), I am willing, but unable.
 vox et præterea nihil (L.), a voice and nothing else.
 vox populi, vox Dei (L.), the voice of the people is the voice of God.

EXPLANATION OF CORRECTIONS

- Line 1—Capital letters, not lower case.
 .. 2—Alter "a" to "e."
 .. 3—Insert comma.
 .. 4—Transpose "o" and "s."
 .. 5—Change to small (lower case) letter.
 .. 6—Full-point, not comma.
 .. 7—Change *diaks* to Roman letters; change to bolder type.
 .. 8—Let it stand.
 .. 9—Insert "l."
 .. 10—Commence new paragraph.
 .. 11—Alter to small capitals.
 .. 12—Change bad letter.
 .. 13—Delete "s."
 .. 14—Push down space between words.
 .. 15—Insert the word "rich."

- Line 17—Change full-point to semi-colon; *alter capital* "F" to lower case.
 .. 18—Insert quotation marks.
 .. 19—Straighten type.
 .. 20—Not new paragraph.
 .. 21—Turn letter.
 .. 22—Alter Roman to *italic* letters.
 .. 23—Delete commas, insert rules.
 Lines 23, 24, 25—Range lines at side
 Line 25—Change to accented letter.
 .. 26—Insert hyphen.
 .. 27—Equalise spacing between words.
 .. 28—Change wrong-fount letter; alter word "its" to "the."
 .. 29—Push down space.
 .. 30—Take out space and close up.

The following shows how the opposite page will read after the corrections have been made :—

THE frequent use of soap being absolutely indispensable it is important to obtain it free from noxious ingredients. Too often, however, the most poisonous adulterations are found in toilet soaps, causing numerous skin troubles, the origin of which is unsuspected. It is with the fullest confidence that the proprietors of **Pears' Transparent Soap** recommend their manufacture to the notice of those not already acquainted with its long-established merits.

This soap, which has enjoyed the HIGHEST REPUTATION amongst the aristocracy since its invention in 1789, is prepared solely from the purest materials, and undergoes a refining process, by which all excess of alkaline matter is expelled, and a beautiful transparency imparted to it; whilst its rich amber colour is acquired by age only, without the addition of any foreign matter; for its delightful fragrance "and beautiful" appearance, it commends itself as the greatest luxury of the toilet. No medicinal properties are claimed for Pears' Transparent Soap, but *the* above-mentioned special characteristics—together with its absolute purity—have obtained for it testimonials of the highest order (which may be seen at their Dépôt). The recommendation of the following eminent authorities, amongst numerous others, is sufficient guarantee for the excellence of the soap.

As there are numerous imitations of Pears' Transparent Soap, it is necessary to obtain it of a

THE UNION JACK.

The present Union Jack is composed of three heraldic crosses, viz., the cross of St. Andrew, forming the blue and white basis; upon which lies the red and white cross of St. Patrick; and upon the whole rests the red and white cross of St. George, dividing the flag vertically and horizontally. The original Union Jack combined only the St. George and St. Andrew crosses, and was adopted on the accession of James VI. of Scotland to the throne of England under the title of James I. in 1603. No further alteration was made in the flag until January 1st, 1801, when the Irish Parliament was dissolved and the Act of Union came into force.

MOTOR-CAR SPEED PROHIBITION AND CAUTION SIGNS

FROM THE ROYAL AUTOMOBILE CLUB YEAR BOOK

The following are the signs employed on highways:—

1. For 10 miles or lower limit of speed, a white ring, 18in. in diameter, with plate below giving the limit in figures.

Example:

2. For prohibition, a solid red disc, 18in. diameter.

Example:

3. For caution (dangerous corners, cross roads, or precipitous places) a hollow red equilateral triangle, 18in. sides.

Example:

4. All other notices under the Act to be on diamond-shaped boards.

Example:

The above signs are placed on the near side of the road facing the driver, with their lower edges not less than 8 ft. from the ground, and about 50 yards from the spot to which they apply.

MOTOR-CAR INDEX MARKS ALPHABETICALLY ARRANGED.

The following is a list, alphabetically arranged, of the index marks allotted to the County and Borough Councils of Great Britain and Ireland by the Local Government Board.

It will facilitate the reading of the marks still further if automobilists bear in mind that all the marks containing an "S" belong to Scotland, and those containing an "I" to Ireland. With the exception of the six County Boroughs denoted in the list, all the Irish marks are those of counties.

Notts. 11	Lancashire. 6	Gloucestershire 3	Warwickshire 1
Yorkshire. 9	Kent 4	Middlesex 2	Derbyshire 1
Surrey 9			

In 1873 Notts and Gloucester tied, and in 1870, 1882, and 1899 Notts and Lancashire tied.

ENGLAND v. AUSTRALIA TEST MATCHES.

From 1877 to 1912 inclusive fourteen representative English cricket teams have visited Australia, and played in all 52 test matches there against Australian teams. Of these England won 23, lost 27, and 2 were drawn. Lillywhite's was the first team to go out, in 1877; Lord Harris's followed in 1879; Shaw's in 1881-1882; the Hon. T. Bligh's in 1882-1883; Shaw's again in 1884-1885, and also in 1887; a combined English team in 1888; Lord Sheffield's team in 1892; A. E. Stoddart's in 1894-1895, and again in 1897-1898; MacLaren's in 1901-1902; Warner's (M.C.C.) in 1901-1904; A. O. Jones's (M.C.C.) in 1907-1908, and Warner's (M.C.C.) in 1911-1912. Thirteen visits have been paid to England by Australian teams, accounting for 42 test matches, of which England has won 17 and lost 8, while 17 have been drawn. The years of these test matches were 1880, 1882, 1884, 1886, 1888, 1890, 1893, 1896, 1899, 1902, 1905, 1909, and 1911.

SUMMARY.

In Australia: 52 matches. England won 23, Australia won 27, drawn 2
In England: 42 matches. England won 17, Australia won 8, drawn 17
Total: 94 matches. England won 40, Australia won 35, drawn 19

TRIANGULAR TOURNAMENT, 1912.

RESULT OF MATCHES.

England won 1; Australia won 0; drawn 2.	England won 3; South Africa won 0; drawn 0.
Australia won 2; South Africa won 0, drawn 1	

ETON AND HARROW MATCHES.

Instituted 1805. Played 88 matches. Harrow won 35, Eton 35, drawn 18.

1914	Mrs. Lambert Chambers.

* Holder did not defend title.

YACHTING.**AMERICA CUP.**

The first race for the Royal Yacht Squadron Cup, now known as the America Cup, was sailed on Aug. 29, 1851, the course being round the Isle of Wight. Fifteen vessels started, including the American schooner *America*, which completely out sailed the British yachts, with the result that the trophy went to the New York Yacht Club, where it still remains, in spite of the repeated efforts which have since been made by British yachtsmen to recover it. There have been sixteen contests in all since 1851, and all on American waters, but not until nineteen years after the first race was the challenge taken up again on this side. Canada competed in 1876, and again in 1881, but with no better result; nor did Scotland's attempt in 1887 meet with any better fate. The more recent endeavours to wrest the Cup from America's keeping have been those of Sir Thomas Lipton, who in 1899, 1901, and 1903 made gallant but vain efforts to out sail the American yachts. He is again a challenger for 1914.

1909 Corporal H. C. Burr, London R.B.
1910 Corporal F. K. Radice, Oxford University.
1911 Private W. J. Clifton, Canada.
1912 Private A. G. Fulton, Queen's Westminsters.
1913 Private W. Hawkins, Canada.
1914 Sergeant J. L. Dewar, 4th Royal Scots.

"NATIONAL" CHALLENGE TROPHY.

(Instituted 1864.)

Open to one team of 20 Volunteers from England, Scotland, Ireland and Wales respectively. Service Rifle.

Highest possible score, 2,100

	Scores
1910 Scotland	1,844
1911 England	1,800
1912 England	1,882
1913 England	1,821
1914 Scotland	1,910

	Scores
1905 England	1,924
1906 Scotland	1,860
1907 England	1,974
1908 Scotland	1,944
1909 England	1,801

* Highest Score.

	Scores
1910 Scotland	1,671
1911 England	1,873
1912 England	1,866
1913 England	1,906
1914 England	1,932

ELCHO SHIELD. (Instituted 1862).

Open to one team of eight from England, Scotland, Ireland, and Wales respectively. Match Rifle.

Highest possible score, 1,800.

Contests to 1914: 52. England won 27; Ireland 14; Scotland 10; Wales has never competed. The winners since 1900 have been:—

	Scores
1900 Ireland	1,537
1901 England	1,500
1902 England	1,587
1903 Ireland	1,553
1904 England	1,570

	Scores
1905 Scotland	1,677
1906 England	1,658
1907 Ireland	1,634
1908 Declared void	—
1909 England	1,717

	Scores
1910 England	1,678
1911 England	1,644
1912 England	1,687
1913 Scotland	1,732
1914 Scotland	1,612

THE ST. GEORGE'S CHALLENGE VASE (Founded 1862).

1880 Corporal King, and Wiltshire.
1881 Sergeant Heiton, and Renfrew.
1882 Lieutenant Stevens, 13th Middlesex.
1883 Private Wilson, 13th Middlesex.
1884 Private Osborne, 1st Warwick.
1885 Private Fergusson, and Perthshire.
1886 Private G. Marr, 1st Cheshire.
1887 Lieutenant Hole, and Somerset.
1888 Sergeant Ford, and South Staffordshire.
1889 Sergeant Lawson, 1st Lanark.
1890 Captain Gibbs, Gloucester Engineers.
1891 Corporal Ritchie, and Renfrew.
1892 Private Gray, 1st Norfolk.

Useful Terms for China Collectors.

CHINA.—A modern descriptive term applied to pottery which is made semi-transparent by adding bone to the other materials used in its manufacture.

PORCELAIN.—Semi-transparent pottery made from natural clays, no bone being used. For example:—Chinese, Dresden, Limoges, &c.

LUSTRE WARE.—Pottery decorated with gold, silver, or copper.

BISCUIT.—The first stage of china after being fired. It is white and porous, and ready for decoration.

IRONSTONE CHINA, SEMI-PORCELAIN, SILICON CHINA, &c.—Trade terms applied to fine qualities of earthenware.

EARTHENWARE.—A descriptive term to distinguish opaque pottery from china, stoneware, terra-cotta, &c.

ON-GLAZE.—Decoration on the ware, after it has been glazed.

UNDER-GLAZE.—Decoration on the ware when it is in biscuit state.

THE LONDON

1697 to June 1730.
June 1730 to 1756.

1756 to 1784.

1784 to 1821.

LIQUOR DEALERS', TOBACCO, MOTOR SPIRIT AND OTHER LICENCES AND DUTIES INCLUDED IN THE FINANCE BILL, 1909-10.

The figures below are those applying to the ante-war period. In present changing conditions we refrain from giving later figures which may be superseded any day.

LIQUOR MANUFACTURERS' LICENCES.

Brewer of Beer for sale: according to quantity brewed in preceding year, viz., not exceeding 100 barrels, £1; exceeding 100, £1 for the first 100, and 12s. for every further 50.
 Distiller of Spirits: not exceeding 50,000 gallons, £10; exceeding 50,000, £10 for the first 50,000, and £10 for every further 25,000.

Rectifier of Spirits	£ s. d.
Sweets (including Brit. Wine), Maker of	15 15 0
	5 5 0

LIQUOR DEALERS' (WHOLESALE) LICENCES.

Beer	£ s. d.
Spirits	10 10 0
Sweets	15 15 0
Wine	5 5 0
	10 10 0

LIQUOR RETAILERS' ON-LICENCES.

Beer (Beer-house Licence): a Duty equal to a third of the annual value of the premises, subject to a minimum of from £3 10s to £2 10s, according to population of district. There is an option to pay in proportion to the annual "compensation value" in certain cases of large beer-houses and "seasonal" hotels.

Cider: from £2 5s where annual value is under £30, up to £6 where it is £100 or over.

Spirits (Publican's Licence): a Duty equal to half the annual value of the premises, subject to a minimum of from £5 to £35 according to population of district. There is an option to pay in proportion to the annual "compensation value" in certain cases of large public-houses and "seasonal" hotels.

(Hotels and Restaurants): duty to be charged according to proportion that receipts from intoxicating liquors bear to total receipts, or optionally, 25 per cent. of the "annual licence value"; subject in either case to a minimum charge.

(Clubs): an Excise Duty of 6d. in the £ on their purchases of intoxicating liquors, but no Licence Duty.

(Theatres, Music Halls and Refreshment Rooms): The Bill has special provisions.

Sweets: the same scale as for Cider.

Wine: from £4 10s. where annual value is under £30, up to £12 where it is £100 or over.

LIQUOR RETAILERS' OFF-LICENCES.

Beer: from £1 10s. where annual value does not exceed £10, up to £10 where it exceeds £500.

Cider: from £10 (annual value not exceeding £500) up to £50 (annual value exceeding £500).

Spirits: from £10 (annual value not exceeding £500) up to £50 (annual value exceeding £500).

Sweets: from £2 10s. (annual value not exceeding £500) up to £10 (annual value exceeding £500).

OTHER LIQUOR LICENCES.

Passenger Vessel: £10 (annual); £2 (one day).
 Railway Restaurant Car: £1 0 0
 Occasional Licences: 10s. per day (5s. if for beer and wine only)

Motor Spirit, manufactured in U.K. the gallon £0 0 3
 Duty repayable to persons using otherwise than for motive power for motor cars, and half duty repayable when used for trade cars or hackney carriages, or by a medical man for professional purposes.

Motor Spirit Manufacturer, annual licence £1 0 0
 Dealer 0 5 0

(One pint at a time may be sold without a licence.)

Spirits, made in U.K.: 3s. 9d. additional,

making total duty . . . per proof gallon £0 14 9

Tobacco, grown in Ireland (from April 30, 1909), or

grown in England or Scotland (from Jan. 1, 1910):

Manufactured in bond per lb. £ s. d.

Unmanufactured, if containing 10 per cent. 0 4 8

moisture per lb. 0 3 6

Less than 10 per cent. moisture . . . 0 3 12

Tobacco Growers, Cultivators or Curers,

England and Scotland, annual licence . . 0 5 0

RECEIPTS.

Receipts for the payment of £2 or upwards . . . 1d.

(Persons receiving the money to pay the duty.)

Penalty for giving a receipt liable to duty not duly

stamped, £10.

Letters acknowledging the safe arrival of Bills of Exchange, etc., and other securities for money, are no longer exempt from the Stamp Act, but must have a stamp affixed.

HOUSE DUTY.

On inhabited houses, occupied as farm-house, in the £

public-house, coffee-shop, shop, or

lodging-house, of the annual value of £20,

and not exceeding £40 0 0 2

Exceeding £40, and not exceeding £60 . . . 0 0 4

60 0 0 6

Other houses of the annual value of £20, and

not exceeding £40 0 0 3

Exceeding £40, and not exceeding £60 . . . 0 0 9

60 0 0 9

LETTERS PATENT.

(For Inventions)

On application for provisional protection . . £1 0 0

On filing complete specification . . . 3 0 0

Upon application for certificate of renewal, before

the expiration of the 4th year and in respect of the 5th

year, £5; 6th year, £6; 7th year, £7; 8th year, £8;

9th year, £9; 10th year, £10; 11th year, £11; 12th

year, £12; 13th year, £13; 14th year, £14.

Every Patent is granted for the term of 14 years from

the date of application, subject to the payment,

before the expiration of the 4th and each succeeding

year during the term of the Patent, of fees as above,

and of other small fees prescribed by the Treasury and

the Board of Trade from time to time. The patentee

may pay the whole or any portion of the aggregate of

such prescribed annual fees in advance. Formerly

the fees were much higher than the above.

REGISTRATION OF BIRTHS, MARRIAGES AND DEATHS.

An infant must be registered within 42 days after its birth. No fee is payable; but after six weeks the registration must take place in the presence of the Superintendent Registrar, when—besides liability to a penalty for neglect—a fee is chargeable.

In Scotland every child has to be registered within 21 days after its birth.—A marriage must be registered within three days after the occurrence.—A death must be registered within eight days after the demise

THE FRENCH METRICAL SYSTEM.

The above diagram illustrates the method of calculation adopted in working out the French Metrical System, which is based on the assumed length of the distance from the Equator to the North Pole. The 10,000,000th part of this distance is adopted as the unit of length and called a *metre*, and all other measurements are derived from this unit. Thus, the cube of the tenth part of the metre is the unit of capacity, called a *litre*, and the weight of a millilitre of water at a temperature of 4° Centigr. or 39 1/5 Fahr. is the unit of weight called a *gramme*. The unit of land measurement is 100 sq. metres, called an *are*. The multiples in Greek are:—

	100	1,000	10,000
	<i>hecto.</i>	<i>kilo</i>	<i>myria.</i>
10th		100th	1,000th
<i>deci</i>		<i>centi</i>	<i>milli</i>

EQUIVALENTS OF METRIC WEIGHTS AND MEASURES IN TERMS OF IMPERIAL WEIGHTS AND MEASURES FOR USE IN TRADE.

METRIC TO IMPERIAL.

LINEAR MEASURE.

1 millimetre (mm.) (1-1000th m.)	=	0.03937 inch.
1 centimr. (1-100th m.)	=	0.3937 "
1 decimetre (1-10th m.)	=	3.937 inches.
1 METRE (m.)	=	{ 39.370113 INCHES.

1 gramme (1 grm.)	=	{ 0.0375 drachm.
		{ 0.7716 scruple.
		{ 15.432 grains.

IMPERIAL TO METRIC.

LINEAR MEASURE.

1 inch	= 25.400 millimetres.
1 foot (12 inches)	= 0.3048 metre.
1 YARD (3 feet)	= 0.914387 METRE.
1 fathom (6 feet)	= 1.8288 metres.
1 pole (54 yards)	= 50.929 "
1 chain (100 yards)	= 201.168 "
1 furlong (220 yards)	= 201.168 "
1 mile (8 furlongs)	= 1.6093 kilometres.

SQUARE MEASURE.

1 square inch	= 6.4516 sq. centimetres.
1 square foot (144 sq. inches)	= 9.2903 sq. decimetres.
1 square yard (9 sq. feet)	= 0.836126 sq. metre.
1 perch (304 sq. yards)	= 25.293 sq. metres.
1 rood (40 perches)	= 10.117 ares.
1 acre (4,840 square yards)	= 0.40468 hectare.
1 square mile (640 acres)	= 259.00 hectares.

CUBIC MEASURE.

1 cubic inch	= 16.387 cub. centimetres.
1 cubic foot (1728 cubic inches)	= 0.028317 cubic metre.
1 cubic yard (27 cubic feet)	= 0.764553 " "

MEASURES OF CAPACITY.

1 gill	= 1.42 decilitres.
1 pint (4 gills)	= 0.568 litre.
1 quart (2 pints)	= 1.136 litres.
1 GALLON (4 quarts)	= 4.545963 LITRES.
1 peck (2 gallons)	= 9.092 litres.
1 bushel (8 gallons)	= 3.637 dekalitres.
1 quarter (8 bushels)	= 2.909 hectolitres.

APOTHECARIES MEASURE.

1 minim	= 0.059 millilitre.
1 fluid scruple	= 1.284 millilitres.
1 fluid drachm (60 minims)	= 3.552 "
1 fluid ounce (8 drachms)	= 28.4133 centilitres.
1 pint	= 0.568 litre.
1 GALLON (8 pints or 160 fluid ounces)	= 4.545963 litres.

AVOIRDUPOIS WEIGHT.

1 grain	= 0.0648 gramme.
1 dram	= 1.772 grammes.
1 ounce (16 drachms)	= 28.350 "
1 POUND (16 ozs. or 7,000 grains)	= 0.45359243 KILOGRAM.
1 stone (14 lb.)	= 6.350 kilograms.
1 quarter (28 lb.)	= 12.70 "
1 hundredweight (cwt.) (112 lb.)	= 50.80 "
1 ton (20 cwt.)	= 1.0160 tonnes or 1.016 kilograms.

TROY WEIGHT.

1 grain	= 0.0648 gramme.
1 pennyweight (24 grains)	= 1.5552 grammes.
1 troy ounce (20 pennyweights)	= 31.1035 "
1 troy pound (12 oz.)	= 373.2430 "

APOTHECARIES WEIGHT.

1 grain	= 0.0648 gramme.
1 scruple (20 grains)	= 1.360 grammes.
1 drachm (3 scruples)	= 3.888 "
1 oz. (8 drachms)	= 31.1035 "

NOTE.—One litre equals 1,000 cubic centimetres, and one millilitre equals one cubic centimetre.

WATCH AND TIME REGULATIONS ON SHIPS.

A ship's crew is mustered in two divisions: the Starboard (right side, looking forward) and the Port (left). The day commences at noon, and is thus divided:—

Afternoon Watch	noon to 4 p.m.
First Dog	4 p.m. to 6 p.m.
Second Dog	6 p.m. to 8 p.m.
First	8 p.m. to midnight.
Middle	12 a.m. to 4 a.m.
Morning	4 a.m. to 8 a.m.
Forenoon	8 a.m. to noon.

This makes seven WATCHES, which the crew keep alternately, the *Watch* which is on duty in the forenoon one day having the afternoon next day, and the men who have only four hours' rest one night have eight hours' the next. This is the reason for *Dog Watches*, which are made by dividing the hours between 4 p.m. and 8 p.m. into two *Watches*.

Time is kept by means of "Bells." Two strokes of the clapper at the interval of a second, then an interval

of two seconds, then two more strokes with a second's interval apart, then a rest of two seconds, thus:—
BELL, ONE SECOND; B., TWO SECS.; B. S.; B. S.

1 Bell is struck at 12.30, and again at 4.30, 6.30, 8.30 p.m.; 12.30, 4.30, and 8.30 a.m.
2 Bells at 1 (struck with an interval of a second between each—B. S., B.), the same again at 5, 7, and 9 p.m., 1, 3, and 5 a.m.
3 Bells at 1.30 (B. S., B. S., B.), 5.30, 7.30, and 9.30 p.m.; 1.30, 5.30, and 9.30 a.m.
4 Bells at 2 (B. S., B. S., B. S., B.), 6 and 10 p.m.; 2, 6, and 10 a.m.
5 Bells at 2.30 (B. S., B. S., B. S., B. S., B.) and 10.30 p.m.; 2.30, 6.30, and 10.30 a.m.
6 Bells at 3 (B. S., B. S., B. S., B. S., B. S., B.) and 11 p.m.; 3, 7, and 11 a.m.
7 Bells at 3.30 (B. S., B. S., B. S., B. S., B. S., B. S., B.) and 11.30 p.m.; 3.30, 7.30, and 11.30 p.m.
8 Bells (B. S., B. S., B. S., B. S., B. S., B. S., B. S., B.) every 4 hours, at noon, at 4 p.m., 8 p.m., midnight, 4 a.m., and 8 a.m.

PEARS' COMPLETE GAZETTEER.

Pears' Gazetteer of the World

In this section are set forth the names and brief descriptions of the principal countries, states, cities, towns, seas, mountains, rivers, lakes and other geographical features of the world, together with notes of the chief historical and other events connected with those places, and the latest statistical information, based upon the most recent census returns. It will be found to include many places which have only come into prominence in recent years by the changeful course of events. Brevity is a necessity of the compilation, but so far as the facts stated go they may be depended on for accuracy.

For this edition the Census figures of 1911 are inserted as far as regards the chief places in the United Kingdom.

THE ABBREVIATIONS ADOPTED ARE AS UNDER:

agr. = agriculture.
alt. = altitude.
bor. = borough.
C. = cape.
c. = city.
cap. = capital.
co. = county.
dep. = department.
dist. = district.
div. = division.
E. = east.

ft. = feet.
G. = gulf.
isl. = island.
L. = lake.
m. = miles.
mfg. = manufacturing.
mkt. = market.
mtn. = mountain.
N. = north.
N.S.W. = New South Wales.
p. = population.

par. = parish.
parly. = parliamentary.
prov. = province.
R. = river.
ry. stn. = railway station.
S. = south.
spl. = square.
sq. m. = square miles.
t. = town.
vil. = village.
W. = west.

Aa, the name given to numerous small streams in Germany, Switzerland, France, Russia, and Holland.

Aach, *t.* Baden, *p.* 950.

Aachen, (See Aix-la-Chapelle.)

Aadorf, *t.* Switzerland, *p.* 2,500.

Aafjord, *t.* Trondhjem, *dist.* Norway, *p.* 3,800.

Aagard, *vil.* in N. Jutland, N. Denmark, *p.* 1,500.

Aakirkeby, *t.* on *vil.* of Bornholm, Denmark, *p.* 974.

Aal, *t.* on R. Ustedal, Norway, *p.* 4,000. [31,457.

Aalborg, *c.* and *spt.* in Jutland, *prov.* Denmark, *p.* 1.

Aalbu, *min.* near in Wurttemberg, S.W. Germany.

Aalen, walled *t.* in Wurttemberg, *p.* 7,500. [11,672.

Aalesund, *spt.* Norway, centre of herring fishery.

Aalsmeer, *vil.* nr. Amsterdam, *p.* 4,500.

Aalten, *vil.* Netherlands, *prov.* Gelderland, *p.* 6,800.

Aalum, *vil.* Jutland *prov.* Denmark, fine Norman church.

Aar, *R.* in Switzerland, flows through the Brentz and Thun lakes, and thence into the Rhine.

Aarau, *t.* Switzerland, *cap.* canton Aargau, *p.* 7,824.

Aarburg, *t.* on K. Aar, *p.* 2,100. [many, *p.* 1,500.

Aarce, *isl.* on Little Belt, off Hadersleben, N. Ger-

Aardenburg, *t.* *prov.* Zealand, Netherlands, *p.* 1,812.

Aargau, canton in N. Switzerland, *area*, 512 sq. m.; has extensive vineyards, *p.* 200,408.

Aarhus, *c.* and principal *spt.* on E. coast of Jutland, Denmark; famous Gothic cathedral, *p.* 51,814.

Aarlanderveen, *t.* in S. Holland, *p.* 3,000.

Aaril, *prov.* Arabia, containing Riadh city, *cap.* of the country, *p.* (of prov.) 110,000. [1, 2,500.

Aarmühle, health resort, canton Bern, Switzerland.

Aba, *t.* in Hungary, *p.* 3,000.

Abach, *t.* nr. Ratisbon, in Bavaria, on the Danube, *p.* 2,800.

Abaco, Great and Little, two of the Bahama Islands, the greater *isl.* (sometimes called Lucaya) has an area of 1,600 sq. m.; Little Abaco, lying to the N.W., is 28 miles long.

Abad, *vil.* on R. Theiss, Hungary, *p.* 2,700.

Abadeh, *t.* in Persia, *p.* 4,500. [1, and R. in Abyssinia.

Abai, *t.* and *harbour* on N.W. coast of Borneo; also

Abate, *R.* in Brazil, flowing in R. San Francisco.

Abakan, *R.* in Siberia, affluent of the Yenisei, from the Altai mtns.; also a fortified town on the R., *p.* 4,100.

Abalak, *t.* id.

Abancay, *t.* and *prov.* in Peru, in the silver mine dis., *p.* 6,500.

Abanill, fortified *t.* in N.E. Spain, *p.* 6,100.

Abano, *t.* in N. Italy, *prov.* Padua, sulphur waters and mud baths, *p.* 4,750.

Abar, *mtns.* in Assam, N.E. India.

Abari, *R.* in British Guiana [p. 50,000.

Abasia, *prov.* of Circassia, on E. coast of Black Sea,

Abatamagomaw, *L.* in N.W. Territory, Canada.

Abatsho, *t.* on R. Benue, W. Africa, *p.* 1,500.

Abazai, fortified *vil.* N.W. Ind. *p.* on Swat R.

Abb, *t.* in Yemen, Arabia, *p.* 5,500.

Abba Yared, *mtn.* in Abyssinia, one of the Samen range, 14,918 ft. high.

Abbadia San Salvatore, *t.* in N. Italy, *p.* 3,500.

Abbazia, *t.* and health resort on the Gulf of Fiume, Austria, *p.* 2,343.
